HP

Exam Questions HPE0-V25

HPE Hybrid Cloud Solutions

NEW QUESTION 1
Your customer IS interested in me new MSA storage array and asks tor a demo Of the features and monitoring capabilities.
which tool should you use?

A. HPE Storage Management Utility (SMU)
B. HPE Data serves Cloud console (DSCC)
C. HPE StoreServ Management console (SSMC)
D. HPE InfoSight

Answer: A

Explanation:
According to HPE, SMU is a web-based interface that enables you to configure, monitor, and manage storage devices. It also provides performance monitoring and reporting for HPE MSA storage array1s. With SMU, you can demonstrate the features and monitoring capabilities of the new MSA storage array to your customer.

NEW QUESTION 2
You are considering requirements for a database server. What is the most important component to employ?

A. File and Print software
B. GPU accelerators
C. Antivirus Software
D. Fault-tolerant memory

Answer: D

Explanation:
According to Database Design Resource, fault-tolerant memory is a type of memory that can detect and correct errors without affecting the performance or availability of the database server1. Fault-tolerant memory can help prevent data corruption and loss, which are critical issues for database servers1.

NEW QUESTION 3
A customer needs Help setting up their bootable logical drive/volume, checking online drive firmware activation readiness, and managing device identification LEDS
What HPE tool should you recommend?

A. smart storage Administrator
B. Integrated Smart Update Tool
C. HPE OneView
D. Service pack for ProLiant

Answer: A

Explanation:
the HPE Smart Storage Administrator (SSA) is a web-based application that helps you configure, manage, diagnose, and monitor HPE ProLiant Smart Array Controllers and now other storage devices as well, such as host bus adapters (HBAs), HPE Storage controllers, and future devices such as SCSI Express drives, and SAS switch devices.
Some of the features of the HPE SSA include:
≫ Creating a bootable logical drive
≫ Checking online drive firmware activation readiness
≫ Managing device identification LEDs
≫ Configuring drive erase
≫ Creating and managing arrays and logical drives
≫ Viewing controller and drive status and health information
≫ Updating controller firmware

NEW QUESTION 4
you need to explain how the HPE GreenLake platform can help your customers business become more agile. What information you provide? (Select two)

A. customers can control costs Since advanced metering allows them to only pay tor what is used.
B. The HPE GreenLake platform is always managed by HPE, reducing the need for internal IT staff.
C. HPE active-ty monitors, manages, and deploys capacity ahead of demand so the customer can scale With ease within an installed buffer
D. HPE GreenLake provides infinite scale to the customer at no additional cost with its scale up policy.
E. HPF GreenLake provides a larger hardware portf01i0 than traditional HPE hardware solutions

Answer: AC

Explanation:
HPE GreenLake is a cloud services platform that delivers on-demand capacity and planning, combining the agility and economics of the public cloud with the security and performance of on-premises IT. Some of the benefits of HPE GreenLake include:
≫ Customers can control costs since advanced metering allows them to only pay for what is used: HPE GreenLake offers a pay-per-use model that aligns costs with actual usage, reducing overprovisioning and improving cash flow. Customers can also scale up or down as needed and only pay for what they use.
≫ HPE actively monitors, manages, and deploys capacity ahead of demand so the customer can scale with ease within an installed buffer: HPE GreenLake provides customers with buffer capacity that is ready to use in minutes, not months, enabling them to respond quickly to changing business needs. Customers can also access a range of cloud services from HPE and partners through a self-service portal.

NEW QUESTION 5
Your customer needs to consolidate data and add additional block-based storage to their man document management application. They nave five standalone servers with 10Gb networking
Which storage technology should you recommend?

A. Network File System
B. Storage Area
C. Direct Attached
D. Network Attached Storage

Answer: B

Explanation:
According to IBM, a SAN is a dedicated network that provides access to consolidated, block-level data storage 1. A SAN allows multiple servers to access shared pools of storage devices, such as disk arrays or tape libraries1. A SAN can help your customer consolidate data and add additional block-based storage to their main document management application.

NEW QUESTION 6
Which combination of HPE solutions can provide data validation on MSL3040 andLTO-9 cartridges?

A. HPE Command View for Tape Libraries and HPE TapeAssure Advanced
B. Library and Tape Tools and HPF StoreEver TapeAssure Advanced Software
C. HPE Command View for Tape Libraries and HPE StoreEver Data Verification
D. HPE Command View for Tape Libraries and Library and Tape Tools

Answer: B

Explanation:
Library and Tape Tools and HPF StoreEver TapeAssure Advanced Software: This combination is correct, as Library and Tape Tools (L&TT) is a diagnostic tool that allows you to perform firmware upgrades, run tests, and verify data on tape devices. HPE StoreEver TapeAssure Advanced Software is a software that provides data integrity, performance, health, and utilization reports for tape drives and cartridges, and it works with L&TT to perform data verification2 .

NEW QUESTION 7
Map the HPE platform and workload-oriented solutions with the customer's challenge.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Containers solutions -> Simplify acquisition and deployment of complex systems1
Data Management and
Analytics solutions -> Accelerate time to value from insights2 management3
Hybrid Cloud solutions -> Unify operations and
Transcoding & Visualization solutions -> Provide stability to scale anywhereVDI solutions -> Improve user experience while managing costs

NEW QUESTION 8
your customer runs a small datacenter ana their storage requirements change on a month-to-month basis. They want to easily monitor their Cloud costs/usage and grow their resources.
Which self-service platform will fill their requirements?

A. HPE InfoSight
B. HPE GreenLake central
C. HPE GreenLake Data Services Cloud Console
D. HPE Compute Ops Management

Answer: B

Explanation:
HPE GreenLake Central is a self-service platform that gives customers a consistent cloud experience for all their applications and data, across edges, colocations, and data centers. Some of the features of HPE GreenLake Central include:

➤ Easily monitor cloud costs and usage: HPE GreenLake Central provides customers with visibility and control over their cloud spending and consumption across

hybrid environments. Customers can view their usage and costs by service, location, application, or business unit. They can also set budgets, alerts, and policies to optimize their cloud resources and expenses.

⮞ Grow resources as needed: HPE GreenLake Central enables customers to scale up or down their cloud services and resources as their business needs change. Customers can access a catalog of cloud services from HPE and partners through a self-service portal and order them with a few clicks. They can also leverage buffer capacity that is ready to use in minutes, not months.

NEW QUESTION 9
Your customer needs to accelerate the performance Of theirDL380 Gen10 servers running workloads on more active cores athigher Clockfrequencies. The customer wants to know if Core Boosting willhelp.
What advice Should you provide?

A. It is only supportedon ProLiantDL Gen11servers.
B. It is a software solution andhas performance limitations.
C. It is only supported on certain Intel processors.
D. It is an AMD technology so it is unavailable to them

Answer: C

Explanation:
Core Boosting technology uses a relaxed and optimized turbo profile that adapts the processor to specific use cases, configurations, and environments. Core Boosting processors take advantage of extra server power and thermal headroom provided by an innovative HPE voltage regulator design and by cooling technologies. Consequently, systems that have Core Boosting processors can alleviate common setbacks and maximize processor computing power. However, Core Boosting option is only supported in ProLiant Gen10 servers with certain Intel processors1.
The HPE ProLiant DL380 Gen10 server data she2et lists the supported processors for Core Boosting as:
⮞ Intel Xeon Gold 6148 Processor (20 core, 2.4 GHz, 27.5 MB L3 cache)
⮞ Intel Xeon Gold 6154 Processor (18 core, 3.0 GHz, 24.75 MB L3 cache)
⮞ Intel Xeon Gold 6152 Processor (22 core, 2.1 GHz, 30.25 MB L3 cache)
⮞ Intel Xeon Platinum 8168 Processor (24 core, 2.7 GHz, 33 MB L3 cache)
Therefore, if your customer's DL380 Gen10 servers are running workloads on more active cores at higher clock frequencies, they can benefit from Core Boosting technology if they have one of these supported Intel processors.

NEW QUESTION 10
Your customer needs a server a maximum Of two processors thatwill providehighperformance, manageability, expansion,and security.
Which server should you recommend?

A. DL560
B. DL380
C. DL110
D. DL20

Answer: B

Explanation:
HPE ProLiant DL380 Gen10 server is a versatile 2U rack server that delivers world-class performance and security for a wide range of workloads. The server supports up to two Intel Xeon Scalable processors with up to 28 cores per processor and up to 3 TB of memory. The server also offers a range of management, expansion, and security features, such as:
⮞ HPE iLO 5 software for remote management and monitoring
⮞ HPE Smart Array controllers for RAID configuration and data protection
⮞ HPE SmartMemory for enhanced performance and reliability
⮞ HPE Flexible Slot power supplies for efficiency and redundancy
⮞ HPE FlexibleLOM adapters for network connectivity options
⮞ HPE Persistent Memory for fast data access and analytics
⮞ HPE Secure Boot and Secure Start for firmware validation and protection

NEW QUESTION 10
Match the RAID level to the number of drive failures an array can handle without losing data. (Each option may be used once, more than once, or not at all.)

A. Mastered
B. Not Mastered

Answer: A

Explanation:

≫ RAID 1: any single drive

≫ RAID 1 ADM: any two drives

≫ RAID 5: any single drive

≫ RAID 6: any two drives

≫ RAID 1: This is a level of RAID that uses mirroring to create an exact copy of data on two or more disks. It can tolerate the failure of any single drive without losing data, as long as the other drive is still functional.

≫ RAID 1 ADM: This is a level of RAID that uses advanced data mirroring to create two copies of data on three disks. It can tolerate the failure of any two drives without losing data, as long as the third drive is still functional.

≫ RAID 5: This is a level of RAID that uses striping with parity to distribute data and parity information across three or more disks. It can tolerate the failure of any single drive without losing data, as long as the other drives can reconstruct the data from the parity information.

≫ RAID 6: This is a level of RAID that uses striping with double parity to distribute data and two sets of parity information across four or more disks. It can tolerate the failure of any two drives without losing data, as long as the other drives can reconstruct the data from the double parity information.

NEW QUESTION 15
your customer is using HPE Infosight in their environment containing ProLiant and MSA systems.
which product supports automatic case creation through InfoSight?

A. ProLiant DL120 G7
B. MSA 2062
C. MSA2040
D. proLiant DL560 Gen10

Answer: D

Explanation:
According to the HPE website, HPE InfoSight supports automatic case creation for HPE ProLiant servers that are connected to HPE InfoSight through HPE Integrated Lights-Out (iLO) Amplifier Pack1. The ProLiant DL560 Gen10 is one of the supported servers that canbenefit from this feature1.

NEW QUESTION 20
Match the HPE server models With the appropriate specification.

Answer Area

Server		Specification
DL20 Gen10 Plus		Flexible and affordable 15" deep server supporting the latest intel XEON E processors
DL180 Gen10		High-density, four-socket server with high performance, scalability and reliability, all in a 2U chassis for business-critical computing performance
DL345		Secure and cost effective 1P 2U server delivering flexible storage capacity, delivering a high core count, and a large memory footprint
DL560		Secure 2P 2U server delivering world-class compelling performance with the right balance of expandability and scalability

A. Mastered
B. Not Mastered

Answer: A

Explanation:

≫ The DL20 Gen10 Plus is a flexible and affordable 15" deep server supporting the latest Intel XEON E processors12.

≫ The DL180 Gen10 is a secure and cost effective IP 2U server delivering flexible storage capacity, delivering a high core count, and a large memory footprint12.

≫ The DL345 is a high-density, four-socket server with high performance, scalability and reliability, all i a 2U chassis for business-critical computing performance12.

≫ The DL560 is a secure 2P 2U server delivering world-class compelling performance with the right balance of expandability and scalability12.

NEW QUESTION 22
Match the preconfigured HPE workload Profile With Its definition.

Profile		Definition
General power efficient compute		This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads
IO throughput		This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance.
Graphics processing		It is intended for configurations that depend on maximum throughput between IO and memory.
Virtualization —Max Performance		This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
HPE workload profile is one of the HPE Intelligent System Tuning (IST) features and allows you to tune the resources in your HPE ProLiant server by choosing a preconfigured workload profile. The server will automatically configure the BIOS settings to match the selected workload12.
According to the information I found on the web, here is how you can match the preconfigured HPE workload profile with its definition:

» General power efficient compute: This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads. It also enables power management settings that have minimal impact to overall performance. This profile is recommended for customers that do not typically tune their BIOS for their workload1.

» IO throughput: This profile is intended for configurations that depend on maximum throughput between IO and memory. It disables power management settings that are known to have impact on maximum achievable bandwidth. It also applies settings that benefit NUMA awareness, as best throughput is achieved when the workload is also NUMA aware and optimized1.

» Graphics processing: This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory. It disables power management settings that are known to have impact on maximum achievable bandwidth. It also applies settings that benefit NUMA awareness, as best throughput is achieved when the workload is also NUMA aware and optimized1.

» Virtualization —Max Performance: This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance. It disables power management settings in favor of delivering maximum performance. Certain virtualization technologies can have possible performance impacts to nonvirtualized environments and can be disabled in other profiles

NEW QUESTION 24
Match each HPE product With the customer requirements it meets.

Product		Requirements
MSA 2062		A hospital wants to store air-gapped copies of their medical imaging to protect against ransomware attacks and natural disasters.
MSL2024		A customer needs a low cost entry-level storage appliance with automatic tiering for their Fibre Channel environment.
StoreEasy 1560		A small software development company needs a solution for their growing file shares in their Microsoft environment.
StoreOnce VSA		Customer wants to backup and quickly recover their Hyper-V environment in a remote site with an option to backup to the cloud.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

» MSA 2062: A customer needs a low cost entry-level storage appliance with automatic tiering for their Fibre Channel environment

» MSL2024: A hospital wants to store air-gapped copies of their medical imaging to protect against ransomware attacks and natural disasters

» StoreEasy 1560: A small software development company needs a solution for their growing file shares in their Microsoft environment

» StoreOnce VSA: Customer wants to backup and quickly recover their Hyper-V environment in a remote site with an option to backup to the cloud
This is because:

» MSA 2062: This is a flash-enabled storage appliance that supports Fibre Channel, iSCSI and SAS connectivity. It offers automatic tiering that optimizes performance and cost by moving data between SSDs and HDDs based on usage patterns.

» MSL2024: This is a tape library that supports up to 24 LTO tape cartridges and one or two tape drives. It provides offline data protection and long-term retention for compliance and disaster recovery purposes. It can also create air-gapped copies of data that are isolated from network threats such as ransomware.

➤ StoreEasy 1560: This is a file storage appliance that supports SMB, NFS and FTP protocols. It is optimized for Microsoft environments and integrates with Active Directory, BitLocker encryption, Windows Storage Server and Windows Server Backup. It can scale up to 16 TB of internal capacity and 280 TB of external capacity.

➤ StoreOnce VSA: This is a virtual storage appliance that provides backup and recovery for virtualized environments. It supports Hyper-V, VMware and KVM hypervisors and integrates with backup applications such as HPE Data Protector and Veeam. It can also deduplicate data and replicate it to another StoreOnce system or to the cloud.

NEW QUESTION 26
You are troubleshooting a server issue and need to reference a log file tor hardware and configuration changes. When log file should you review?

A. IML - Integrated Management Log
B. ILO Event Log
C. HPE OneView Activity Log
D. AHS - Active Health system

**Answer:** D

Explanation:
Active Health System (AHS) is a feature that continuously monitors and records thousands of system parameters and diagnostic telemetry data on HPE ProLiant servers. The AHS log contains information such as hardware and configuration changes, health status, boot issues, and firmware updates. The AHS log can be used for troubleshooting and analysis by HPE support or by the user.

NEW QUESTION 30
Match the correct scaling approach to each strategy

A. Mastered
B. Not Mastered

Answer: A

Explanation:
➤ Scale-out: Add more servers to do the workload
➤ Scale-up: Add more resources (such as processors and memory) to existing servers
➤ Scale-out: Add an additional two-socket system to an existing VMware Cluster
➤ Scale-up: Add two additional processors to a four-socket system currently equipped with only two processors
This is because:
➤ Scale-out: This is a scaling approach that involves adding more servers or nodes to a system to increase its capacity and performance. It is also known as horizontal scaling. It can help distribute the workload across multiple servers and improve availability and fault tolerance.
➤ Scale-up: This is a scaling approach that involves adding more resources (such as processors, memory, storage or network) to an existing server or node to increase its capacity and performance. It is also known as vertical scaling. It can help improve the performance of a single server and reduce the complexity of managing multiple servers.

NEW QUESTION 33
Your customer has a large DL380Gen10andDL385 Gen10Plus server farm. They onlyhave a small staffmonitoring andmanaging these servers. You need to recommend a management service that Will allow them tofree up resources andautomatemanagement.
What HPE management serviceshould they use?

A. HPEGreenLake Compute Ops Manager
B. HPECloudPhysics
C. iLO5 Lifecycle Management
D. HPE InfoSight
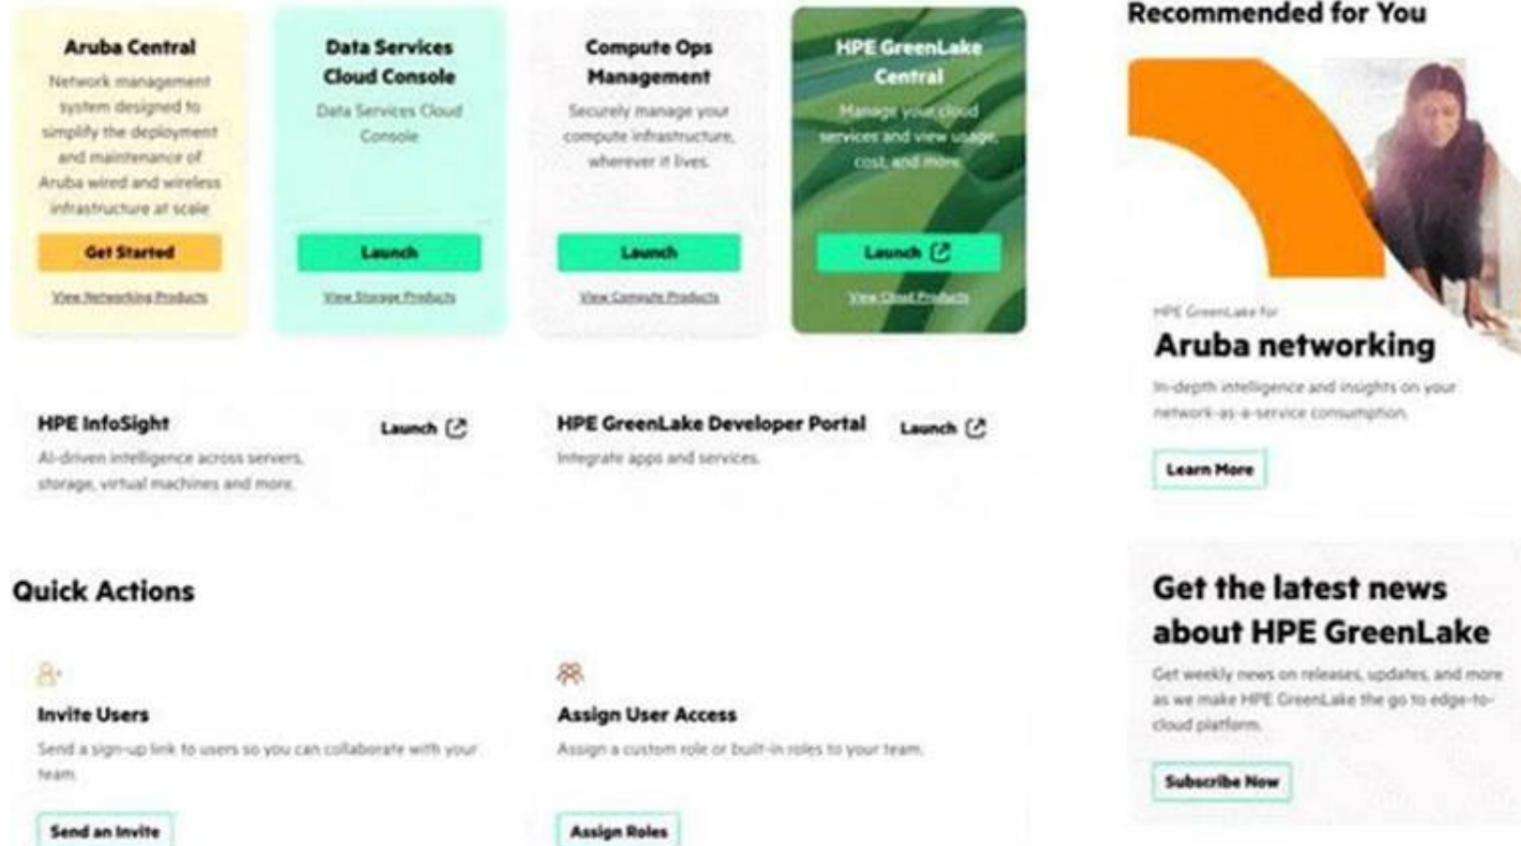

Answer: A

Explanation:
This is because HPE GreenLake Compute Ops Management is a cloud-based service that provides a unified and automated way to monitor, manage and update servers remotely through a web console. It can help customers free up resources and automate management tasks such as firmware updates, compliance checks,

server health monitoring and troubleshooting. It can also support servers across different locations and platforms, whether on premises, at the edge or in the cloud.

NEW QUESTION 34
You connect to the compute ops Management (COM) through the Green lake Cloud Platform dashboard. The server you want to manage is missing
Click where you can add the server so it appears in the CoM.

Featured Applications

Aruba Central	Data Services Cloud Console	Compute Ops Management	HPE GreenLake Central
Network management system designed to simplify the deployment and maintenance of Aruba wired and wireless infrastructure at scale	Data Services Cloud Console	Securely manage your compute infrastructure, wherever it lives.	Manage your cloud services and view usage, cost, and more.

NEW QUESTION 39
you want to quickly 100k up the list price of an HPEhardware component. Which pre-saves toolhas a QuickQuotefunction?

A. HPE smart CID
B. HPE CloudPhysics
C. HPE seismic
D. HPE ProductBlletin

Answer: D

Explanation:
This tool has a Quick Quote function that allows you to quickly look up the list price of an HPE hardware component by entering the product number or selecting from a list of products. You can also add multiple products to a quote and export it to a file or email it to yourself or others.

NEW QUESTION 42
your customer has standardized on the AMD platform and asks tor a new I IJ server. Which server should you recommend?

A. DL365
B. DL360
C. DL385
D. DL560

Answer: C

Explanation:
According to HPE, this server offers the 2nd generation AMD EPYC 7000 Series processor delivering up to 2X the performance of the prior generation1. It also provides built-in security and flexibility for key applications such as virtualization, software-defined storage (SDS), and High-Performance Compute (HPC)1.

NEW QUESTION 46
What is a feature Of the MSA 2060 storage array?

A. Gains AI and machine learning operational through InfoSight
B. Encryption can be enabled by adding 2 self-encrypted drives through Full Disk Encryptbn
C. Supports a mixture Of both SSD and HDDs within the same system
D. Deduplication and compression are non-intrusive and in-line

Answer: C

Explanation:
This is because the HPE MSA 2060 Storage solution supports a mixture of 3.5 inch LFF and 2.5 inch SFF expansion enclosures for a maximum of 9 enclosures (10 total including the array). You can start small and scale as needed with any combination of SSDs, Enterprise SAS or MidLine SAS HDDs12.

NEW QUESTION 48
your customer wants to update the firmware tor multiple HPE proLiant MicroServer Gen10 Plus servers. Which tool must be used?

A. HPE Composer
B. HPE Data Services Cloud console
C. HPE ILO 5
D. HPE GreenLake central

Answer: C

Explanation:
According to HPE, iLO 5 is a remote management solution that enables you to configure, monitor, and update your HPE servers seamlessly from anywhere in the world1. It also provides firmware update capabilities for
HPE ProLiant MicroServer Gen10 Plus servers2. With iLO 5, you can demonstrate how to update the firmware for multiple servers easily and securely.

NEW QUESTION 49
A customerwants to create a 3TBboot partition on their HPE Pt0Ljant DL360 Gen10Plus server. What setting must De enabled to allow this configuration?

A. Secure Boot
B. unlimitedExtensible Firmware Interface (UEFI) Boot Mode
C. Legacy BIOS Boot Mode
D. Virtuaulization-Maxjmum pertormance

Answer: B

Explanation:
setting that must be enabled to allow a 3TB boot partition on their HPE ProLiant DL360 Gen10 Plus server is B. Unified Extensible Firmware Interface (UEFI) Boot Mode. This is because UEFI Boot Mode supports booting from disks larger than 2.2 TB by using the GUID Partition Table (GPT) format. GPT allows for partitions of up to 9.4 ZB (9.4 x 10^21 bytes) in size.12

NEW QUESTION 51
A customer needs an open-source container orchestration system that supports cloud-native applications area provides support for containers with persistent storage at the same time.
Which platform should you recommend?

A. Kubernetes
B. openstack Neutron
C. Hadoop
D. Hortonworks Data Platform

Answer: A

Explanation:
Kubernetes is an open-source system for automating deployment, scaling, and management of containerized applications. It groups containers that make up an application into logical units for easy management and discovery. Kubernetes supports cloud-native applications that are designed to run on distributed and

dynamic environments.
Kubernetes also supports containers with persistent storage by providing various options such as:

>> Persistent Volumes: These are abstracted storage resources that can be provisioned by administrators and consumed by users without worrying about the underlying storage implementation.

>> Persistent Volume Claims: These are requests for storage by users that can be dynamically or statically bound to Persistent Volumes.

>> Storage Classes: These are ways to describe different kinds of storage offered by a cluster, such as SSD or HDD, performance or capacity, etc.

>> Volume Snapshots: These are point-in-time copies of Persistent Volumes that can be used for backup or restoration purposes.

>> Container Storage Interface: This is a standard interface that allows Kubernetes to communicate with various storage vendors and plugins.

NEW QUESTION 54
Review the exhibit.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
F10 Save

NEW QUESTION 56
your customer needs to capture, store, manage, and analyze a dataset that exceeds capacity of typical database software tools.
What storage technology should you propose to meet their needs?

A. Block Storage
B. Containers
C. Big Data
D. File Storage

Answer: C

Explanation:
According to Simplilearn, big data storage is a new technology that allows you to store large amounts of data that exceed the capacity of typical database software tools1. Big data storage can handle various types of data, such as structured, unstructured, or semi-structured data, and provide fast and scalable access to it1.

NEW QUESTION 58
It also has a small footprint and can fit in a limited space.
A customer who is new to HPE wants to refresh the hardware infrastructure for their VMware environment. Before meeting the customer, you need to perform an assessment to get a better of their environment
Which HPE tool should you use?

A. OneView
B. CloudPhysics
C. GreenLake QuiCk Quote
D. InfoSight

Answer: B

Explanation:
CloudPhysics is a tool that provides a comprehensive assessment of VMware environments and helps identify opportunities for optimization and modernization.
CloudPhysics can also generate a ready-to-order bill of materials for HPE solutions based on the customer's workload requirements.
The other options do not seem to be suitable for performing an assessment of a VMware

environment. OneView is a tool for managing HPE servers, storage, and networkin2g. GreenLake Quick Quote is a tool for creating quotes for HPE GreenLake services3. InfoSight is a tool for monitoring and managing HPE storage systems.
