Exam Questions AB-731

AI Transformation Leader (beta)

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Foundry helps organizations securely build and manage generative AI solutions in a governed environment.	☐	☐
Microsoft Foundry provides built-in scalability to enable organizations to expand AI workloads as usage increases.	☐	☐
Microsoft Foundry can be used for image recognition and computer vision tasks.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Foundry helps organizations securely build and manage generative AI solutions in a governed environment.	☒	☐
Microsoft Foundry provides built-in scalability to enable organizations to expand AI workloads as usage increases.	☒	☐
Microsoft Foundry can be used for image recognition and computer vision tasks.	☒	☐

NEW QUESTION 2

HOTSPOT

- Select the answer that correctly completes the sentence.

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to .

Answer Area

To ensure that your organization follows trustworthy AI principles, the organization should
establish an AI governance council to

configure and deploy AI models in the organization's Azure environment.
guide AI strategy, ensure responsible AI oversight, and promote alignment across business units.
manage day-to-day model training and labeling tasks for AI development teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

To ensure that your organization follows trustworthy AI principles, the organization should
establish an AI governance council to

configure and deploy AI models in the organization's Azure environment.
guide AI strategy, ensure responsible AI oversight, and promote alignment across business units.
manage day-to-day model training and labeling tasks for AI development teams.

NEW QUESTION 3

You have a historical dataset that contains 1,000 records. You need an AI solution that can analyze the data to identify patterns and predict future outcomes. What should you include in the solution?

- A. Microsoft Foundry
- B. Azure Document Intelligence in Foundry Tools
- C. Azure Machine Learning

D. Azure Content Understanding in Foundry Tools

Answer: C

NEW QUESTION 4

Your company sells hiking and camping gear online. You need a generative AI solution that can interact with customers and ask questions about their needs. What should you include in the solution?

- A. a chatbot
- B. predictive AI
- C. computer vision
- D. a recommendation engine

Answer: A

NEW QUESTION 5

You plan to meet with a group of stakeholders to discuss how generative AI can benefit your company. You need to provide the stakeholders with a relevant description of generative AI during the meeting. Which description should you use?

- A. Generative AI is designed to translate documents into other languages.
- B. Generative AI is designed to predict future trends based on historical data.
- C. Generative AI is designed to generate responses based on a user's natural language prompts.
- D. Generative AI is designed to recommend products based on user behavior.

Answer: C

Explanation:

Generative AI's defining characteristic is that it creates new content (text, images, code, summaries, drafts) in response to instructions—most commonly natural language prompts. Option C captures that general-purpose description in a stakeholder-friendly way: users provide prompts and the system generates responses or content. This framing is broad enough to cover common business value scenarios such as summarizing documents, drafting communications, creating marketing copy, generating reports, building assistants, and producing structured outputs from unstructured requests.

Option A is a single use case (translation), not the defining description. Option B describes predictive analytics/forecasting, which is a different AI category focused on outcomes and probabilities rather than content creation. Option D describes recommendation systems, typically driven by ranking/behavioral signals; while AI can enhance recommendations, that is not the core definition of generative AI. Therefore, the most accurate and relevant description for stakeholders is C.

NEW QUESTION 6

HOTSPOT

HOTSPOT - Select the answer that correctly completes the sentence.

You use _____ to train a model that will forecast product demand based on historical sales data.

You use to train a model that will forecast product demand based on historical sales data.

- Azure Machine Learning
- Azure AI Search
- Azure OpenAI
- Microsoft Foundry

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You use to train a model that will forecast product demand based on historical sales data.

- Azure Machine Learning
- Azure AI Search
- Azure OpenAI
- Microsoft Foundry

NEW QUESTION 7

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Content filtering controls can prevent AI-generated responses from exposing confidential and sensitive information.	☐	☐
AI-generated content can unintentionally reveal sensitive information if the generative AI model has access to unsecured data sources.	☐	☐
To prevent data exposure, only the prompts used by users must be protected by using policies.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Content filtering controls can prevent AI-generated responses from exposing confidential and sensitive information.	☒	☐
AI-generated content can unintentionally reveal sensitive information if the generative AI model has access to unsecured data sources.	☒	☐
To prevent data exposure, only the prompts used by users must be protected by using policies.	☐	☒

NEW QUESTION 8

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat, you must have a Microsoft 365 Copilot license.	☐	☐
Microsoft 365 Copilot Chat provides context-aware assistance in Microsoft 365 apps.	☐	☐
Microsoft 365 Copilot Chat can only access information in open files and read emails.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat, you must have a Microsoft 365 Copilot license.	☐	☒
Microsoft 365 Copilot Chat provides context-aware assistance in Microsoft 365 apps.	☒	☐
Microsoft 365 Copilot Chat can only access information in open files and read emails.	☐	☒

NEW QUESTION 9

Your company manages an online catalog of office supplies. You plan to use a generative AI solution to create product descriptions for your company??s website.

The solution must ensure descriptions can be posted immediately after creation, enable selection/inclusion of product details, and be fast and simple for non-technical staff. What is the best type of solution to use? Select the BEST answer.

- A. custom Azure Machine Learning model
- B. the Researcher agent in Microsoft 365 Copilot
- C. an interactive AI agent
- D. a fine-tuned large language model LLM

Answer: D

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot helps users create and analyze content in Microsoft 365 apps.	☐	☐
Microsoft Copilot Studio can only be used to customize Microsoft 365 Copilot.	☐	☐
Microsoft Security Copilot uses AI to assign sensitivity labels to documents.	☐	☐

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot helps users create and analyze content in Microsoft 365 apps.	☒	☐
Microsoft Copilot Studio can only be used to customize Microsoft 365 Copilot.	☐	☒
Microsoft Security Copilot uses AI to assign sensitivity labels to documents.	☐	☒

NEW QUESTION 10

Your company plans to use generative AI to help build a website that will showcase various existing products. Which capability best describes a benefit of using generative AI for this project? Select the BEST answer.

- A. translating product descriptions into a different language
- B. analyzing product sales to identify patterns and trends
- C. designing a new product based on customer requirements
- D. creating product descriptions based on product specifications

Answer: D

NEW QUESTION 13

HOTSPOT

You need to recommend an AI solution for each task. The solutions must use prebuilt AI capabilities to reduce development time. What should you recommend for each task?

Extract information from invoices and credit notes:

Azure AI Search

Azure Document Intelligence in Foundry Tools

Azure Machine Learning

Identify discussion topics in customer service call recordings:

Azure AI Search

Azure Document Intelligence in Foundry Tools

Azure Machine Learning

Detect customer sentiment and opinions:

Azure AI Search

Azure Document Intelligence in Foundry Tools

Azure Machine Learning

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Extract information from invoices and credit notes:

Azure AI Search

Azure Document Intelligence in Foundry Tools

Azure Machine Learning

Identify discussion topics in customer service call recordings:

Azure AI Search

Azure Document Intelligence in Foundry Tools

Azure Machine Learning

Detect customer sentiment and opinions:

Azure AI Search

Azure Document Intelligence in Foundry Tools

Azure Machine Learning

NEW QUESTION 16

Your company is developing an AI-powered customer support agent. You need to ensure that the solution follows Microsoft responsible AI principles. Which two actions should you perform? Select the two BEST answers. Each correct answer presents part of the solution.

- A. Retain all customer conversations.
- B. Test the agent to ensure that responses are inclusive and culturally sensitive.
- C. Enable the agent to operate independently.
- D. Ensure that the agent can be used for multiple purposes.
- E. Provide a clear disclaimer that users are interacting with an AI solution.

Answer: BE

NEW QUESTION 18

Your company receives thousands of scanned invoices each month. You need to recommend an AI solution that can automatically extract key details, such as invoice numbers, vendor names, and total amounts. What is the best solution to recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Azure Document Intelligence in Foundry Tools
- B. Azure Vision in Foundry Tools
- C. Azure AI Search
- D. Azure Machine Learning

Answer: A

NEW QUESTION 22

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	☐	☐
Implementing Microsoft 365 Copilot reduces data management costs.	☐	☐
Microsoft 365 Copilot can help IT teams manage data risks.	☐	☐

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	☒	☐
Implementing Microsoft 365 Copilot reduces data management costs.	☐	☒
Microsoft 365 Copilot can help IT teams manage data risks.	☒	☐

NEW QUESTION 27

DRAG DROP

Match the business scenario to the appropriate AI solution design approach. Each solution may be used once, more than once, or not at all.

AI Solutions

- Build with Azure Machine Learning
- Build with Microsoft Copilot Studio
- Extend with Microsoft 365 Copilot connectors
- Use Microsoft 365 Copilot

Answer Area

- AI SolutionThe marketing department at your company wants AI to summarize emails and create presentations.
- AI SolutionThe HR department at your company wants a conversational agent for policy questions and leave requests.
- AI SolutionThe manufacturing department at your company wants AI to predict maintenance schedules.
- AI SolutionThe finance department at your company wants AI-powered access to enterprise resource planning (ERP) data by using familiar productivity tools.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

The marketing department at your company wants AI to summarize emails and create presentations. Answer:Use Microsoft 365 Copilot
The HR department at your company wants a conversational agent for policy questions and leave requests. Answer:Build with Microsoft Copilot Studio
The manufacturing department at your company wants AI to predict maintenance schedules. Answer:Build with Azure Machine Learning
The finance department at your company wants AI-powered access to enterprise resource planning ERP data by using familiar productivity tools. Answer:Extend with Microsoft 365 Copilot connectors
These scenarios map to four distinct solution patterns: out-of-the-box productivity assistance, low-code conversational agents, predictive ML, and enterprise data integration.
Marketing’s need to summarize emails and create presentations is a core “productivity copilot” use case. Microsoft 365 Copilot is embedded in Outlook, Word, PowerPoint, and Teams, so it directly supports summarization, drafting, and presentation generation without building a custom solution—making Use Microsoft 365 Copilot the best fit.
HR’s requirement is a conversational agent tailored to internal policies and workflows such as leave requests. That typically needs custom dialog, grounded knowledge sources, and possibly actions/workflows. Microsoft Copilot Studio is designed to build and manage such agents with organizational knowledge and business process integration, so Build with Microsoft Copilot Studio fits best.

Manufacturing??s predictive maintenance scheduling is classic predictive analytics: learning patterns from historical telemetry/maintenance data to forecast failures or optimal service windows. This is best addressed with Azure Machine Learning, which supports training, evaluating, and deploying custom predictive models.

Finance wants AI-powered access to ERP data ??using familiar productivity tools,?? which implies bringing external line-of-business data into the Microsoft 365 Copilot experience. That is precisely where Microsoft 365 Copilot connectors help—indexing and exposing enterprise data sources so Copilot can reference them in a governed way—so Extend with Microsoft 365 Copilot connectors is the best approach.

NEW QUESTION 28

Your company has an AI solution that uses a prebuilt Azure OpenAI model to generate content. You need to reduce the cost of the solution while minimizing the impact on the quality of the generated output. Which two actions should you perform? (Select TWO.) NOTE: Each correct selection is worth one point.

- A. Fine-tune the existing model.
- B. Apply content moderation.
- C. Optimize the prompts.
- D. Switch to an alternate model.
- E. Decrease the number of hosting hours for the model.

Answer: CD
