Exam Questions PL-200

Microsoft Power Platform Functional Consultant

https://www.2passeasy.com/dumps/PL-200/

NEW QUESTION 1
- (Exam Topic 1)
You need to add controls to the check-in solution for the health and wellness questions. Which form control should you use?

A. Drop down
B. Check box
C. Text input

Answer: A

NEW QUESTION 2
- (Exam Topic 1)
You need to design the resort portal to meet the business requirements. Which data source should you use?

A. Microsoft Excel
B. Azure SQL Database
C. SQL Server
D. Common Data Service

Answer: A

NEW QUESTION 3
- (Exam Topic 1)
You need to create the FAQ solution content What should you do first?

A. AI Builder
B. Suggest topics
C. Automate
D. Trigger phrases

Answer: B

Explanation:
You need to make sure there are three main steps need to do while doing import FAQ and add the topic to your bot application.
- Import Suggested Topics from FAQ webpage.
- Add a topic.
- Enable the topics Reference:
https://social.technet.microsoft.com/wiki/contents/articles/53820.power-virtual-agents-faq-chatbot.aspx

NEW QUESTION 4
- (Exam Topic 1)
You need to design the chat solution to answer the inquiry from Guest1.
Which three components can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Variables
B. Escalations
C. Smart match
D. Synonyms
E. Topics

Answer: ACD

Explanation:
Scenario: Guest1 inquires about snow conditions several times during each day of their stay.
Variables let you save responses from your customers in a conversation with your bot so that you can reuse them later in the conversation.
Synonyms allows you to manually expand the matching logic by adding synonyms. Smart match and synonyms seamlessly work together to make your bot even smarter.
Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables
https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling

NEW QUESTION 5
- (Exam Topic 1)
You need to design the guest check-in solution.
Which technologies should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.
You need to design the guest check-in solution.

Answer Area

Requirement	Technology
Develop the base check-in solution. Access the check-in solution on the check-in devices.	Xamarin app Power Apps portal Model-driven app Canvas app
Access the check-in solution on the check-in devices.	Traditional desktop application Web browser Power Apps mobile app Dynamics 365 for phones and tablets

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Canvas app,
Power Apps mobile app
https://docs.microsoft.com/en-us/power-apps/maker/canvas-apps/offline-apps

NEW QUESTION 6
- (Exam Topic 2)
You need to set up the new service request completion process.
Which two components should you include in the solution? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. connection reference
B. business process flow
C. Power Automate flow
D. connection

Answer: AC

Explanation:
Reference: https://docs.microsoft.com/en-us/power-apps/maker/data-platform/create-connection-reference

NEW QUESTION 7
- (Exam Topic 2)
You need to implement the requirement for the VP of sales. What should you do?

A. Use a test account with a base security role with QV security added.
B. Add the System Administrator security role to your user account.
C. Use a test account with only QV security added.
D. Add QV security to your user account.

Answer: A

Explanation:
A VP of sales requires a test environment to demonstrate to potential clients the security policies that are included in their initial offering.
Currently, testing the new QV functionality outside the development environment is not possible due to corporate security policies requiring the same security role across all environments.
Note: One of the security best practices in Dynamics 365 is to use the base security role as a baseline and apply that role to all Users. The base security role will include all the common/basic permissions that are required to have access to the system.
To set up the base security role for the first time

- create a new empty security role.
- add the minimum privileges required to access the system.
- add the privileges required for the basic functionalities.
- test the role with the test user account.
- add the permissions to the entities that all users can access (e.g. reference data).

Reference: https://linnzawwin.blogspot.com/2020/07/minimum-privileges-required-to-log-in.html

NEW QUESTION 8
- (Exam Topic 2)
You need to configure a Power Automate flow to send the email with the results to the client. What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Trigger settings

- Set Table name to Qualification and Column filter to statecode.
- Set Table name to Qualification and Column filter to statuscode.
- Set Table name to Service Requests and Column filter to statuscode.

Logic to complete service requests

- Complete if current record is in Complete status.
- Complete if current record is in Pending Verification status.
- Loop through related qualification records and complete if all are in Complete status.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Set Table table to Qualification and Column filter to statuscode.
Box 2: Loop through related qualification records and complete if all are in Complete status. The new process for completing a service request must automate the following:
Set the Service Request record status to Complete when work on all Qualification records is finished.
Send an email to the client with the results when the service request is completed. The email must list each qualification as either Valid or Not Valid, depending on the verification.

NEW QUESTION 9
- (Exam Topic 2)
You need to assign 10 percent of the Qualification records to the QV queue through table configuration by using a Power Automate flow.
What should you do?

A. Create an autonumber column on the Qualification table and assign its qualification records if the number cleanly divides by 10.
B. Create a calculated column on the Service Request table that sums the number of qualification records, generates a random number between zero and the number from the new field, and assigns each qualification record if the number generated is 10 percent or less of the value of the new field.
C. Create a roll-up column on the Service Request table that is the count of qualification records, generates a random number between zero and the number from the new field, and assigns each qualification record if the number generated is 10 percent or less of the value of the new field.
D. Create an autonumber column on the Service Request table and assign its qualification records if the number cleanly divides by 10.

Answer: B

NEW QUESTION 10
- (Exam Topic 2)
You need to configure a Power Automate flow to send the email with the results to the client. What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Control
Process qualification records for a service request.	Switch Condition Apply to Each
Evaluate a qualification.	Do until Condition Apply to Each

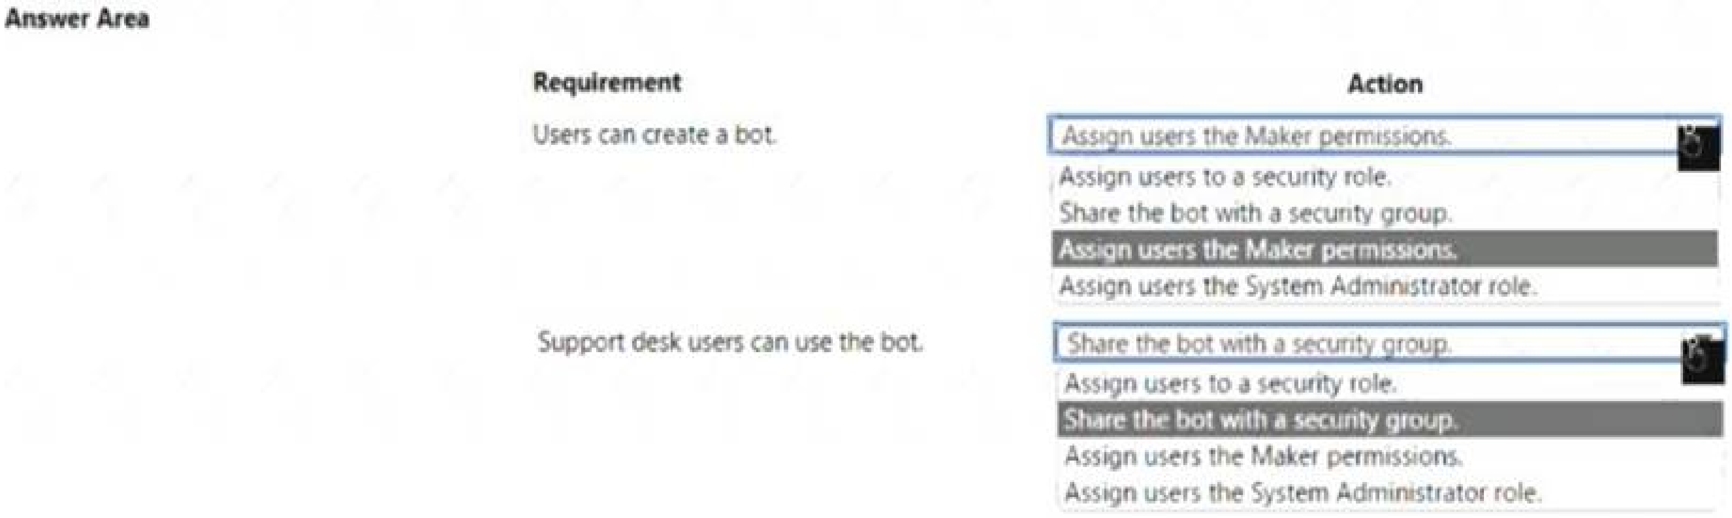
A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Apply to each
You can use the Apply to each action to process a list of items periodically. Box 2: Do until

The Do Until control in Power Automate is a loop that repeatedly forces an action until a certain condition becomes true.
Reference: https://docs.microsoft.com/en-us/power-automate/apply-to-each https://blog.enterprisedna.co/do-until-loop-control-in-power-automate/

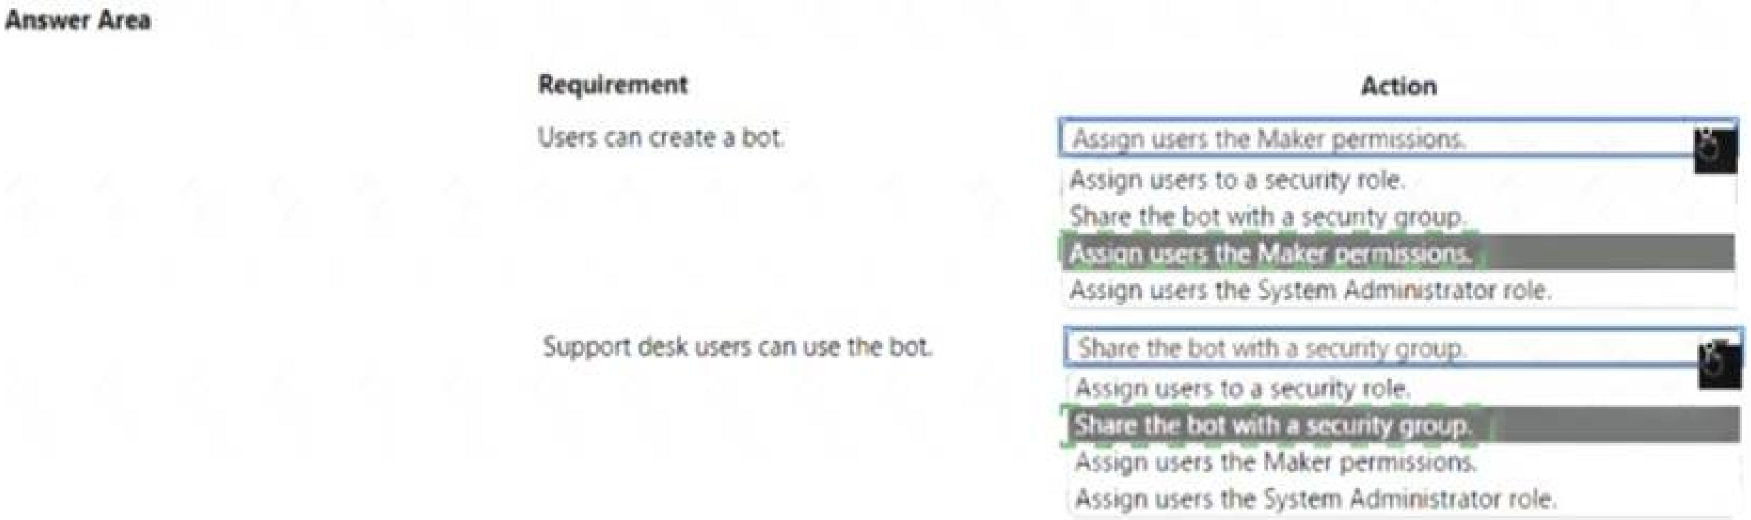
NEW QUESTION 10
- (Exam Topic 3)
A company plans to implement chatbots by using Power Virtual Agents. The company has the following requirements for the bots:
• Users in the accounting department must be able to create a bot for frequently asked questions.
• The support desk users must be able to use the bot.
The users must not be able to change environment parameters in the Microsoft Power Platform environment. You need to configure the permissions for the bots.
Which actions should you implement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 11
- (Exam Topic 3)
You modify a model-driven app for a bicycle repair help desk. The model-driven app is for help desk users when customers have an issue with their bicycle. After you add a custom table named bicycle, you configure the table for Microsoft Dataverse search. The table will contain information from callers about their bicycles. The account table is related to the custom table. Contact information is brought over to the custom table.
You add the following columns to the table:
- Bicycle type
- Tire brand
- Special equipment

Users must be able to perform the following types of searches:
- Search for all customers who have a bicycle type of Contoso and live in Florida.
- Search all tables for any record that contains the word broken.
- You need to decide which type of search will give you the results desired.

Which search should you configure? To answer, drag the appropriate search types to the correct requirements. Each search type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Text Description automatically generated
Box 1: Advanced find
Operators for advanced search: Lets you use simple Boolean operators in your search term and craft the query to get the results you want.
Box 2: Dataverse search
Dataverse search helps you quickly find what you're looking for. It delivers fast and comprehensive results across multiple tables in a single list, sorted by relevance.
Reference: https://docs.microsoft.com/en-us/power-apps/user/quick-find https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization

NEW QUESTION 12
- (Exam Topic 3)
A company creates a Microsoft Power Apps app through the Power Apps designer portal for use in Microsoft Teams.
This app needs to be promoted to the user acceptance testing environment.
You need to complete the Microsoft recommended actions before you export the solution. Which two actions should you complete? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Write validation tests.
B. Set the Optimized embedding appearance field to true.
C. Publish all changes.
D. Run the solution checker.
E. Clone a solution.

Answer: DE

Explanation:
The Power Apps solution checker performs a rich static analysis check on your solutions against a set of best practice rules to quickly identify problematic patterns. After the check completes, you receive a detailed report that lists the issues identified, the components and code affected, and links to documentation that describes how to resolve each issue.
The solution checker analyzes these solution components: Common Data Service plug-ins
Common Data Service custom workflow activities
Common Data Service web resources (HTML and JavaScript) Common Data Service configurations, such as SDK message steps
Reference: https://www.eimagine.com/ui/

NEW QUESTION 16
- (Exam Topic 3)
A company plans to automate the following manual processes by using Power Automate. You need to identify UI flow types for the two business processes.

Process	Time to Complete	Comments
1	30 minutes	The user's device must remain unlocked when the business process runs. The user will be required to leave their device unattended in a secure setting while the business process runs so that the user can assist with other efforts.
2	45 minutes	The process must run after normal business hours. The device that runs the business process must remain unlocked when the business process is not running.

Which desktop flow type should you use? To answer, drag the appropriate desktop flow types to the correct business processes. Each desktop flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, application Description automatically generated

NEW QUESTION 17
- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:

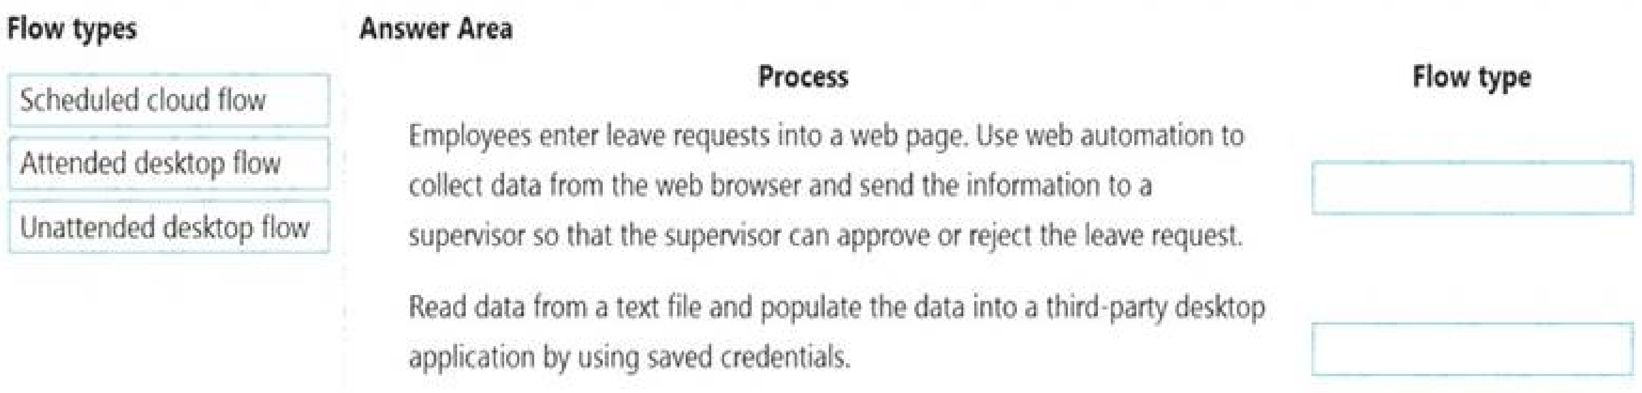
- 0 - 17
- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Use Date and time for Identify in the question and then add branches that use conditional logic to
determine the age group.
Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 20
- (Exam Topic 3)
You are examining several processes to determine if you can automate the processes by using Power Automate.
The processes must run without human intervention when possible.
You need to determine which flow type should be used for each process.
Which flow type should you use? To answer, drag the appropriate processes to the correct flow types. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Text Description automatically generated
Box 1: Attended desktop flow
Desktop flows are used to automate tasks on the Web or the desktop.
To run an attended desktop flow, you need to have an active Windows user session that matches the name of the user configured for your connection.
Note: Web applications are critical components of most organizations, and they are commonly used to access data from servers.
Most CRM and ERP platforms run through web browsers, while the most popular business productivity tools are web services. Web applications are unquestionably an integral part of the technological infrastructure of most companies.
To provide automation solutions for these applications, Power Automate Desktop supports all major browsers through its web automation actions.
Box 2: Unattended desktop flow.
Unattended desktop flows are best for applications that do not need human supervision. References:
https://docs.microsoft.com/en-us/learn/modules/pad-web/1-introduction
https://docs.microsoft.com/en-us/power-automate/desktop-flows/run-pad-flow

NEW QUESTION 24
- (Exam Topic 3)
You create a new independent software vendor (ISV) solution for a Power Apps app.
The Power Apps solution will be imported into multiple customer environments. The environments will have a large variety of solutions and publishers.
You need to avoid naming conflicts during solution import.
Which element should you configure?

A. Package type
B. Configuration page
C. Marketplace
D. Prefix
E. Version

Answer: D

Explanation:
A solution publisher includes a prefix. The publisher prefix is a mechanism to help avoid naming collisions. This allows for solutions from different publishers to be installed in an environment with few conflicts. For example, the Contoso solution displayed here includes a solution publisher prefix of contoso.

Reference: https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm

NEW QUESTION 26
- (Exam Topic 3)
A company has employees in France, Mexico, and the United States. You are creating a Power Apps app to allow users to add client records to Microsoft Dataverse. The default language for the company is English.
The company wants the app to display each local language. You need to add the Spanish and French languages.
Which four actions should you perform in sequence for each language? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Import the solution.	
Export translations.	
Replace the language code column and translated wording in the CrmTranslations.xml file.	
Select an unmanaged solution.	
Select a managed solution.	
Add a language code column and translated wording in the CrmTranslations.xml file.	
Import translations.	
Export the solution.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Select an unmanaged solution. Export the localizable text
The scope of the localizable text that will be exported is the unmanaged solution that contains the localizable text.
- From Power Apps, select Solutions.
- In the All Solutions list, select the unmanaged solution that contains the localizable text you want.
- On the command bar, select Translations > Export Translations.

Step 2: Export translations.
Step 3: Add a language code column and a translated wording in the CrmTranslations.xml file. Get the localizable text translated
You can send this file to a linguistic expert, translation agency, or localization firm.
If you have the knowledge to translate the text, or if you just want to see the format, you can extract the zip file that you exported you will see that it contains two XML files.
[Content_Types].xml CrmTranslations.xml
You can open the CrmTranslations.xml file with Microsoft Office Excel. When you view the data in Excel, look at the Localized Labels tab.
Graphical user interface, text, application, table, Excel Description automatically generated

657	cr2b3_car	1da1f788-3f64-e811-a957-000d3af3b3af	DisplayName	Active		

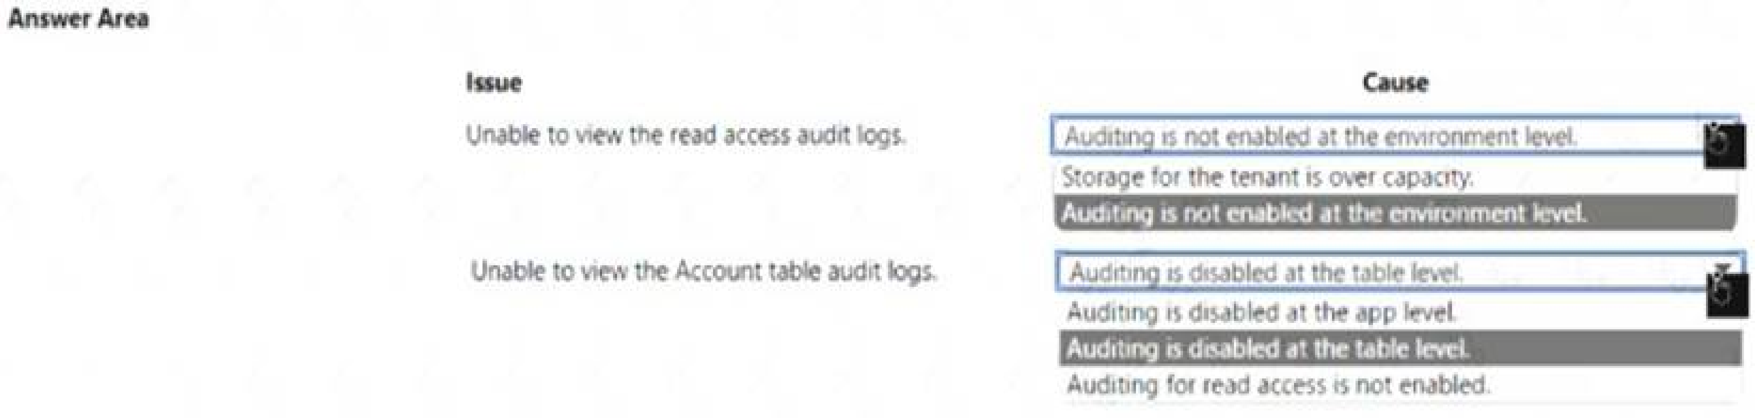
Information | Display Strings | Localized Labels

Any custom tables or columns will have empty cells for the localizable text. Add the localized values for those items.
Step 4: Import translations. Import the localized text
Importing the text requires compressing the files and importing them into the system. Import the files
From the same unmanaged solution that you exported the translations from, in the menu choose Translations > Import Translations.
Note: If you have customized table or column text, such as column labels or drop-down list values, you can provide the users in your environment who are not working with the base language version of your environment with this customized text in their preferred languages.
The process has the following steps:

- Enable other languages for your environment
- Export the localizable text
- Get the localizable text translated
- Import the localized text

Reference: https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/translate-localizable-text

NEW QUESTION 29
- (Exam Topic 3)
A company uses Power Apps. You enable auditing in Microsoft Dataverse. Users report the following issues when viewing the audit logs:
• Unable to view the read access audit logs.
• Unable to view the Account table audit logs. You need to troubleshoot the issues.
What are the causes of the issues? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 33
- (Exam Topic 3)
You are creating a business rule to implement new business logic.
You must apply the business logic to a canvas app that has a single screen named Screen1. You need to configure the scope for the business rule.
Which scope should you use?

A. All Forms
B. Entity
C. Screen1
D. Global

Answer: B

Explanation:
Note: Some terminology has changed. Entity is now Table. If you're building a Canvas app, you must use table (entity) as the scope.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule

NEW QUESTION 34
- (Exam Topic 3)
Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

A. List view of the entity
B. Microsoft Visual Studio
C. Templates area
D. Maker portal

Answer: A

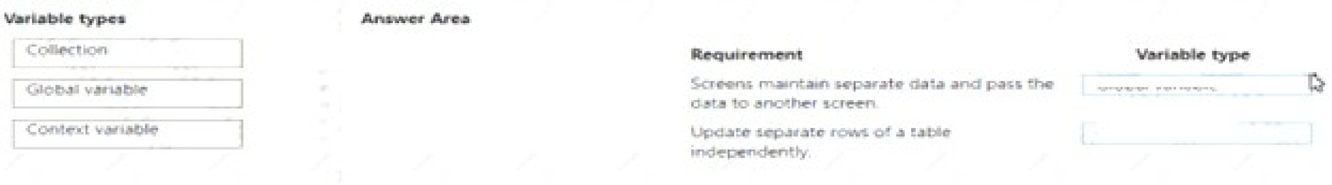
Explanation:
Edit a public or system view in app designer

You can change the way a public or system view is displayed by adding, configuring, or removing columns.

- In the Views list for a table, select the Show list of references down arrow Drop Down. Edit View.Graphical user interface, application Description automatically generated
- Next to the view you want to edit, select Open the View Designer Open view Designer. The view opens in the view designer.

When you edit a public or system view, you must save and publish your changes before they will be visible in the application.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer

NEW QUESTION 35
- (Exam Topic 3)
The app needs to store temporary data
• Each screen must maintain a separate copy of data and pass the data to another screen.
• The app must be able to update separate rows of a table independently. You need to configure variables for the data.
Which variable types should you use? To answer, drag the appropriate variable types to the correct requirements. Each variable type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated with medium confidence

NEW QUESTION 38
- (Exam Topic 3)
You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment they are complete.
The changes must meet the following requirements:
• Must be clearly identified so that they are not confused with system components and components from other solutions.
• Must not affect any existing components in the test environment. You need to prepare a solution for deployment to the test environment.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Create a new publisher Solution publisher
Every app and other solution components such as entities you create or any customization you make is part of a solution. Because every solution has a publisher, you should create your own publisher rather than use the default. You specify the publisher when you create a solution.
Step 2: Create a new unmanaged solution and select the correct publisher unmanaged solution
Unmanaged solutions are used in development environments while you make changes to your application. Unmanaged solutions can be exported either as unmanaged or managed. Exported unmanaged versions of your solutions should be checked into your source control system. Unmanaged solutions should be considered your source for Microsoft Power Platform assets. When an unmanaged solution is deleted, only the solution container of any customizations included in it is deleted. All the unmanaged customizations remain in effect and belong to the default solution.
Step 3: Add the table top the solution and add the new column. Step 4: Run the solution checker on the solution
Use solution checker to validate your model-driven apps in Power Apps.
Reference: https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm https://docs.microsoft.com/en-us/power-apps/maker/data-platform/use-powerapps-checker

NEW QUESTION 42
- (Exam Topic 3)
A bank uses Power BI visualizations to help determine whether they should loan money to a customer. The bank has three different visuals that are part of a Power BI report. The bank uses a set of four risk variables that indicate whether the customer is creditworthy.
You must create a mechanism so that bank employees can change the values of the four risk variables. Changes to the value of any variable must cause the three visualizations to update.
You need to create the solution.
Which action should you perform? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Action
Update the visualizations when users change the values of the risk variables.	Embed a canvas app in a Power BI report. Embed a Power BI report in a model-driven app. Embed a model-driven app in a Power BI report.
Ensure that users can adjust the values of the four risk variables that contribute to a customer's credit risk.	Use Power BI tiles. Use Power Apps visuals. Use the Power BI service.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Embed a Power BI report in a model-driven app
You can embed a Power BI report in a model-driven app main form. Box 2: Use the Power BI service.
The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution. Power BI automatically refreshes the app's data displayed. With Power BI Desktop or Microsoft Excel, Power Query for authoring reports and Power BI for sharing dashboards and refreshing data from model-driven apps,
your users have a powerful way to work with your app's data.
Reference:
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/embed-powerbi-report-in-system-form
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/use-power-bi

NEW QUESTION 44
- (Exam Topic 3)
You manage Dynamics 365 for a company.
You must prevent users from launching and using Power Automate. You need to hide the Flows button on the user interface.
Which configuration setting should you change?

A. the Customizations section of System Settings
B. the Site Map
C. the Buttons tab of Flow
D. the Entity component of the default solution

Answer: A

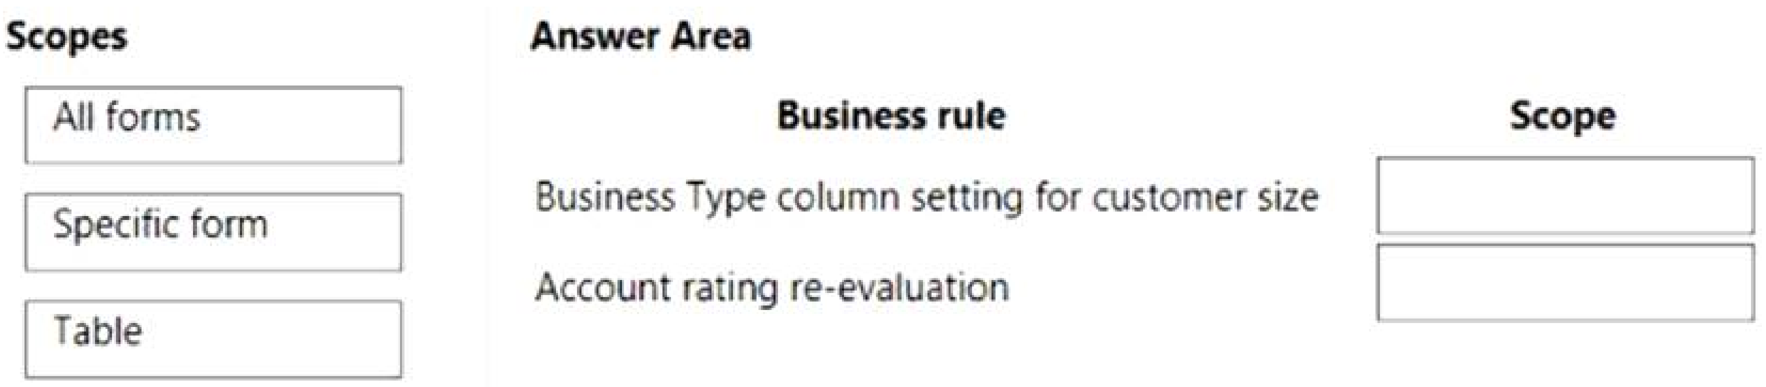
Explanation:
Reference:
https://www.inogic.com/blog/2018/10/show-or-hide-microsoft-flow-button-in-dynamics-365/

NEW QUESTION 47
- (Exam Topic 3)
A company plans to create an app by using Power Apps. The company has the following requirements:
• The app must be able to enter data into Microsoft SharePoint
• Users must be able to add the app into Microsoft Teams.
You need to recommend which app to create. Which type of app should you recommend?

A. model-driven app as a personal app
B. canvas app as a personal app
C. canvas app as a tab app
D. model-driven app as a tab app

Answer: B

NEW QUESTION 51
- (Exam Topic 3)
A company is creating a canvas app and a model-driven app to manage their customer accounts.
The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.
The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.
You need to configure the scope for the business rules.
Which scope should you use? To answer, drag the appropriate scopes to the correct business rules. Each scope may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

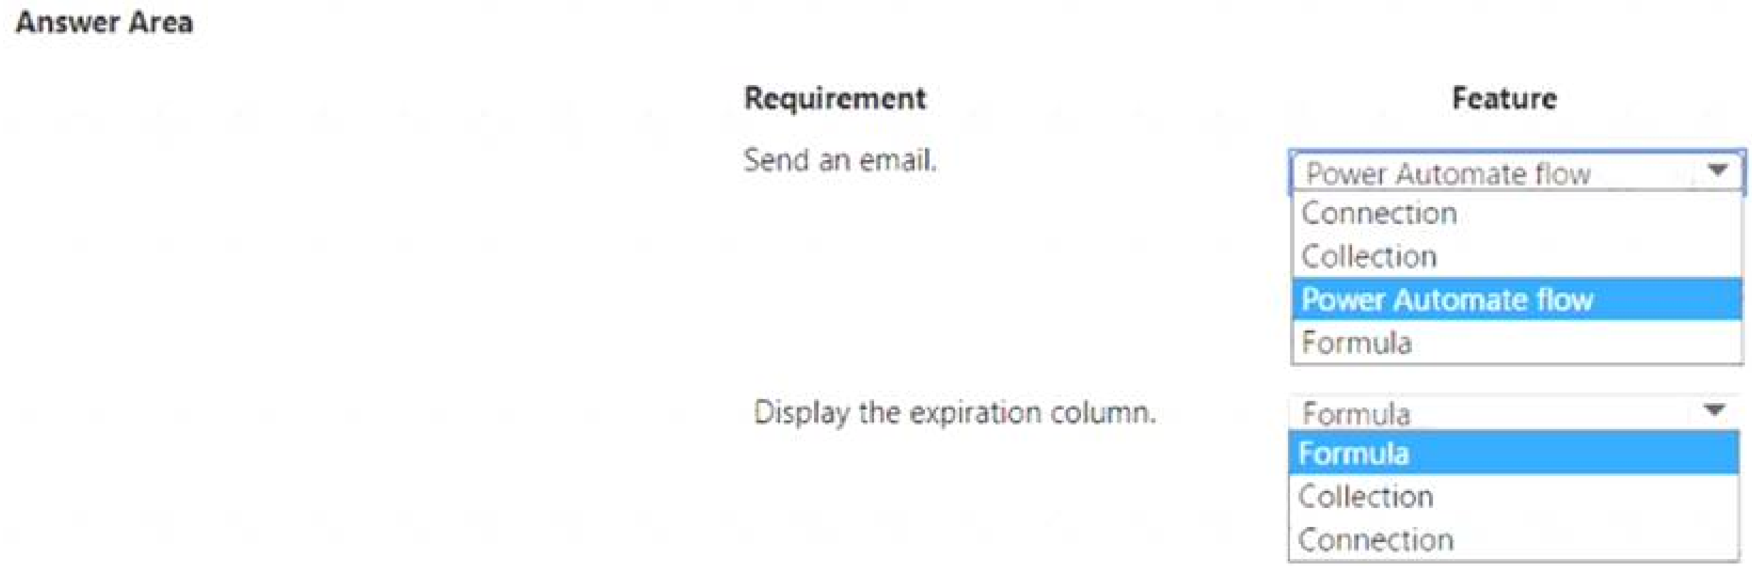


A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Table
The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value.
Scope the business rule to Entity (Table). Box 2: Specific form
The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only.
For Model
The scope of the business rule determines which forms the business rule will be applied. You set the scope, according to the following:
If you select this item... The scope is set to...
Entity- The table and all forms for the table All Forms- All forms for the table
Specific form (account Main Form, for example) - Just that form
Reference: https://debajmecrm.com/business-rules-in-powerapps-canvas-apps/
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-business-rules-recommendations

NEW QUESTION 54
- (Exam Topic 3)
You plan to create a canvas app.
The app must meet the following requirements:
• Send an email after a record is saved.
• Display the expiration column on a form if the creation date of the record is older than 90 days. You need to configure the app.
Which features should you use? To answer, select the appropriate options in the answer area.



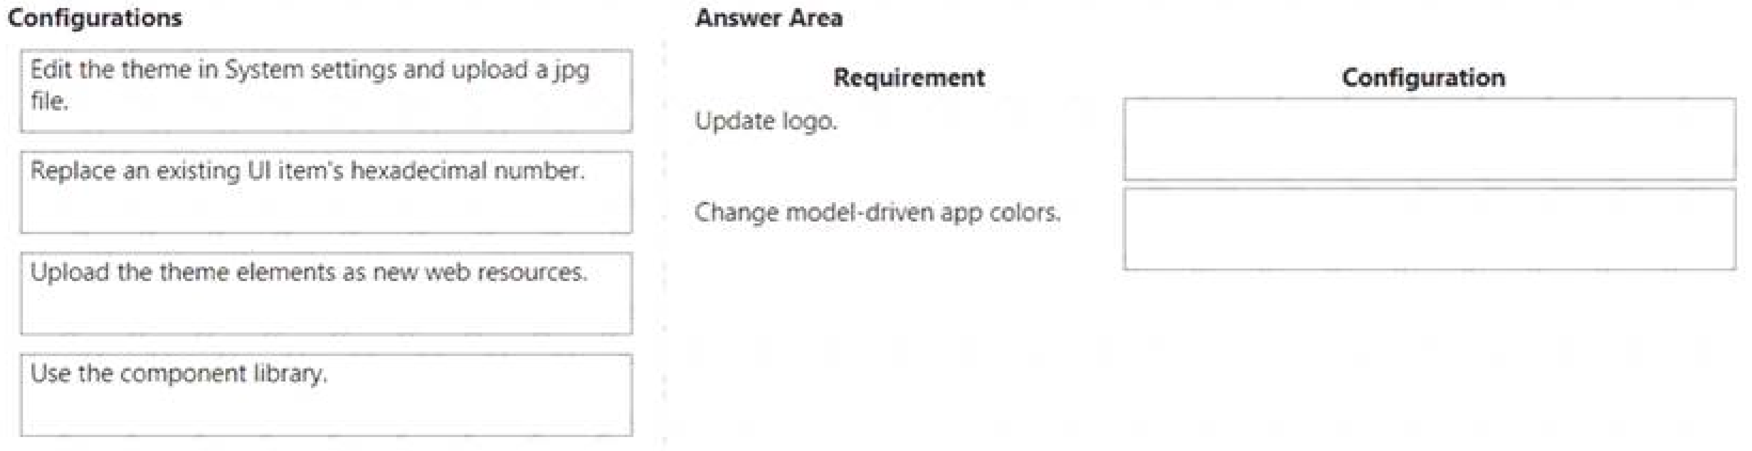
A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 59
- (Exam Topic 3)
You are customizing a model-driven app for a company. You create a Theme template to ensure the company logo and colors are properly used within these apps.
The theme must meet the following requirements:
- Updated to add the logo
- Downloaded by the makers to create the app

You need to configure the assets. To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

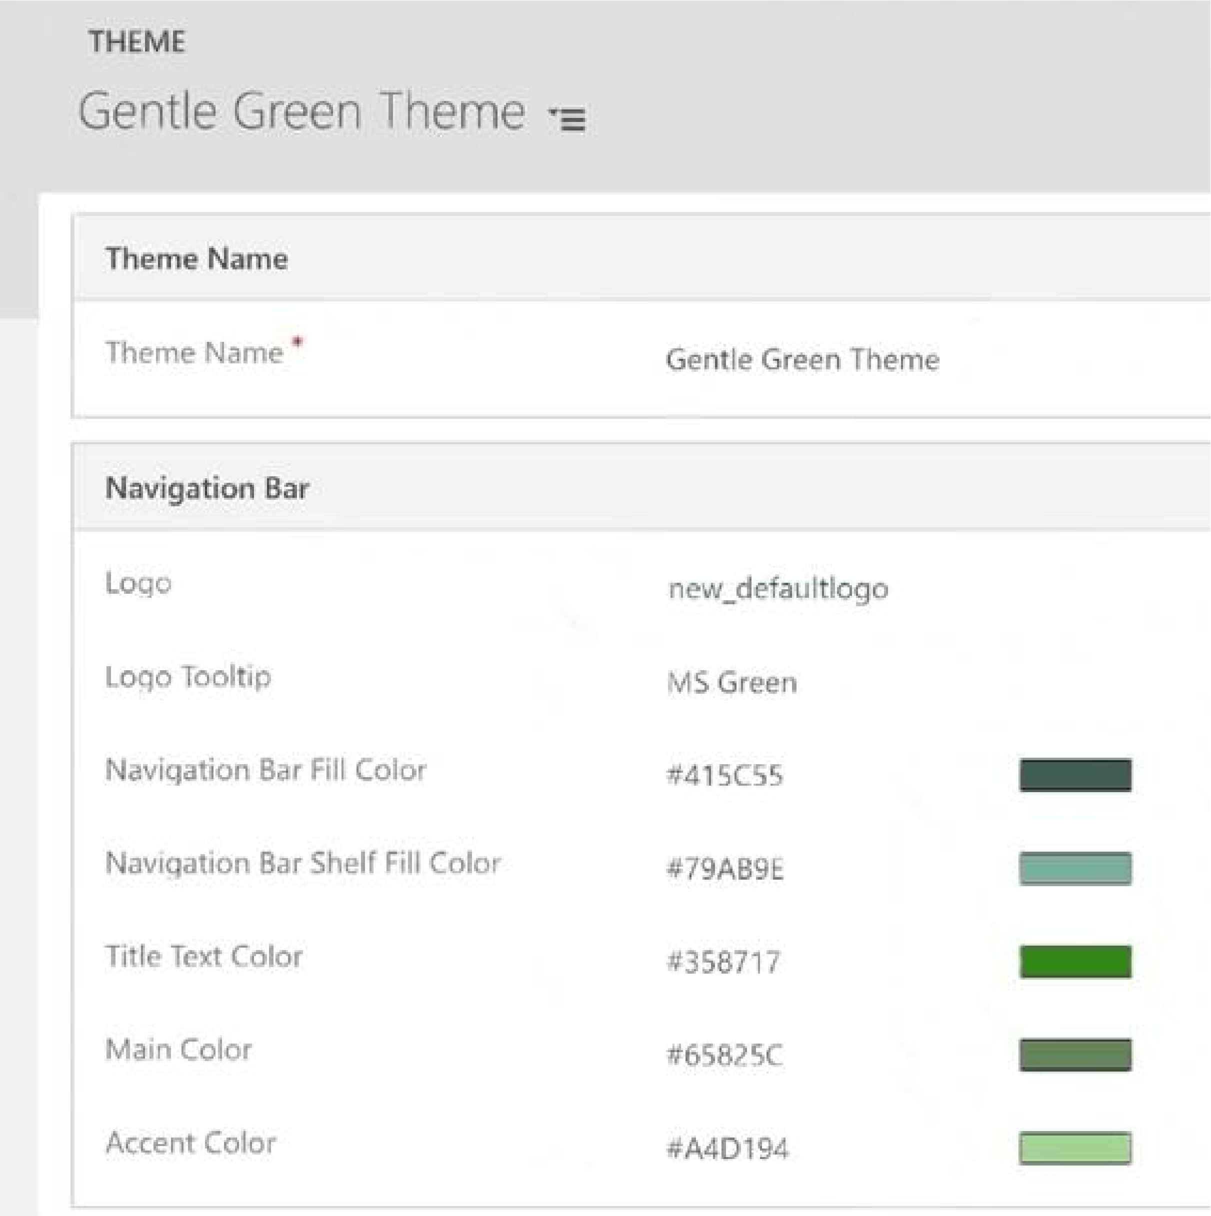


A. Mastered
B. Not Mastered

Answer: A

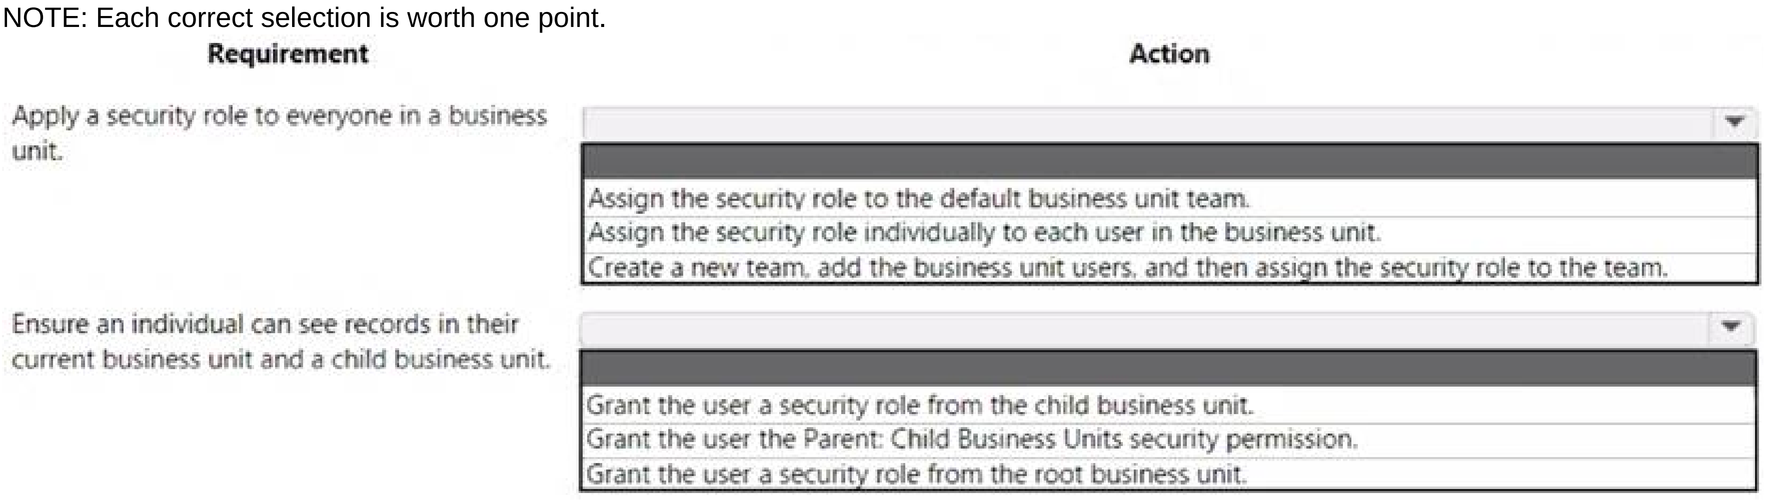
Explanation:
Box 1: Upload the theme elements as new web resources.
Each type of icon is stored as a web resource. Create a web resource first and then set the icons to use them. Alternatively, you can add the icon by creating a new web resource when you define the table properties.
Box 2: Replace an existing UI item's hexadecimal number. Copy and alter the existing theme
The easiest and quickest way to create a new theme is to clone and alter an existing theme. Then save, preview, and publish it.
- Sign in to Power Apps, select Settings icon (upper right), and then select Advanced settings.
- Select Customizations, and then select Themes.
- Under All themes, select the theme you want to clone, such as the CRM Default Theme. Select Clone on the command bar.
- Replace an existing UI item's hexadecimal number, such as the Title Text Color, with the hexadecimal value that represents the color you want.

For example, the CRM Default Theme was cloned and changed using mostly varying shades of green color. The following screenshots show the new colors for navigation and highlighting. A custom logo was also added that will appear in the upper left corner of an app.



Reference:
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-themes-organization-branding

NEW QUESTION 64
- (Exam Topic 3)
You are designing the organization structure for a company that has 5,000 users.
You need to configure security roles for the company while minimizing administrative effort. What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Create a new team, and the business unit users, and the assign the security role to the team. Change the business unit for a team
Important
By changing the business unit for a team, you can remove all security role assignments for the team. At least one security role must be assigned to the team in the new business unit.
- Select an environment and go to Settings > Users + permissions > Teams.
- Select the checkbox for a team name.
- Screenshot selecting a team.
- On the menu bar, select Change Business Unit.
- In the Change Business Unit dialog box, select a business unit. Enable Move records to new business unit to move to a new business unit. Select OK.

Box 2: Grant the user a security role from the child business unit.
Reference: https://docs.microsoft.com/en-us/power-platform/admin/create-edit-business-units https://docs.microsoft.com/en-us/power-platform/admin/security-roles-privileges

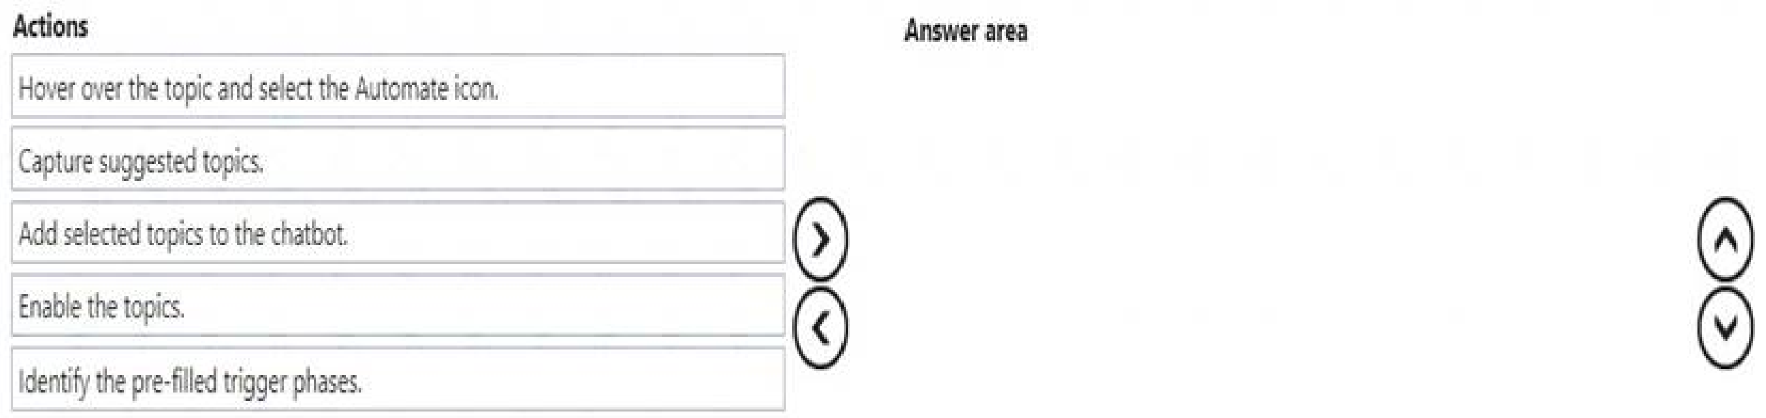
NEW QUESTION 65
- (Exam Topic 3)
A company is planning to create a Power Virtual Agents bot. The bot has the following requirements:
• The bot must provide address information for the company.
• The bot must be available from Microsoft Teams and from the internet website of the company. You need to configure the bot. Which component should you use?

A. Skill
B. Composer
C. Template
D. Channel

Answer: D

Explanation:
To make the bot available from Microsoft Teams and from the company's internet website, you need to configure the channels for the bot. Power Virtual Agents uses channels to connect the bot to different communication platforms such as Microsoft Teams, Skype, Facebook, and more. By configuring the appropriate channels for the bot, you can make it available on those platforms and allow users to interact with the bot from those locations.
You can configure channels by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Channels" tab, where you can add the channels which you want the bot to be available on.
Reference: https://docs.microsoft.com/en-us/power-virtual-agents/channels-overview

NEW QUESTION 70
- (Exam Topic 3)
A customer has a support website that includes FAQ pages, knowledge articles, and support content. You plan to leverage an existing Power Virtual Agents bot to enhance and streamline existing support
functionality for the existing support portal.
You need to create topics from existing website content. The process must minimize human errors during topic creation.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
- Select Suggest topics
on the Topics page to extract content from FAQ/support pages or online files.
- Add the suggested topics to your bot.
- Enable the topics.
https://docs.microsoft.com/en-us/power-virtual-agents/advanced-create-topics-from-web

NEW QUESTION 72
- (Exam Topic 3)
A company uses model-driven apps.
Users in the sales department enter the first name, last name, and phone number of customers in the app. The users request a single screen in the app to enter the customer data.
You need to configure the app. What should you do?

A. Create a canvas app.
B. Modify the site map.
C. Create a Power Automate flow.
D. Use a Power Virtual Agents app.

Answer: B

Explanation:
To configure a model-driven app in order to provide a single screen for the sales department users to enter the customer data, you should modify the site map of the app. A site map is a hierarchical representation of the different areas and functionality of the app, and it can be modified to create a new screen or view that combines the necessary fields for the customer data entry.
Once the site map is modified, you can add the necessary fields (first name, last name, and phone number) to the new screen or view, and make it accessible to the sales department users.
References:
- https://docs.microsoft.com/en-us/power-platform/admin/model-driven-apps-overview
- https://docs.microsoft.com/en-us/power-platform/admin/modify-site-map

NEW QUESTION 73
- (Exam Topic 3)
A company creates a model-driven app.
Users require access to a Power BI report that is embedded in the app. You need to configure the app.
Where should you add the report?

A. XML report
B. Dashboard
C. Business rule
D. Power Automate cloud flow

Answer: B

Explanation:
To add a Power BI report to a model-driven app, you should add it to a dashboard. Dashboards in
model-driven apps provide a way to organize and display information, such as charts, tables, and reports. You can add a Power BI report to a dashboard by creating a new dashboard and then adding a Power BI report component to it. This component allows you to specify the report you want to add and configure its properties, such as size and layout. Users will then have access to the embedded report when they view the dashboard in the app. Reference:
https://docs.microsoft.com/en-us/power-platform/admin/create-model-driven-app-dashboards

NEW QUESTION 75
- (Exam Topic 3)
The owner of a company needs to know who signs into the system. You need to ensure that the owner can view the user audit logs.
Where does each action need to be performed? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

Action	Location
Activate user auditing.	System Settings Personal Settings Customize the System Microsoft 365 Compliance
View the user audit logs.	Advanced Find Individual record User Summary report Microsoft 365 Compliance

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/audit-data-user-activity

NEW QUESTION 77
- (Exam Topic 3)
A company creates a canvas app.
The app requires users to enter their social security number. The app should only display the last four digits when the user tabs to a different column.
You need to configure the app. Which option should you use?

A. Power Fx
B. Business rule
C. Business process flow
D. Power BI DAX

Answer: A

NEW QUESTION 79
- (Exam Topic 3)
You implement an editable grid for the Account entity.
The business team provides the following list of features that they would like you to implement:
- Group by or sort columns in the current view.
- Configure a business rule to show an error message.
- Edit values in calculated fields.
- Edit the Address composite field.
- Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Action	Can be performed?
Group by or sort columns in the current view.	Yes No
Configure a business rule to show an error message.	Yes No
Edit values in calculated fields.	Yes No
Edit the Address composite field.	Yes No
Use the editable grid on mobile phones.	Yes No

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Action	Can be performed?
Group by or sort columns in the current view.	Yes / No
Configure a business rule to show an error message.	Yes / No
Edit values in calculated fields.	Yes / No
Edit the Address composite field.	Yes / No
Use the editable grid on mobile phones.	Yes / No

NEW QUESTION 83
- (Exam Topic 3)
You plan to create a Power Virtual Agents bot. The bot must support single sign-on.
You need to publish the bot.
Which two locations should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Microsoft Teams
B. Mobile app developed for iOS and Android
C. Azure Bot Service channels
D. Website developed using pro developer tools

Answer: CD

Explanation:
* C. Azure Bot Service channels: You can configure a Power Virtual Agents bot as a channel in Azure Bot Service. Single sign-on can be configured for the bot using Azure Active Directory (AAD) and the OpenID Connect protocol. This allows you to use your existing AAD users and groups to control access to your bot.
* D. Website developed using pro developer tools: You can embed a Power Virtual Agents bot on a website using the Web Chat control. Single sign-on can be configured for the bot using Azure Active Directory (AAD) and the OpenID Connect protocol. This allows you to use your existing AAD users and groups to control access to your bot.

NEW QUESTION 84
- (Exam Topic 3)
You are a Dynamics 365 Customer Service administrator.
Users report that the main form does not display data from other entities or allow them to edit data from other entities.
You need to embed information from other entities in the form and allow users to edit the data. Which actions should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Action
Edit data	Add a mobile form Add a quick create form Add a sub-grid Add a virtual entity
View data	Add a reference panel Add a quick view

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated
Box 1: Add a quick create form
With quick create forms, your app can have a streamlined data entry experience with full support for logic defined by form scripts and business rules.
Box 2: Add a quick view
A quick view form can be added to another form as a quick view control. It provides a template to view information about a related entity record within a form for another entity record. This means your app users do not need to navigate to a different record to see the information needed to do their work.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-quick-create-forms https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/create-edit-quick-v

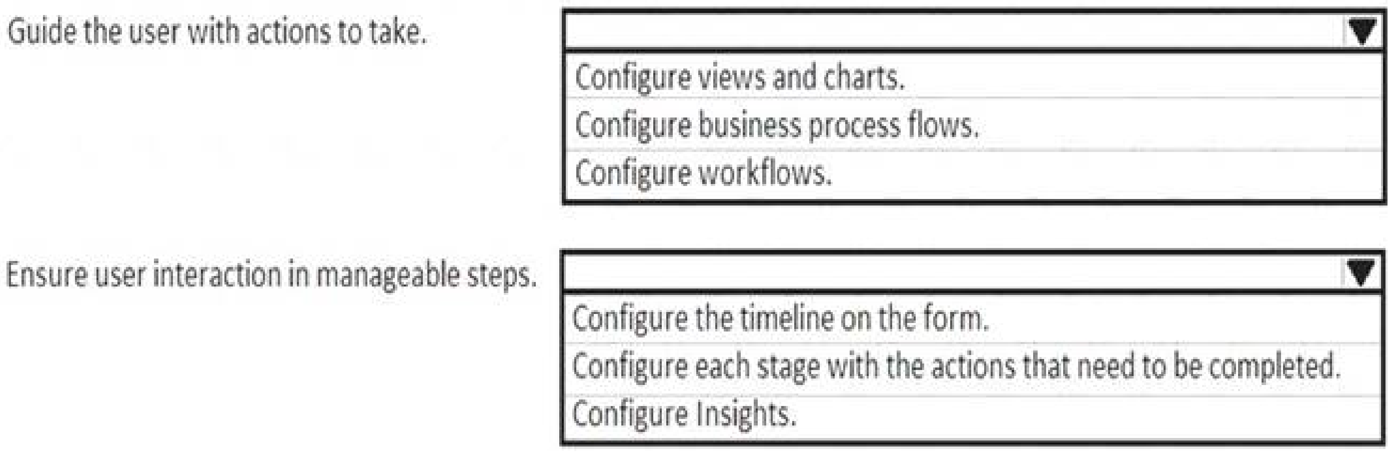
NEW QUESTION 88
- (Exam Topic 3)
You are designing a Power Virtual Agents chatbot.
You observe that the environment you plan to use does not appear as an option in the Power Virtual Agents user interface.
You need to ensure that you can create the chatbot in the environment that you want to use. What should you do?

A. Create an environment in a supported region.
B. Convert the environment to a sandbox environment.
C. Change the region for the environment.

Answer: A

Explanation:
The environment doesn't show up in the drop-down menu of Power Virtual Agents
Your environment might not show up in the drop-down menu due to one of the following:
The environment doesn't have a database created. To resolve this issue, go to admin.powerplatform.com to create a database in your environment.
The environment is created in an unsupported region.
Reference: https://docs.microsoft.com/en-us/power-virtual-agents/environments-first-run-experience

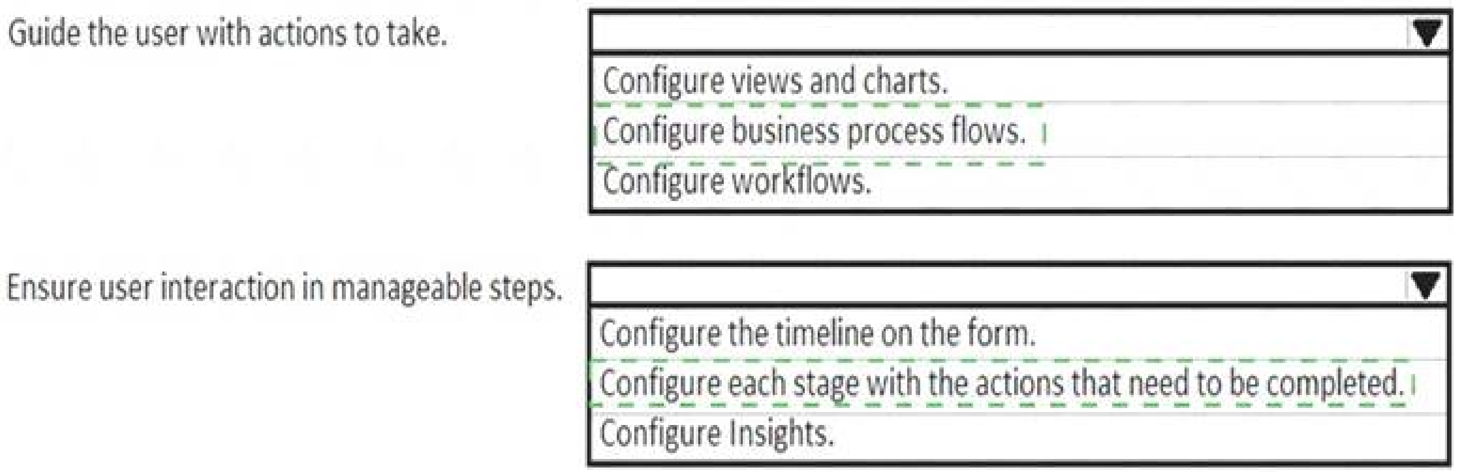
NEW QUESTION 90
- (Exam Topic 3)
You are a Dynamics 365 Customer Engagement administrator. You create a new solution in Dynamics 365. You need to help end users understand which actions to take next and ensure that user interaction occurs in manageable steps.
Which actions should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 93
- (Exam Topic 3)
A company uses Dataverse to store the names of contacts. The company uses a shared Microsoft Excel file to collect the data. The company requires that the contacts be added to Dataverse automatically every day
You need to identify which tools are required to create and perform the import. What should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 94
- (Exam Topic 3)
You are a Dynamics 365 Customer Service system administrator. You create an app for the sales team. Members of the sales team cannot access the app. You need to ensure that sales team members can access the app. Where should you configure app permissions?

A. Security Roles
B. Manage Roles
C. Dynamics administration center
D. Dynamics 365 home

Answer: B

Explanation:
References:
https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/manage-access-apps-security-r Manage access to apps by using security roles.
You can choose what users see and access from the My Apps page or the Customer Engagement home page by giving app access to specific security roles. Users will have access to apps based on the security roles they're assigned to.
* 1. Go to Settings > My Apps.
* 2. In the lower-right corner of the app tile you want to manage access for, select More options (...), and then select Manage Roles.
* 3. Enter the following in the Manage Roles dialog box:
a) App URL Suffix
b) Roles
c) Select Save.
* 4. Refresh the My Apps page.
* 5. Go to the Apps Being Edited view, and publish the app again. Reference:
https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/manage-access-app

NEW QUESTION 97
- (Exam Topic 3)
You plan to add a Power Apps app to Microsoft Teams.
A Microsoft Dataverse for Teams environment has not been provisioned. You need to create a Dataverse for Teams environment.
Which two actions can you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Create a new environment in the Microsoft Power Platform Admin Center.

B. Create a new app in Teams.
C. Create an app permission policy in the Teams admin center.
D. Install an existing app in Teams.

Answer: BD

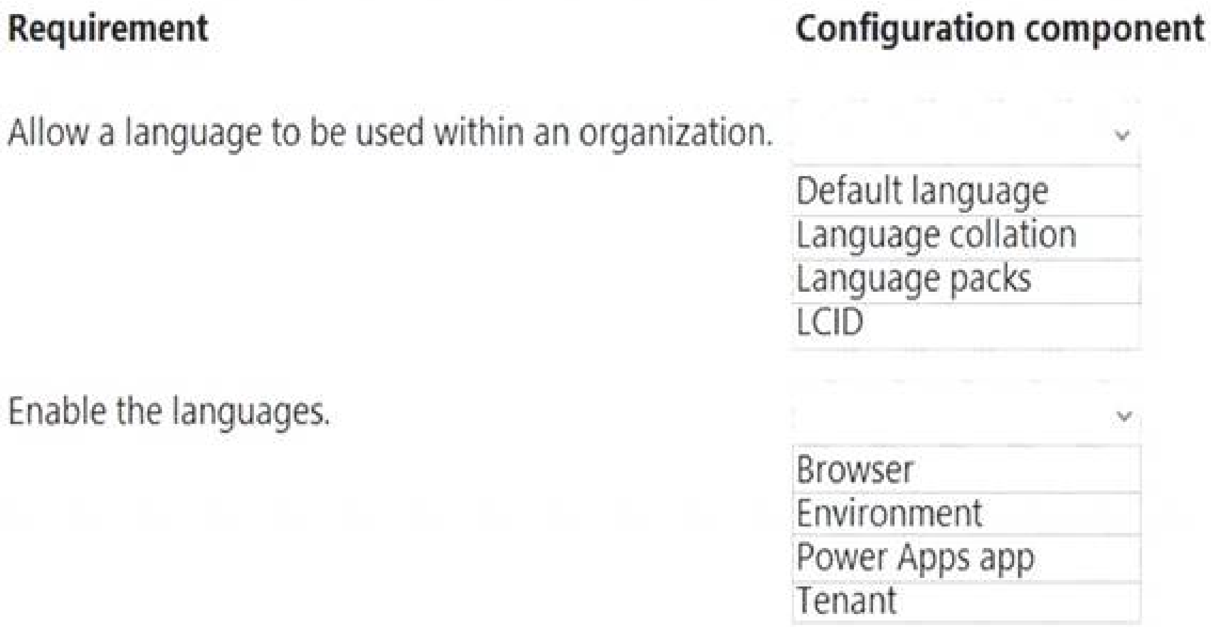
NEW QUESTION 100
- (Exam Topic 3)
You need to create a Power Automate desktop flow.
What are two possible ways to create the flow? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Record mouse and keyboard events.
B. Configure a pre-built template.
C. Use pre-built actions.
D. Create models by using Microsoft Visio.

Answer: AC

Explanation:
C: Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate you can automate tasks on the desktop as well as the Web.
A: Alternatively, you can use the two legacy methods of creating desktop flows: Windows recorder (V1) and Selenium ID. With these you record mouse and keyboard events.
Reference:
https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-flow https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-web

NEW QUESTION 101
- (Exam Topic 3)
A company uses a model-driven Power Apps app in a new environment. The base language is English. You need to configure French and Spanish.
Which configuration component should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

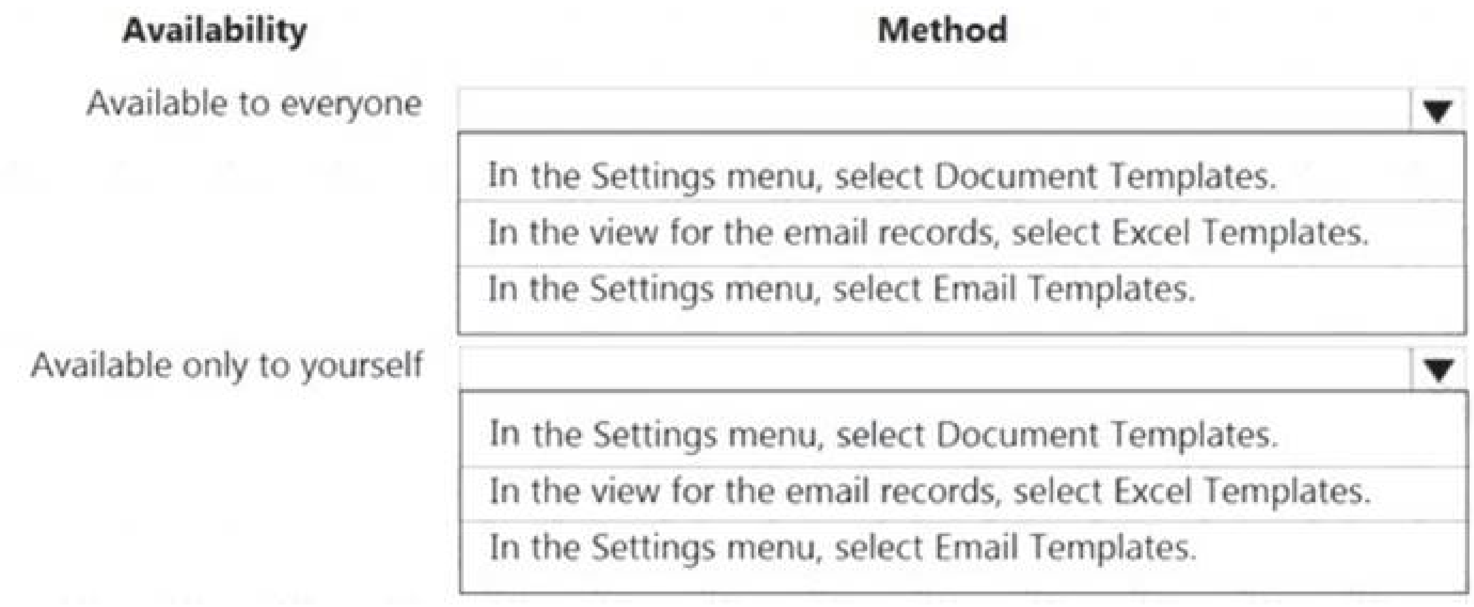


A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Language packs
Before users can start using a Language Pack to display a language, the Language Pack must be enabled in your organization.
Box 2: Environment Enable the language
These settings can be found in the Microsoft Power Platform admin center by going to Environments > [select an environment] > Settings > Product > Languages.
Reference: https://docs.microsoft.com/en-us/power-platform/admin/enable-languages

NEW QUESTION 103
- (Exam Topic 3)
You have a model-driven app. You create five Microsoft Excel templates for analyzing customer data. Four of the templates must be available to all users. The remaining template must be available only to you.
You configure the appropriate security roles for users.
You need to determine how to upload the Excel templates.
Which method should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Table Description automatically generated with medium confidence
Box 1: In the Settings menu, select Document Templates
Templates uploaded from the Settings page are available to all users. You don't need to take any further action. Administrators can use the Settings page to upload the Excel template. A template uploaded in Settings is
available to all users.
For admins: Upload the Excel template
- Go to Settings > Templates > Document Templates.
- Click Upload Template.
- Drag the Excel file into the dialog box or browse to find and upload the file.
- Upload Template dialog box.
- Click Upload.

Box 2: In the view for the email records, select Excel templates
Note: For non-admins or admins wanting to create a personal template: Upload the Excel template
Open a page with a list of records, for example, the list of Sales Opportunities. Go to Sales > Opportunities > My Open Opportunities.
- On the menu bar, click Excel Templates > Create Excel Template.
- Click Excel Template > Upload.
- Click Upload to add the Excel template.
- Drag the file into the dialog box or browse to find and upload the file.
- Click Upload.

Reference:
https://docs.microsoft.com/en-us/power-platform/admin/analyze-your-data-with-excel-templates

NEW QUESTION 107
- (Exam Topic 3)
You plan to create a canvas app.
The app requires a button on the data entry screen that users can select to send an email. You need to configure the app.
What should you create?

A. Business process flow
B. Azure Logic App
C. Power Automate cloud flow
D. Classic workflow

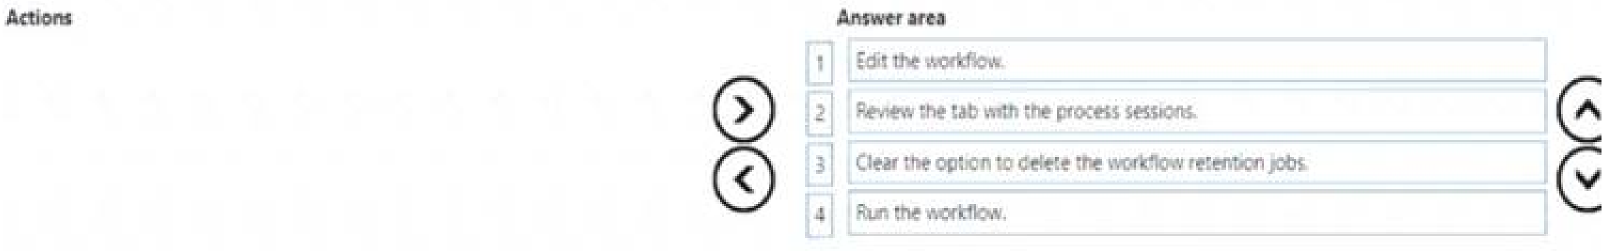
Answer: C

NEW QUESTION 109
- (Exam Topic 3)
A company uses a model-driven app. The app uses a workflow to send email. Emails are sent to new customers that enter an email address for the first time in the app.
Customers report that they do not receive an email after entering an email address. You need to troubleshoot the issue.
In which order should you perform the actions? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

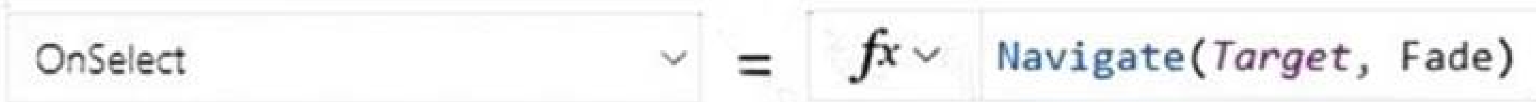


NEW QUESTION 113
- (Exam Topic 3)
You are creating a canvas app.
A user will click a button on each screen of a Power Apps app to proceed to the next screen. You need to implement an action that selects the next screen that the user sees.
Which event should you handle?

A. OnLoad
B. OnCheck
C. ScreenTransition
D. OnSelect

Answer: D

Explanation:
Add navigation
* 1. With the Source screen selected, open the Insert tab, select Icons, and then select Next arrow.
* 2. With the arrow still selected, select the Action tab, and then select Navigate.
* 3. The OnSelect property for the arrow is automatically set to a Navigate function.



* 4. When a user selects the arrow, the Target screen fades in.
* 5. On the Target screen, add a Back arrow, and set its OnSelect property to this formula:
* 6. Navigate(Source, ScreenTransition.Fade)
* 7. While holding down the Alt key, toggle between screens by selecting the arrow on each screen. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-screen-context-variables

NEW QUESTION 118
- (Exam Topic 3)
You create a Power Virtual Agents chatbot to reduce the number of incoming support calls that require a live person.
The chatbot does not direct users to the correct information. You determine that this is because the chatbot is not able to identify which product a user is referring to in a conversation.
You need to present a list of products so that users can select the correct product. What should you create?

A. Table
B. Variable
C. Slot filling
D. Entity

Answer: C

Explanation:
Slot filling is a natural language understanding concept that means saving an extracted entity to an object. However, in Power Virtual Agents, slot filling means placing the extracted entity value into a variable.
Reference: https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling

NEW QUESTION 123
- (Exam Topic 3)
You create a Power Virtual Agents bot.
You observe that the bot is not able to recognize input from some users. You need to configure the bot response for unrecognized input from users.
What are two possible ways to achieve this goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Transfer to an agent.
B. Use a fallback topic.
C. Display a system-defined error message.
D. Connect to a different channel.

Answer: BC

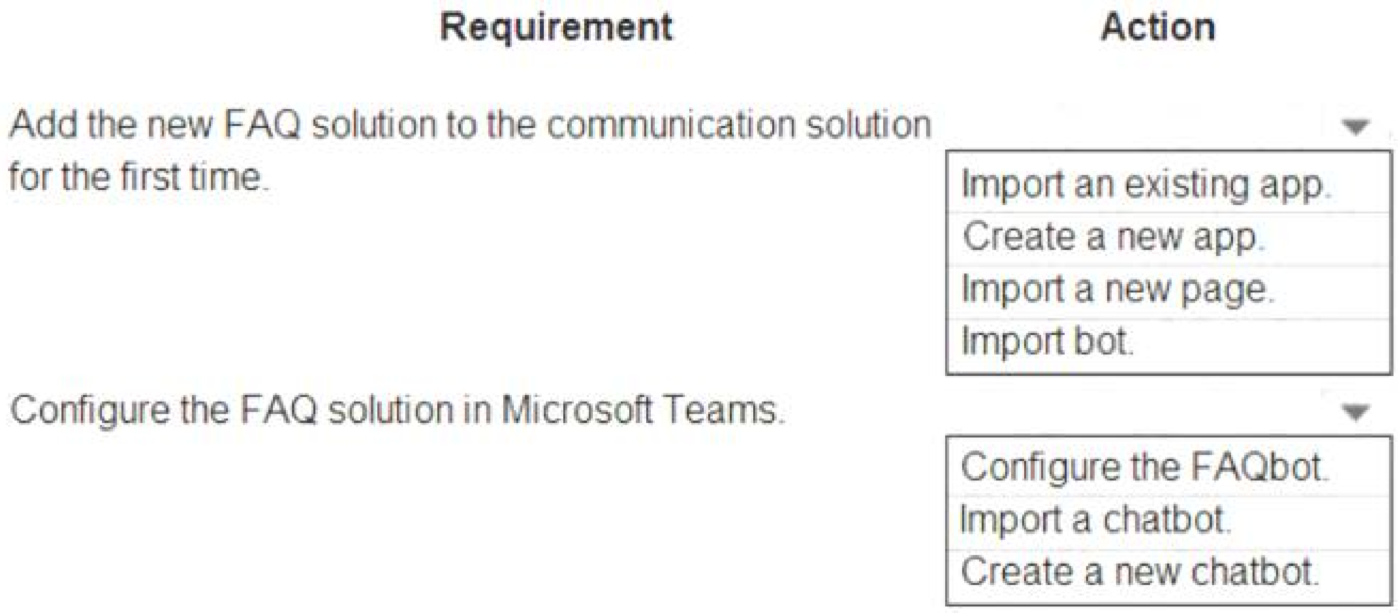
Explanation:
* B. Use a fallback topic: Power Virtual Agents provides the capability to handle unrecognized inputs by using fallback topics. A fallback topic is a topic that is triggered when the bot is unable to recognize the user input. You can configure fallback topics by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Topics" tab and create a new topic with a fallback trigger. Reference: https://docs.microsoft.com/en-us/power-virtual-agents/topics-triggers#fallback-triggers
* C. Display a system-defined error message: This is another option to handle unrecognized inputs by displaying a predefined message that inform the user that the bot was unable to understand their input.

NEW QUESTION 128
- (Exam Topic 3)
A company uses three apps to complete several business processes.
You need to identify solutions to help the company perform regression testing when the apps are updated. Which two tools should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Power Automate automated flow
B. Windows recorder (V1)
C. Power Automate desktop flow
D. Windows Steps Recorder

Answer: BD

NEW QUESTION 130
- (Exam Topic 3)
You need to embed the FAQbot into the communication solution.
Which actions should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 131
- (Exam Topic 3)
A company uses a model-driven app. The app uses a Power Virtual Agents chatbot.
The company has two locations in different countries/regions with separate environments for each location. Each location has a development environment, a testing environment, and a production environment. The company uses the Application Lifecycle Management (ALM) process for the environments.
You need to create the different Power Virtual Agents bot environments. How many Power Virtual Agents bot environments are required?

A. 1
B. 2
C. 3
D. 6

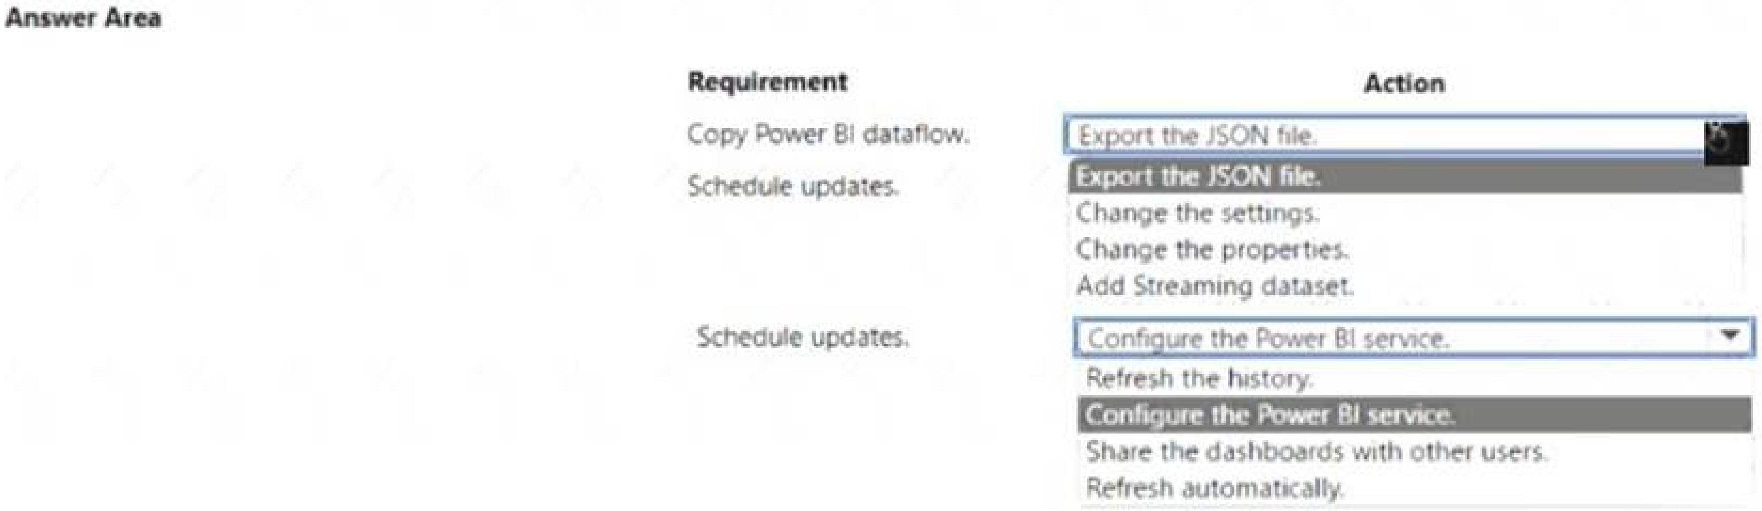
Answer: D

Explanation:
When a company uses a model-driven app that incorporates a Power Virtual Agents chatbot, and has multiple locations with different environments for each

location, it is necessary to create separate Power Virtual Agents bot environments for each location.
For each location, 3 different environments are required: development, testing, and production. This is in line with the Application Lifecycle Management (ALM) process that the company uses.
In total, 6 Power Virtual Agents bot environments are required: 2 locations x 3 environments per location = 6. It's worth mentioning that Power Virtual Agents allows to export and import the bot, so once you configure the bot in one environment, you can import the bot to the other environments, this way you don't need to start from scratch.
References:

- https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/bot-lifecycle
- https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/export-import

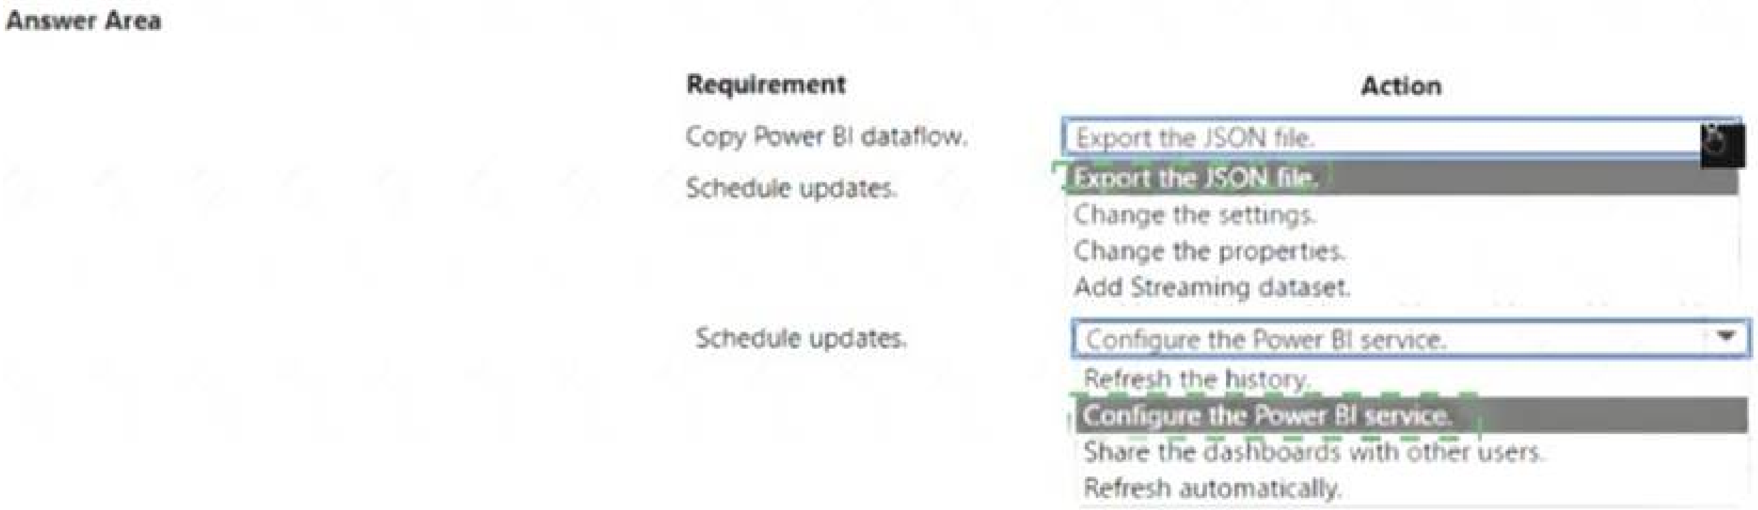
NEW QUESTION 133
- (Exam Topic 3)
You plan to create a Power Bi dataflow.
The Power BI dataflow has the following requirements:
• Be able to create a copy of the dataflow to separate Power Bl workspaces
• Schedule the dataflow to update every day at 11:00 AW. You need to configure the dataflow.
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



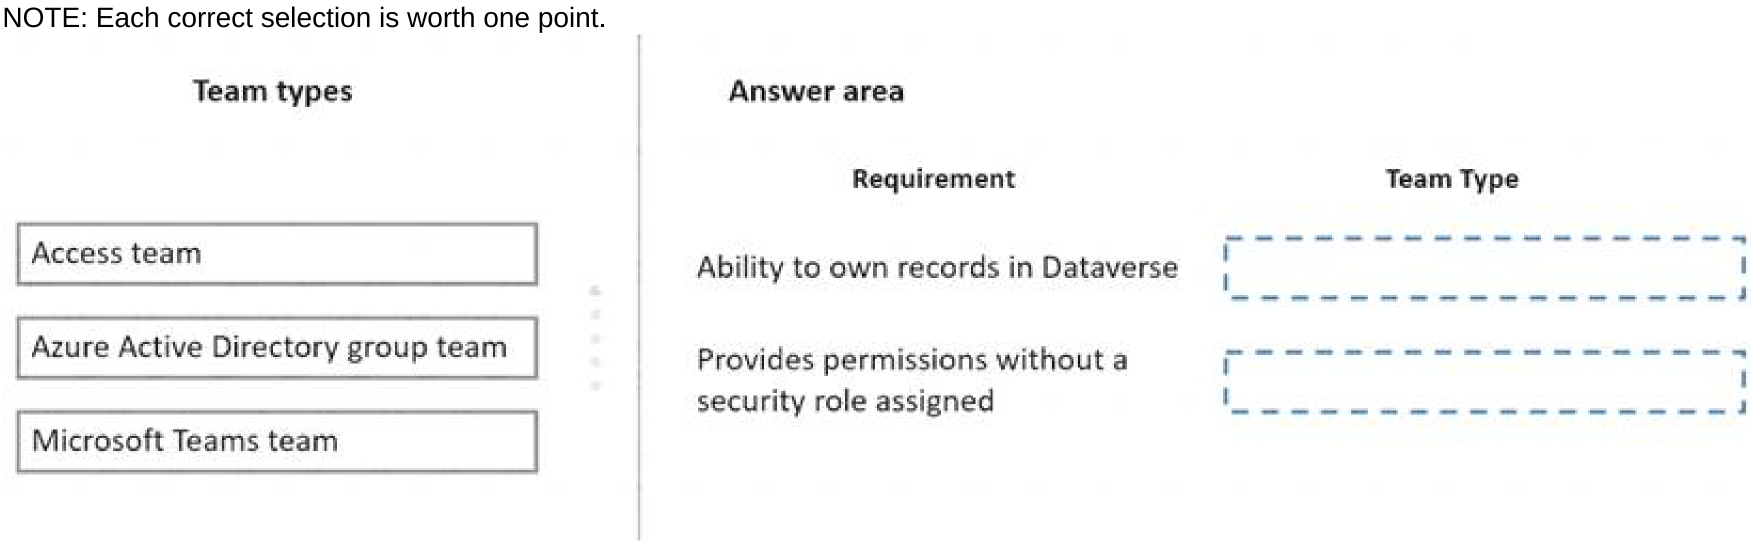
A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 137
- (Exam Topic 3)
You are configuring Microsoft Dataverse security. You plan to assign users to teams. Record ownership and permissions will differ based on business requirements.
You need to determine which team types meet the requirements.
Which team type should you use? To answer, drag the appropriate team types to the correct requirements.
Each team type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

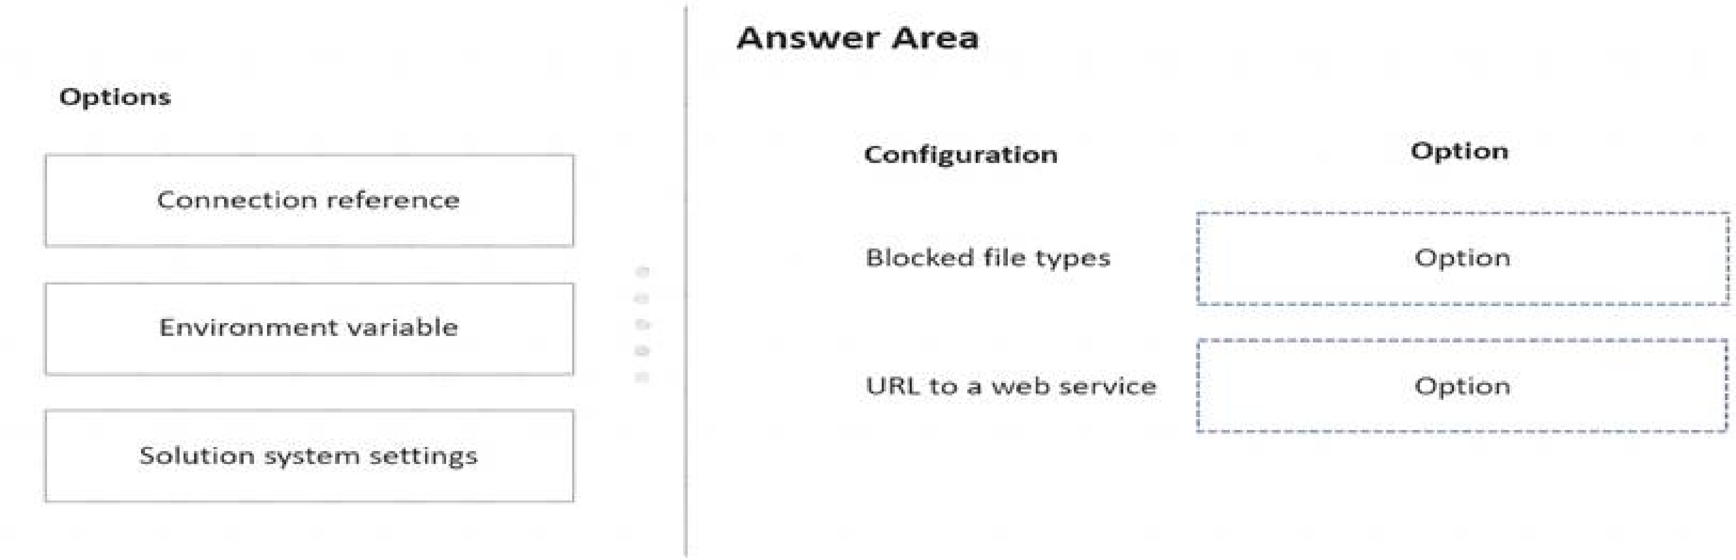


A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Microsoft Teams team
Dataverse supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the table is created and can't be changed. For security purposes, records that are organization owned, the only access level choices is either the user can do the operation or can't. For user and team owned records, the access level choices for most privileges are tiered Organization, Business Unit, Business Unit and Child Business Unit or only the user's own records. That means for read privilege on contact, I could set user owned, and the user would only see their own records.
Box 2: Access team
An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams in which they are members. The records are shared with an access team and the team is granted access rights on the records, such as Read, Write or Append.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-security-cds
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/use-access-teams-owner-teams-collaborate

NEW QUESTION 139
- (Exam Topic 3)
You create a new solution for a business process.
The business process includes uploading specific file types to a web service.
You need to ensure that the business process works the same way anywhere the solution is deployed. Which option should you use? To answer, drag the appropriate options to the correct configurations. Each
option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Solution system settings
For Power Apps in Settings > Customizations > Customize the System you can configure email and document management, activate or deactivate processes, and more.
Box 2: Environment variable
When should Environment variables be used? Some examples include:
When an input parameter needs to change across environments and should not be hard-coded. For example, a URL that points to a different resource in development and production environments.
If you're building a solution where your customer is required to provide an input value. Application setup pages.
Incorrect:
A connection reference is a solution component that contains information about a connector. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/advanced-navigation https://powerapps.microsoft.com/en-us/blog/environment-variables-available-in-preview/

NEW QUESTION 140
- (Exam Topic 3)
A company has a sales application that is supported by an Azure SQL database. You are developing a Power Apps app for use by customer service agents.
The app must reference customer data from the sales application. Data in the sales application is constantly changing and must not be replicated in Microsoft Dataverse
Some customer data is considered sensitive. You must protect data for specific fields when users view data in the app.
You need to configure table creation for the app.
How should you configure the app? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

Requirement	Action
Dataverse table type to create for the referenced customer data.	Create a virtual table. Create an activity table. Create a user-owned table. Create an organization-owned table.
Protect sensitive customer data for specific fields.	Create an alternate key. Create a secured column. Implement input method editor (IME) mode. Set the value of the visible property of the fields to false.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Requirement	Action
Dataverse table type to create for the referenced customer data.	Create a virtual table. Create an activity table. Create a user-owned table. Create an organization-owned table.
Protect sensitive customer data for specific fields.	Create an alternate key. Create a secured column. Implement input method editor (IME) mode. Set the value of the visible property of the fields to false.

NEW QUESTION 142
- (Exam Topic 3)
You are designing an app for a bank.
You must create entities for the app and configure relationships between entities:

Entity	Requirements
LoanApplicant	This entity represents a person who is applying for a loan. The entity must contain an attribute named Email. This attribute must provide look-up for the name of the applicant.
Loan	This entity represents a loan application. Loan applicants may apply for one loan per application. Loan applicants may have more than one active application.
Property	This entity represents the property that the applicant intends to purchase.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct requirements. Each relationship type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Relationship types

1 : N
N : N
N : 1

Answer Area

Requirement	Relationship type
The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.	
Loan applicants can apply for one type of loan per application. Applicants can have more than one application.	
Loans must be applied for for a single property.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Text Description automatically generated
Box 1: N:1
You add a lookup column with a many-to-one relationship. Box 2: N:N
Box 3: N:1
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-entity-lookup

NEW QUESTION 145
- (Exam Topic 3)
A farm uses a canvas app to manage schedules for planting fields with crop seeds. The farm uses business intelligence to provide recommendations for schedule changes based on weather data.
You must implement a business rule that changes information for several forms in the canvas app based on business intelligence data.
You need to configure the business rule. Which scope should you use?

A. Table
B. All Forms
C. Form specific

Answer: A

NEW QUESTION 148
- (Exam Topic 3)

NEW QUESTION 152
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.
After marriage, Elisabeth changes her legal name to Elisabeth Mueller.
You need to update the sign in name for the user without losing any application history.
Solution: Ask the Microsoft 365 administrator to sign in to the admin portal and change the username. Does the solution meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 157
- (Exam Topic 3)
You are creating a Power Virtual Agents chatbot for a Microsoft Power Platform power apps portal app. The job title of users must be stored automatically when users log in. The job title must always appear in the
chatbot.
You need to configure the job title functionality.
Which mechanism should you use?

A. artificial intelligence
B. variable
C. entity
D. topic

Answer: B

Explanation:
After enabling the Authentication, you will now have access to Two variables, bot.UserDisplayName
bot.UserId

NEW QUESTION 162
- (Exam Topic 3)
You create a canvas app for a sales team. The app has an embedded Power BI tile that shows year-to-date sales. Sales users do not have access to the data source that the tile uses.
Sales team users must be able to see data in the Power BI tile. You must minimize the level of permissions that you grant and minimize administrative overhead.
You need to share another Power BI component to make the data visible. What should you share?

A. The Power BI dataset the tile uses as a data source.
B. The Power BI workspace that includes the tile.

C. The Power BI dashboard that includes the tile.

Answer: C

Explanation:
Once shared, the PowerApps app will be accessible by all users who have permissions to access the app. However, in order to make the Power BI content visible to those users, the dashboard where the tile comes from needs to be shared with the user on Power BI. This ensures that Power BI sharing permissions are respected when Power BI content is accessed in an app.

NEW QUESTION 169
- (Exam Topic 3)
A company uses Common Data Service to manage prospects. The company has a business process flow named BPFA that is associated with the Prospect entity to streamline the prospect management process.
You add a field named Category to the Prospect entity. You create additional business process flows. You apply the business process flows to Prospect records based on the selected category. Users can switch to any other newly configured business process flows but must not use BPFA.
You need to configure the solution.
What are two possible ways to achieve this goal? Each correct answer presents a complete solution. NOTE Each correct selection is worth one point.

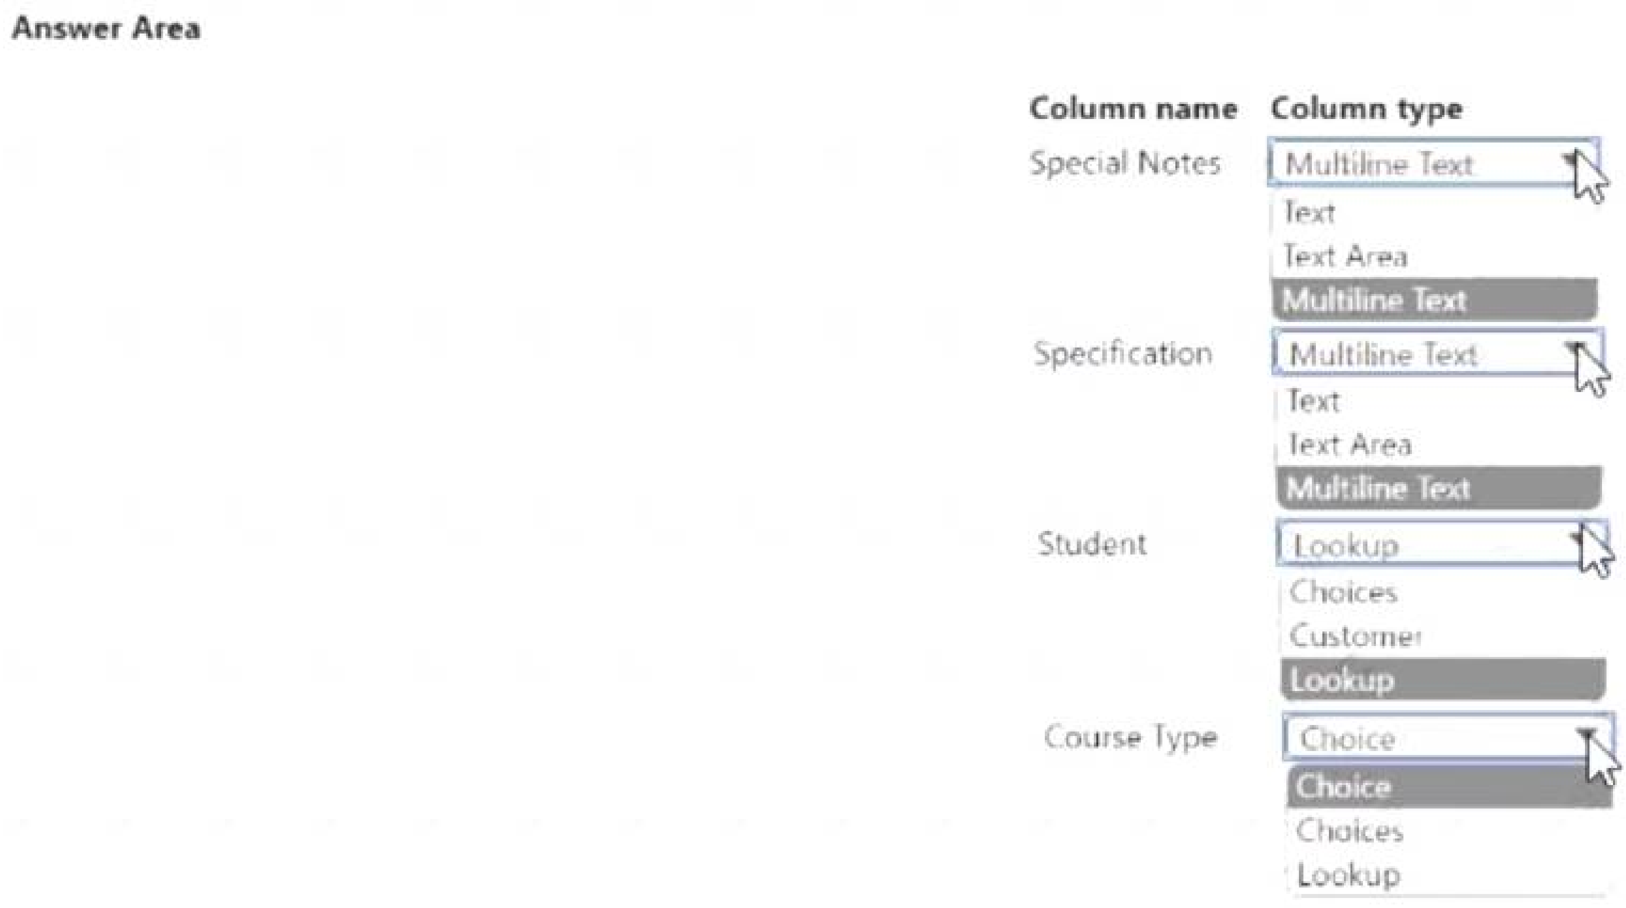
A. Remove all of the privileges for BPFA.
B. Deactivate BPFA.
C. Use a business rule to prevent users from switching to BPFA.
D. Change the display order of the business process flows to move BPFA to the bottom of the list.

Answer: AB

NEW QUESTION 172
- (Exam Topic 3)
A company is implementing a data model by using Dataverse.
The company requires the following columns in a new custom table:

Column name	Requirement
Special Notes	Must contain string data that stores 100 characters and be rendered as a multiline control.
Specification	Must contain string data that stores up to 8,000 characters and be rendered as a multiline control.
Student	Must contain an input control that can store a reference to an account or a contact in the system.
Course Type	Must contain a list of predefined options. Users must be able to select only one option.

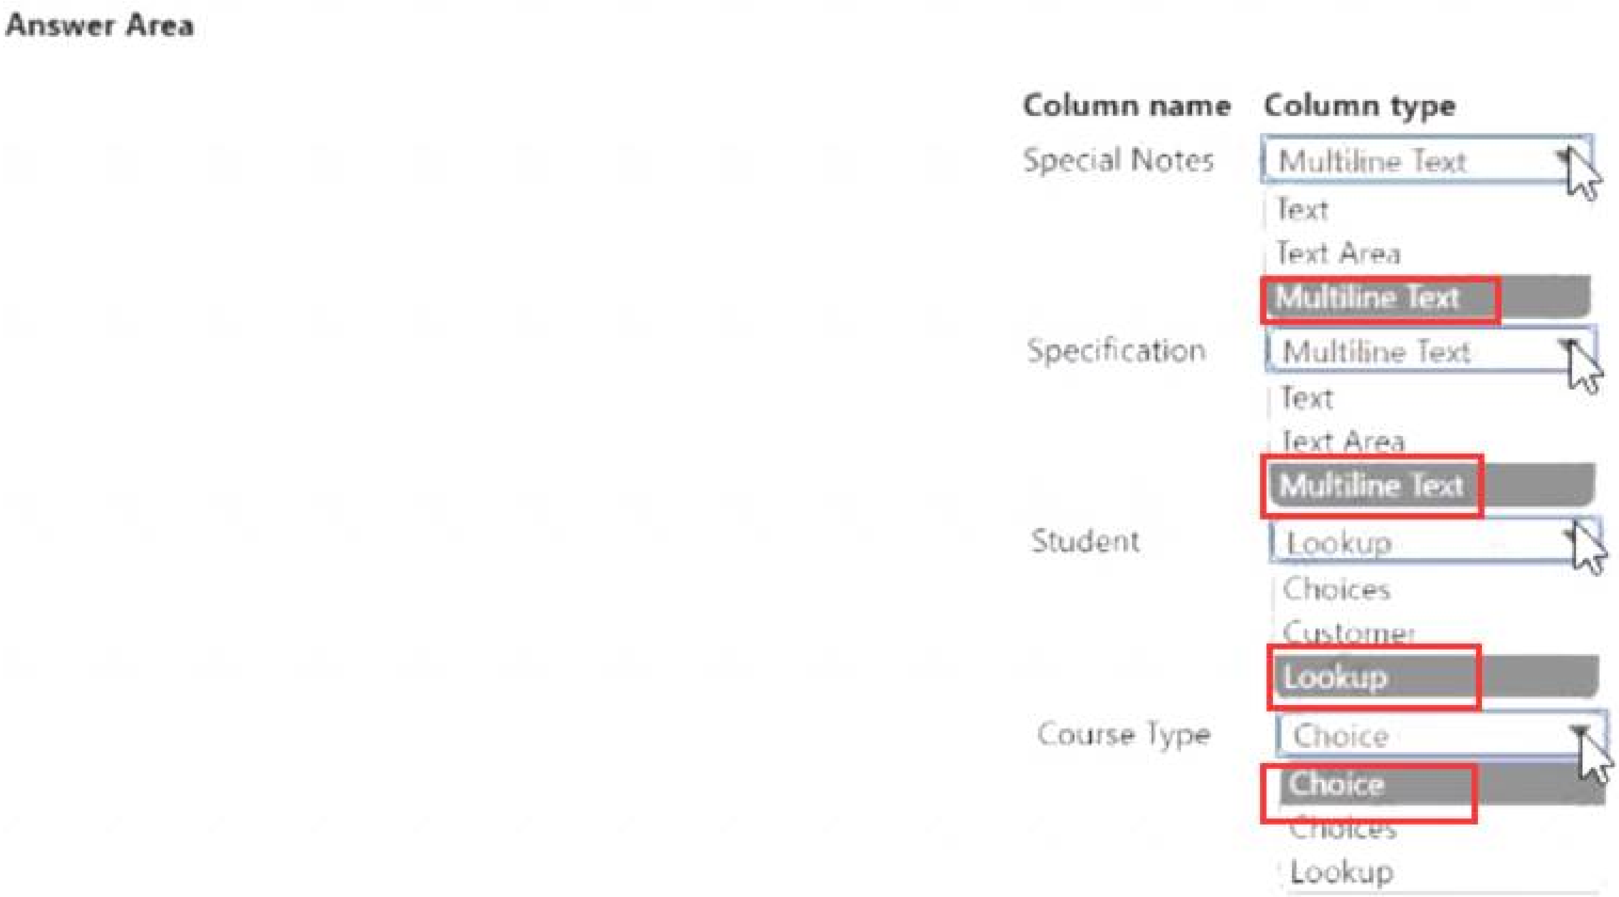
You need to choose the column type that uses the least amount of database storage for each column.
Which column types should you choose? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 176
- (Exam Topic 3)
A company plans to implement AI Builder to add intelligence to several business processes. Each business process uses different sources and produces different outputs.
You need to determine which AI Builder model types to use.
Which model types should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Recognition requirement	Model type
Identify a person's age in a paragraph when written using the pattern **twenty years old**.	Entity extraction Text recognition Key phrase
Identify items and prices from an invoice.	Form processing Text recognition Object detection

A. Mastered
B. Not Mastered

Answer: A
