

# Microsoft

## Exam Questions PL-200

Microsoft Power Platform Functional Consultant

**NEW QUESTION 1**

- (Exam Topic 1)

You need to design the resort portal's email registration process. Which solution should you use?

- A. Default the invitation code from the email upon logging into the portal
- B. Auto-populate the invitation code field on the sign in screen from the email link
- C. Embed the invitation code in the email link URL
- D. Send the customer their username and temporary password in the email link

**Answer: C**

**Explanation:**

Scenario: Guests must receive a separate email to verify proof of ownership for their registration. Note: You can setup redeem an invitation code for power apps portal.

Reference:

<https://cardesouza.com/how-to-setup-redeem-an-invitation-code-for-power-apps-portal/>

**NEW QUESTION 2**

- (Exam Topic 1)

You need to design the guest check-in solution.

Which technologies should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

You need to design the guest check-in solution.

**Answer Area**

Requirement	Technology
Develop the base check-in solution.	<ul style="list-style-type: none"> <li>Xamarin app</li> <li>Power Apps portal</li> <li>Model-driven app</li> <li>Canvas app</li> </ul>
Access the check-in solution on the check-in devices.	
Access the check-in solution on the check-in devices.	<ul style="list-style-type: none"> <li>Traditional desktop application</li> <li>Web browser</li> <li>Power Apps mobile app</li> <li>Dynamics 365 for phones and tablets</li> </ul>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Canvas app,

Power Apps mobile app

<https://docs.microsoft.com/en-us/power-apps/maker/canvas-apps/offline-apps>

**NEW QUESTION 3**

- (Exam Topic 2)

You need to implement the requirement for the VP of sales. What should you do?

- A. Use a test account with a base security role with QV security added.
- B. Add the System Administrator security role to your user account.
- C. Use a test account with only QV security added.
- D. Add QV security to your user account.

**Answer: A**

**Explanation:**

A VP of sales requires a test environment to demonstrate to potential clients the security policies that are included in their initial offering.

Currently, testing the new QV functionality outside the development environment is not possible due to corporate security policies requiring the same security role across all environments.

Note: One of the security best practices in Dynamics 365 is to use the base security role as a baseline and apply that role to all Users. The base security role will include all the common/basic permissions that are required to have access to the system.

To set up the base security role for the first time

- > create a new empty security role.
- > add the minimum privileges required to access the system.
- > add the privileges required for the basic functionalities.
- > test the role with the test user account.
- > add the permissions to the entities that all users can access (e.g. reference data).

Reference: <https://linzawwin.blogspot.com/2020/07/minimum-privileges-required-to-log-in.html>

**NEW QUESTION 4**

- (Exam Topic 2)

You need to address the executive's concerns regarding unnecessary data access. Which security changes should you make? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

**Concern** – Unnecessary user access to client data during verification

**Security Measure** –

Assign records to the user doing the verification and change table security to basic.

Assign records to a service account and share the record with the team member doing the verification.

Assign records to a service account and add the team member doing the verification by using an access team.

**Concern** – Unnecessary user access to client data after the request is completed

**Security Measure** –

Assign records to the QV team when the service request is completed.

Assign records to a service account when the service request is completed.

Assign records to the team member doing the verification when the service request is completed.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Assign records to a service account and add the team member doing the verification by using an access team.

When to use access teams

- \* The teams are dynamically formed and dissolved. This typically happens if the clear criteria for defining the teams, such as established territory, product, or volume aren't provided.
- \* The team members require different access rights on the records. You can share a record with several access teams, each team providing different access rights on the record. For example, one team is granted the Read access right on the account and another team, the Read, Write and Share access rights on the same account.
- \* A unique set of users requires access to a single record without having an ownership of the record. Box 2: Assign records to the QV team when the service request is completed.

Issues: More employees than are required can access individual client information and continue to have access after a service request is completed.

Management has decided to create a new qualification verification (QV) role to help ensure that clients get the most accurate results. This role examines completed work to ensure that nothing is missed.

- When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

Reference:

<https://docs.microsoft.com/en-us/power-apps/developer/data-platform/use-access-teams-owner-teams-collaborat>

**NEW QUESTION 5**

- (Exam Topic 2)

You need to add the missing components to the Verification Process Automation solution. Which two components should you add? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Service Request statuscode field
- B. Dataverse connection reference
- C. Qualification statuscode field
- D. On-premises data gateway reference
- E. Outlook connection reference

**Answer:** CE

**Explanation:**

C: A service request can have one or more Qualification records associated with it. E: The new process for completing a service request must automate the following:

- Set the Service Request record status to Complete when work on all Qualification records is finished.
- Send an email to the client with the results when the service request is completed. The email must list each qualification as either Valid or Not Valid, depending on the verification.

**NEW QUESTION 6**

- (Exam Topic 2)

You need to resolve the issue reported by substitute employees after they are assigned service requests. How should you configure the system? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

## Aspect Configuration

Relationship	<div style="border: 1px solid gray; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;">Service Request 1:N Qualification</div> <div style="padding: 2px;">Service Request N:N Qualification</div> <div style="padding: 2px;">Service Request N:1 Qualification</div> </div>
Cascading rule	<div style="border: 1px solid gray; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;">Restrict</div> <div style="padding: 2px;">Cascade All</div> <div style="padding: 2px;">Cascade None</div> </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Service Request 1:N Qualification

When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.

Box 2: Cascade All

Cascade All - Perform the action on all referencing table records associated with the referenced table record. Reference:

<https://docs.microsoft.com/en-us/power-apps/developer/data-platform/configure-entity-relationship-cascading-b>

**NEW QUESTION 7**

- (Exam Topic 2)

You create a desktop flow to interact with a certification authority's website. You need to get data in and out of the desktop flow.

How should you set up the input and output parameters? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Parameter direction	Configuration
Inbound	<div style="border: 1px solid gray; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;">Copy and paste qualification data into the desktop flow.</div> <div style="padding: 2px;">Run a cloud flow from the Dataverse qualification record to send data to the desktop flow.</div> <div style="padding: 2px;">Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data.</div> </div>
Outbound	<div style="border: 1px solid gray; padding: 2px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;">Copy and paste the verification data into the qualification record.</div> <div style="padding: 2px;">Send data from the desktop flow to a cloud flow to update the qualification record.</div> <div style="padding: 2px;">Connect by using the Dataverse connector from the desktop flow and the qualification record</div> </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Connect by using the Dataverse connector from the desktop flow and retrieve the qualification data. All information sent by clients for services is stored in Microsoft Dataverse with a model-driven app as the interface.

Qualification verification

The qualification table contains details about an individual school degree, professional qualifications, and other qualifications that must be verified.

A service request can have one or more Qualification records associated with it.

Record status is pending verification until the initial team member finishes, at which point the member changes the status to Complete.

When all qualification records related to a service request are verified either by manual or automated processes, the results are made available to ADatum Corporation's client.

In the rare event that results are questioned, a new service request is created and verified independently of the previous work that took place.

Box 2: Send data from the desktop flow to a cloud flow to update the qualification record. To complete a service request, users perform the following actions:

Send a templated email by using Microsoft Outlook to the client after all qualifications for a service request are checked.

Change the service request status to Completed. Currently, service requests do not indicate when all Qualification records are addressed.

**NEW QUESTION 8**

- (Exam Topic 3)

You are a Dynamics 365 Customer Service system administrator.

Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where

should you create the view?

- A. Microsoft Excel template
- B. Entities component of a solution
- C. Microsoft Virtual Studio
- D. Templates area

**Answer: B**

**Explanation:**

Entity: Refers to a table in Dataverse. Table and entity are often used interchangeably for data access. Edit public views through tables

- > Expand Data, select Tables, select the table you want, and then select the Views area.
- > On the toolbar, select Add view. Add view to table
- > On the Create a view dialog, enter a name and, optionally, a description, and then select Create. Reference: <https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-edit-views-app-designer>

**NEW QUESTION 9**

- (Exam Topic 3)

A company plans to implement chatbots by using Power Virtual Agents. The company has the following requirements for the bots:

- Users in the accounting department must be able to create a bot for frequently asked questions.
- The support desk users must be able to use the bot.

The users must not be able to change environment parameters in the Microsoft Power Platform environment. You need to configure the permissions for the bots. Which actions should you implement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Requirement	Action
Users can create a bot.	<input type="checkbox"/> Assign users the Maker permissions. <input type="checkbox"/> Assign users to a security role. <input checked="" type="checkbox"/> Share the bot with a security group. <input checked="" type="checkbox"/> Assign users the Maker permissions. <input type="checkbox"/> Assign users the System Administrator role.
Support desk users can use the bot.	<input checked="" type="checkbox"/> Share the bot with a security group. <input type="checkbox"/> Assign users to a security role. <input checked="" type="checkbox"/> Share the bot with a security group. <input type="checkbox"/> Assign users the Maker permissions. <input type="checkbox"/> Assign users the System Administrator role.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

Requirement	Action
Users can create a bot.	<input type="checkbox"/> Assign users the Maker permissions. <input type="checkbox"/> Assign users to a security role. <input checked="" type="checkbox"/> Share the bot with a security group. <input checked="" type="checkbox"/> Assign users the Maker permissions. <input type="checkbox"/> Assign users the System Administrator role.
Support desk users can use the bot.	<input checked="" type="checkbox"/> Share the bot with a security group. <input type="checkbox"/> Assign users to a security role. <input checked="" type="checkbox"/> Share the bot with a security group. <input type="checkbox"/> Assign users the Maker permissions. <input type="checkbox"/> Assign users the System Administrator role.

**NEW QUESTION 10**

- (Exam Topic 3)

You are a consultant. A client asks you to remove several solutions in one of their Microsoft Dataverse environments

The client wants to know what effect removing the solutions will have on the rest of the system. You need to explain the results of removing the solutions.

Which components be affected? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Solution description**

**Component or components removed**

An unmanaged solution contains a custom table. The table is in a parent-child relationship with another table.

The solution only.  
 The solution and the lookup column.  
 The solution, the table, and any data in the table.

A managed solution patch contains an update to a column label. The column is used in several forms and views.

The solution and the updated column label.  
 The solution, the column, and any data in the column.  
 The solution, the table, and the updated column label.

A managed solution that was created by an independent solution provider (ISV) contains a custom table and changes to the site map.

The solution only.  
 The solution and the site map.  
 The solution, the table, and any data in the table.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

**NEW QUESTION 10**

- (Exam Topic 3)

You are a Dynamics Sales administrator for a car dealership. The dealership uses only out-of-the-box functionality. When a new car is sold, the salesperson uses a Word template to generate a letter from the quote to thank the customer.

You need to determine if you can revise the template. Which Word template change can you make?

- A. Add the Discount field conditionally.
- B. Format the table to have alternating color rows.
- C. Format the Created On field to a long date format.
- D. Add the address of the customer.D18912E1457D5D1DDCDBD40AB3BF70D5D

**Answer:** D

**NEW QUESTION 13**

- (Exam Topic 3)

You are a Dynamics 365 Customer Service developer. A salesperson creates a chart.

You need to ensure that the chart is available to all users on the team. What should you do?

- A. Share the chart with the team.
- B. Assign the chart to each person on the team.
- C. Export the user chart to Power BI
- D. Import the chart as a Power BI visualization.
- E. Export the user chart for import as a user chart.

**Answer:** A

**NEW QUESTION 14**

- (Exam Topic 3)

You plan to implement Microsoft Dataverse.

You must track changes for two columns in the Account table. You must maintain a historical log of changes for the two columns and track only what is necessary.

You configure the appropriate organization settings.

You need to configure the system to track changes for the two columns.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enable auditing for the Account table.
- B. Enable auditing for the two specific columns.
- C. Enable change tracking for the Account table.
- D. Enable change tracking for the two specific columns.

**Answer:** AB

**Explanation:**

By setting the IsAuditEnabled property of a table's definition and the IsAuditEnabled property of each desired column's definition to true, data changes to records of those tables can be logged by the platform.

Note: There are three levels where auditing can be configured: organization, table, and column. The organization level is the highest level, followed by the table level, and finally the column level. For column auditing to take place, auditing must be enabled at the column, table, and organization levels. For table auditing to take place, auditing must be enabled at the table and organization levels.

Reference:  
<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/configure-entities-attributes-auditing>

**NEW QUESTION 19**

- (Exam Topic 3)

You create a report by using Power BI Desktop and a Power BI dataset that is connected to Azure SQL Database. Multiple groups of employees will use the report.

You need to ensure that each group of employees can see only data that pertains to their group. What should you do?

- A. Create and assign file security profiles.
- B. Create and assign Common Data Service security roles.
- C. Create and assign roles by using row-level security.

**Answer: C**

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards>

**NEW QUESTION 22**

- (Exam Topic 3)

A company deploys several model-driven apps. The company uses shared devices in their warehouse. The devices are always powered on. Users log on to the devices and then launch the apps to perform actions.

Unauthorized users recently uploaded several files after another user failed to log out of a device. The company needs to prevent these incidents from occurring in the future.

You need to configure the solution to prevent the reported security incidents. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Prevent unauthorized access to devices.	<div style="border: 1px solid gray; padding: 5px;"> <ul style="list-style-type: none"> <li>Set an inactivity limit in the user's group policy.</li> <li>Set a timeout in the Power Platform admin center.</li> <li>Configure access controls in Azure Active Directory.</li> <li>Configure a Power Automate flow to poll for user inactivity on the devices.</li> </ul> </div>
Prevent users from uploading a specific type of file.	<div style="border: 1px solid gray; padding: 5px;"> <ul style="list-style-type: none"> <li>Enter the restricted file types in the SharePoint admin center.</li> <li>Enter the allowed file types in the Power Platform admin center.</li> <li>Enter the restricted file types in the Power Platform admin center.</li> </ul> </div>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Graphical user interface, text, application Description automatically generated

Box 1: Set a timeout in the Power Platform admin center.

To enforce users to reauthenticate after a pre-determined period of time, admins can set a session timeout for their individual environments. Users can only remain signed in the application for the duration of session. The application signs out the user when the session expires. Users need to sign in with their credentials to return to customer engagement apps.

Note: Configure session timeout

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Privacy + Security.
- > Set Session Expiration and Inactivity timeout. These settings apply to all users.

Incorrect:

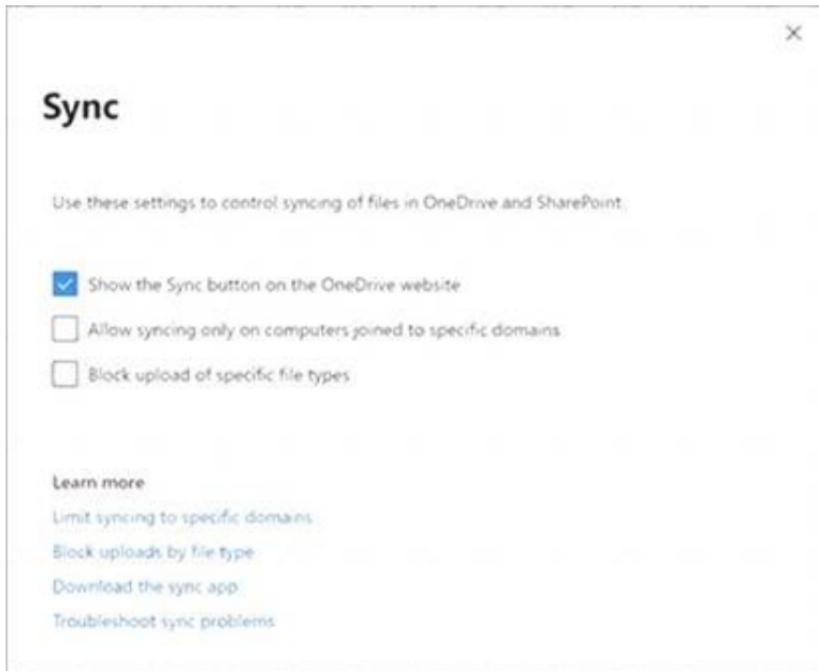

Configure inactivity timeout

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Privacy + Security.
- > Set Session Expiration and Inactivity timeout. These settings apply to all users. Box 2: Enter the restricted file types in the SharePoint admin center.

To block uploading of specific file types

- > Go to the Settings page of the new SharePoint admin center,
- > Select Sync.

Graphical user interface, text, application Description automatically generated

- > Select the Block upload of specific file types check box.
- > Enter the file name extensions you want to block, for example: exe or mp3.
- > Select Save.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/user-session-management> <https://docs.microsoft.com/en-us/onedrive/block-file-types>

**NEW QUESTION 27**

- (Exam Topic 3)

A company collaborates by using Microsoft Teams.

You must create a Power Apps app directly from within a Teams channel. The app will be used by members of the channel to manage sales orders.

You need to create the app by using Dataverse for Teams. How should you create the app?

- A. Create a canvas app by using a Power Apps personal app in Teams.
- B. Create a canvas app by using the App Studio app.
- C. Use the Power Apps web designer.
- D. Create a model-driven app by using the App Studio app

**Answer: B**

**Explanation:**

You can create, edit, and delete canvas apps in Teams.

Note: With Power Apps Studio embedded in the Power Apps app in Teams and the new built-in data platform providing an easy-to-use, editable data table, you can quickly build apps based on custom data tables that are Teams-specific and scenario-specific.

Reference: <https://docs.microsoft.com/en-us/power-apps/teams/create-first-app> <https://docs.microsoft.com/en-us/power-apps/teams/create-apps-overview>

**NEW QUESTION 30**

- (Exam Topic 3)

You need to design the FAQ solution to handle unknown responses.

Which component should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Component
Handle an unknown question from a guest in a conversation.	<div style="border: 1px solid black; padding: 5px;"> <ul style="list-style-type: none"> <li>Escalate</li> <li>Fallback topic</li> <li>Failure path</li> </ul> </div>
Redirect a guest with an unknown question to a live staff member.	<div style="border: 1px solid black; padding: 5px;"> <ul style="list-style-type: none"> <li>Power Apps</li> <li>Power Virtual Agents web application</li> <li>Microsoft Teams</li> <li>Omnichannel for Dynamics 365 Customer Service</li> </ul> </div>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-hand-off>

**NEW QUESTION 34**

- (Exam Topic 3)

You are a system administrator for a company with locations in Mexico, United States, and France. The company has both fulltime employees and contractors in all regions. Fulltime employees use a mobile app. The company has two security groups: fulltime employees and contractors.

The company requests a chatbot in Microsoft Teams to answer employee benefit questions. The chatbot must meet the following requirements:

- It must be in the local language.
- Only fulltime employees may access the chatbot. You need to configure the chatbot.

Which action should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Chatbot in local language	<ul style="list-style-type: none"> <li>Create one chatbot that manages all three languages.</li> <li><b>Create one chatbot that manages all three languages.</b></li> <li>Create one chatbot and add it to three Teams channels that are configured for the local language.</li> <li>Create three chatbots, one for each language.</li> </ul>
Employee access	<ul style="list-style-type: none"> <li>Publish the chatbot in Teams.</li> <li><b>Share the chatbot with the fulltime employees.</b></li> <li>Publish the chatbot to the mobile app channel.</li> <li>Add the chatbot to Appsource.</li> <li>Publish the chatbot in Teams.</li> </ul>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Configuration
Chatbot in local language	<ul style="list-style-type: none"> <li>Create one chatbot that manages all three languages.</li> <li><b>Create one chatbot that manages all three languages.</b></li> <li>Create one chatbot and add it to three Teams channels that are configured for the local language.</li> <li>Create three chatbots, one for each language.</li> </ul>
Employee access	<ul style="list-style-type: none"> <li>Publish the chatbot in Teams.</li> <li><b>Share the chatbot with the fulltime employees.</b></li> <li>Publish the chatbot to the mobile app channel.</li> <li>Add the chatbot to Appsource.</li> <li>Publish the chatbot in Teams.</li> </ul>

**NEW QUESTION 35**

- (Exam Topic 3)

A company uses Power Apps. You enable auditing in Microsoft Dataverse. Users report the following issues when viewing the audit logs:

- Unable to view the read access audit logs.
- Unable to view the Account table audit logs. You need to troubleshoot the issues.

What are the causes of the issues? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Issue	Cause
Unable to view the read access audit logs.	<ul style="list-style-type: none"> <li>Auditing is not enabled at the environment level.</li> <li>Storage for the tenant is over capacity.</li> <li><b>Auditing is not enabled at the environment level.</b></li> </ul>
Unable to view the Account table audit logs.	<ul style="list-style-type: none"> <li><b>Auditing is disabled at the table level.</b></li> <li>Auditing is disabled at the app level.</li> <li><b>Auditing is disabled at the table level.</b></li> <li>Auditing for read access is not enabled.</li> </ul>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Issue	Cause
Unable to view the read access audit logs.	<ul style="list-style-type: none"> <li>Auditing is not enabled at the environment level.</li> <li>Storage for the tenant is over capacity.</li> <li><b>Auditing is not enabled at the environment level.</b></li> </ul>
Unable to view the Account table audit logs.	<ul style="list-style-type: none"> <li><b>Auditing is disabled at the table level.</b></li> <li>Auditing is disabled at the app level.</li> <li><b>Auditing is disabled at the table level.</b></li> <li>Auditing for read access is not enabled.</li> </ul>

**NEW QUESTION 40**

- (Exam Topic 3)

You are creating a business rule to implement new business logic.

You must apply the business logic to a canvas app that has a single screen named Screen1. You need to configure the scope for the business rule.

Which scope should you use?

- A. All Forms
- B. Entity
- C. Screen1
- D. Global

**Answer: B**

**Explanation:**

Note: Some terminology has changed. Entity is now Table. If you're building a Canvas app, you must use table (entity) as the scope.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

**NEW QUESTION 42**

- (Exam Topic 3)

Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

- A. List view of the entity
- B. Microsoft Visual Studio
- C. Templates area
- D. Maker portal

**Answer: A**

**Explanation:**

Edit a public or system view in app designer

You can change the way a public or system view is displayed by adding, configuring, or removing columns.

> In the Views list for a table, select the Show list of references down arrow Drop Down. Edit View.Graphical user interface, application Description automatically generated

> Next to the view you want to edit, select Open the View Designer Open view Designer. The view opens in the view designer.

When you edit a public or system view, you must save and publish your changes before they will be visible in the application.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer>

**NEW QUESTION 43**

- (Exam Topic 3)

You use Power Virtual Agents to create a bot that will answer and transfer help desk calls.

You create topics that contain nodes and functions. The company has the following requirements for the bot:

- When a caller states the word issue, help, or problem, the bot must respond with the question. "How can we help you today?"
- When the bot responds with the question, "How can we help you today?", the bot must provide the caller with the choices of hardware, software or other
- When the caller asks a question, the bot must save the response so that it can perform an action on the response.

You need to configure the bot.

Which nodes or functions should you use? To answer, select the appropriate options in the answer area.

**Answer Area**

Requirement	Node/Function
Caller states <b>issue, help, or problem.</b>	Trigger phrase Trigger phrase Question Message Action
Bot provides choices.	Question Action Question Message Variable
Responses are temporarily saved.	Identifier Action Variable Trigger Identifier

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Requirement	Node/Function
Caller states <b>issue, help, or problem.</b>	Trigger phrase Trigger phrase Question Message Action
Bot provides choices.	Question Action Question Message Variable
Responses are temporarily saved.	Identifier Action Variable Trigger Identifier

**NEW QUESTION 44**

- (Exam Topic 3)

A company has a Power Apps app.

The app must meet the following requirements:

- Managers assign lead records to the sales department. A new phone call record must be created if a lead record has no activities.
- An email must be sent to the manager if the phone call record created is not completed after one day. A classic workflow must run when a lead record is assigned.

You need to configure the check conditions for the workflow. NOTE: Each correct selection is worth one point.

**Answer Area**

Condition	Value
Number of activities for new phone call record.	0 0 1 Process Activity Count
Duration for email sent to manager.	Lead Created On + 1 Day 1 Day Lead Created On + 1 Day Lead Modified On + 1 Day

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Condition	Value
Number of activities for new phone call record.	0 0 1 Process Activity Count
Duration for email sent to manager.	Lead Created On + 1 Day 1 Day Lead Created On + 1 Day Lead Modified On + 1 Day

**NEW QUESTION 45**

- (Exam Topic 3)

You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment they are complete.

The changes must meet the following requirements:

- Must be clearly identified so that they are not confused with system components and components from other solutions.
- Must not affect any existing components in the test environment. You need to prepare a solution for deployment to the test environment.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Create a new unmanaged solution and select the correct publisher.	
Create a new publisher.	
Select a managed solution and add the correct publisher.	
Add the table with all components to the solution.	
Choose an existing publisher.	
Add the table to the solution and add the new column.	
Run the solution checker on the solution.	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Create a new publisher Solution publisher

Every app and other solution components such as entities you create or any customization you make is part of a solution. Because every solution has a publisher, you should create your own publisher rather than use the default. You specify the publisher when you create a solution.

Step 2: Create a new unmanaged solution and select the correct publisher unmanaged solution

Unmanaged solutions are used in development environments while you make changes to your application. Unmanaged solutions can be exported either as unmanaged or managed. Exported unmanaged versions of your solutions should be checked into your source control system. Unmanaged solutions should be considered your source for Microsoft Power Platform assets. When an unmanaged solution is deleted, only the solution container of any customizations included in it is deleted. All the unmanaged customizations remain in effect and belong to the default solution.

Step 3: Add the table top the solution and add the new column. Step 4: Run the solution checker on the solution

Use solution checker to validate your model-driven apps in Power Apps.

Reference: <https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm> <https://docs.microsoft.com/en-us/power-apps/maker/data-platform/use-powerapps-checker>

**NEW QUESTION 48**

- (Exam Topic 3)

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Categorized Search to search for the word run. Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead use Relevance Search.

Note: Relevance Search finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming," or "streamed."

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva>

**NEW QUESTION 50**

- (Exam Topic 3)

A company uses a Power Apps app with Microsoft Dataverse.

The company requires the import of records into Dataverse. Duplicate records in the data must be deleted without user intervention.

You create a duplicate detection rule.

You need to configure the rule for the data import. Which option should you configure?

- A. Enable the Templates for Data Import option.
- B. Enable the When a record is created or updated option.
- C. Disable the Allow Duplicates option.
- D. Enable the During data import option.

**Answer:** D

**Explanation:**

When configuring a duplicate detection rule in Power Apps with Microsoft Dataverse, to automatically delete duplicate records during a data import, you should enable the "During data import" option. This option allows the detection rule to automatically delete duplicates as they are imported into the system, without requiring user intervention.

References:

- > <https://docs.microsoft.com/en-us/power-platform/admin/create-duplicate-detection-rule>
- > <https://docs.microsoft.com/en-us/power-platform/admin/data-integration-duplicate-detection>

**NEW QUESTION 51**

- (Exam Topic 3)

A company uses Common Data Service to store sales data.

For the past few quarters, the company has experienced a decrease in sales revenue. The company wants to improve sales forecasting.

The company plans to use AI Builder to implement the solution. You select fields that will be used for prediction.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

**Answer Area**

- Export data from Common Data Service into Microsoft Excel
- Train the category classification AI model by using Common Data Service data
- Train the AI model by using data exported to Microsoft Excel
- Publish the AI model
- Use the model with Power Apps
- Import the AI model analysis into Common Data Service
- Train the prediction AI model by using Common Data Service data

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, application Description automatically generated

Step 1:

Before you can use your prediction model, you have to train it to perform the way you want. Step 2:

After you train your model, publish it to make it available.

Publish your model when you want to make it available to users in your Power Apps environment. Step 3: Use the model with Power Apps

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-train-model>

**NEW QUESTION 56**

- (Exam Topic 3)

You are a Dynamics 365 administrator. You create a new app.

You need to create the site map for the app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

**Answer Area**

- Add a subarea.
- Add a view.
- Add a group.
- Add an area.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Actions	Answer Area
Add a subarea.	Add an area.
Add a view.	Add a group.
Add a group.	Add a subarea.
Add an area.	

**NEW QUESTION 58**

- (Exam Topic 3)

A company is creating a canvas app and a model-driven app to manage their customer accounts.

The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.

The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.

You need to configure the scope for the business rules.

Which scope should you use? To answer, drag the appropriate scopes to the correct business rules. Each scope may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Scopes	Business rule	Scope
All forms	Business Type column setting for customer size	
Specific form	Account rating re-evaluation	
Table		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Table

The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.

Scope the business rule to Entity (Table). Box 2: Specific form

The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.

For Model

The scope of the business rule determines which forms the business rule will be applied. You set the scope, according to the following:

If you select this item... The scope is set to...

Entity- The table and all forms for the table All Forms- All forms for the table

Specific form (account Main Form, for example) - Just that form

Reference: <https://debajmecrm.com/business-rules-in-powerapps-canvas-apps/>

<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-business-rules-recommendations>

**NEW QUESTION 60**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution: Enable OneDrive for Business.

Does this meet the goal?

- A. Yes

B. No

**Answer: B**

**NEW QUESTION 65**

- (Exam Topic 3)

You are implementing a model-driven app to support a new line of business. There are several places where automated business logic must be applied. You need to determine how to apply the business logic.

Which method should you use? To answer, drag the appropriate methods to the appropriate business logic statements. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Business logic	Method
Business rule	Make a field read only until a predetermined value is exceeded.	Method
Real-time workflow	Automatically send an email when a record's status is changed to deactivated.	Method
Power Automate instant flow	Use the previous value of a field when the value is automatically updated as part of the	Method

A. Mastered  
 B. Not Mastered

**Answer: A**

**Explanation:**

Graphical user interface, text, application Description automatically generated

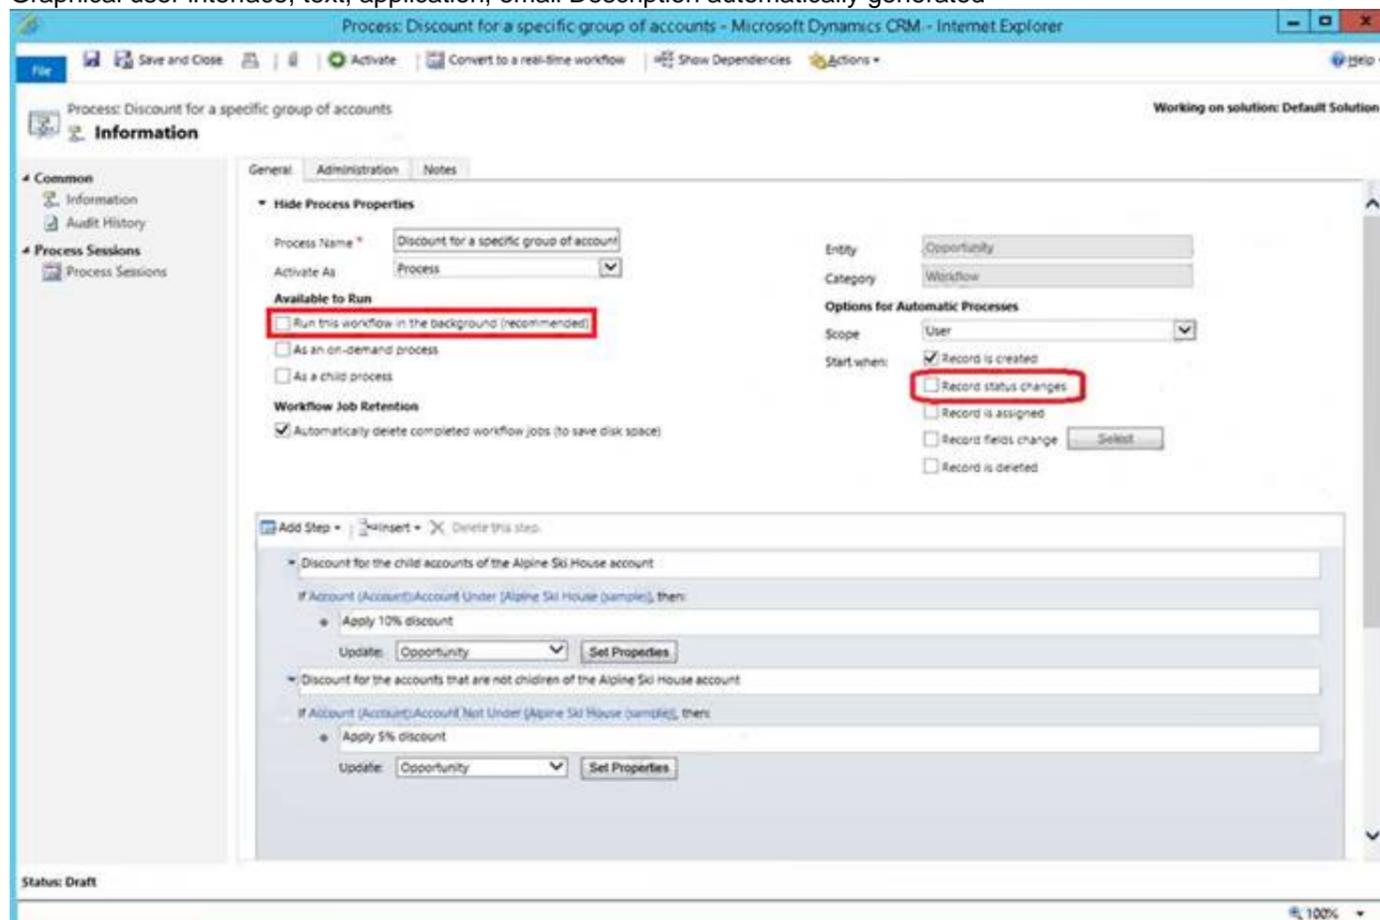

Box 1: Business rule

By combining conditions and actions, you can do any of the following with business rules:

- > NSE5\_FSM-5.2 Set column values
- > Clear column values
- > Set column requirement levels
- > Show or hide columns
- > Enable or disable columns
- > Validate data and show error messages
- > Create business recommendations based on business intelligence.

Box 2: Real-time workflow

Real-time workflows:  
 Graphical user interface, text, application, email Description automatically generated

Box 3: Power Automate instant flow

Instant Flows don't have a trigger in the same way as the Automated flow. Instead, they are triggered manually or on-demand, such as a user clicking a Flow button in the mobile app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-business-rules-recommendations-a> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/configure-workflow-steps> <https://carldesouza.com/difference-between-instant-automated-and-scheduled-flows-in-power-automate-and-ho>

**NEW QUESTION 67**

- (Exam Topic 3)

You create a model-driven app for an automobile parts help desk.

A help desk agent uses a form to gather information about customers' automobiles in two custom tables. The names of the tables are Client and Automobile, The form must prepopulate the following information about the customer from the client table:

- First name
- Last name

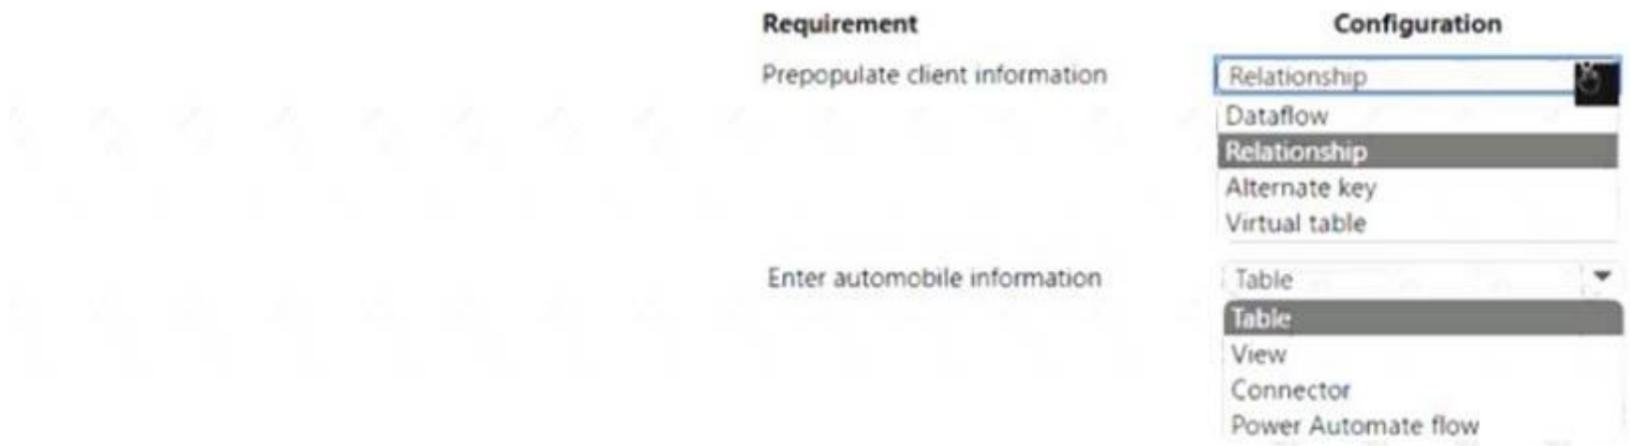

The agent must be able to type the following information about the automobile:

- Automobile make
- Automobile model

You need to implement the form.

What should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

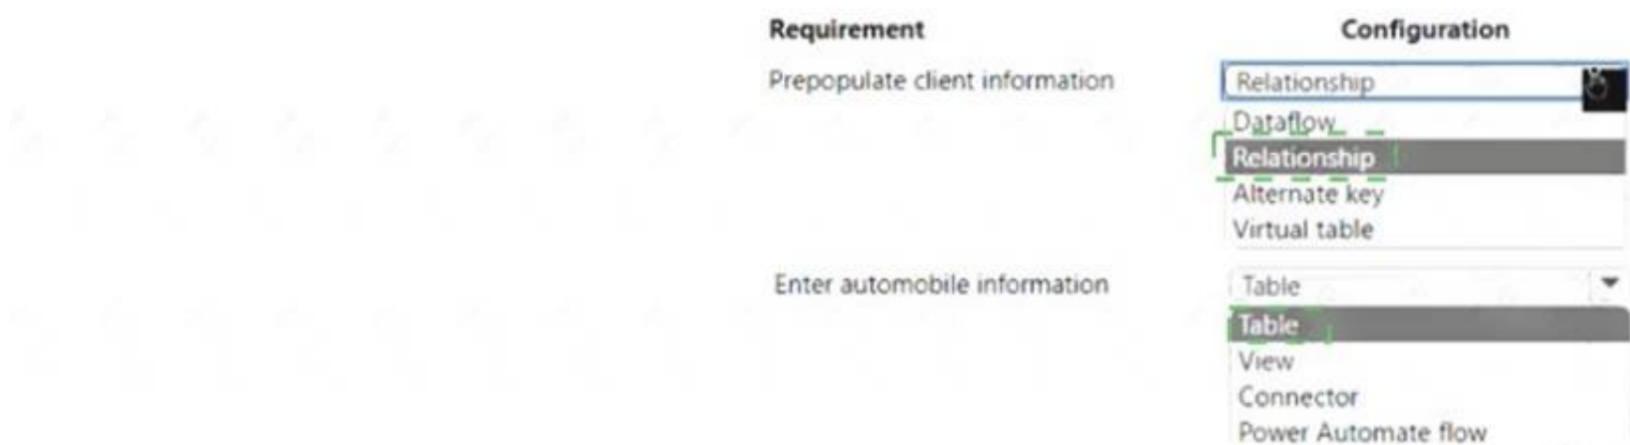

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

**NEW QUESTION 71**

- (Exam Topic 3)

A veterinary office plans to use Microsoft Power Platform to streamline customer experiences. The customer creates a canvas apps to manage appointments. On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, a text field must appear so that staff members can add details about the pet.

You need to create a dynamically visible field. What should you configure?

- A. business rule
- B. business process flow
- C. workflow

**Answer:** A

**Explanation:**

A business rule can be used to configure the visibility of a field based on the value selected in another field. In this case, a business rule could be created to make the text field for additional pet details visible when the "Other" option is selected in the dropdown field for the type of pet. This can be done by going to the Power Apps portal, navigating to the Common Data Service, and creating a new business rule for the entity that contains the appointment form. Within the rule, you can set the visibility of the text field to be dependent on the value selected in the dropdown field. Reference:

<https://docs.microsoft.com/en-us/power-platform/model-driven-apps/model-driven-business-rules>

It's important to note that the above feature is only available in the PowerApps Model Driven App and not in Canvas App.

**NEW QUESTION 73**

- (Exam Topic 3)

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage. The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution: Enable OneNote integration. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 75**

- (Exam Topic 3)

A company is updating a Power Apps solution that contains two tables named Services and Equipment. The company is creating a new solution to update the current solution for the following requirements:

- The Services table must be updated to include change tracking.
- The Equipment table must be updated to include four new columns.
- The solution must update only the components that need to be added or changed. You need to create the solution.

Which table option should you use? To answer, drag the appropriate options to the correct tables. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Options	Answer Area						
<div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">Include all components</div> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">Include entity metadata</div> <div style="border: 1px solid gray; padding: 2px;">Select components</div>	<table border="1"> <thead> <tr> <th>Table</th> <th>Option</th> </tr> </thead> <tbody> <tr> <td>Services</td> <td><div style="border: 1px solid gray; height: 20px; width: 100%;"></div></td> </tr> <tr> <td>Equipment</td> <td><div style="border: 1px solid gray; height: 20px; width: 100%;"></div></td> </tr> </tbody> </table>	Table	Option	Services	<div style="border: 1px solid gray; height: 20px; width: 100%;"></div>	Equipment	<div style="border: 1px solid gray; height: 20px; width: 100%;"></div>
Table	Option						
Services	<div style="border: 1px solid gray; height: 20px; width: 100%;"></div>						
Equipment	<div style="border: 1px solid gray; height: 20px; width: 100%;"></div>						

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Select components Option for Services Table Select components Option for Equipment Table

The "Select components" table option allows you to update specific components of a table, such as adding new columns or change tracking, while keeping the existing data and relationships in the table intact. This meets the requirement that the solution must update only the components that need to be added or changed.

You can use the Power Apps maker portal and navigate to the Environment, then click on the Data tab, select the table you want to update and click on the settings icon and then select "Select components" from the options. Then you can select only the columns you want to add or update for each table.

This way, you can ensure that the solution will update only the necessary components for each table, including change tracking for the Services table and four new columns for the Equipment table, without affecting the existing data and relationships in the tables.

**NEW QUESTION 78**

- (Exam Topic 3)

A company is planning to create a Power Virtual Agents bot. The bot has the following requirements:

- The bot must provide address information for the company.
- The bot must be available from Microsoft Teams and from the internet website of the company. You need to configure the bot. Which component should you use?

- A. Skill
- B. Composer
- C. Template
- D. Channel

**Answer: D**

**Explanation:**

To make the bot available from Microsoft Teams and from the company's internet website, you need to configure the channels for the bot. Power Virtual Agents uses channels to connect the bot to different communication platforms such as Microsoft Teams, Skype, Facebook, and more. By configuring the appropriate channels for the bot, you can make it available on those platforms and allow users to interact with the bot from those locations.

You can configure channels by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Channels" tab, where you can add the channels which you want the bot to be available on.

Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/channels-overview>

**NEW QUESTION 80**

- (Exam Topic 3)

The owner of a company needs to know who signs into the system. You need to ensure that the owner can view the user audit logs.

Where does each action need to be performed? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

Action	Location
Activate user auditing.	<ul style="list-style-type: none"> <li>System Settings</li> <li>Personal Settings</li> <li>Customize the System</li> <li>Microsoft 365 Compliance</li> </ul>
View the user audit logs.	<ul style="list-style-type: none"> <li>Advanced Find</li> <li>Individual record</li> <li>User Summary report</li> <li>Microsoft 365 Compliance</li> </ul>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/power-platform/admin/audit-data-user-activity>

**NEW QUESTION 83**

- (Exam Topic 3)

A company plans to create two Microsoft Power Platform applications.

One of the applications requires a custom control layout without using code. The other application will be used primarily by external users.

You need to create the applications.

Which application types should you use? To answer, drag the appropriate application types to the correct requirements. Each application type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Application types	Requirement	Application type
Canvas app	Custom control layout without coding	
Model-driven app	Used by external users	
Power Pages portal		
Power BI		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Application types	Requirement	Application type
Canvas app	Custom control layout without coding	Canvas app
Model-driven app	Used by external users	Model-driven app
Power Pages portal		
Power BI		

**NEW QUESTION 86**

- (Exam Topic 3)

You plan to automate several different processes by using Power Automate. Each process has unique characteristics.

You need to recommend components for each process.

Which components should you recommend? To answer, drag the appropriate components to the correct processes. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Components**

- Attended UI flow
- Unattended UI flow
- Flow that uses a custom connector
- Flow that uses a prebuilt connector

**Answer Area**

Process	Component
Access data from an internally created web application with basic REST API functionality as part of a nightly batch job.	Component
Access data from a public web site with no API functionality for emails processed through an unmonitored queue.	Component

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

1: Custom connector (REST API access) 2: Unattended UI flow

**NEW QUESTION 91**

- (Exam Topic 3)

You are a Dynamics 365 Customer Service administrator.

You need to configure the following automation for the sales team:

- \* Send an email when the status changes on an Opportunity.
- \* Text the sales manager when an Opportunity is created.
- \* Create a Wunderlist task when an Opportunity is open for 30 days.

Which tool should you use for each requirement? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

**Automation**

**Tool**

Email when the status changes.

- Dynamics 365 workflow
- Microsoft Flow
- Business Process Flow

Text when the Opportunity is created.

- Dynamics 365 workflow
- Microsoft Flow
- Business Process Flow

Create a Wunderlist task.

- Dynamics 365 workflow
- Microsoft Flow
- Business Process Flow

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Automation**

**Tool**

Email when the status changes.

- Dynamics 365 workflow
- Microsoft Flow
- Business Process Flow

Text when the Opportunity is created.

- Dynamics 365 workflow
- Microsoft Flow
- Business Process Flow

Create a Wunderlist task.

- Dynamics 365 workflow
- Microsoft Flow
- Business Process Flow

**NEW QUESTION 93**

- (Exam Topic 3)

A company creates a canvas app.

The app requires users to enter their social security number. The app should only display the last four digits when the user tabs to a different column.

You need to configure the app. Which option should you use?

- A. Power Fx
- B. Business rule
- C. Business process flow
- D. Power BI DAX

**Answer:** A

**NEW QUESTION 97**

- (Exam Topic 3)

You implement an editable grid for the Account entity.

The business team provides the following list of features that they would like you to implement:

- > Group by or sort columns in the current view.
- > Configure a business rule to show an error message.
- > Edit values in calculated fields.
- > Edit the Address composite field.
- > Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Action	Can be performed?
Group by or sort columns in the current view.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Configure a business rule to show an error message.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Edit values in calculated fields.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Edit the Address composite field.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Use the editable grid on mobile phones.	<input type="checkbox"/> Yes <input type="checkbox"/> No

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Action	Can be performed?
Group by or sort columns in the current view.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Configure a business rule to show an error message.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Edit values in calculated fields.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Edit the Address composite field.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Use the editable grid on mobile phones.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

**NEW QUESTION 98**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history. Solution: Change Elizabeth's username in the user record for the app. Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

**NEW QUESTION 101**

- (Exam Topic 3)

You are designing a Power Virtual Agents chatbot.

You observe that the environment you plan to use does not appear as an option in the Power Virtual Agents user interface.

You need to ensure that you can create the chatbot in the environment that you want to use. What should you do?

- A. Create an environment in a supported region.
- B. Convert the environment to a sandbox environment.
- C. Change the region for the environment.

**Answer: A**

**Explanation:**

The environment doesn't show up in the drop-down menu of Power Virtual Agents

Your environment might not show up in the drop-down menu due to one of the following:

The environment doesn't have a database created. To resolve this issue, go to [admin.powerplatform.com](https://admin.powerplatform.com) to create a database in your environment.

The environment is created in an unsupported region.

Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/environments-first-run-experience>

**NEW QUESTION 102**

- (Exam Topic 3)

You are a Dynamics 365 Customer Engagement administrator. You create a new solution in Dynamics 365. You need to help end users understand which actions to take next and ensure that user interaction occurs in manageable steps.

Which actions should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Guide the user with actions to take.

<input type="checkbox"/> Configure views and charts. <input type="checkbox"/> Configure business process flows. <input type="checkbox"/> Configure workflows.
---

Ensure user interaction in manageable steps.

<input type="checkbox"/> Configure the timeline on the form. <input type="checkbox"/> Configure each stage with the actions that need to be completed. <input type="checkbox"/> Configure Insights.
---

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Guide the user with actions to take.

<input checked="" type="checkbox"/> Configure views and charts. <input checked="" type="checkbox"/> Configure business process flows.   <input type="checkbox"/> Configure workflows.
---

Ensure user interaction in manageable steps.

<input checked="" type="checkbox"/> Configure the timeline on the form. <input checked="" type="checkbox"/> Configure each stage with the actions that need to be completed.   <input type="checkbox"/> Configure Insights.
---

**NEW QUESTION 104**

- (Exam Topic 3)

A company uses Dataverse to store the names of contacts. The company uses a shared Microsoft Excel file to collect the data. The company requires that the contacts be added to Dataverse automatically every day

You need to identify which tools are required to create and perform the import. What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Requirement	Tool
Create the import	<ul style="list-style-type: none"> <li>Import Wizard</li> <li>Data map</li> <li>Dataflow</li> <li>Import from Excel</li> <li><b>Import Wizard</b></li> </ul>
Perform the import	<ul style="list-style-type: none"> <li>Power Query</li> <li>Connections</li> <li>Custom connectors</li> <li>Power Apps</li> <li><b>Power Query</b></li> </ul>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Requirement	Tool
Create the import	<ul style="list-style-type: none"> <li>Import Wizard</li> <li>Data map</li> <li>Dataflow</li> <li>Import from Excel</li> <li><b>Import Wizard</b></li> </ul>
Perform the import	<ul style="list-style-type: none"> <li>Power Query</li> <li>Connections</li> <li>Custom connectors</li> <li>Power Apps</li> <li><b>Power Query</b></li> </ul>

**NEW QUESTION 107**

- (Exam Topic 3)

You are using power Automate to create a list of customers from a Microsoft Excel file, The list must contain customers who meet one of the following criteria:

- > Sales of less than \$500,000.
- > Customers who are on credit hold.

You need to create a condition to filter the list Of customers.

How should you complete the filter condition? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

@  (less(item()?['sales'], 500000),  empty(item()?['credithold'], 'true')

or  equals(item()?['credithold'], 'true')

and  not(equals(item()?['credithold'], 'true'))

not

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, application, Word Description automatically generated

Box 1: or

Or: Takes two arguments and returns true if either argument is true. Box 2: equals(item()?['credithold'],'true')

Equals: Returns true if two values are equal.

For example, if parameter1 is someValue, this expression returns true: equals(parameters('parameter1'), 'someValue')

Reference:

<https://docs.microsoft.com/en-us/power-automate/use-expressions-in-conditions>

**NEW QUESTION 111**

- (Exam Topic 3)

You are designing a canvas app that connects to Common Data Service.

You need to configure the app to meet the requirements and ensure that the canvas app is available offline. What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Function
Pass values from the current screen when moving to another screen.	<div style="border: 1px solid black; padding: 5px;">                     Navigate                      Back                      MovePrevious                 </div>
Display data to a user when the app is offline.	<div style="border: 1px solid black; padding: 5px;">                     LoadData                      LoadDateOffline                      ShowData                 </div>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/offline-apps>

**NEW QUESTION 116**

- (Exam Topic 3)

You plan to create a canvas app.

The app requires a button on the data entry screen that users can select to send an email. You need to configure the app.

What should you create?

- A. Business process flow
- B. Azure Logic App
- C. Power Automate cloud flow
- D. Classic workflow

**Answer: C**

**NEW QUESTION 118**

- (Exam Topic 3)

You create a Power Virtual Agents bot.

You observe that the bot is not able to recognize input from some users. You need to configure the bot response for unrecognized input from users.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Transfer to an agent.
- B. Use a fallback topic.
- C. Display a system-defined error message.
- D. Connect to a different channel.

**Answer: BC**

**Explanation:**

\* B. Use a fallback topic: Power Virtual Agents provides the capability to handle unrecognized inputs by using fallback topics. A fallback topic is a topic that is triggered when the bot is unable to recognize the user input. You can configure fallback topics by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Topics" tab and create a new topic with a fallback trigger. Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/topics-triggers#fallback-triggers>

\* C. Display a system-defined error message: This is another option to handle unrecognized inputs by displaying a predefined message that inform the user that the bot was unable to understand their input.

**NEW QUESTION 121**

- (Exam Topic 3)

You create a Power Apps portal to provide training and documentation for students. Students create a profile on the portal and then select and pay for courses.

You plan to add free courses to the training portfolio. Free courses must be automatically available to all students when they sign in.

You need to assign default permissions to students. What should you do?

- A. Create an entity for managing free course
- B. Create a Students web role and set the Authenticated Users role option to true
- C. Create appropriate entity permissions to access the free course entity records and assign the entity permissions to the web role.
- D. Create an entity for managing free course

- E. Create entity permission records to provide access to entity records for free courses and assign the entity permissions to users when they register on the portal for the first time.
- F. Create a Students web role and set the Authenticated Users Role option to true.
- G. Assign the web role to each registered user.

**Answer: C**

**NEW QUESTION 124**

- (Exam Topic 3)

A company creates a Power Automate cloud flow for a Power Apps app.

The cloud flow must send a daily email that contains a list of year-to-date (YTD) totals. You need to configure the flow.

Which feature should you use?

- A. Parallel branch
- B. Loop
- C. Condition
- D. Wait

**Answer: B**

**Explanation:**

In order to send a daily email that contains a list of year-to-date (YTD) totals, you would need to use a loop in the Power Automate cloud flow. A loop allows you to repeat a specific set of actions until a certain condition is met. In this case, the loop would be used to iterate through the data for each day, accumulating the totals for the year-to-date (YTD) and then sending the email at the end of the loop with the accumulated totals.

Here are some references from Microsoft that may be helpful in understanding how to use loops in Power Automate:

- > [Microsoft docs: Loops in Power Automate](#)
- > [Microsoft docs: Repeating a flow with a loop](#)
- > [Microsoft docs: Using the do-until loop in Power Automate](#)

**NEW QUESTION 129**

- (Exam Topic 3)

A company uses a model-driven app. The app uses a Power Virtual Agents chatbot.

The company has two locations in different countries/regions with separate environments for each location. Each location has a development environment, a testing environment, and a production environment. The company uses the Application Lifecycle Management (ALM) process for the environments.

You need to create the different Power Virtual Agents bot environments. How many Power Virtual Agents bot environments are required?

- A. 1
- B. 2
- C. 3
- D. 6

**Answer: D**

**Explanation:**

When a company uses a model-driven app that incorporates a Power Virtual Agents chatbot, and has multiple locations with different environments for each location, it is necessary to create separate Power Virtual Agents bot environments for each location.

For each location, 3 different environments are required: development, testing, and production. This is in line with the Application Lifecycle Management (ALM) process that the company uses.

In total, 6 Power Virtual Agents bot environments are required: 2 locations x 3 environments per location = 6. It's worth mentioning that Power Virtual Agents allows to export and import the bot, so once you configure the bot in one environment, you can import the bot to the other environments, this way you don't need to start from scratch.

References:

- > <https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/bot-lifecycle>
- > <https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/export-import>

**NEW QUESTION 131**

- (Exam Topic 3)

A company deploys a chatbot that is embedded in a Power Pages website. The company has the following requirements for the chatbot:

- Azure AD users only must be able to use the chatbot when accessing sensitive data.
- The chatbot must be accessible only from the Power Pages website. You need to recommend a solution that meets the requirements.

Which two options should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enable Manual authentication.
- B. Set up a new channel for the chatbot.
- C. Enable Only for Teams authentication.
- D. Enable web channel security.
- E. Configure a data loss prevention policy.

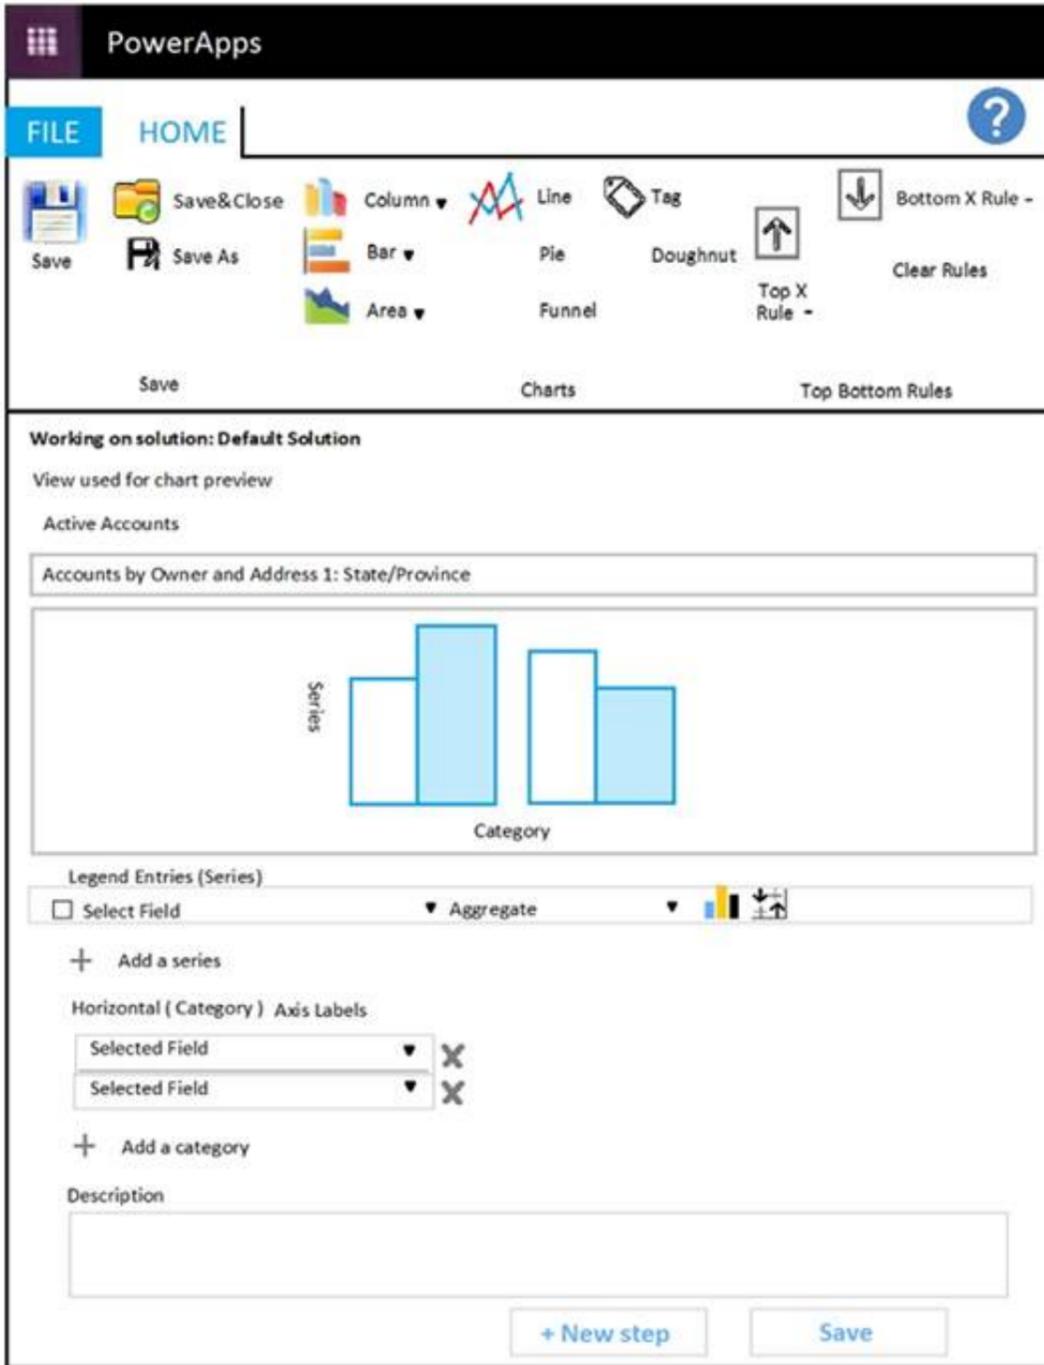

**Answer: DE**

**NEW QUESTION 134**

- (Exam Topic 3)

You need to create a system chart for the Account entity.

The chart must display a count of accounts grouped by owner and then display the accounts by Address 1: State/Province for each owner. You begin to configure chart options as shown in the image below.

How should you complete the configuration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point. The chart must display a count of accounts grouped by owner, and then display the accounts by Address 1 to State/Province for each owner.

Component	Selection
Legend Entries (Series): Select Field	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">Account</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Address 1: State/Province</div> <div style="padding: 2px;">Owner</div> </div>
Legend Entries (Series): Aggregate	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">Avg</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Count:All</div> <div style="padding: 2px;">Sum</div> </div>
Horizontal (Category) Axis Labels: Select Fields	
First grouping field	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">Account</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Address 1: State/Province</div> <div style="padding: 2px;">Owner</div> </div>
Second grouping field	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">Account</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Address 1: State/Province</div> <div style="padding: 2px;">Owner</div> </div>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Component	Selection
Legend Entries (Series): Select Field	<div style="border: 1px solid black; padding: 2px;"> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Account</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Address 1: State/Province</div> <div style="border: 1px solid black; padding: 2px;">Owner</div> </div>
Legend Entries (Series): Aggregate	<div style="border: 1px solid black; padding: 2px;"> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Avg</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Count:All</div> <div style="border: 1px solid black; padding: 2px;">Sum</div> </div>

**NEW QUESTION 137**

- (Exam Topic 3)

You are configuring Microsoft Dataverse security. You plan to assign users to teams. Record ownership and permissions will differ based on business requirements.

You need to determine which team types meet the requirements.

Which team type should you use? To answer, drag the appropriate team types to the correct requirements.

Each team type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Team types	Requirement	Team Type
<div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;">Access team</div> <div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;">Azure Active Directory group team</div> <div style="border: 1px solid black; padding: 5px;">Microsoft Teams team</div>	<p>Ability to own records in Dataverse</p> <p>Provides permissions without a security role assigned</p>	<div style="border: 1px dashed black; height: 20px; width: 100%; margin-bottom: 10px;"></div> <div style="border: 1px dashed black; height: 20px; width: 100%;"></div>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Microsoft Teams team

Dataverse supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the table is created and can't be changed. For security purposes, records that are organization owned, the only access level choices is either the user can do the operation or can't. For user and team owned records, the access level choices for most privileges are tiered Organization, Business Unit, Business Unit and Child Business Unit or only the user's own records. That means for read privilege on contact, I could set user owned, and the user would only see their own records.

Box 2: Access team

An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams in which they are members. The records are shared with an access team and the team is granted access rights on the records, such as Read, Write or Append.

<https://docs.microsoft.com/en-us/power-platform/admin/wp-security-cds>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/use-access-teams-owner-teams-collaborate>

**NEW QUESTION 140**

- (Exam Topic 3)

A customer tracks events by using a custom entity.

The custom entity includes a custom field for the venue of the events. The customer must be able to display the events by venue in a calendar.

You need to ensure that all events display by venue in the calendar. To which component should you add a control?

- A. Form
- B. view
- C. Field
- D. Chart

**Answer: B**

**Explanation:**

If you use unified interface, you can display any record in a calendar view via the calendar control.

- > Go to Settings->Customization->Customize the System
- > Open the configuration for the entity that you want to use the calendar control (Opportunities in our example)
- > Click the View tab
- > Click "Add Control" and select the calendar control.
- > Click the dot for every interface from which you want the calendar control to be available.

Reference:

<https://crmtipoftheday.com/1206/view-any-dynamics-365-record-on-a-calendar/>

**NEW QUESTION 143**

- (Exam Topic 3)

A company creates a Microsoft Teams app that stores data in two tables in a Microsoft Dataverse for Teams environment.

Users require access to the app and the app data. You need to configure access.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Access	Action
Access to the data	<input type="checkbox"/> Share the data and assign permissions. <input type="checkbox"/> Assign a permission set for each table in the app. <input type="checkbox"/> Create a security role and assign permissions by table. <input checked="" type="checkbox"/> Share the data and assign permissions.
Access to the app	<input type="checkbox"/> Publish the app to a Teams channel. <input type="checkbox"/> Share with a security group. <input type="checkbox"/> Share with users. <input checked="" type="checkbox"/> Publish the app to a Teams channel.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

Access	Action
Access to the data	<input type="checkbox"/> Share the data and assign permissions.   <input type="checkbox"/> Assign a permission set for each table in the app. <input type="checkbox"/> Create a security role and assign permissions by table. <input checked="" type="checkbox"/> Share the data and assign permissions.
Access to the app	<input type="checkbox"/> Publish the app to a Teams channel.   <input type="checkbox"/> Share with a security group. <input type="checkbox"/> Share with users. <input checked="" type="checkbox"/> Publish the app to a Teams channel.

**NEW QUESTION 144**

- (Exam Topic 3)

A farm uses a canvas app to manage schedules for planting fields with crop seeds. The farm uses business intelligence to provide recommendations for schedule changes based on weather data.

You must implement a business rule that changes information for several forms in the canvas app based on business intelligence data.

You need to configure the business rule. Which scope should you use?

- A. Table
- B. All Forms
- C. Form specific

**Answer: A**

**NEW QUESTION 147**

- (Exam Topic 3)

A company uses Power Apps and Power Automate.

There is an issue with the existing flow in the test environment. Development changes are allowed in the test environment.

You need to troubleshoot the issue with the flow.

Which command should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Action**

**Command**

Enable changes to the flow.

Add existing
Remove
Edit
Turn off

Enable changes to the object.

Edit
Publish
Turn off

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

**NEW QUESTION 150**

- (Exam Topic 3)

A company creates a canvas app.

The company plans to make the app available in Microsoft Teams. Only employees will be allowed to use the app.

You need to add the app to Teams.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 154**

- (Exam Topic 3)

The business team provides the following list of features that they would like you to implement:

- Group by or sort columns in the current view.
- Configure a business rule to show an error message.
- Edit values in calculated fields.
- Edit the Address composite field.
- Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Group by or sort columns in the current view.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Configure a business rule to show an error message.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Edit values in calculated fields	<input type="checkbox"/> Yes <input type="checkbox"/> No
Edit the Address composite field.	<input type="checkbox"/> Yes <input type="checkbox"/> No
use the editable grid on mobile phones.	<input type="checkbox"/> Yes <input type="checkbox"/> No

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Group by or sort columns in the current view.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Configure a business rule to show an error message.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Edit values in calculated fields	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Edit the Address composite field.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
use the editable grid on mobile phones.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

**NEW QUESTION 155**

- (Exam Topic 3)

You have a business process flow (BPF) that interacts with the Account entity. You configure a new version for the BPF and add a new stage at the beginning. You need to identify the impact of the new version on the existing account records.

What is the outcome in each scenario? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Scenario	Action
What happens to existing accounts?	<div style="border: 1px solid gray; padding: 5px;"> <input type="checkbox"/> Existing accounts show the old BPF.  <input checked="" type="checkbox"/> Existing accounts show the new BPF.  <input type="checkbox"/> Existing accounts only show the new stage.                 </div>
What happens to new accounts?	<div style="border: 1px solid gray; padding: 5px;"> <input type="checkbox"/> No BPF is linked to a new account.  <input checked="" type="checkbox"/> The new BPF shows only the new stage for a new account.  <input type="checkbox"/> The new BPF is showing in a new account.                 </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text Description automatically generated

Box 1: Existing accounts show the new BPF.

When an entity record is being created and if there are multiple BPFs defined on that entity. The system would do the following:

If the ProcessId field is set to Guid.Empty. The system will skip defaulting the BPF on that instance.

If the ProcessId field is set to specific BPF entity reference. The system will default to the specified BPF. If the ProcessId field on the record is not set. The system will default the BPF.

Box 2: No BPF is linked to a new account.

Note: A business process flow definition is represented as a custom entity and an instance of a process is stored as a record within that entity. Each record is

associated with a data record (such as an Account, Contact, Lead, or Opportunity) and in case of cross-entity processes, with a data record for each participating entity.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/business-process-fl>

**NEW QUESTION 156**

- (Exam Topic 3)

You create a canvas app for a sales team. The app has an embedded Power BI tile that shows year-to-date sales. Sales users do not have access to the data source that the tile uses.

Sales team users must be able to see data in the Power BI tile. You must minimize the level of permissions that you grant and minimize administrative overhead. You need to share another Power BI component to make the data visible. What should you share?

- A. The Power BI dataset the tile uses as a data source.
- B. The Power BI workspace that includes the tile.
- C. The Power BI dashboard that includes the tile.

**Answer: C**

**Explanation:**

Once shared, the PowerApps app will be accessible by all users who have permissions to access the app. However, in order to make the Power BI content visible to those users, the dashboard where the tile comes from needs to be shared with the user on Power BI. This ensures that Power BI sharing permissions are respected when Power BI content is accessed in an app.

Reference:

<https://powerapps.microsoft.com/en-us/blog/power-bi-tile-in-powerapps/>

**NEW QUESTION 158**

- (Exam Topic 3)

You are a Dynamics 365 for Customer Service developer.

You must trigger a mobile notification whenever a specific hashtag is posted from Twitter. The notification will send email to the company's social media teams distribution list.

You need to create a connection to the Twitter service and build a solution.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

**Answer Area**

- Sign in to the Business platform admin center and create a new project and connection set.
- Create a trigger to search for the new posts with the hashtag.
- Create an action to send a mobile notification.
- Sign in to Power Automate and create a new blank flow.
- Create a trigger to send a mobile notification.
- Select the social media connector, generate an authentication key from the service, and enter the key for the connection.
- Create an action to search for the new posts with the hashtag.
- Select the social media connector and enter the user credentials for the connection.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Actions**

- Sign in to the Business platform admin center and create a new project and connection set.
- Create a trigger to search for the new posts with the hashtag.
- Create an action to send a mobile notification.
- Sign in to Power Automate and create a new blank flow.
- Create a trigger to send a mobile notification.
- Select the social media connector, generate an authentication key from the service, and enter the key for the connection.
- Create an action to search for the new posts with the hashtag.
- Select the social media connector and enter the user credentials for the connection.

**Answer Area**

- Sign in to Power Automate and create a new blank flow.
- Select the social media connector and enter the user credentials for the connection.
- ← Create an action to search for the new posts with the hashtag →
- Create a trigger to send a mobile notification.

**NEW QUESTION 159**

- (Exam Topic 3)

You create and publish a Power BI report that contains an embedded canvas app. The report will be used by multiple people. The canvas app has an issue that must be corrected. You update the canvas app. You need to ensure that the updated canvas app is available in the published Power BI report. What should you do?

- A. Publish the Power BI report from Power BI Desktop.
- B. Manually refresh the data source on the published Power BI report.
- C. Publish the Power BI report from Power BI Desktop and reshare to any users.
- D. Publish the canvas app.

**Answer: B**

**Explanation:**

- If you change the data fields associated with the visual, you must edit the app from within the Power BI service by selecting the ellipsis (...) and then selecting Edit. Otherwise, the changes won't be propagated to Power Apps, and the app will behave in unexpected ways.
- The Power Apps visual can't trigger a refresh of Power BI reports and Power BI data sources from within Power BI Desktop. If you write back data from the app to the same data source as the report, your changes won't be reflected immediately in Power BI Desktop. Changes are reflected on the next scheduled refresh.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/powerapps-custom-visual#limitations-of-the-po>

**NEW QUESTION 164**

- (Exam Topic 3)

You are creating Power BI reports for a company.

A company that has a model-driven app wants to use Power BI reports within the app. You create the reports. You need to ensure that these reports are available within the app.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Share the Power BI report to all users.
- B. Add the Power BI report to the Site Map dashboards.
- C. Create a PCF file.
- D. Use the native reports in model-driven apps.
- E. Add the Power BI report to a dashboard in the model-driven app.

**Answer: BE**

**Explanation:**

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/add-powerbi-visual>

**NEW QUESTION 166**

- (Exam Topic 3)

A company is implementing a data model by using Dataverse.

The company requires the following columns in a new custom table:

Column name	Requirement
Special Notes	Must contain string data that stores 100 characters and be rendered as a multiline control.
Specification	Must contain string data that stores up to 8,000 characters and be rendered as a multiline control.
Student	Must contain an input control that can store a reference to an account or a contact in the system.
Course Type	Must contain a list of predefined options. Users must be able to select only one option.

You need to choose the column type that uses the least amount of database storage for each column.

Which column types should you choose? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Column name	Column type
Special Notes	Multiline Text Text Text Area Multiline Text
Specification	Multiline Text Text Text Area Multiline Text
Student	Lookup Choices Customer Lookup
Course Type	Choice Choice Choices Lookup

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

Column name	Column type
Special Notes	Multiline Text Text Text Area Multiline Text
Specification	Multiline Text Text Text Area Multiline Text
Student	Lookup Choices Customer Lookup
Course Type	Choice Choice Choices Lookup

**NEW QUESTION 171**

- (Exam Topic 3)

You create a Power Automate flow as part of a managed solution. The flow alerts users when files are uploaded to a SharePoint location. Files are uploaded to SharePoint at a much higher rate than expected. Users report that they receive too many notifications about uploaded files. You need to stop the flow and correct the issue.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Disable the flow in the managed solution	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; padding: 2px 5px;">▼</div> <div style="padding: 2px 5px;">Disable the flow from the Power Automate portal</div> <div style="padding: 2px 5px;">Disable the flow from the Azure portal</div> <div style="padding: 2px 5px;">Disable the flow from the Power Automate solution</div> </div>
Verify changes to the flow	<div style="border: 1px solid black; padding: 5px;"> <div style="border-bottom: 1px solid black; padding: 2px 5px;">▼</div> <div style="padding: 2px 5px;">Run the Flow checker and then turn on the updated flow</div> <div style="padding: 2px 5px;">Use the Test feature on the updated flow and then turn on the flow</div> <div style="padding: 2px 5px;">Turn on the flow and then use the Test feature for the updated flow</div> <div style="padding: 2px 5px;">Run the Flow checker and then use the Test feature on the updated flow</div> </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

<https://docs.microsoft.com/en-us/power-automate/edit-solution-aware-flow> <https://docs.microsoft.com/en-us/power-automate/error-checker>

**NEW QUESTION 176**

- (Exam Topic 3)

A company has marketing teams for different regions.

A user creates and publishes a chatbot within Microsoft Teams for their specific marketing team. The base metrics retrieved by the chatbot are relevant to all marketing teams.

The other marketing teams request access to the chatbot. You need to publish the chatbot to the entire company. What should you do?

- A. Configure the chatbot to be used with the Teams channel.
- B. Submit the chatbot for admin approval.
- C. Copy the published chatbot link and email it to the other teams
- D. Invite the other teams to the team that has the chatbot.
- E. Export the chatbot and import it into a corporate environment.

**Answer:** B

**Explanation:**

Show to teammates and shared users

You can share your bot by adding it to the Microsoft Teams app store, Built for your org > Built by your colleagues section. Only your teammates and shared users will find the bot there.

Important

Only teammates or shared users can find and install the bot in the Microsoft Teams app store Built by your colleague section. The bot will not show for everyone in the organization even if it is configured to allow everyone to use the bot. To show the bot to the organization, submit the bot for admin's approval to show in Microsoft Teams app store Built by your org section.

<https://docs.microsoft.com/en-us/power-virtual-agents/teams/publication-add-bot-to-microsoft-teams-teams>

**NEW QUESTION 180**

- (Exam Topic 3)

You configure and test a user interface (UI) flow. You plan to run the flow as a scheduled flow.

The UI flow must run on a Windows 10 device. As part of process automation, the UI flow must sign into the Windows 10 device with the credentials for a user account named User1.

You need to ensure that the flow runs during non-peak hours and requires no physical user intervention. What should you do?

- A. Ensure that all user sessions are signed out except for locked user sessions.
- B. Ensure that the User1 account has an active user session on the device.
- C. Ensure that all user sessions are signed out.
- D. Ensure that there are no active user sessions on the device.

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/power-automate/ui-flows/run-ui-flow>

**NEW QUESTION 185**

- (Exam Topic 3)

A user needs to create a Power Apps portal app.

The user is getting a permission denied error when creating the portal app.

You need to configure permissions to create the portal app.

Which three permissions should you configure? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. In the Power Platform admin center, ensure that the user account has read-write access.
- B. In Azure Active Directory, assign the Contributor role to the application at the subscription scope.
- C. In Azure Active Directory, ensure that the user has permission to register an app.
- D. In the Power Platform admin center, change the portal app owner to the user.
- E. In the Power Platform admin center, ensure that the user has the System administrator security role.

**Answer:** ACE

**Explanation:**

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/portals/create-common-problems> <https://docs.microsoft.com/en-us/power-apps/maker/portals/create-portal>
