Exam Questions 98-365

Windows Server Administration Fundamentals

About Exambible

Your Partner of IT Exam

Found in 1998

Exambible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, Exambible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

Which two services should you use to ensure that your networked computers and servers automatically maintain the latest security patches? (Choose two.)

- A. Windows Server Update Service
- B. Update command in Programs and Features
- C. Microsoft Windows Update
- D. Driver Update in Hardware Properties

Answer: AC

Explanation:

A: Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates to computers that are running the Windows operating system. By using WSUS, administrators can fully manage the distribution of updates that are released through Microsoft Update to computers in their network.
C: Windows Update keeps a Windows PC up to date.

NEW QUESTION 2

Disk mirroring occurs when data is:

- A. Duplicated on the same disk.
- B. Backed up by using parity.
- C. Duplicated on separate disks.
- D. Split between disks.

Answer: C

NEW QUESTION 3

By default, group policies are first applied to networked computers when the:

- A. Computer is backed up.
- B. Computer starts up.
- C. User accesses a shared drive.
- D. User runs gpresult.exe.

Answer: B

NEW QUESTION 4

This question requires that you evaluate the underlined text to determine if it is correct. Active Directory user account names are not case sensitive. Select the correct answer if the underlined text does not make the statement correct. Select 'No change is needed' if the underlined text makes the statement correct

- A. Can be from 1 to 256 characters in length
- B. Can contain numbers and letters but no special characters
- C. Must be created with a first and last name
- D. No change is needed.

Answer: D

Explanation:

Active directory user names are not case sensitive.

NEW QUESTION 5

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area

	Yes	No
AppCmd.exe allows detailed command-line administration of an IIS 7.5 webserver.	<input type="radio"/>	<input type="radio"/>
Inetmgr.exe allows detailed graphical administration of an IIS 7.5 webserver.	<input type="radio"/>	<input type="radio"/>
Web Management Service (WMSVC) is a required service to administer IIS on a local computer.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Yes	No
AppCmd.exe allows detailed command-line administration of an IIS 7.5 webserver.	<input checked="" type="radio"/>	<input type="radio"/>
Inetmgr.exe allows detailed graphical administration of an IIS 7.5 webserver.	<input checked="" type="radio"/>	<input type="radio"/>
Web Management Service (WMSVC) is a required service to administer IIS on a local computer.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 6

Which RAID level mirrors a set of disks and then stripes across the disks?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 10

Answer: D

Explanation:

A RAID 1+0, sometimes called RAID 1&0 or RAID 10. RAID 10 is a stripe of mirrors.

NEW QUESTION 7

This question requires that you evaluate the underlined text to determine if it is correct.

Active Directory "Distribution groups" can only be assigned permissions to resources within the same domain but can have members from other domains.

Select the correct answer if the underlined text does not make the statement correct. Select 'No change is needed' if the underlined text makes the statement correct.

- A. Global groups
- B. Universal groups
- C. Domain local groups
- D. No change is needed

Answer: C

Explanation:

Distributions groups are used as recipients of email messages.

Domain local groups:

* Member permissions can be assigned only within the same domain as the parent domain local group

* Group can include as member: Accounts from any domain Global groups from any domain

Universal groups from any domain

Reference: Group scope

<https://technet.microsoft.com/en-us/library/cc755692%28v=ws.10%29.aspx>

Domain local groups but only from the same domain as the parent domain local group

NEW QUESTION 8

You need to grant a set of users permissions to a specific folder. Where should you place the user accounts?

- A. Domain root
- B. Security group
- C. Shared folder
- D. Organizational Unit

Answer: :D

Explanation:

Place the users in an OU. Assign permissions to the OU for the specific folder.

NEW QUESTION 9

Which file extension indicates a Hyper-V virtual disk file?

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

* . VHD (file format)

VHD (Virtual Hard Disk) is a file format which represents a virtual hard disk drive (HDD). It may contain what is found on a physical HDD, such as disk partitions and a file system, which in turn can contain files and folders. It is typically used as the hard disk of a virtual machine.

* Virtual Hard Disk format was initially used only by Microsoft Virtual PC (and Microsoft Virtual Server). Later however, Microsoft used the VHD format in Hyper-V, the hypervisor- based virtualization technology of Windows Server 2008.

NEW QUESTION 10

Which technology provides both e-mail and database services?

- A. Windows Server Enterprise Edition
- B. Microsoft Office Communications Server
- C. Windows Small Business Server
- D. Microsoft Project Server

Answer: C

Explanation:

Windows Small Business Server is available in Essentials, Standard, and Premium editions. Essentials is a scaled down version for 1-25 users, both the other editions are based on the Windows Server codebase and include Microsoft Exchange Server mail server, Internet Information Services (IIS) web server, Windows SharePoint Services for collaboration, Microsoft Office Outlook 2003 email client (not included in 2008), Routing and Remote Access Service (RRAS), Windows Server Update Services for update management across the network, and a Fax server. Up to SBS 2003, the Premium edition also included Microsoft SQL Server, Microsoft Internet Security and Acceleration Server and Microsoft Office FrontPage 2003.

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area

	Yes	No
An organizational unit can only contain objects within its parent domain.	<input type="radio"/>	<input type="radio"/>
Two organizational units from different domains can share objects.	<input type="radio"/>	<input type="radio"/>
An organizational unit administrator requires domain administrator rights.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Yes	No
An organizational unit can only contain objects within its parent domain.	<input checked="" type="radio"/>	<input type="radio"/>
Two organizational units from different domains can share objects.	<input type="radio"/>	<input checked="" type="radio"/>
An organizational unit administrator requires domain administrator rights.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 13

Which kind of group is only used for e-mail applications?

- A. Exchange Admins group
- B. Universal group
- C. Security group
- D. Distribution group

Answer: D

Explanation:

Example:

As an Office 365 Small Business admin, you can create and manage distribution groups for your organization. A distribution group is a collection of two or more people that appears in your organization's address book. When an email message is sent to a distribution group, it goes to all members of the group.

NEW QUESTION 18

Which two firmware platforms does the Boot Configuration Data store support? (Choose two.)

- A. UEFI
- B. RAID
- C. eSATA
- D. BIOS

Answer: AD

Explanation:

On EFI-based operating systems, the BCD registry file is located in the \EFI\Microsoft\Boot\ folder on the EFI system partition.

On BIOS-based operating systems, the BCD registry file is located at \Boot\Bcd on the active partition.

Incorrect:

RAID and eSATA are not firmware platforms.

Reference: <http://sourcedaddy.com/windows-7/boot-configuration-data.html>

NEW QUESTION 23

A domain controller that is designated to perform a set of specialized domain controller tasks is commonly referred to as a/an:

- A. Windows Internet Name Service (WINS) server
- B. Operations Master
- C. Organizational Unit
- D. Primary domain controller

Answer: B

Explanation:

Operations Master Roles

The five operations master roles are assigned automatically when the first domain controller in a given domain is created.

NEW QUESTION 26

Which technology is designed to host calendars, contacts, and e-mail on the server?

- A. Microsoft Host Integration Server
- B. Microsoft Expression Studio
- C. Microsoft SQL Server
- D. Microsoft Exchange Server

Answer: D

NEW QUESTION 27

You are an IT intern for Tailspin Toys.

Your manager attends a conference out of town and wants you to perform routine maintenance directly on a Windows 2008 R2 server console.

Because you have restricted access, you need your manager to enter credentials at a UAC prompt in your session.

What should you do?

- A. Have your manager use Server Manager to connect to the server.
- B. Have your manager use Remote Administration to connect to the server.
- C. Send a Remote Assistance request to your manager.
- D. Have your manager use Remote Desktop to connect to the server.

Answer: C

Explanation:

With Remote Assistance the manager can take control of your computer and enter the password.

Note: Remote Assistance enables a trusted person (a friend, support person, or IT administrator) to remotely and actively assist someone with a computer problem. The helper (also called an expert) can view the screen of the user requesting assistance and offer advice. With the permission of the user, the helper can take control of the user's computer and perform tasks remotely.

Reference: Administering Remote Assistance <https://technet.microsoft.com/en-us/library/bb456978.aspx>

NEW QUESTION 31

You need to install a driver. Where should you get the driver?

- A. The Task Manager
- B. The device manufacturer
- C. The system firmware
- D. The Hardware Compatibility List

Answer: B

Explanation:

The device manufacturer should provide a driver.

NEW QUESTION 34

Power On Self Test (POST) runs when a computer first boots. Which component software issues this test?

- A. Complementary Metal Oxide Semiconductor
- B. Northbridge On Board Chip
- C. Basic Input/Output System
- D. Southbridge On Board Chip

Answer: C

Explanation:

The four main functions of a PC BIOS (Basic Input/Output System).

POST - Test the computer hardware and make sure no errors exist before loading the operating system. Additional information on the POST can be found on our POST and Beep Codes page.

Bootstrap Loader - Locate the operating system. If a capable operating system is located, the BIOS will pass control to it.

BIOS drivers - Low level drivers that give the computer basic operational control over your computer's hardware.

BIOS or CMOS Setup- - Configuration program that allows you to configure hardware settings including system settings such as computer passwords, time, and date.

Reference: <http://www.computerhope.com/jargon/b/bios.htm>

NEW QUESTION 38

You need to manage your server remotely as if you were seated in front of it. Which tool should you use?

- A. Remote Desktop Client
- B. Remote Desktop Session Host
- C. Remote Desktop Gateway
- D. Remote Server Administration Tools

Answer: D

Explanation:

Example: Remote Server Administration Tools for Windows 8.1 enables IT administrators to manage roles and features that are installed on computers that are running Windows Server 2012 or Windows Server 2012 R2 from a remote computer that is running Windows 8.1 Pro or Windows 8.1 Enterprise.

NEW QUESTION 39

You manage a Workgroup. You need to create a group for print administrators.

Which type of group should you create?

- A. Domain Local group
- B. Local group
- C. Global group
- D. Universal group

Answer: B

Explanation:

Many organizations deploy Windows servers and workstations in workgroup configurations and for these organizations, local group policies can play a vital role in simplifying Windows system administration.

Read more at http://tech.sportstoday.us/windows_server/windows-server-2008-r2---planning-workgroup-and-standalone-local-group-policy-configuration.aspx#iV1QJMxpiO0FVQyk.99

NEW QUESTION 42

To enable enhanced keyboard and mouse functions for a Hyper-V virtual machine, you need to install:

- A. Hyper-V Integration Components.
- B. Keyboard and mouse drivers.
- C. Microsoft Updates.
- D. Hyper-V Server.

Answer: A

Explanation:

To get a virtual machine (VM) to work properly, it's critical to install the Hyper-V integration components. These integration components install agents into a VM that enable a host to successfully back up a VM, recognize when it has gone down, copy and paste data into and out of a VM, and synchronize its clock to the host. These components are important to processing a VM's workload: In effect, their installation reconfigures an operating system to make it "aware" that it has been virtualized, resulting in an "enlightened" OS.

NEW QUESTION 43

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select

No. Each correct selection is worth one point.

Answer Area

	Yes	No
A forest is a complete instance of Active Directory.	<input type="radio"/>	<input type="radio"/>
A leaf can have child objects.	<input type="radio"/>	<input type="radio"/>
A domain is a logical structure used for delegating authority over a collection of objects.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Yes	No
A forest is a complete instance of Active Directory.	<input checked="" type="radio"/>	<input type="radio"/>
A leaf can have child objects.	<input type="radio"/>	<input checked="" type="radio"/>
A domain is a logical structure used for delegating authority over a collection of objects.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 45

Which should you use to manage the working environments of users and computers in an Active Directory infrastructure?

- A. Active Directory Domains and Trusts
- B. Group Policy Objects
- C. Builtin containers
- D. Global security groups

Answer: B

Explanation:

A Group Policy Object (GPO) is a collection of settings that define what a system will look like and how it will behave for a defined group of users or computers.

NEW QUESTION 48

What is the minimum Windows Server version on which Hyper-V can be installed?

- A. 2003 32-bit
- B. 2003 64-bit
- C. 2008 32-bit
- D. 2008 64-bit

Answer: D

Explanation:

Hyper-V, formerly known as Windows Server Virtualization, is a native hypervisor that enables platform virtualization on x86-64 systems. A beta version of Hyper-V was shipped with certain x86-64 editions of Windows Server 2008, and a finalized version (automatically updated through Windows Update) was released on June 26, 2008.

NEW QUESTION 49

To protect a server in case of a blackout, you should use a/an:

- A. Uninterruptible Power Supply.
- B. Dedicated surge protector.
- C. Power Supply Unit.
- D. Redundant power supply.
- E. Hot-swappable power supply.
- F. Line conditioner.

Answer: A

NEW QUESTION 54

The University Chess Club has a single Windows Server 2008 R2 server. The server has 12 GB of RAM and 1TB of disk space on a RAID 5 array. Using this server, you need to install two separate instances of Windows Server 2008 R2: one to act as a web server and one to act as a database server.

Which Windows Server 2008 R2 role or feature provides this capability?

- A. Windows Deployment Services
- B. Hyper-V
- C. Windows System Resource Manager
- D. Windows Internal Database

Answer: A

Explanation:

Hyper-V can create virtual machines on x86-64 systems.

Starting with Windows 8, Hyper-V supersedes Windows Virtual PC as the hardware virtualization component of the client editions of Windows NT. A server computer running Hyper-V can be configured to expose individual virtual machines to one or more networks.

NEW QUESTION 58

You need to secure a server that you have been working on without disrupting the work of other employees in your company. What should you do?

- A. Log off the server
- B. Hibernate the server
- C. Restart the server
- D. Shut down the server

Answer: A

NEW QUESTION 60

You need to control which Microsoft Office updates are automatically deployed to client computers. Which tool should you use?

- A. Microsoft Office SharePoint Services (MOSS)
- B. Windows Server Update Services (WSUS)
- C. Windows Update
- D. Microsoft Office Update

Answer: B

Explanation:

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates to computers that are running the Windows operating system. By using WSUS, administrators can fully manage the distribution of updates that are released through Microsoft Update to computers in their network.

NEW QUESTION 62

A record of specific aspects of system performance over time is referred to as a/an:

- A. Threshold
- B. Log
- C. Event
- D. Alert

Answer: B

Explanation:

Working with Performance Logs
Applies To: Windows 7, Windows Server 2008 R2, Windows Server 2012, Windows Vista You can view log files or log data provided by a database in Performance Monitor to see a visual representation of performance data collected by Data Collector Sets.

NEW QUESTION 64

You need to install storage device drivers for a Windows boot partition. When should you do this?

- A. After you have started Windows for the first time
- B. Before creation of the RAID array
- C. During the post-boot phase
- D. During the installation phase

Answer: D

Explanation:

Example:
During the first phase of the Windows XP installation, Setup displays the following message at the bottom of the screen:
Press F6 if you have to install a third-party SCSI or RAID driver.
Press F6 and then follow the instructions to install a mass-storage device driver from your Original Equipment Manufacturer (OEM).

NEW QUESTION 67

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer Area

	Yes	No
To use a managed printer being shared by a Windows server, add the printer as a network printer.	<input type="radio"/>	<input type="radio"/>
To use a printer that is directly connected to the network, you must add the printer as a network printer.	<input type="radio"/>	<input type="radio"/>
To use a network-attached printer as a local printer, create a TCP/IP port and map the printer to the port.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Yes	No
To use a managed printer being shared by a Windows server, add the printer as a network printer.	<input checked="" type="radio"/>	<input type="radio"/>
To use a printer that is directly connected to the network, you must add the printer as a network printer.	<input type="radio"/>	<input checked="" type="radio"/>
To use a network-attached printer as a local printer, create a TCP/IP port and map the printer to the port.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 69

Which should you use to monitor server performance and resource utilization?

- A. Memory
- B. Counters
- C. Boot logs
- D. RAM

Answer: B

Explanation:

Performance Counters, Purpose

Counters are used to provide information as to how well the operating system or an application, service, or driver is performing. The counter data can help determine system bottlenecks and fine-tune system and application performance. The operating system, network, and devices provide counter data that an application can consume to provide users with a graphical view of how well the system is performing.

NEW QUESTION 73

What should you use to prevent power spikes from harming a server?

- A. Power supply unit
- B. Hot-swappable power supply
- C. Dedicated surge protector
- D. Line conditioner

Answer: C

Explanation:

Dedicated surge protectors protect specific items, such as servers, from surges.

A surge occurs when too much electricity (technically too much voltage) flows through to the item.

Reference: <http://romitti.com/2015/02/dedicated-surge-protectors/>

NEW QUESTION 78

DRAG DROP

In which order are group policies applied?

(To answer, move the appropriate scopes from the list of scopes to the answer area and arrange them from first applied to last applied)

Scopes	Answer Area
Domain	
Local	
Organizational Unit	
Site	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Scopes	Answer Area
Domain	Local
Local	Site
Organizational Unit	Domain
Site	Organizational Unit

NEW QUESTION 79

What are three benefits of performing a Server Core installation of Windows Server 2008 R2? (Choose three.)

- A. Option to upgrade to a Full Server installation
- B. Reduced maintenance
- C. Reduced attack vulnerability
- D. Enhanced installation GUI
- E. Lower disk space requirement

Answer: BCE

Explanation:

Benefits of Server Core:

- * Reduced servicing. Because Server Core installs only what is required for a manageable DHCP, File, DNS, Media Services, and Active Directory server, less servicing is required.
- * Reduced management. Because less is installed on a Server Core-based server, less management is required.
- * Reduced attack surface. Because there is less running on the server, there is less attack surface.
- * Less disk space required. Server Core requires about 3.4GB to install.

Reference: <https://msdn.microsoft.com/en-us/library/ee391628%28v=vs.85%29.aspx>

NEW QUESTION 83

You want to receive a notification when your server's processor exceeds 80 percent utilization. You should create a:

- A. Performance Alert.
- B. Scheduled task.
- C. Performance Log.
- D. Performance counter.
- E. System Event.

Answer: A
