## Exam Questions PL-100

Microsoft Power Platform App Maker

## About Exambible

*[Your Partner of IT Exam](#)*

## Found in 1998

Exambible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, Exambible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

DRAG DROP - (Topic 4)

You are developing an app that warehouse workers will run on their phones to perform inventory counts.

You need to design the app.

Which type of control should you use? To answer, drag the appropriate control types to the correct requirements. Each control type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection presents a complete solution.

Control types

Text box

Combo box

Slider

Radio

Answer Area

Requirement	Control type
Capture decimal numbers.	
Select multiple products from a list.	
Set the status of a product.	

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Control types

Text box

Combo box

Slider

Radio

Answer Area

Requirement	Control type
Capture decimal numbers.	Text box
Select multiple products from a list.	Combo box
Set the status of a product.	Radio

NEW QUESTION 2

HOTSPOT - (Topic 4)

HOTSPOT

A company uses Microsoft Teams and Microsoft 365. Employees use Microsoft Excel to create checklist and capture measurements.

The company requites a Microsoft Power Platform app to consolidate the checklists and perform the measurements- Network connectivity may not be available when measurements are taken.

Which features should you use? To answer, select the appropriate options in the answer area

NOTE: Each coned selection is worth one point.

Answer Area

Requirement	Feature
App type	<div><div>Model-driven app</div><div>Canvas app</div><div>Model-driven app</div></div>
Data source	<div><div>Cloud Excel table</div><div>Local Excel table</div><div>Cloud Excel table</div></div>
Offline mode	<div><div>Power Apps mobile</div><div>Field Service Mobile</div><div>Power Apps mobile</div><div>Power Apps for Windows</div><div>Power Apps wrap</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 3

HOTSPOT - (Topic 4)

You are configuring security to enable users to analyze data by using Microsoft Excel templates.

You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

Power Apps

File Save and Close Actions Help

Security role: TemplateAdministrator Working on solutions: Default Solution

Details Core Records Marketing Sales Service Business Management Service Management Customization Missing Entities Business Process Flows Custom Entities

Entity	Create	Read	Write	Delete	Append	Append To	Assign	Share
Business Unit								
Channel Property Group								
Currency								
Document Template								
Mailbox Auto Tracking Folder								
Organization								
Personal Document Template								

Privacy Related Privileges

Enabling these privileges will allow users to extract customer data from Microsoft Dynamics 365. For more information, review the corresponding user documentation.

Document Generation		Dynamics 365 for mobile	
Export to Excel		Go Offline in Outlook	
Mail Merge		Print	
Sync to Outlook		Use Dynamics 365 App for Outlook	

Miscellaneous Privileges

Act on Behalf of Another User		Approve Email Addresses for Users or Queues	
Assign manager for a user		Assign position for a user	
Assign Territory to User		Bulk Edit	

Key

None Selected User Business Unit Parent: Child Business Unit Organization

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.  
Which permission should you change?

NEW QUESTION 4

- (Topic 4)

You design a canvas app for users to search thousands of records. You select a data source that supports delegation to optimize performance. You need to create the app so that it takes advantage of the delegable functionality of the data source. What should you do?

- A. Run multiple processes simultaneously.
- B. Use the query functions the data source provides.
- C. Use the data returned from the data source in multiple languages.
- D. Connect to the same data source as different users at run time.

Answer: B

NEW QUESTION 5

DRAG DROP - (Topic 4)

A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories.

You are creating an app to manage requests for new products.

The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings.

Only two new tables should be created in Microsoft Dataverse:

? Products: Holds the products that can be requested.

? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category.

You need to identify the data types to use when building the table columns in Dataverse.

Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data types

Lookup

Choice

Text

Answer Area

Scenario

Create a column in the Products table that displays the category of the product

Create a column in the Products table for the product ID of the product

Create a column in the Requests table that allows the user to select form a list of available products

Data types

Data type

Data type

Data type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Text

Text columns can contain text characters. This column type has several format options that will change the presentation of the text.

Box 2: Lookup

When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.

Box 3: Choice

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

## NEW QUESTION 6

HOTSPOT - (Topic 4)

You create a canvas app for a service company.

Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

▼

Name\_DataCard1.Default

Name\_DataCardKey1.Default

Name\_DataCardValue1.Default

Which action should you perform on the People icon?

▼

In the On Select property, set the Activity form to Edit mode.

In the On Select property, set the Activity form to View mode.

Move the icon to the Activity form and set the On Select property to the Activity screen.

Move the icon to the DetailForm1 and set the On Select property to open the Activity screen.

- A. Mastered
- B. Not Mastered

**Answer: A**

### Explanation:

Box 1: Name\_DataCardValue1.Default

Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.

The Select function simulates a select action on a control as if the user had clicked or tapped the control. As a result, the OnSelect formula on the target control is evaluated.

## NEW QUESTION 7

DRAG DROP - (Topic 4)

A company uses a canvas app.

The finance team and sales team require access to the canvas app. You must perform the following actions:

- Add members of the sales team to the app as users.
- Add members of the finance team to the app as co-owners.

The app must be shareable with current and future team members.

You need to request creation of group types for team members. This must enable sharing of the app with the least amount of effort.

Which group types should you request? To answer, drag the appropriate group types to the correct activities. Each group type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Group types

Security group

Distribution group

Dynamic group

Answer Area

Activity

Add members of the sales team to the app as users.

Add members of the finance team to app as co-owners.

Group type

Dynamic group

Security group

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Group types

Security group

Distribution group

Dynamic group

Answer Area

Activity

Add members of the sales team to the app as users.

Add members of the finance team to app as co-owners.

Group type

Dynamic group

Security group

NEW QUESTION 8

DRAG DROP - (Topic 4)

You ate designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps. Employees must be able to look up their employee ID number and enter time-off start and end dates in the app. You need to configure the elements of the data source. Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Data elements

Table

View

Record reference

Answer Area

Data

Time-off dates for all employees

Employee ID number

Data element

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 9

DRAG DROP - (Topic 4)

A company has the following divisions: wholesale and retail. The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database. You need to ensure that each user sees data only for the team to which the user is assigned. How should you secure the report? To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Options

Power BI Service

Power BI Desktop

Common Data Service

Power Platform Admin center

Answer Area

Action

Create the team as a role.

Add members to the role.

Option

Option

Option

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Power BI Desktop

You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.

To define security roles, follow these steps.

? Import data into your Power BI Desktop report, or configure a DirectQuery connection.

? From the Modeling tab, select Manage Roles.

? From the Manage roles window, select Create.

? Etc.

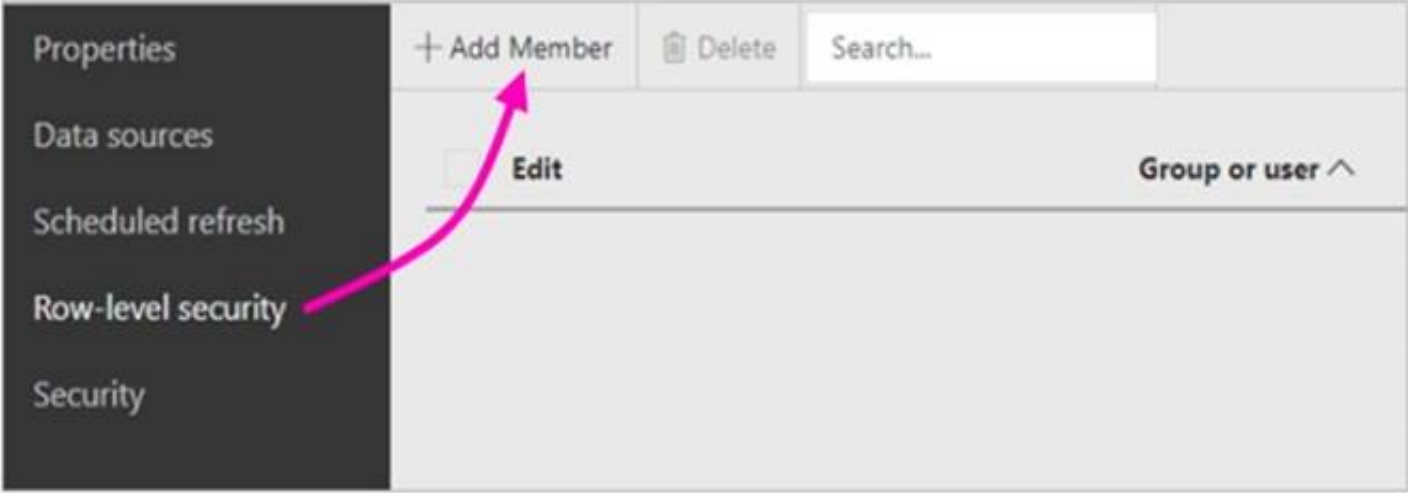

Box 2: Power BI Service

After you save your report in Power BI Report Server, you manage security and add or remove members on the server.

\* 1. In Power BI Desktop, save the report to Power BI Report Server. You need to use the version of Power BI Desktop for Power BI Report Server.

\* 2. In Power BI Report Service, select the ellipsis (...) next to the report.

\* 3. Select Manage > Row-level security.

On the Row-level security page, you add members to a role you created in Power BI Desktop.

NEW QUESTION 10

DRAG DROP - (Topic 4)

You are an app and report maker. You provide visualizations for two departments in an organization.

Each department requires department-specific visualizations:

Department	Requirement
Department1	Provide unstructured answers to free text survey questions.
Department2	Chart real-time data in columns that groups complaints by category, urgency, and status.

You need to create the visualizations.

Which chart type should you use? To answer, drag the appropriate chart type to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Chart types	Requirement	Chart type
Multi-series	Unstructured answers to free text survey questions.	
Tag		
Stacked column	Real-time column chart that groups complaints by category, urgency, and status.	

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Tag

Box 2: Multi-series

Multi-series charts: Charts that display data with multiple series values mapped to a single category value.

NEW QUESTION 10

DRAG DROP - (Topic 4)

You are creating a canvas app that reads and writes to a data source.

You need to configure the app to perform create and update data operations.

Which functions should you use? To answer, drag the appropriate functions to the correct data operations. Each function may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE; Each correct selection is worth one point.

Functions	Answer Area						
<div>Patch</div> <div>Update</div> <div>AddColumns</div>	<table><thead><tr><th>Data operation</th><th>Function</th></tr></thead><tbody><tr><td>Replace an entire record.</td><td></td></tr><tr><td>Update specific columns.</td><td></td></tr></tbody></table>	Data operation	Function	Replace an entire record.		Update specific columns.	
Data operation	Function						
Replace an entire record.							
Update specific columns.							

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Functions	Answer Area						
<div>Patch</div> <div>Update</div> <div>AddColumns</div>	<table><thead><tr><th>Data operation</th><th>Function</th></tr></thead><tbody><tr><td>Replace an entire record.</td><td>Patch</td></tr><tr><td>Update specific columns.</td><td>AddColumns</td></tr></tbody></table>	Data operation	Function	Replace an entire record.	Patch	Update specific columns.	AddColumns
Data operation	Function						
Replace an entire record.	Patch						
Update specific columns.	AddColumns						

NEW QUESTION 12

- (Topic 4)

You create a dashboard in Power BI. You share the dashboard with the sales team. Sales team members report that they can see information for the entire company. You need to ensure that the team is able to see only data for their team. Where must you configure this restriction?

- A. Dashboard
- B. Report
- C. Dataset
- D. Settings

Answer: C

Explanation:

Restrict access to the dataset.

Note: Another way of setting access is through manage permission in the dashboard, report, or dataset. If you share a dashboard, by default the report and the dataset will also be shared as read-only for users.

Reference:

<https://radacad.com/dashboard-sharing-and-manage-permissions-in-power-bi-simple-but- useful>

NEW QUESTION 17

- (Topic 4)

A company uses Power Apps in a single Microsoft Dataverse environment.

Users are divided into two groups about not a canvas app should work. The company decides that each group of users will try a version of the app for one week and switch to the other version of the app the following week.

You need to manage the app creation. What should you do?

- A. Create one app with two different version numbers.
- B. Create one app with two different version notes.
- C. Create two apps with the same name.
- D. Create two apps with different app names.

Answer: A

NEW QUESTION 22

DRAG DROP - (Topic 4)

You are developing a Power BI report for a company.

The Power BI report must display company performance metrics in Power BI service. The report must include three fields in a visualization. The data for the report exists in a dataset.

The company will display the report on a large television screen during team meetings. You need to create the report.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer and arrange them in the correct order.

Actions

Add the report to a new dashboard

Create a report

Add a visualization to the report

Create a paginated report

Select a dataset

Answer Area

>

<

^

v

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Select a dataset  
Sign in to your Power BI online account, or sign up, if you don't have an account yet. Open the Power BI service. Get some data and open it in report view.  
Box 2: Create a report  
Use that data to create visualizations and save it as a report. Box 3: Add a visualization to the report  
Box 4: Add the report to a new dashboard  
Visualizations (known as visuals for short) display insights that have been discovered in the data. A Power BI report might have a single page with one visual or it might have pages full of visuals. In the Power BI service, visuals can be pinned from reports to dashboards.

NEW QUESTION 26

HOTSPOT - (Topic 4)  
A company uses a model-driven app. You create a Power BI sales report.  
The executive of the company wants all users to see tiles from the report in the model- driven app.  
You need to ensure all users can see the tiles.  
What should you do? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Step

Setting

Allow addition of Power BI visualization tiles.

Power Platform Environment settings

Power Apps settings

Power BI Service settings

Power BI Desktop settings

Add tiles to a dashboard.

Create a personal dashboard

Create a Power BI dashboard.

Create a system dashboard.

Allow users to view tiles.

Share tile and share dashboard.

Share report and share dashboard.

Share tile and publish dashboard.

Share report and publish dashboard.

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Power Platform Environment settings  
Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.  
? In the Power Platform admin center, select an environment.  
? Select Settings > Product > Features.  
? Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.  
? Select Save.  
Box 2: Create a personal dashboard  
You can embed Power BI tiles on your personal dashboard.  
? Open your app and go to Dashboards.  
? Select an existing personal dashboard or select New to create one.  
? On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.  
? Add new Power BI tile.

? In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.  
? Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.  
? Select Save to save your dashboard.  
Box 3: Share report and share dashboard.  
To share your personal dashboard that contains Power BI visualizations you must same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

**NEW QUESTION 29**

HOTSPOT - (Topic 4)  
You need to create a model-driven app without using code.  
Which tools should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Tool
Select the forms and views that the app will use.	<div><div></div><div>Site Map designer</div><div>Solution Explorer</div><div>App designer</div><div>Entity view</div></div>
Design the navigation for the app.	<div><div></div><div>Site Map designer</div><div>Dynamics 365 Admin center</div><div>Microsoft Azure DevOps</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: App designer  
As an app maker, you can create and edit public views by using Power Apps.  
Box 2: Site Map designer  
Site maps define the navigation for your app. Create a site map for your app with ease by using the tile-based site map designer.

**NEW QUESTION 33**

- (Topic 4)  
A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.  
A user updates the Excel file daily with updated data.  
The company needs a solution that automatically displays the latest analytics.  
You need to create a basic report that contains pie charts that display the most profitable channels.  
You need to propose the right solution.  
Solution: Model-driven application using native charts. Does the solution meet the goal?

- A. Yes

Answer: B

**NEW QUESTION 37**

DRAG DROP - (Topic 4)  
A company plans to use Microsoft Power Platform to modernize their business.  
Sales commissions are given only to the representatives who sell items from a designated category of products. The company wants to minimize the effort needed to manage data security.  
You need to describe how to store real-world objects to the business stakeholders.  
What should you use? To answer, drag the appropriate tables to the correct objects. Each table may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Tables	Answer Area								
Organization-owned standard table	<table><thead><tr><th>Object</th><th>Table</th></tr></thead><tbody><tr><td>Item manufacturer</td><td></td></tr><tr><td>Item model</td><td></td></tr><tr><td>Item inventory</td><td></td></tr></tbody></table>	Object	Table	Item manufacturer		Item model		Item inventory	
Object	Table								
Item manufacturer									
Item model									
Item inventory									
Activity table									
Virtual table									

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Tables

Organization-owned standard table

User-owned standard table

Activity table

Virtual table

Answer Area

Object

Item manufacturer

Item model

Item inventory

Table

Organization-owned standard table

User-owned standard table

Virtual table

NEW QUESTION 41

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Microsoft Power Platform. All users in the company have read/write and create access to SharePoint. You create a canvas app that displays data from a SharePoint list. A group of users must use the app without the ability to change the data source. You need to shore the app with the users.

What should you do? To answer, drag the appropriate actions to the correct components. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions

Send all users an email invitation.

Enable Can use permission.

Set the users as co-owners.

Enable Can edit permission.

Answer Area

Component

Canvas app

SharePoint connection

Action

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Send all users an email invitation.

Enable Can use permission.

Set the users as co-owners.

Enable Can edit permission.

Answer Area

Component

Canvas app

SharePoint connection

Action

Send all users an email invitation.

Enable Can use permission.

NEW QUESTION 45

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Category classification model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

A Category classification model categorizes text by its meaning. Reference:  
<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>

NEW QUESTION 47

HOTSPOT - (Topic 4)

A company uses Microsoft Dataverse to store holiday employee request data.

An HR manager needs a report that displays overview information about the employee requests.

You need to design a report that visualizes request data over time and type.

Which Microsoft Power BI functionalities should you use to complete each step? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Step	Functionality
Create additional relationships between tables	<div>Model view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Change the data type of a column	<div>Data view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Design visuals	<div>Report view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Choose data for import	<div>Navigator</div> <div>Data view</div> <div>Report view</div> <div>Navigator</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Step	Functionality
Create additional relationships between tables	<div>Model view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Change the data type of a column	<div>Data view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Design visuals	<div>Report view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Choose data for import	<div>Navigator</div> <div>Data view</div> <div>Report view</div> <div>Navigator</div>

NEW QUESTION 50

DRAG DROP - (Topic 4)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties. You need to create a solution for the apps.

Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
<div>Entity</div>	Reuse the custom control for multiple canvas apps.	<div></div>
<div>Component</div>		
<div>Component library</div>	Receive input data through a custom property.	<div></div>
<div>Component framework</div>		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Component library  
Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.  
By creating a component library, app makers easily share and update one or more components with other makers.  
Component libraries are containers of component definitions that make it easy to: Discover and search components.  
Publish updates.  
Notify app makers of available component updates.  
Box 2: Component  
A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 51

- (Topic 4)  
A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

- A. Lookup
- B. Choice
- C. Choices
- D. Text

Answer: A

NEW QUESTION 56

DRAG DROP - (Topic 4)  
DRAG DROP  
A company uses data from a publicly available web service. You plan to create a tabular report by using Power 81 Desktop to visualize data from the web service. The data returned in one column is numeric and must be converted to a corresponding text  
You need to create the report and make it available only to co workers.  
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.  
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select

Actions

Create a connection to the web service.

Publish to the Power BI service.

Create a table and input the data from the web service.

Perform data transformation.

Create the visualization.

Publish to AppSource.

>

<

Answer area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Create a connection to the web service.

Publish to the Power BI service.

Create a table and input the data from the web service.

Perform data transformation.

Create the visualization.

Publish to AppSource.

NEW QUESTION 58

HOTSPOT - (Topic 3)  
You need to implement the student attendance requirements.  
What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Cooking class ownership

Student attendance

Table type or ownership

User owned by instructors

User owned by students

User owned by instructors

User owned by chefs

Organization owned

Appointment

Task

Appointment

Custom activity

Recurring appointment

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement

Cooking class ownership

Recurring appointment

NEW QUESTION 60

DRAG DROP - (Topic 3)

You need to create the food bank notification.  
Which four actions should you perform in sequence? To answer, move the appropriate

Actions

Create a food bank topic.

Retrieve the food bank locations.

Authenticate the food bank user.

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

Answer area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Create a food bank topic.

Retrieve the food bank locations.

Authenticate the food bank user.

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

Answer area

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

NEW QUESTION 63

HOTSPOT - (Topic 2)

You need to implement features for the solution.  
Which Power Platform component should you use for each feature? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Feature	Component
Mobile app for Sales Log workbook	<div><div></div><div>Canvas app</div><div>Model-driven app</div><div>Power Virtual Agents chatbot</div></div>
Embed KPIs for sales quotas by region	<div><div></div><div>Content Pack</div><div>Power BI Desktop</div><div>Power BI service</div></div>
Transfer of key sales information to the Job Setup entity	<div><div></div><div>Power Automate</div><div>Business process flow</div><div>Power Virtual Agents</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Model-driven app

The Sales app must meet the following requirements:

? Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.

Compared to canvas apps, model-driven apps in PowerApps are based on underlying data — specifically, the data stored in Common Data Service (CDS).

Box 2: Power BI Desktop

You can create a KPI in Power BI Desktop.

? Open your report editor in Power BI Desktop then select a report on which you are working.

? On your right, you will see a Visualizations pane and a Fields pane.

? From the Visualizations pane, select the KPI visual.

? Etc.

Box 3: Power Automate

NEW QUESTION 68

HOTSPOT - (Topic 2)

You need to resolve the issues found during testing.

Which option should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Option
Testers see all time entries.	<div><div></div><div>Hierarchical security</div><div>Security group</div><div>Security role</div></div>
Testers are able to edit existing time entries.	<div><div></div><div>Control property</div><div>Field-level security</div><div>Security role</div></div>
Managers cannot see required information.	<div><div></div><div>Access team template</div><div>Field-level security</div><div>Hierarchical security</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Security role

Scenario: Employees must only be able to access their own time tracking records from the app.

Testers report that they can see time entries in the Time Tracker app, not just their own.

Box 2: Field-level security

Scenario: Employees must only be able to modify time records for the current and previous day.  
Testers report that they can edit any existing time entries.  
Box 3: Hierarchical security  
You use field security tables to apply field-level security, which restricts field access to specified users and teams.

**NEW QUESTION 69**

- (Topic 2)  
You need to modify the entity form to resolve the customer request number issue. What should you do?

- A. Use a calculated field
- B. Change the data type of the customer request number field to Lookup
- C. Change the data type of the customer request number field to Autonumber

**Answer: C**

**Explanation:**

Scenario: Users report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number. Autonumber columns are columns that automatically generate alphanumeric strings whenever they are created.  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/autonumber-fields>

**NEW QUESTION 72**

HOTSPOT - (Topic 1)  
You need to roll back the mobile app to an earlier version.

Requirement	Action
Identify the currently published version and view version notes.	<div>View the session details page for the app in Power Apps Studio.</div> <div>View environment details for the app in the Power Admin portal.</div> <div>View details for the app in the Power Apps Maker portal.</div>
Revert to an earlier version of the app.	<div>Select Restore on the previous version of the app.</div> <div>Export the previous version of the app and import as a new version.</div> <div>Delete versions of the app until the desired version is the most recent.</div>

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Action
Identify the currently published version and view version notes.	<div>View the session details page for the app in Power Apps Studio.</div> <div>View environment details for the app in the Power Admin portal.</div> <div>View details for the app in the Power Apps Maker portal.</div>
Revert to an earlier version of the app.	<div>Select Restore on the previous version of the app.</div> <div>Export the previous version of the app and import as a new version.</div> <div>Delete versions of the app until the desired version is the most recent.</div>

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: View the sessions details page for the app in Power Apps Studio  
Use PowerApps Studio, select the App, and choose and you will be directed to the app's Versions tab in PowerApps portal. There should be one version marked Live.

Details • Share • Versions • Settings					
PowerApps keeps a version history of your apps.					
VERSION	MODIFIED	MODIFIED BY	POWERAPPS RELEASE (?)	PUBLISHED	COMMENT
1	6/7/2017 9:01:43 AM	Karthik Bharathy	2.0.659	Live	

Box 2: Select Restore on the previous version of the app. Restore an app from your account  
? Open powerapps.com, and then click or tap Apps in the left navigation bar.  
? Near the right edge, click or tap the info icon for the app that you want to restore.  
? Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

Details • Share • Versions • Settings • Analytics (preview)

#### NEW QUESTION 77

- (Topic 1)

You need to provide the app to Tailwind Traders. What should you do?

- A. Within Managed Properties, set the value of the Allow customizations option to true
- B. Export the app as a managed solution.
- C. Use the Share App feature.
- D. Within Managed Properties, set the value of the Allow customizations option to false
- E. Export the app as a managed solution.
- F. Within Managed Properties, set the value of the Allow customizations option to false
- G. Export the app as an unmanaged solution.

**Answer: C**

#### Explanation:

Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

#### NEW QUESTION 82

HOTSPOT - (Topic 1)

You need to create a flow for sending required emails to the regional manager.

How should you create the flow? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Option	Type
Flow type to use	<div><div>Instant</div><div>Automated</div><div>Business Process</div><div>Scheduled</div></div>
Trigger to start flow	<div><div>HTTP Webhook</div><div>Power Apps</div><div>Common Data Service when a record is created</div><div>Office 365 Outlook Send an email</div></div>

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

Graphical user

interface, text, application, email Description automatically generated

Box 1: Business Process

Scenario: If a sales representative submits a status report and assigns the At Risk status to a process, the app must prompt the sales representative to enter a detailed description for the risk. This information must be emailed to the regional manager.

Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind. This user experience can be tailored so that people with different security roles can have an experience that best suits the work they do.

Box 2: Common Data Service when a record is created

The Microsoft Dataverse (Common Data Service) connector provides the following triggers to help you define when your flows start:

- ? When a row is created, updated, or deleted
- ? When an action is performed
- ? When a flow step is run from a business process flow

#### NEW QUESTION 83

- (Topic 4)

You are creating a canvas app for a company.

The app must access data from a private web service that is provided by the company. You need to set up the connector.

Which connector type should you use?

- A. Custom

- B. Standard
- C. First-party
- D. Premium

Answer: A

NEW QUESTION 87

- (Topic 4)

An automobile company uses Power Apps. The company uses a model-driven app to manage customers and repairs. The Customer table has a custom column of type text named Best time to call. On the Repair form, employees require the Best time to call column to be displayed next to the customer name. You need to modify the model-driven app to display the Best time to call column. Which two steps should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add The Best time to call column to the quick view Repair form.
- B. Create a quick view form for the Repair table.
- C. Create a quick view form for the Customer table.

Answer: CD

NEW QUESTION 91

- (Topic 4)

A company uses Power Apps. The company creates a solution that contains the following items:

- environment setting
- flow that accesses Microsoft Dataverse
- plug-in with an unsecure configuration
- environment variable with a default value

The company plans to import solutions manually. You need to document the solution component type that prompts for user input. Which component type should you document?

- A. Environment variable
- B. Environment setting
- C. Connection reference

Answer: D

NEW QUESTION 94

HOTSPOT - (Topic 4)

A company creates a Power Apps app that allows service representatives to record information about on-site client visits. Service representatives perform a one-hour site visit with each client each quarter.

Service representatives use the app to perform the following activities:

- ? View their scheduled visits for the day.
- ? Record notes from service visits.
- ? Schedule service technicians for issues uncovered during site visits.
- ? Scan and upload service quote forms to a folder named Service Quote folder on Microsoft OneDrive once the customer has signed a service quote.

Service quotes that are over \$10,000 are automatically sent to the service manager for review and approval. Visits that are not closed at the end of the day are automatically moved to the following day unless it is the last day of the quarter. All client visits not performed for the quarter are escalated to the service manager for follow-up. You need to create flows to meet the requirements. Which type of flows should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Type of flow
Move client visits not completed for the day.	<div><div></div><div>Scheduled flow</div><div>Automated flow</div><div>Adaptive card flow</div><div>Team flow</div></div>
Approve service quote.	<div><div></div><div>Automated flow</div><div>Button flow</div><div>Scheduled flow</div><div>Team flow</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Adaptive card flow

Adaptive Cards are a platform-agnostic method of sharing and displaying blocks of information without the complexity of customizing CSS or HTML to render them.

Directing content to Teams channels:

Post your own adaptive card as the Flow bot to a channel

This action posts an adaptive card as a Flow bot to a specific Teams channel. In this case, you will be prompted for Teams instance, and a channel where the card will be posted. The flow-maker will have to have access to the Teams instance in order to post an adaptive card there. In this case, only URL buttons function by redirecting to the URL configured within the flow.

Box 2: Button flow

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

NEW QUESTION 99

DRAG DROP - (Topic 4)

A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database.

You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration.

Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Answer Area	
	Data	Component
Column	Excel data	Component
Table	Customer data	Component
Row	Customer identifier	Component
Data source	Product data	Component

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Table

Box 2: Data source Box 3: Column

Box 4: Row

NEW QUESTION 100

- (Topic 4)

DRAG DROP

A company uses Microsoft Power Platform in a production environment. The company is defining new business processes in a prototyping environment. You create components in both environments.

You need to package the components you create.

Which solution types should you use? To answer, drag the appropriate solution types to the connect components. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution types	Answer Area	
	Component	Solution type
Managed	Canvas app created in production and used only in production.	
Unmanaged	Tables created in prototype to allow only new views added in production.	
Segmented		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Solution types	Answer Area	
	Component	Solution type
Managed	Canvas app created in production and used only in production.	Managed
Unmanaged	Tables created in prototype to allow only new views added in production.	Segmented
Segmented		

NEW QUESTION 104

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles. Development and testing must be performed using production data. Multiple testers must be used at each testing stage. You need to provision and configure new environments for development and testing. Solution:

- ? Provision sandbox environments named S1 and S2.
- ? Copy the production environment to both S1 and S2.
- ? Use S1 for development and S2 for testing.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer:** A

**Explanation:**

A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

**NEW QUESTION 105**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use an Entity Extraction model.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer:** B

**Explanation:**

AI Builder entity extraction models recognize specific data in the text that you target based on your business needs.

The model identifies key elements in the text and then classifies them into predefined categories. This can help you transform unstructured data into structured data that's machine-readable. You can then apply processing to retrieve information, extract facts, and answer questions.

Note: Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

**NEW QUESTION 106**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a business rule on the appropriate data entity with a scope of entity.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer:** B

**Explanation:**

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft->

**NEW QUESTION 110**

- (Topic 4)

You create a new solution publisher and include a publisher prefix value.

Which two actions can you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You can change contact details of a publisher after you create the publisher
- B. When you change a solution publisher prefix, you can change the schema name for existing components
- C. You can change the schema name of a publisher after creating the publisher
- D. You can add a component from one solution to another solution that has a different publisher

**Answer:** AD

**Explanation:**

Once you introduce a publisher for a component in a managed solution, you can't change the publisher for the component.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm#solution-publisher>

**NEW QUESTION 115**

HOTSPOT - (Topic 4)

A company uses two SQL Server environments and two Common Data Service environments.

The company policy states that only specific administrators can create environments. SQL Server and Common Data Service groups must be distinct.

You need to assign security access.

What should you assign? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Role	Security access
Admin users for SQL environments	<div>▼</div> <div>Environment Maker</div> <div>Environment Admin</div> <div>System Administrator and Environment Security group</div> <div>Power Platform Administrator and Environment Security group</div>
Admin users for Common Data Service environments	<div>▼</div> <div>Environment Maker</div> <div>Environment Admin</div> <div>Global Administrator</div> <div>System Administrator</div>
Users that create Common Data Service apps	<div>▼</div> <div>System Customizer</div> <div>Environment Maker</div> <div>Environment Admin</div> <div>System Administrator</div>
Users that create SQL apps	<div>▼</div> <div>System Customizer</div> <div>Environment Maker</div> <div>Environment Admin</div> <div>System Administrator</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: System Administrator and Environment Security group Security model for the databases

When a database is created, the users who have environment roles assigned to them, will continue to maintain those privileges.

Users with Environment Admin role are now assigned to System Administrator role. Users with Environment Maker continue to possess the same role.

Box 2: Environment Admin

The Environment Admin role can perform all administrative actions on an environment, including the following:

? Add or remove a user from either the Environment Admin or Environment Maker role.

Box 3: Environment Maker

Environment Maker: Can create new resources associated with an environment, including apps, connections, custom APIs, gateways, and flows using Microsoft Power Automate. However, this role doesn't have any privileges to access data within an environment. More information:

Box 4: System Customizer

System Customizer: Has full permission to customize the environment. However, users

with this role can only view records for environment entities that they create.

NEW QUESTION 118

- (Topic 4)

You receive ideas from employees in a Microsoft Teams channel. Managers are not members of the Teams channel Submissions must be reviewed by three managers who are determined by submission type. You need approval from the managers to process submissions. What should you create?

- A. approval request in the Teams channel that requires a response from all approvers
- B. approval request in a chat with the three managers that requires a response from all approvers
- C. approval template that requires responses to be completed m order
- D. approval template that requires a response from all approvers

Answer: B

NEW QUESTION 119

HOTSPOT - (Topic 4)

A company is building a Power Apps app to track key project tasks.

Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.

You need to configure a solution to change the text on the header bar.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Where should you apply logic to change the text?	<div>On the header control.</div> <div>On each RiskStatus slider input.</div> <div>In the global variables of the Power Apps app.</div> <div>On the OnStart property of the Power Apps app.</div>
Which formula should you use?	<div>SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)&gt;=150? "HIGH RISK" : ""</div> <div>IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)&lt;150, "", HIGH RISK")</div> <div>Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatis3.value)&gt;=150, "HIGH RISK")</div> <div>UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value&gt;=150), "HIGH RISK")</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: On each RiskStatus slider input

You can change the value based on input.

Box 2: Updateif(..)

Use the UpdateIf function to modify one or more values in one or more records that match one or more conditions. The condition can be any formula that results in a true or false and can reference columns of the data source by name. The function evaluates the condition for each record and modifies any record for which the result is true.

NEW QUESTION 122

DRAG DROP - (Topic 4)

You store data about products in two Microsoft Excel worksheets. The data contains duplicate rows.

You need to consolidate data from the two worksheets into a Microsoft Dataverse custom table.

In which order should you perform the actions? To answer, move all actions from the list of

Actions	Answer Area
Upload the worksheets to OneDrive	
Add conditional columns to perform checks on the data	
Create queries for the worksheets	
Append the output from the queries	
Create a dataflow	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Upload the worksheets to OneDrive

A data source needs to be specified. The data needs to be available. Step 2: Create a dataflow

Step 3: Create queries for the worksheets

You can shape your data selection into a form that works best for your table using a Power Query editing experience, similar to the Power Query Editor in Power BI Desktop.

Step 4: Add conditional columns to perform checks on the data Step 5: Append the output of the queries

#### NEW QUESTION 125

DRAG DROP - (Topic 4)

You have the following Common Data Service entities: BusinessContracts and

You need to configure an N:N relationship between the two entities.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Select <b>Add relationship</b> and then select the many-to-many relationship option.	
Select the BusinessAccounts entity as the related entity.	
Open the relationship tab of the BusinessContracts entity.	
Choose the Relationship Name and Relationship Entity Prefix.	

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Step 1: Open the relationship tab of the BusinessContracts entity. View entity relationships

From the Power Apps portal, select either Model-driven or Canvas design mode. Select Data > Entities and select the entity that has the relationships you want to view. With the Relationships tab selected, you can select the following views:

Step 2: Select Add relationship.. Create relationships

While viewing entity relationships, in the command bar, select Add relationship and choose Many-to-many.

Step 3: Select the BusinessAccounts entity as the related entity.

#### NEW QUESTION 129

- (Topic 4)

You create a canvas app that uses the following resources:

- Power Automate cloud flow
- Custom connector
- Microsoft Dataverse customization
- Connection

You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

- A. Custom connector
- B. Connection
- C. Microsoft Dataverse customization
- D. Power Automate cloud flow

**Answer:** D

#### NEW QUESTION 134

- (Topic 4)

You complete work on a new canvas app in a development environment and add the app to a solution. You export the solution from the development environment and import the solution into a production environment.

After several days you notice that the background color for the canvas app in the production environment has changed from white to grey.

You need to determine why the background color changed.

What are two possible causes for the background color change? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You recently changed the Office 365 theme.
- B. You exported a managed copy of the solution and imported the solution as an unmanaged solution.
- C. You modified the canvas app in the unmanaged solution.
- D. You exported and imported an unmanaged copy of the solution and a co-worker modified the canvas app.
- E. You chose a different theme from the Theme menu inside the canvas app.

**Answer:** AC

#### Explanation:

A: You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system.

C: Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution. You also have the ability to create restrictions on the components within the solution.

Note: Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited.

### NEW QUESTION 137

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera.

Proposed solution:

? Create a Category Classification custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer:** B

#### Explanation:

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

### NEW QUESTION 139

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

? Create an Object Detection custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer:** A

#### Explanation:

To train an object detection model to recognize your objects, you have to gather images that contain those objects.

The first thing you'll do when you create an AI Builder object detection model is to define its domain.

Upload images

Then Train and publish your object detection model

The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 141

HOTSPOT - (Topic 4)

HOTSPOT

Users in your company vote on color choices for marketing materials by using the following canvas app:

Enter new color:

Marine blue

Add color

Color Options

☐ Sky blue

☒ Dark blue

☐ Marine blue

Clear Selection

Users enter color names into a text control and then select Add color to add the color to the Color options radio control. You must remove all the listed colors when a user selects Clear Selection

You need to implement the functionality.

Which Power Fx formulas should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Action	Power Fx formula
User selects <b>Add color</b> .	<div><div>If(txtColor.Value &lt;&gt;"", Collect(ColorList, txtColor.Value))</div><div>If(txtColor.Value &lt;&gt;"", Collect(ColorList, txtColor.Value))</div><div>If(Value(txtColor.Text) &lt;&gt;"", Collect(ColorList, txtColor.Text))</div><div>If(Value(txtColor.Color) &lt;&gt;"", Collect(ColorList, txtColor.Color))</div></div>
User selects <b>Clear Selection</b> .	<div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div><div>Reset(radioselector); Clear(ColorList)</div><div>Reset(radioselector); Refresh(ColorList)</div><div>Revert(radioselector); Remove(ColorList)</div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Power Fx formula
User selects <b>Add color</b> .	<div><div>If(txtColor.Value &lt;&gt;"", Collect(ColorList, txtColor.Value))</div><div>If(txtColor.Value &lt;&gt;"", Collect(ColorList, txtColor.Value))</div><div>If(Value(txtColor.Text) &lt;&gt;"", Collect(ColorList, txtColor.Text))</div><div>If(Value(txtColor.Color) &lt;&gt;"", Collect(ColorList, txtColor.Color))</div></div>
User selects <b>Clear Selection</b> .	<div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div><div>Reset(radioselector); Clear(ColorList)</div><div>Reset(radioselector); Refresh(ColorList)</div><div>Revert(radioselector); Remove(ColorList)</div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div></div>

NEW QUESTION 146

DRAG DROP - (Topic 4)

You plan to create apps for a company.

You need to identify the Power Platform tools required.

What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Power Virtual Agents bot	Create an app with a customized user interface that allows users to quickly create support tickets.	Tool
Power Automate	Create an app that uses a guided business process to navigate through all records associated with a support ticket.	Tool
Canvas app	Send an email to a customer support manager every time a support ticket is created.	Tool
Model-driven app	Create an automated chat tool that guides a customer through the support ticket creation process.	Tool

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Canvas App

Box 2: Model-driven app

Model-driven app design is a component-focused approach to app development. Model- driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

Box 3: Power Automate

Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.

Box 4: Power Virtual Agents bot

When you create bots with Power Virtual Agents, you author and edit topics.

NEW QUESTION 147

HOTSPOT - (Topic 4)

A company uses Microsoft Power Platform. The company categorizes customers into Specialty shop, Grocery store, Wholesaler, and Seasonal market groups by using a custom choice type column.

The staff uses a model-driven app with an interactive dashboard that displays all customer

You must update the app to provide the following functionality:

- Display selected customers by type in the interactive dashboard.
- Search for customers across multiple tables by postal code by entering any number of characters.

You need to configure the system.

Which configuration options should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Display customers by type.	<div>Enable sync with global choice. <input checked="" type="checkbox"/></div> <div>Enable the global filter. <input type="checkbox"/></div> <div>Enable the searchable property. <input type="checkbox"/></div> <div>Enable sync with global choice. <input checked="" type="checkbox"/></div> <div>Enable the sortable property. <input type="checkbox"/></div>
Search by postal code.	<div>Enable the searchable property. <input checked="" type="checkbox"/></div> <div>Find by setting in quick find. <input type="checkbox"/></div> <div>Filter by setting in quick find. <input type="checkbox"/></div> <div>Enable the searchable property. <input checked="" type="checkbox"/></div> <div>Enable the global filter on the postal code. <input type="checkbox"/></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Configuration
Display customers by type.	<div>Enable sync with global choice. <input checked="" type="checkbox"/></div> <div>Enable the global filter. <input type="checkbox"/></div> <div>Enable the searchable property. <input type="checkbox"/></div> <div>Enable sync with global choice. <input checked="" type="checkbox"/></div> <div>Enable the sortable property. <input type="checkbox"/></div>
Search by postal code.	<div>Enable the searchable property. <input checked="" type="checkbox"/></div> <div>Find by setting in quick find. <input type="checkbox"/></div> <div>Filter by setting in quick find. <input type="checkbox"/></div> <div>Enable the searchable property. <input checked="" type="checkbox"/></div> <div>Enable the global filter on the postal code. <input type="checkbox"/></div>

NEW QUESTION 149

DRAG DROP - (Topic 4)

You have a canvas app that uses multiple inputs for calculations.

You must use Test Studio to create automated tests and confirm that the app works as expected.

You need to organize your test scenarios into a hierarchy.

In which order should you create the objects? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

## Actions

## Answer Area

Test assertions

Test steps

Test suites

Test cases

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

Step 1: Test suites

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases. An app can contain one or more test suites.

Step 2: Test cases

Depending on how you want to organize or group your tests, you can create multiple test cases in a test suite. Each case can test a specific feature or a subset of functionalities in your app.

Step 3: Test steps Step 4: Test assertions

A test case consists of test steps that contain actions. Test actions are written using Power

Apps expressions that perform a task. You can use the recorder to automatically generate the test steps as you interact with your app. After you record, you can update the test case, add new steps, delete steps, and write test assertions to validate the result of your test.

### NEW QUESTION 154

- (Topic 4)

You have a Power Platform solution that uses Common Data Service. You need to secure all fields that support field-level security.

Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. cr7b\_accountid

**Answer:** D

### Explanation:

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage\_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

### NEW QUESTION 158

- (Topic 4)

A company uses a canvas app. The last published version of the app is version 18.

You edit the app. You save your updates and run the app. When you test the app, you discover you deleted a screen.

You need to restore the last published version of the app.

What is the version number of the app after you successfully restore it?

- A. 17
- B. 18
- C. 18.1
- D. 20

**Answer:** B

### NEW QUESTION 161

- (Topic 4)

A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.

A user updates the Excel file daily with updated data.

The company needs a solution that automatically displays the latest analytics.

You need to create a basic report that contains pie charts that display the most profitable channels.

You need to propose the right solution.

Solution: Microsoft Power BI report querying Excel file using its path. Does the solution meet the goal?

- A. Yes

B. No

Answer: A

NEW QUESTION 162

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Key Phrase Extraction model.

Does the solution meet the goal?

A. Yes

B. No

Answer: B

Explanation:

The key phrase extraction prebuilt model identifies the main points in a text document.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-key-phrase>

NEW QUESTION 166

- (Topic 4)

You are creating a canvas app.

A small amount of tabular data must be available only to the app. The data must be available before user inter action.

You need to create the data source for this data. What should you do?

A. Use a formula to populate a table when the app starts.

B. Use the Excel Online connector to retrieve the data.

C. Create a Microsoft Dataverse table and use the Microsoft Dataverse connector.

D. Read the data from a file on the device.

Answer: B

NEW QUESTION 168

DRAG DROP - (Topic 4)

DRAG DROP

You are creating a Power Automate cloud flow to update a column on each Item in a list of Microsoft Dataverse records. Records are sorted in order of priority.

You must use a complex expression to determine the column value. The column value must be stored in a variable to make future maintenance easier. Records must be processed based on the sorted order.

You need to add flow steps to process the list of records.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Filter the array.

Use the Apply to each loop running in parallel.

Initialize the variable.

Use the Apply to each loop running sequentially.

Set the variable.

Update the Microsoft Dataverse row.

>

<

Answer Area

<

>

A. Mastered

B. Not Mastered

Answer: A

Actions

Filter the array.

Use the Apply to each loop running in parallel.

Initialize the variable.

Use the Apply to each loop running sequentially.

Set the variable.

Update the Microsoft Dataverse row.

>

<

Answer Area

Initialize the variable.

Use the Apply to each loop running in parallel.

Set the variable.

Update the Microsoft Dataverse row.

NEW QUESTION 171

- (Topic 4)  
Engineers in an organization plan to attend an international product show.  
The engineers must be able to capture information about presented products based on personal assessment and interest. The engineers must capture the information by taking pictures of the booth, brochures, and other product-specific materials.  
You need to provide a button flow to streamline the process.  
Which two AI Builder models should you use? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Language detection
- B. Sentiment analysis
- C. Category classification
- D. Business card reader
- E. Form processing

Answer: AD

Explanation:

International product show: The language detection prebuilt model identifies the predominant language of a text document. The model analyzes the text and returns the detected language and a numeric score from 0 through 1. Scores close to 1 indicate higher confidence in the result. The detected language is returned as the "script" of the language. For instance, for the phrase "I have a dog", it will return "en" instead of "en-US". The response for languages that can't be detected is unknown.  
Use the AI Builder business card reader component to detect business cards and extract their information. You can take photos directly in the component or load images that you've taken. Data is extracted and identified by using the properties listed below.  
Reference:  
<https://docs.microsoft.com/en-us/ai-builder/prebuilt-language-detection> <https://docs.microsoft.com/en-us/ai-builder/business-card-reader-component-in-powerapps>

NEW QUESTION 175

- (Topic 4)  
A company creates multiple cases in Microsoft Dataverse each day with a status of New.  
For all cases with a status of New, the system must send an email to the customer and then change the status to in Process.  
You need to create a Microsoft Power Automate cloud flow to automatically send the email. What should you do?

- A. Trigger the flow on a schedule and then configure the flow to use the Compose data operation to get a list of cases and send email to each from inside a loop.
- B. Trigger the flow on a schedule and then configure the flow to use the Dataverse Listrows action to query case records using a filter and send email to each from inside a loop.
- C. Trigger the flow manually on the case and then configure the flow to send the email.

Answer: B

NEW QUESTION 176

HOTSPOT - (Topic 4)  
HOTSPOT

A company uses Power Apps and Microsoft Data verse. You need to perform the following activities:  
\* Create a model-driven app.  
\* Design navigation for the app  
\* Show an approval name field on the form if the amount is greater than \$1,000.  
Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Activity	Feature
Create model driven app.	<div>App designer</div> <div>App designer</div> <div>Solution checker</div> <div>App checker</div>
Design app navigation.	<div>Site map</div> <div>Site map</div> <div>Solutions area</div> <div>Table designer</div>
Show approval name field if amount > \$1,000.	<div>Table designer</div> <div>Form designer</div> <div>Table designer</div> <div>Business rule designer</div>

- A. Mastered
- B. Not Mastered

Answer: A

**NEW QUESTION 177**

- (Topic 4)

A company uses Microsoft Teams. A coworker creates a chatbot. The coworker observes unexpected behavior with the chatbot. You need to troubleshoot the chatbot.

Which two actions should you recommend to the coworker? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Ask the coworker to assign you to the owner role for the team.
- B. In Advanced tools, select Monitor.
- C. Ask the coworker to add you to their team.
- D. Select the chatbot and then select the Share button.

**Answer:** AB

**NEW QUESTION 181**

- (Topic 4)

A company uses Power Apps. You embed a canvas app in a model-driven app form. You need to bind the app to a form component. Which form component should you use?

- A. Section
- B. View
- C. Column
- D. Tab

**Answer:** C

**NEW QUESTION 182**

DRAG DROP - (Topic 4)

An insurance broker uses a Microsoft Dataverse environment with custom tables. You create a Power Apps app to manage vehicle insurance policies.

The app has a drop-down field that allows users to categorize a policy holder's driving record. This category field is not mandatory.

You need to ensure that insurance agents enter the correct categories when creating a new vehicle policy.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

In the vehicle policy table, click on Add subcomponents and navigate to Business rules.

Add a Recommendation card, select the driver record drop-down field and enter the recommendation details.

In the vehicle policy table, navigate to Business rules.

Add a business rule and enter a meaningful business rule name.

Click on the Condition card, select the Vehicle Policy and check for new driver.

&u2193

**NEW QUESTION 185**

- (Topic 4)

You significantly modify a canvas app. You need to generate a new app version. What should you do?

- A. Publish the app.
- B. Update the major version number.
- C. Update the version notes.
- D. Update the minor version number.
- E. Save the app.

**Answer:** A

**NEW QUESTION 189**

#### DRAG DROP - (Topic 4)

You create a custom field on the Account entity.

Members of TeamA must have full access to the field. Members of TeamB must have no access to the field.

You need to configure security.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add TeamA to the field security profile.	
Create a field security profile and set all the permissions for the custom attribute to <b>Yes</b> .	
Add TeamB to the field security profile.	
Create a field security profile and set all the permissions for the custom attribute to <b>No</b> .	
Enable field-level security for the field.	

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Step 1: Enable field security for the field

Step 2: Create a field security profile and set all the permissions for the custom attribute to Yes.

Step 3: Add TeamA to the field security profile.

Note: Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

? Enable field security on one or more fields for a given entity.

? Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

#### NEW QUESTION 191

- (Topic 4)

You create a canvas app named Hardware Order that suggests computer hardware to customers.

A value must be entered for the EmployeeID field when creating a new order if the value in the OrderType field does not contain the prefix test.

You need to configure the business rule.

Which two actions should you perform? Each correct answer presents part of the complete solution.

NOTE: Each correct selection is worth one point.

- A. Set the scope of the business rule to Entity.
- B. Add a Recommendation action and configure it to enter the order type.
- C. Set the scope of the business rule to All Forms.
- D. Use the following condition expression:(OrderType Does not begin with [test]) AND (Modified By Does not contain data)

**Answer:** AD

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

#### NEW QUESTION 196

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** A

#### Explanation:

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in- powerapps>

#### NEW QUESTION 198

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a custom action that has defined dataflows.

Does the solution meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows>

## NEW QUESTION 201

- (Topic 4)

You are creating an employee directory canvas app. The app must display name, address, and a photo of each employee. You need to select a control type that will display the

A. Address input

B. List box

C. Gallery

D. Data table

**Answer: C**

## NEW QUESTION 202

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Automate. You manage two cloud flows named A and B. Users must perform the following activities:

- Manage the properties of cloud flow A.

- Manually trigger cloud flow B

You need to set up privileges for the business users by using the principle of least privilege Which privilege types should you grant for each activity? To answer, drag the appropriate

privilege types to the correct activities. Each privilege type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

Privilege types	Answer Area	Activity	Privilege type
Microsoft Power Platform Admin		Manage the properties of cloud flow A.	
Co-owner		Manually trigger cloud flow B.	
Run-only			

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

Privilege types	Answer Area	Activity	Privilege type
Microsoft Power Platform Admin		Manage the properties of cloud flow A.	Co-owner
Co-owner		Manually trigger cloud flow B.	Run-only
Run-only			

## NEW QUESTION 206

- (Topic 4)  
You are creating a multi-page canvas app that loads tabular data from an external data source.  
Once loaded, the data must be available to all screens within the canvas app.  
You need to reduce the number of times that the app must retrieve data from the data source.  
Which two data stores can you use? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. parameter
- B. collection
- C. environment variable

Answer: CD

Explanation:  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-data-sources>

NEW QUESTION 208

HOTSPOT - (Topic 4)  
A company is building a canvas app.  
A user needs to understand which data they can make available for the 500 contacts that are present in the Contact table. All relevant data must be shown in the app. Single fields must show one record and grids must show multiple records. Only the primary fields for each related table should be shown for a contact.

Display name	Relationship name	Related table	Relationship type	Type	Customizable
Company Name	contact_customer_contacts	Contact	Many-to-one	Managed	Yes
Connected From	contact_connections1	Connection	One-to-many	Managed	Yes
Owning Team	Team_contacts	Team	Many-to-one	Standard	Yes

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

How should you design a screen to display the Connection table information for each contact in the Contacts table?

Use a grid for the Contact table and a grid for the Connection table

Use a single field for the Contact table and a grid for the Connection table

Use a grid for the Contact table and a single field for the Connection table

Use a single field for the Contact table and a single field for the Connection table

How should you design a screen to display the Team table information for each contact in the Contact table?

Use a grid for the Contact table and a grid for the Team table

Use a single field for the Contact table and a grid for the Team table

Use a grid for the Contact table and a single field for the Team table

Use a single field for the Contact table and a single field for the Team table

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Box 1: Use a single field for Contact table and a grid for the Connection table The Contact table is on 1-side of the 1-to-many relation to the Connection table.  
Box 2: Use a single field for Team table and a grid for the Connect table The Team table is on 1-side of the 1-to-many relation to Contact.

NEW QUESTION 210

DRAG DROP - (Topic 4)  
The company is adding a multi-stream interactive dashboard to a model-driven app.  
The company requires configuration of the dashboard to filter the table data based on modified accounts over the last month.  
You need to configure the filters for the model-driven app dashboard.  
Which configuration should you use? To answer, drag the appropriate locations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Configurations

Filter by

Table view

Filter table

Time frame

Answer Area

Requirement

Configuration

Configure visual filter attributes that the dashboard can use.

Configure the field that the dashboard uses to filter the table data monthly.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Filter table

Filter Table: The visual filters and global filter attributes are based on this table.

Box 2: Filter By

Filter By: The column that the time frame filter applies to.

**NEW QUESTION 215**

- (Topic 4)

A company uses a canvas app to encourage employees to take reading breaks during their work schedule. The reading breaks are created automatically as Outlook tasks in the employees Outlook app. The app must trigger a Power Automate cloud flow when specific data is captured in the canvas app. You need to create and configure the flow. Which flow step should you configure first?

- A. Flow button for mobile
- B. Power Apps step with trigger conditions
- C. New Microsoft Outlook task
- D. Condition step

**Answer:** A

**NEW QUESTION 217**

DRAG DROP - (Topic 4)

You are designing an app for a bank. You plan to use the following entities in the app:

Entity	Comments
Clients	Clients are assigned to a branch office
Bank accounts	A client may have multiple bank accounts. A bank account may have multiple clients as bank account owners
Branch offices	Clients are assigned to a branch office
Employees	Each employee works at only one branch office

You need to configure the relationships between the entities.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct relationships. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Relationship types**

One-to-one

One-to-many

Many-to-one

Many-to-many

**Answer Area**

Relationship		
Source entity	Target entity	Relationship type
Clients	Bank accounts	Relationship type
Clients	Branch offices	Relationship type
Branch offices	Employees	Relationship type

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Many-to-many

Box 2: Many-to-one

A client have a single branch office.

A branch office can have many clients.

Box 3: One-to-many

A branch office can have many employees. An employee only works at one branch office.

**NEW QUESTION 222**

HOTSPOT - (Topic 4)

: 189 HOTSPOT

A company is building several Power Apps apps to help with sales operations collaboration. You need to identify the right solution for data storage. Which solution should you use? To answer select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Characteristic	Solution
Limits the number of records that can be added.	<div>Microsoft Dataverse for Teams</div> <div>Microsoft Dataverse</div> <div>Microsoft Dataverse for Teams</div>
Allows for advanced development tasks for apps specific to Microsoft Teams.	<div>Microsoft Dataverse</div> <div>Microsoft Dataverse</div> <div>Microsoft Dataverse for Teams</div>
Has the most granular level of security to account for column-level security in Microsoft Teams.	<div>Microsoft Dataverse</div> <div>Microsoft Dataverse</div> <div>Microsoft Dataverse for Teams</div>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Allows for advanced development tasks for apps specific to Microsoft Teams.	<div>Microsoft Dataverse</div> <div>Microsoft Dataverse</div> <div>Microsoft Dataverse for Teams</div>
Has the most granular level of security to account for column-level security in Microsoft Teams.	<div>Microsoft Dataverse</div> <div>Microsoft Dataverse</div> <div>Microsoft Dataverse for Teams</div>

**NEW QUESTION 226**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

? Provision a trial environment named T1 and a sandbox environment named S1.

? Copy the production environment to T1 and S1.

? Use T1 for development and S1 for testing.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer:** B

**Explanation:**

Using trial environments, companies and customers can try out new features and solutions. Do not use a trial environment for development.

A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/trial-environments> <https://docs.microsoft.com/en-us/power-platform/admin/sandbox-environments>

**NEW QUESTION 228**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

? Create a Category Classification custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer:** B

**Explanation:**

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

### NEW QUESTION 229

DRAG DROP - (Topic 4)

A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app.

You need to insert the custom control into the Power Apps app.

Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Answer Area						
<div>Display</div> <div>Screens</div> <div>Components</div>	<table border="1"><thead><tr><th>Action</th><th>Location</th></tr></thead><tbody><tr><td>Import a custom control from a file.</td><td><div></div></td></tr><tr><td>Add an alignment to the custom control to display it in the middle of the Power Apps app screen.</td><td><div></div></td></tr></tbody></table>	Action	Location	Import a custom control from a file.	<div></div>	Add an alignment to the custom control to display it in the middle of the Power Apps app screen.	<div></div>
Action	Location						
Import a custom control from a file.	<div></div>						
Add an alignment to the custom control to display it in the middle of the Power Apps app screen.	<div></div>						

- A. Mastered  
B. Not Mastered

Answer: A

#### Explanation:

Box 1: Components

- \* 1. To add code components to a canvas app:
- \* 2. Navigate to Power Apps Studio.
- \* 3. Create a new canvas app or edit an existing app to which you want to add the code component.
- \* 4. Go to Insert > Custom > Import component.

### NEW QUESTION 230

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen\_Accounts and add a gallery named Gallery\_Accounts to the screen. You set the data source of Gallery\_Accounts to Accounts and add another blank screen named Screen\_AccountDetail.

You need to complete the app.

Solution:

- ? Add a display form to Screen\_AccountDetail.
- ? Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).
- ? Set the data source of the form to Accounts.
- ? Set the Item property of the form to Selected.
- ? Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).

Does the solution meet the goal?

- A. Yes  
B. No

Answer: A

#### Explanation:

If you add a Display form control, the user can display all fields of a record or only the fields that you specify.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form- detail>

### NEW QUESTION 232

DRAG DROP - (Topic 4)

A company uses Power Automate and Power Apps to streamline business processes. You need to use AI Builder to analyze customer reviews of the company's products.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Action

Publish the model.

Connect data to the model.

Train the model.

Use the model in a Power Automate flow.

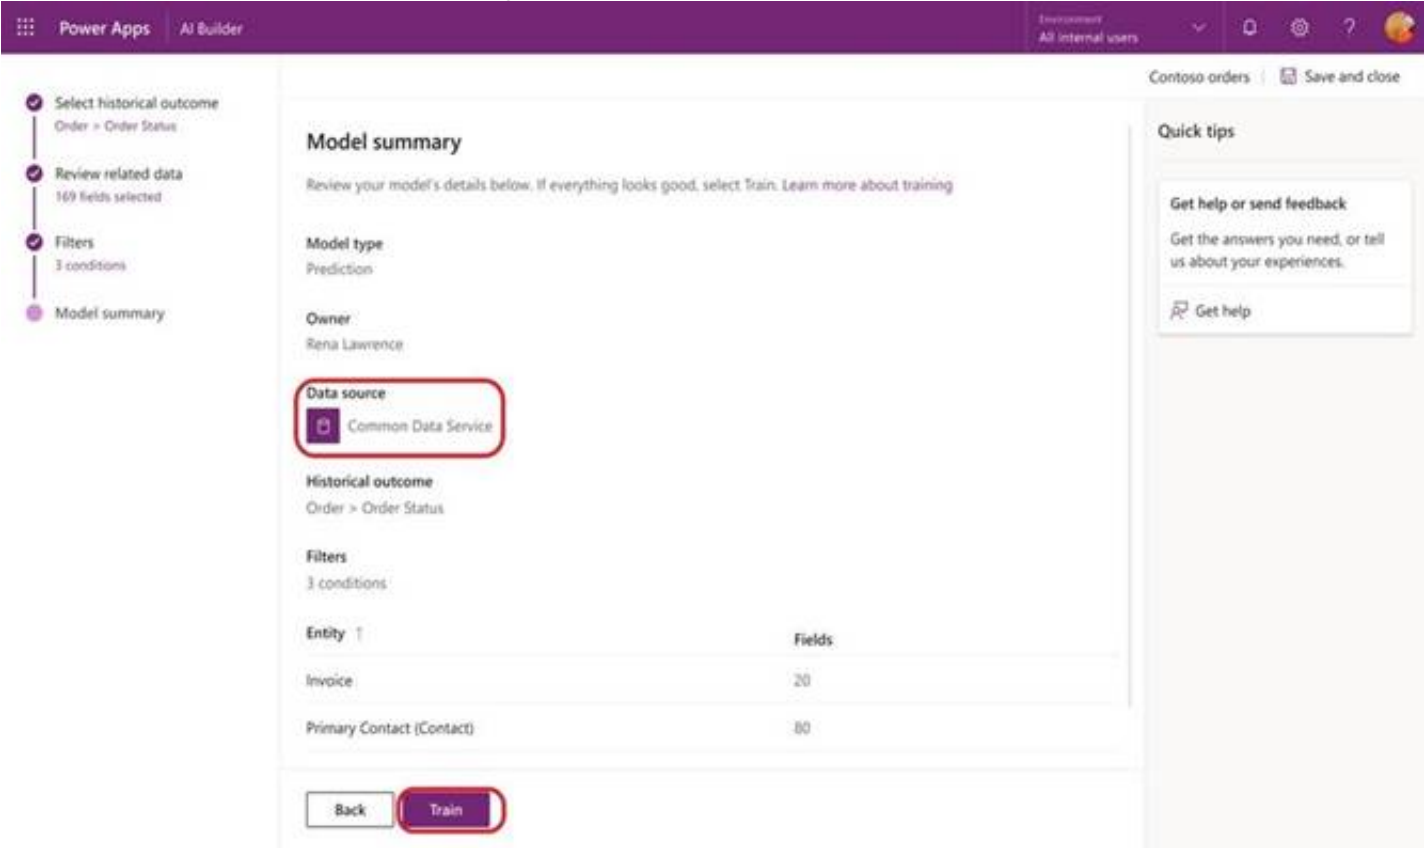

Answer Area

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Step 1: Connect data to the model.  
First create an AI Builder form processing model for the customer reviews you want to process.

Step 2: Train the model. Step 3: Publish the model.  
Step 4: Use the model in a Power Automate flow.  
Once you train and publish the model, create a solution-aware flow in Power Automate.

NEW QUESTION 236

DRAG DROP - (Topic 4)

You create a canvas app. You run App checker to validate the app. App checker returns error results. You need to locate where the errors occur. Which areas should you review? To answer drag the appropriate areas to the correct error messages. Each area may be used once, more than once, or not at all. You may need to drag the spirt bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

#### NEW QUESTION 237

- (Topic 4)

A clothing retailer is creating a Power Virtual Agents chatbot in Microsoft Teams. The chatbot will use Microsoft Dataverse for Teams to provide sales metrics by store.

A user wants to be able to ask the chatbot to see all the sales for pants.

You need to configure the chatbot to provide sales data for pants even when a user enters the terms jeans, slacks, or trousers.

Which chatbot component should you use?

- A. Skills
- B. Tables
- C. Topics
- D. Supported languages
- E. Entities

**Answer:** E

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

#### NEW QUESTION 242

HOTSPOT - (Topic 4)

You are creating a capacity planning dashboard with Power BI desktop.

The dashboard must be able to be used within a model-driven manufacturing planning app as well as be embedded within a Microsoft Teams channel.

The data sources are as follows:

You need to determine the appropriate method for accomplishing each task.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task	Method
Connect to the ERP system.	<div><div></div><div>Use a Data Gateway</div><div>Use a Custom Connector</div><div>Use a Service Content Pack</div></div>
Create the relationship between the employee file and the work estimates.	<div><div></div><div>Create a composite model</div><div>Create an aggregated table</div><div>Create entity relationships in the CDS Solution Explorer</div></div>
Create calculations for work remaining, remaining budget.	<div><div></div><div>Create a Data Analysis Expressions formula</div><div>Create an aggregated table</div><div>Create a modeling view</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Use a Date Gateway

You can install an on-premises data gateway on the same local computer as SQL Server (in production, it would typically be a different computer).

Box 2: Create an entity relationship in CDS Solution Explorer You can create relationships with CDS Solution Explorer.

Box 3: Create an aggregate table

Rollup columns help users obtain insights into data by monitoring key business metrics. A rollup column contains an aggregate value computed over the rows related to a specified row. This includes regular tables and activity tables such as emails and appointments.

#### NEW QUESTION 245

- (Topic 4)

You create and publish a canvas app component library to perform complex calculations.

You discover an error in one of the calculations. You correct the issue and publish the canvas app.

You need to ensure that the co-worker uses the updated version of the component library.

What should you do?

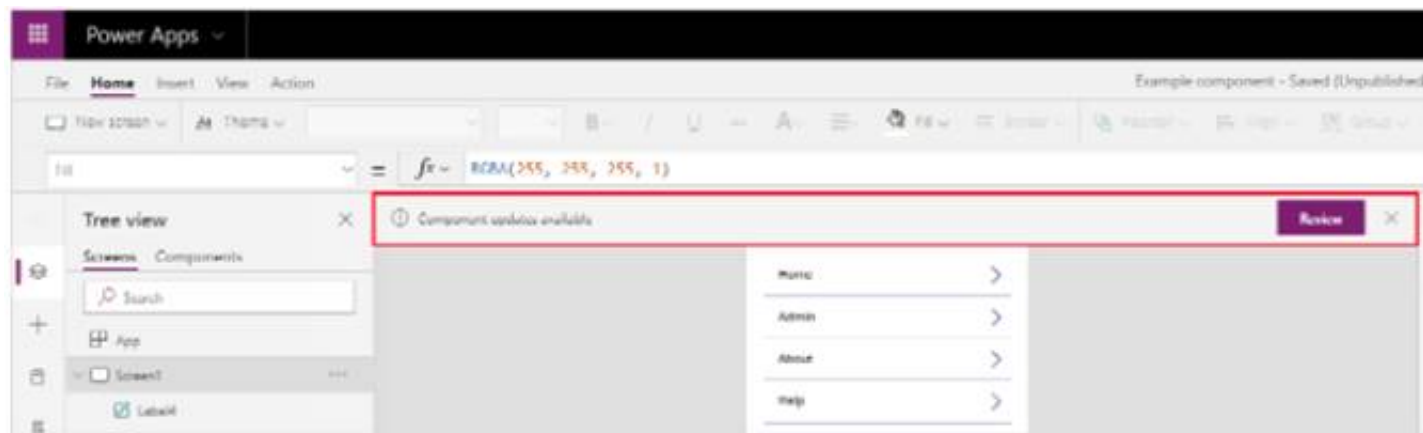

- A. Export the updated component library and instruct the co-worker to import the updated version into the canvas app
- B. Inform the co-worker to edit the canvas app and manually add the updated version of the component library
- C. Instruct the co-worker to edit the canvas app and update the component library

**Answer:** C

#### Explanation:

You can modify an existing component library and save any changes with additional version notes. However, the updated component library version must be published for use in existing apps that use the component library.

Makers of other apps are notified of updated components being available. The notification appears when makers edit the apps in canvas app studio. They can choose to update the components:

Select Review, and you'll see the option to update the component:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>
