Search

Search by members name

Member	Email	ASSIGNMENT TYPE	EXPIRATION
Admin1	Admin1@M365x901434.onmicrosoft.com	Permanent	-
Admin2	Admin2@M365x901434.onmicrosoft.com	Eligible	-

What should you do to meet the security requirements?

- A. Change the Assignment Type for Admin2 to Permanent
- B. From the Azure Active Directory admin center, assign the Exchange administrator role to Admin2
- C. From the Azure Active Directory admin center, remove the Exchange administrator role to Admin1
- D. Change the Assignment Type for Admin1 to Eligible

Answer: D

NEW QUESTION 2

You need to recommend a solution to protect the sign-ins of Admin1 and Admin2. What should you include in the recommendation?

- A. a device compliance policy
- B. an access review
- C. a user risk policy
- D. a sign-in risk policy

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/howto-user-risk-policy>

NEW QUESTION 3

You need to recommend a solution that meets the technical and security requirements for sharing data with the partners. What should you include in the recommendation? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Create an access review.
- B. Assign the Global administrator role to User1.
- C. Assign the Guest inviter role to User1.
- D. Modify the External collaboration settings in the Azure Active Directory admin center.

Answer: AC

NEW QUESTION 4

HOTSPOT

You are evaluating which finance department users will be prompted for Azure MFA credentials. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
A finance department user who has an IP address from the Montreal office will be prompted for Azure MFA credentials.	<input type="radio"/>	<input type="radio"/>
A finance department user who works from home and who has an IP address of 193.77.140.140 will be prompted for Azure MFA credentials.	<input type="radio"/>	<input type="radio"/>
A finance department user who has an IP address from the New York office will be prompted for Azure MFA credentials.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
A finance department user who has an IP address from the Montreal office will be prompted for Azure MFA credentials.	<input type="radio"/>	<input checked="" type="radio"/>
A finance department user who works from home and who has an IP address of 193.77.140.140 will be prompted for Azure MFA credentials.	<input checked="" type="radio"/>	<input type="radio"/>
A finance department user who has an IP address from the New York office will be prompted for Azure MFA credentials.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 5

Which user passwords will User2 be prevented from resetting?

- A. User6 and User7
- B. User4 and User6
- C. User4 only
- D. User7 and User8
- E. User8 only

Answer: C

NEW QUESTION 6

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Compliance Manager Contributor
User2	Compliance Manager Assessor
User3	Compliance Manager Administrator
User4	Portal Admin

You discover that all the users in the subscription can access Compliance Manager reports. The Compliance Manager Reader role is not assigned to any users.

You need to recommend a solution to prevent a user named User5 from accessing the Compliance Manager reports.

Solution: You recommend modifying the licenses assigned to User5. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Case Study: 4 Mix Questions

NEW QUESTION 7

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that is associated to a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

You use Active Directory Federation Services (AD FS) to federate on-premises Active Directory and the tenant. Azure AD Connect has the following settings:

- Source Anchor: objectGUID
- Password Hash Synchronization: Disabled
- Password writeback: Disabled
- Directory extension attribute sync: Disabled
- Azure AD app and attribute filtering: Disabled
- Exchange hybrid deployment: Disabled
- User writeback: Disabled

You need to ensure that you can use leaked credentials detection in Azure AD Identity Protection.

Solution: You modify the Source Anchor settings.

Does that meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 8

You have a Microsoft 365 subscription.

You need to ensure that all users who are assigned the Exchange administrator role have multi-factor authentication (MFA) enabled by default.

What should you use to achieve the goal?

- A. Security & Compliance permissions
- B. Microsoft Azure Active Directory (Azure AD) Privileged Identity Management

- C. Microsoft Azure AD group management
- D. Microsoft Office 365 user management

Answer: B

NEW QUESTION 9

Your company has a Microsoft 365 subscription.

The company forbids users to enroll personal devices in mobile device management (MDM). Users in the sales department have personal iOS devices.

You need to ensure that the sales department users can use the Microsoft Power BI app from iOS devices to access the Power BI data in your tenant.

The users must be prevented from backing up the app's data to iCloud. What should you create?

- A. a conditional access policy in Microsoft Azure Active Directory (Azure AD) that has a device state condition
- B. an app protection policy in Microsoft Intune
- C. a conditional access policy in Microsoft Azure Active Directory (Azure AD) that has a client apps condition
- D. a device compliance policy in Microsoft Intune

Answer: B

NEW QUESTION 10

You have a Microsoft 365 E5 subscription.

You implement Advanced Threat Protection (ATP) safe attachments policies for all users.

User reports that email messages containing attachments take longer than expected to be received. You need to reduce the amount of time it takes to receive email messages that contain attachments. The solution must ensure that all attachments are scanned for malware. Attachments that have malware must be blocked.

What should you do from ATP?

- A. Set the action to Block
- B. Add an exception
- C. Add a condition
- D. Set the action to Dynamic Delivery

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/dynamic-delivery-and-previewing>

NEW QUESTION 10

You have a Microsoft 365 tenant.

You have 500 computers that run Windows 10.

You plan to monitor the computers by using Windows Defender Advanced Threat Protection (Windows Defender ATP) after the computers are enrolled in Microsoft Intune.

You need to ensure that the computers connect to Windows Defender ATP. How should you prepare Intune for Windows Defender ATP?

- A. Configure an enrollment restriction
- B. Create a device configuration profile
- C. Create a conditional access policy
- D. Create a Windows Autopilot deployment profile

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/advanced-threat-protection>

NEW QUESTION 12

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant. You create a label named CompanyConfidential in Microsoft Azure Information Protection.

You add CompanyConfidential to a global policy.

A user protects an email message by using CompanyConfidential and sends the label to several external recipients. The external recipients report that they cannot open the email message.

You need to ensure that the external recipients can open protected email messages sent to them. Solution: You modify the encryption settings of the label.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 16

HOTSPOT

You have a Microsoft 365 subscription.

You identify the following data loss prevention (DLP) requirements:

- Send notifications to users if they attempt to send attachments that contain EU social security numbers
- Prevent any email messages that contain credit card numbers from being sent outside your organization
- Block the external sharing of Microsoft OneDrive content that contains EU passport numbers

•Send administrators email alerts if any rule matches occur.
What is the minimum number of DLP policies and rules you must create to meet the requirements? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Policies:

1	v
2	
3	

Rules:

1	v
2	
3	
4	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Policies:

NEW QUESTION 21
HOTSPOT
You have a Microsoft 365 subscription.
You are creating a retention policy named Retention1 as shown in the following exhibit.

Decide if you want to retain content, delete it, or both

Do you want to retain content?

☒ Yes, I want to retain it

For this long... 2 years

Retain the content based on when it was last modified

Do you want us to delete it after this time?

☒ Yes

☐ No

☐ No, just delete content that's older than

1 years

Need more options?

☐ Use advanced retention settings

Back

Next

Cancel

You apply Retention1 to SharePoint sites and OneDrive accounts.
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

If a user creates a file in a Microsoft SharePoint library on January 1, 2019, and modifies the file every six months, the file will be [answer choice].

retained	▼
deleted on January 1, 2021	
deleted on July 1, 2021	

If a user creates a file in Microsoft OneDrive on January 1, 2019, modifies the file on March 1, 2019, and deletes the file on May 1, 2019, the user [answer choice].

cannot recover the file	▼
can recover the file until January 1, 2020	
can recover the file until March 1, 2020	
can recover the file until May 1, 2020	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

If a user creates a file in a Microsoft SharePoint library on January 1, 2019, and modifies the file every six months, the file will be [answer choice].

retained	▼
deleted on January 1, 2021	
deleted on July 1, 2021	

If a user creates a file in Microsoft OneDrive on January 1, 2019, modifies the file on March 1, 2019, and deletes the file on May 1, 2019, the user [answer choice].

cannot recover the file	▼
can recover the file until January 1, 2020	
can recover the file until March 1, 2020	
can recover the file until May 1, 2020	

NEW QUESTION 24

Your company has a main office and a Microsoft 365 subscription.

You need to enforce Microsoft Azure Multi-Factor Authentication (MFA) by using conditional access for all users who are NOT physically present in the office.

What should you include in the configuration?

- A. a user risk policy
- B. a sign-in risk policy
- C. a named location in Azure Active Directory (Azure AD)
- D. an Azure MFA Server

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

NEW QUESTION 27

You have a Microsoft 365 Enterprise E5 subscription.

You use Windows Defender Advanced Threat Protection (Windows Defender ATP).

You need to integrate Microsoft Office 365 Threat Intelligence and Windows Defender ATP. Where should you configure the integration?

- A. From the Microsoft 365 admin center, select Settings, and then select Services & add-ins.
- B. From the Security & Compliance admin center, select Threat management, and then select Explorer.
- C. From the Microsoft 365 admin center, select Reports, and then select Security & Compliance.
- D. From the Security & Compliance admin center, select Threat management and then select Threat tracker.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/integrate-office-365-ti-with-wdatp>

NEW QUESTION 28

You have a Microsoft 365 subscription that uses a default domain name of fabrikam.com. You create a safe links policy, as shown in the following exhibit.

Safe links policy for your organization

Settings that apply to content across Office 365

When users click a blocked URL, they're redirected to a web page that explains why the URL is blocked.
Block the following URLs:

Settings that apply to content except email

These settings don't apply to email messages. If you want to apply them for email, create a safe links policy for email recipients.

Use safe links in:

- ☒ Office 356 ProPlus, Office for iOS and Android
- ☒ Office Online of above applications

For the locations selected above:

- ☒ Do not track when users click safe links:
- ☒ Do not let users click through safe links to original URL:

Which URL can a user safely access from Microsoft Word Online?

- A. fabrikam.phishing.fabrikam.com
- B. malware.fabrikam.com
- C. fabrikam.contoso.com
- D. www.malware.fabrikam.com

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-a-custom-blocked-urls-list- wti h-atp>

NEW QUESTION 33

You have a Microsoft 365 subscription.

You create a retention policy and apply the policy to Exchange Online mailboxes.

You need to ensure that the retention policy tags can be assigned to mailbox items as soon as possible.

What should you do?

- A. From Exchange Online PowerShell, run Start-RetentionAutoTagLearning
- B. From Exchange Online PowerShell, run Start-ManagedFolderAssistant
- C. From the Security & Compliance admin center, create a data loss prevention (DLP) policy
- D. From the Security & Compliance admin center, create a label policy

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/labels>

NEW QUESTION 34

You have a hybrid Microsoft Exchange Server organization. All users have Microsoft 365 E5 licenses. You plan to implement an Advanced Threat Protection (ATP) anti-phishing policy. You need to enable mailbox intelligence for all users. What should you do first?

- A. Configure attribute filtering in Microsoft Azure Active Directory Connect (Azure AD Connect).
- B. Purchase the ATP add-on.
- C. Select Directory extension attribute sync in Microsoft Azure Active Directory Connect (Azure AD Connect).
- D. Migrate the on-premises mailboxes to Exchange Online.

Answer: B

NEW QUESTION 35

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an on-premises Active Directory domain named contoso.com.

You install and run Azure AD Connect on a server named Server1 that runs Windows Server. You need to view Azure AD Connect events. You use the Directory Service event log on Server1. Does that meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

<https://support.pingidentity.com/s/article/PingOne-How-to-troubleshoot-an-AD-Connect-Instance>

NEW QUESTION 40

Your network contains an on-premises Active Directory domain. The domain contains servers that run Windows Server and have advanced auditing enabled.

The security logs of the servers are collected by using a third-party SIEM solution.

You purchase a Microsoft 365 subscription and plan to deploy Azure Advanced Threat Protection (ATP) by using standalone sensors.

You need to ensure that you can detect when sensitive groups are modified and when malicious services are created.

What should you do?

- A. Configure Event Forwarding on the domain controllers
- B. Configure auditing in the Office 365 Security & Compliance center.
- C. Turn on Delayed updates for the Azure ATP sensors.
- D. Enable the Audit account management Group Policy setting for the servers.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/configure-event-forwarding>
