Answer: D

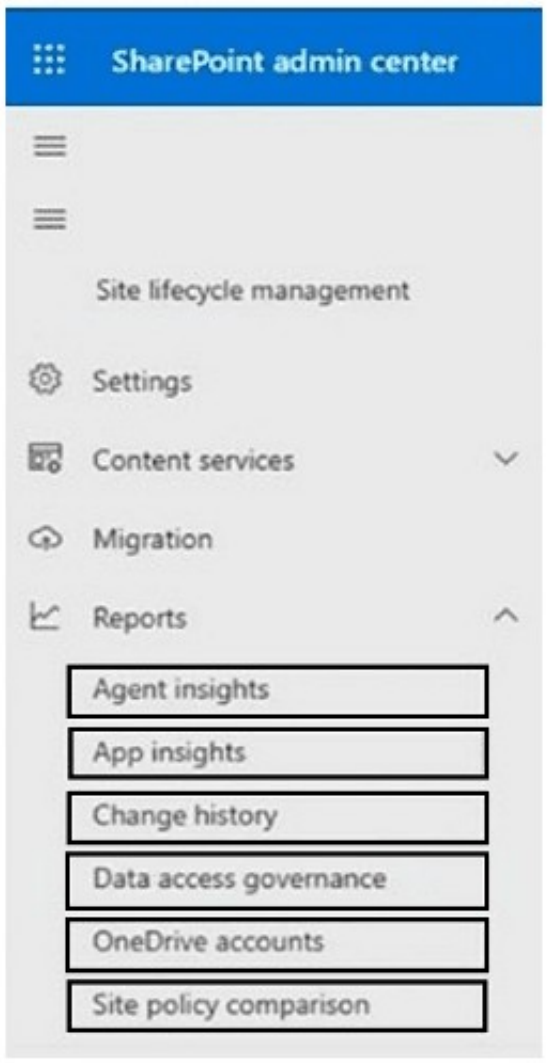
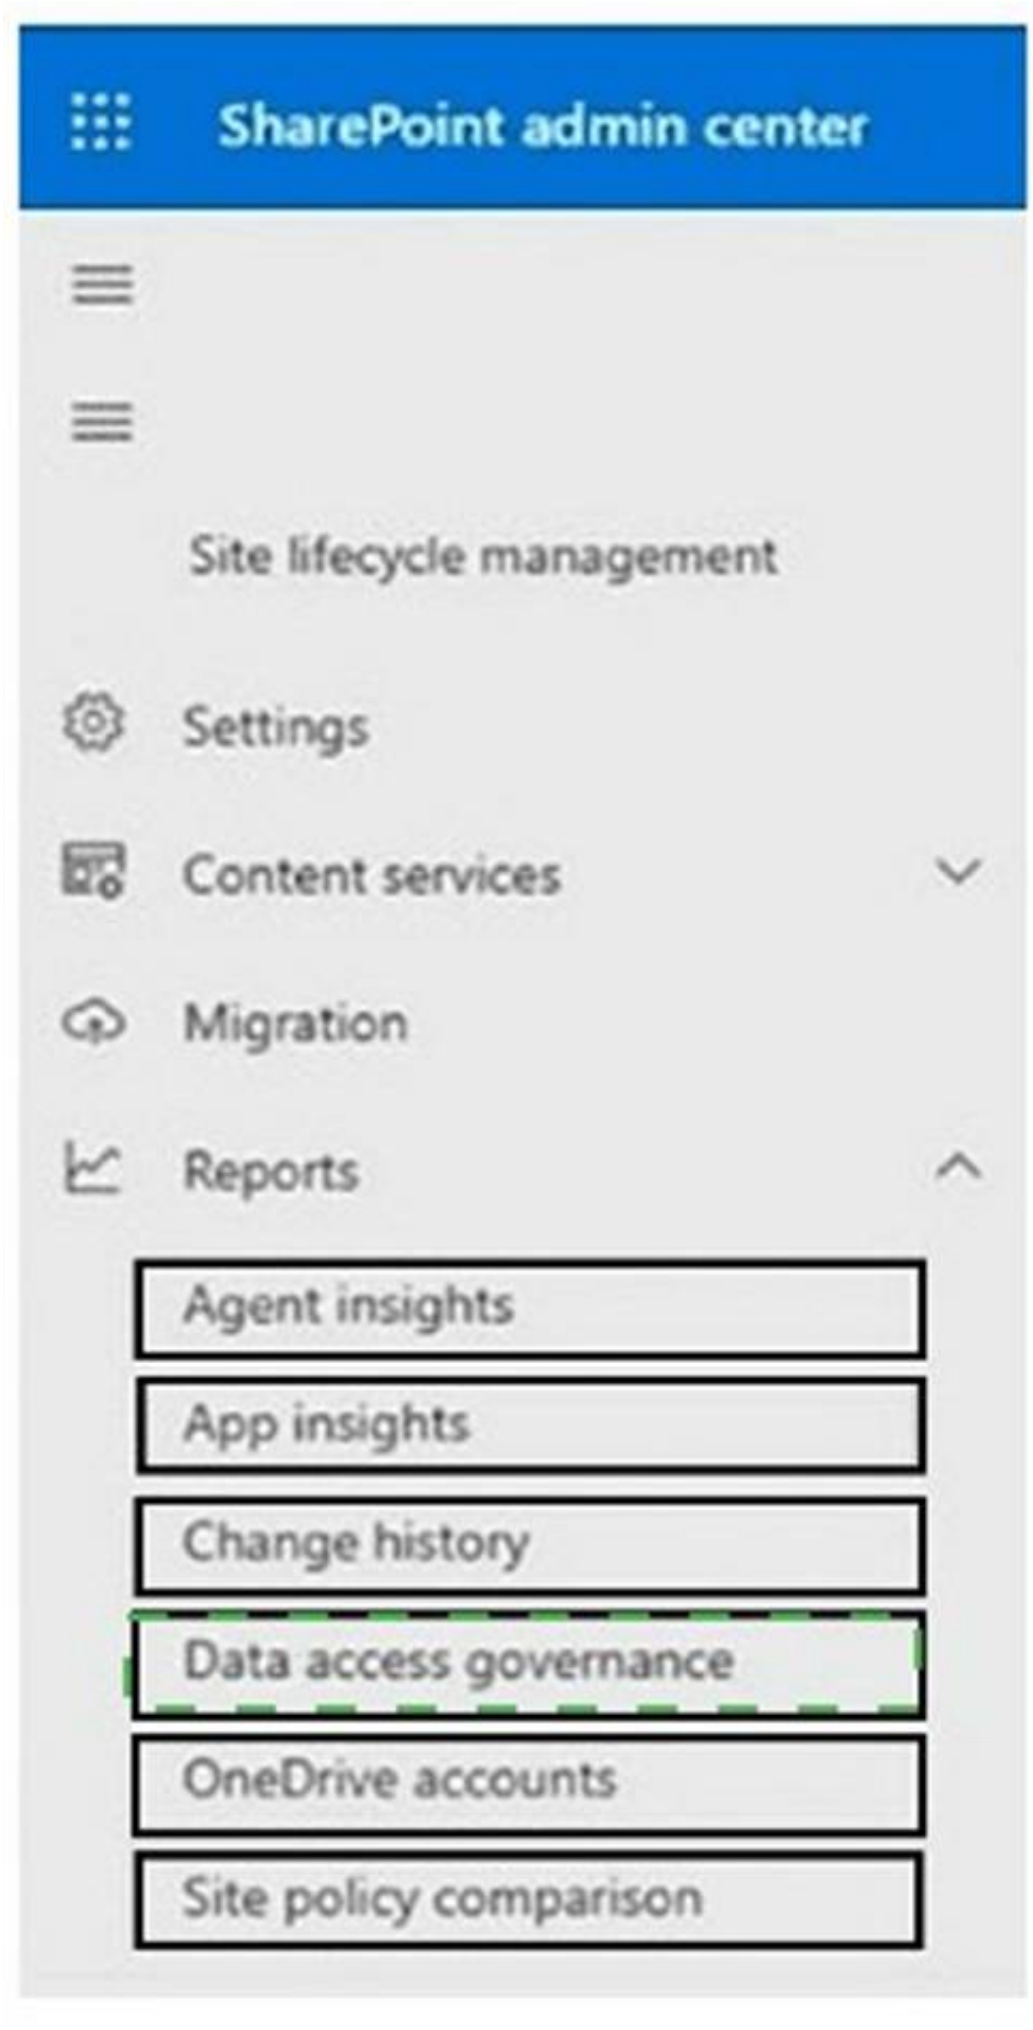
NEW QUESTION 14
HOTSPOT
Your organization has a Microsoft 365 subscription.
You discover that Microsoft SharePoint files are being shared to users outside your organization.
You need to identify which files are being shared to the external users.
Which report should you use in the SharePoint admin center? To answer, select the appropriate report in the answer area.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 15
Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

A. an auto-labeling policy
B. a trainable classifier
C. a retention label policy
D. a sensitivity label policy

Answer: D

Explanation:
The correct answer isD. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself doesnotmake it available to users. Microsoft Learn states that after you create sensitivity labels, you mustpublishthem by creating alabel policyso that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why asensitivity label policyis required to ensure that users can applyLabel1to files.
The other options do not meet the requirement.Auto-labeling policiesapply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. Atrainable classifieris used to identify content categories, not to publish a label. Aretention label policypublishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using asensitivity label policy.

NEW QUESTION 17
Your organization has a Microsoft 365 subscription that contains a user named User1. User1 plans to leave your company in two weeks. You need to capture the activity of User1 to identify whether the user is exfiltrating data. Which Microsoft Purview solution should you use?

A. Communication Compliance
B. Data Security Posture Management
