Server1	Paris	contoso.com	10.1.1.1
Server2	New York	None	10.2.2.2

All the client computers in the New York office use Server2 as the DNS server.
You need to configure name resolution in the New York office to meet the following requirements:

» Ensure that the client computers in New York can resolve names from contoso.com.
»

   Ensure that Server2 forwards all DNS queries for internet hosts to 131. 107.100.200. The solution must NOT require modifications to Server1.
Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. a forwarder
B. a conditional forwarder
C. a delegation
D. a secondary zone
E. a reverse lookup zone

Answer: AB

Explanation:
A conditional forwarder is required for contoso.com. A forwarder is required for all other domains.
When you have a conditional forwarder and a forwarder configured, the conditional forwarder will be used for the specified domain.
You could use a secondary zone for contoso.com but that would require a configuration change on Server1.
