

PMI

Exam Questions PMI-RMP

PMI Risk Management Professional

NEW QUESTION 1

You and your project team are identifying the risks that may exist within your project. Some of the risks are small risks that won't affect your project much if they happen. What should you do with these identified risk events?

- A. All risks must have a valid, documented risk response.
- B. These risks can be accepted.
- C. These risks can be added to a low priority risk watch list.
- D. These risks can be dismissed.

Answer: C

NEW QUESTION 2

Nancy is the project manager of a project with 78 stakeholders. This is a high-profile project and she needs to express to her project team and to the management the importance of communication in this project. She would like to show the number of stakeholder communication channels in the project. Based on this information how many communication channels exist within this project?

- A. 156
- B. 3,003
- C. 78
- D. 6,084

Answer: B

NEW QUESTION 3

You are the project manager of the GHY Project for your company. You need to complete a project management process that will be on the lookout for new risks, changing risks, and risks that are now outdated. Which project management process is responsible for these actions?

- A. Risk planning
- B. Risk identification
- C. Risk monitoring and controlling
- D. Risk analysis

Answer: C

NEW QUESTION 4

Frank is the project manager of the NHQ project for his company. Frank is working with the project team, key stakeholders, and several subject matter experts on risks dealing with the new materials in the project. Frank wants to utilize a risk analysis method that will help the team to make decisions in the presence of the current uncertainty surrounding the new materials. Which risk analysis approach can Frank use to create an approach to make decisions in the presence of uncertainty?

- A. Monte Carlo Technique
- B. Qualitative risk analysis process
- C. Quantitative risk analysis process
- D. Delphi Technique

Answer: C

NEW QUESTION 5

You are the project manager for GHY Project and are working to create a risk response for a negative risk. You and the project team have identified the risk that the project may not complete on time, as required by the management, due to the creation of the user guide for the software you're creating. You have elected to hire an external writer in order to satisfy the requirements and to alleviate the risk event. What type of risk response have you elected to use in this instance?

- A. Avoidance
- B. Exploiting
- C. Transference
- D. Sharing

Answer: C

NEW QUESTION 6

You are interviewing members of a project team to test their understanding of the assigned risk responses as risk owners. You and the project manager are working together to evaluate the risk responses to determine their effectiveness in the project. What project management technique are you performing with the project manager in this scenario?

- A. Risk audits
- B. Stakeholder analysis as the project team is a stakeholder
- C. Risk identification with the project team
- D. Risk analysis

Answer: A

NEW QUESTION 7

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. Which of the following inputs will be needed for the qualitative risk analysis process in your project? Each correct answer represents a complete solution. Choose all that apply.

- A. Organizational process assets
- B. Cost management plan
- C. Project scope statement
- D. Risk register

Answer: ACD

NEW QUESTION 8

You are the project manager of the GHG project for your company. You have identified the project risks, completed qualitative and quantitative analysis, and created risk responses. You also need to document how and when risk audits will be performed in the project. Where will you define the frequency of risk audits?

- A. Risk response plan
- B. Quality management plan
- C. Risk management plan
- D. Schedule management plan

Answer: C

NEW QUESTION 9

In what portion of a project are risk and opportunities greatest and require intense planning and anticipation of risk events?

- A. Closing
- B. Planning
- C. Initiating
- D. Executing

Answer: C

NEW QUESTION 10

You work as a project manager for BlueWell Inc. Management has asked you to work with the key project stakeholder to analyze the risk events you have identified in the project. They would like you to analyze the project risks with a goal of improving the project's performance as a whole. What approach can you use to achieve the goal of improving the project's performance through risk analysis with your project stakeholders?

- A. Focus on the high-priority risks through qualitative risk analysis
- B. Involve the stakeholders for risk identification only in the phases where the project directly affects them
- C. Involve subject matter experts in the risk analysis activities
- D. Use qualitative risk analysis to quickly assess the probability and impact of risk events

Answer: A

NEW QUESTION 10

You are the project manager for the TTR project. You are in the process of gathering information for risk identification. You ask experts to participate in the process through their emails for maintaining anonymity. You collect the responses, summarize them, and are then re-circulated to the experts for further comment. Which of the following techniques are you using for risk identification?

- A. Delphi
- B. Expert judgment
- C. SWOT analysis
- D. Brainstorming

Answer: A

NEW QUESTION 13

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

Answer: A

NEW QUESTION 17

You work as a project manager for BlueWell Inc. You are working with Nancy, the COO of your company, on several risks within the project. Nancy understands that through qualitative analysis you have identified 80 risks that have a low probability and low impact as the project is currently planned. Nancy's concern, however, is that the impact and probability of these risk events may change as conditions within the project may change. She would like to know where will you document and record these 80 risks that have low probability and low impact for future reference. What should you tell Nancy?

- A. Risks with low probability and low impact are recorded in a watchlist for future monitoring.
- B. All risks, regardless of their assessed impact and probability, are recorded in the risk log.
- C. Risk identification is an iterative process so any changes to the low probability and low impact risks will be reassessed throughout the project life cycle.
- D. All risks are recorded in the risk management plan.

Answer: A

NEW QUESTION 22

Mike is the project manager of the NNP Project for his organization. He is working with his project team to plan the risk responses for the NNP Project. Mike would like the project team to work together on establishing risk thresholds in the project. What is the purpose of a risk threshold?

- A. It helps to identify those risks for which specific responses are needed.
- B. It is a limit of the funds that can be assigned to risk events.
- C. It is a warning sign that a risk event is going to happen.
- D. It is a study of the organization's risk tolerance.

Answer: A

NEW QUESTION 27

You are the project manager of the GHY project for your organization. You are about to start the qualitative risk analysis process for the project and you need to determine the roles and responsibilities for conducting risk management. Where can you find this information?

- A. Enterprise environmental factors
- B. Risk register
- C. Risk management plan
- D. Staffing management plan

Answer: C

NEW QUESTION 32

Fred is the project manager of the CPS project. He is working with his project team to prioritize the identified risks within the CPS project. He and the team are prioritizing risks for further analysis or action by assessing and combining the risks probability of occurrence and impact. What process is Fred completing?

- A. Risk identification
- B. Perform qualitative analysis
- C. Perform quantitative analysis
- D. Risk Breakdown Structure creation

Answer: B

NEW QUESTION 36

Holly is the project manager of the NHQ project for her company. Her project sponsor, Tracy, has requested that Thomas, the department manager, from the Risk Management Department, will work with Holly to determine the effectiveness of the risk responses. Tracy and Thomas are concerned that some of the risks within Holly's project may not be addressed to depth they would like. In this scenario, who is responsible for ensuring that risk audits are performed at an appropriate frequency throughout the project?

- A. Thomas
- B. Tracy
- C. The project team
- D. Holly

Answer: D

NEW QUESTION 41

Your project has several risks that may cause serious financial impact should they happen. You have studied the risk events and made some potential risk responses for the risk events but management wants you to do more. They'd like for you to create some type of a chart that identified the risk probability and impact with a financial amount for each risk event. What is the likely outcome of creating this type of chart?

- A. Risk response
- B. Quantitative analysis
- C. Contingency reserve
- D. Risk response plan

Answer: C

NEW QUESTION 42

Shawn is the project manager of the WHT Project for his company. In this project Shawn's team reports that they have found a way to complete the project work for less cost than what was originally planned. The project team presents a new software that will help to automate the project work. While the software and the associated training costs \$25,000 it will save the project nearly \$65,000 in total costs. Shawn agrees to the software and changes to the project management plan accordingly. What type of risk response has been used in this instance?

- A. Avoidance
- B. Exploiting
- C. Accepting
- D. Enhancing

Answer: B

NEW QUESTION 43

Melody is the project manager for her organization. She has created a risk response to conduct more tests on the software her project is creating. The identified risk that prompted this response was that the software is mission-critical and must be flawless before it can be put into product. What type of a risk response has Melody used in this scenario?

- A. Mitigation
- B. Enhance
- C. Transference
- D. Avoidance

Answer: A

NEW QUESTION 48

You are the project manager of the HJK Project for your organization. You and the project team have created risk responses for many of the risk events in the project. Where should you document the proposed responses and the current status of all identified risks?

- A. Stakeholder management strategy
- B. Risk management plan
- C. Risk register
- D. Lessons learned documentation

Answer: C

NEW QUESTION 49

You are the project manager of your organization. Your organization will receive a bonus if the project finishes by December 20. Management has communicated this bonus to you and your project team and has asked you to evaluate the project to see if it is possible to realize the reward. The bonus offered to your organization is \$750,000. You have examined the project and believe that you can crash the project for an additional \$275,000 and reach the December 20 date. Management is thrilled with your assessment and they approve the crash fee. What risk response is this?

- A. Crashing can be a type of the enhancing risk response.
- B. Crashing can be considered transference because of the \$275,000 is actually paid from the bonus, which is paid by the project customer.
- C. Crashing can be a type of the exploit risk response.
- D. Crashing is the addition of labor, not a risk response.

Answer: A

NEW QUESTION 53

Rachel is the project manager of the KJH Project for her company. She needs a method to create a quick and simple approach to risk identification to communicate the project risk with the stakeholders. Which one of the following approaches to risk identification should Rachel choose to provide a quick and simple listing of the project risks?

- A. Delphi Technique
- B. Checklist analysis
- C. Assumptions analysis
- D. Brainstorming

Answer: B

NEW QUESTION 57

Lisa is the project manager of the SQL project for her company. She has completed the risk response planning with her project team and is now ready to update the risk register to reflect the risk response. Which of the following statements best describes the level of detail Lisa should include with the risk responses she has created?

- A. The level of detail is set by historical information.
- B. The level of detail should correspond with the priority ranking.
- C. The level of detail must define exactly the risk response for each identified risk.
- D. The level of detail is set of project risk governance.

Answer: B

NEW QUESTION 59

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. You will need all of the following as inputs to the qualitative risk analysis process except for which one?

- A. Stakeholder register
- B. Project scope statement
- C. Risk management plan
- D. Risk register

Answer: A

NEW QUESTION 62

Thomas is a key stakeholder in your project. Thomas has requested several changes to the project scope for the project you are managing. Upon review of the proposed changes, you have discovered that these new requirements are laden with risks and you recommend to the change control board that the changes be excluded from the project scope. The change control board agrees with you. What component of the change control system communicates the approval or denial of a proposed change request?

- A. Configuration management system
- B. Scope change control system
- C. Integrated change control
- D. Change log

Answer: C

NEW QUESTION 64

What risk identification technique allows participants to identify the project risks and to remain anonymous?

- A. Influence diagrams
- B. Assumptions analysis
- C. Surveys
- D. Delphi technique

Answer: D

NEW QUESTION 66

You are the project manager of a new project in your organization. You and the project team have identified the project risks, completed risk analysis, and are planning the most appropriate risk responses. Which of the following tools is most effective to choose the most appropriate risk response?

- A. Cause-and-effect diagrams
- B. Project network diagrams
- C. Delphi Technique
- D. Decision tree analysis

Answer: D

NEW QUESTION 67

Which of the following processes involves choosing the alternative strategies, executing a contingency or fallback plan, taking corrective action, and modifying the project management plan?

- A. Monitor and Control risk
- B. Configuration Management
- C. Integrated Change control
- D. Scope Change control

Answer: A

NEW QUESTION 70

Which of the following risk responses delineates that the project plan will not be changed to deal with the risk?

- A. Exploitation
- B. Transference
- C. Acceptance
- D. Mitigation

Answer: C

NEW QUESTION 72

Which of the following techniques examines the degree to which organizational strengths offset threats and opportunities that may serve to overcome weaknesses?

- A. SWOT Analysis
- B. Expert Judgment
- C. Delphi
- D. Brainstorming

Answer: A

NEW QUESTION 77

Harry works as a project manager for BlueWell Inc. He is determining how to conduct the risk management activities for a project. According to the PMBOK, there are six inputs to the plan risk management process. Which one of the following is NOT an input to this process?

- A. Project scope statement
- B. Risk management plan
- C. Schedule management plan
- D. Cost management plan

Answer: B

NEW QUESTION 79

You are the project manager of the GHG project. You are preparing for the quantitative risk analysis process. You are using organizational process assets to help you complete the quantitative risk analysis process. Which one of the following is NOT a valid reason to utilize organizational process assets as a part of the quantitative risk analysis process?

- A. You will use organizational process assets for risk databases that may be available from industry sources.
- B. You will use organizational process assets for studies of similar projects by risk specialists.
- C. You will use organizational process assets to determine costs of all risks events within the current project.
- D. You will use organizational process assets for information from prior similar projects.

Answer: C

NEW QUESTION 84

There are four inputs to the Monitoring and Controlling Project Risks process. Which one of the following will NOT help you, the project manager, to prepare for risk monitoring and controlling?

- A. Work Performance Information
- B. Project management plan
- C. Risk register
- D. Change requests

Answer: D

NEW QUESTION 87

You are the project manager for the NHH project. You are working with your project team to examine the project from four different defined perspectives to increase the breadth of identified risks by including internally generated risks. What risk identification approach are you using in this example?

- A. Root cause analysis
- B. SWOT analysis
- C. Influence diagramming techniques
- D. Assumptions analysis

Answer: B

NEW QUESTION 92

You are the project manager of the HJK project for your organization. You and the project team have created risk responses for many of the risk events in the project. A teaming agreement is an example of what risk response?

- A. Transference
- B. Acceptance
- C. Mitigation
- D. Sharing

Answer: D

NEW QUESTION 95

A high-profile, high-priority project within your organization is being created. Management wants you to pay special attention to the project risks and do all that you can to ensure that all of the risks are identified early in the project. Management has to ensure that this project succeeds. Management's risk aversion in this project is associated with what term?

- A. Quantitative risk analysis
- B. Risk conscience
- C. Risk mitigation
- D. Utility function

Answer: D

NEW QUESTION 97

You are the project manager of the NNQ Project for your company and are working with your project team to define contingency plans for the risks within your project. Mary, one of your project team members, asks what a contingency plan is. Which of the following statements best defines what a contingency response is?

- A. Some responses are designed for use only if certain events occur.
- B. Some responses have a cost and a time factor to consider for each risk event.
- C. Some responses must counteract pending risk events.
- D. Quantified risks should always have contingency responses.

Answer: A

NEW QUESTION 102

Elizabeth is a project manager for her organization and she finds risk management to be very difficult for her to manage. She asks you, a lead project manager, at what stage in the project will risk management become easier. What answer best resolves the difficulty of risk management practices and the effort required?

- A. Risk management only becomes easier the more often it is practiced.
- B. Risk management only becomes easier when the project is closed.
- C. Risk management only becomes easier when the project moves into project execution.
- D. Risk management is an iterative process and never becomes easier.

Answer: A

NEW QUESTION 104

You work as a project manager for BlueWell Inc. There has been a delay in your project work that is adversely affecting the project schedule. You decided, with your stakeholders' approval, to fast track the project work to get the project done faster. When you fast track the project which of the following are likely to increase?

- A. Costs
- B. Quality control concerns
- C. Human resource needs
- D. Risks

Answer: D

NEW QUESTION 107

You are the project manager of the NKQ project for your organization. You have completed the quantitative risk analysis process for this portion of the project. What is the only output of the quantitative risk analysis process?

- A. Probability of reaching project objectives
- B. Risk register updates
- C. Risk response
- D. Risk contingency reserve

Answer: B

NEW QUESTION 110

Frances is the project manager of a project in her organization. This project has a budget of \$567,000 and is schedule to last for three years. Frances wants to examine the risk events to determine which risk events have the most potential impact on the project. Which modeling technique can help Frances to accomplish this goal?

- A. Expected monetary value
- B. Sensitivity analysis
- C. Quantitative risk analysis
- D. Modeling and simulation

Answer: B

NEW QUESTION 113

You are the project manager for your organization. You have determined that an activity is too dangerous to complete internally so you hire licensed contractor to complete the work.

The contractor, however, may not complete the assigned work on time which could cause delays in subsequent work beginning. This is an example of what type of risk event?

- A. Internal
- B. Secondary risk
- C. Pure risk
- D. Transference

Answer: B

NEW QUESTION 117

John works as a project manager for ABD project. He and his team, are working on the following activities:

Relative ranking or priority list of project risks Watchlists of low priority risk

Trends in Qualitative Risk Analysis results

On which of the following processes is John working on?

- A. Perform Qualitative Risk Analysis
- B. Plan Risk Management
- C. Plan Risk Responses
- D. Perform Quantitative Risk Analysis

Answer: A

NEW QUESTION 120

Jenny is the project manager for the NBT projects. She is working with the project team and several subject matter experts to perform the quantitative risk analysis process. During this process she and the project team uncover several risks events that were not previously identified. What should Jenny do with these risk events?

- A. The events should be entered into qualitative risk analysis.
- B. The events should be determined if they need to be accepted or responded to.
- C. The events should be entered into the risk register.
- D. The events should continue on with quantitative risk analysis.

Answer: C

NEW QUESTION 121

Which of the following processes must be repeated after Plan Risk Responses, as well as part of the Monitor and Control Risks, to determine if the overall project risk has been satisfactorily decreased?

- A. Risk Limitation
- B. Perform Qualitative Risk Analysis
- C. Identify Risk
- D. Perform Quantitative Risk Analysis

Answer: D

NEW QUESTION 122

You are the project manager of a large, high-profile project in your organization. You have realized that politics within your company may affect the true identification of risk events within the project. You decide that you'd like to use a method to identify risk events through an anonymous process. Which one of the following risk events will allow you to collect and distribute risk information without the stakeholders knowing what other stakeholders are communicating about the project risk events?

- A. Surveys
- B. Monte Carlo Technique
- C. Checklist analysis
- D. Delphi Technique

Answer: D

NEW QUESTION 125

You are the project manager of the GGH Project in your company. Your company is structured as a functional organization and you report to the functional manager that you are ready to move onto the quantitative risk analysis process. What things will you need as inputs for the quantitative risk analysis of the project in this scenario?

- A. You will need the risk register, risk management plan, permission from the functional manager, and any relevant organizational process assets.
- B. You will need the risk register, risk management plan, cost management plan, schedule management plan, and any relevant organizational process assets.
- C. You will need the risk register, risk management plan, outputs of qualitative risk analysis, and any relevant organizational process assets.
- D. Quantitative risk analysis does not happen through the project manager in a functional structure.

Answer: B

NEW QUESTION 127

You are the project manager of the AMD project for your organization. In this project, you are currently performing quantitative risk analysis. The tool and technique you are using is simulation where the project model is computed many times with the input values chosen at random for each iteration. The goal is to create a probability distribution from the iterations for the project schedule. What technique will you use with this simulation?

- A. Pareto modeling
- B. Expected Monetary Value
- C. Analogous modeling
- D. Monte Carlo Technique

Answer: D

NEW QUESTION 131

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Increased understanding or quantification of the system
- B. Estimating the average outcome
- C. Model development
- D. Decision making or the development of recommendations for decision makers

Answer: ACD

NEW QUESTION 133

Nancy is the project manager of the NHH project. She and the project team have identified a significant risk in the project during the qualitative risk analysis process. Bob is familiar with the technology that the risk is affecting and proposes to Nancy a solution to the risk event. Nancy tells Bob that she has noted his response, but the risk really needs to pass through the quantitative risk analysis process before creating responses. Bob disagrees and ensures Nancy that his response is most appropriate for the identified risk. Who is correct in this scenario?

- A. Bob is correct
- B. Bob is familiar with the technology and the risk event so his response should be implemented.
- C. Bob is correct
- D. Not all risk events have to pass the quantitative risk analysis process to develop effective risk responses.
- E. Nancy is correct
- F. All risks of significant probability and impact should pass the quantitative risk analysis process before risk responses are created.
- G. Nancy is correct
- H. Because Nancy is the project manager she can determine the correct procedures for risk analysis and risk response
- I. In addition, she has noted the risk response that Bob recommends.

Answer: B

NEW QUESTION 135

You are the project manager of a large construction project. This project will last for 18 months and will cost \$750,000 to complete. You are working with your project team, experts, and stakeholders to identify risks within the project before the project work begins.

Management wants to know why you have scheduled so many risk identification meetings throughout the project rather than just initially during the project planning. What is the best reason for the duplicate risk identification sessions?

- A. The iterative meetings allow the project manager and the risk identification participants to identify newly discovered risk events throughout the project.
- B. The iterative meetings allow all stakeholders to participate in the risk identification processes throughout the project phases.

- C. The iterative meetings allow the project manager to discuss the risk events which have passed the project and which did not happen.
- D. The iterative meetings allow the project manager to communicate pending risks events during project execution.

Answer: A

NEW QUESTION 137

Mary is a project manager in her organization. On her current project she is working with her project team and other key stakeholders to identify the risks within the project. She is currently aiming to create a comprehensive list of project risks so she is using a facilitator to help generate ideas about project risks. What risk identification method is Mary likely using?

- A. Brainstorming
- B. Delphi Techniques
- C. Checklist analysis
- D. Expert judgment

Answer: A

NEW QUESTION 142

You are the project manager of the KJH Project and are working with your project team to plan the risk responses. Consider that your project has a budget of \$500,000 and is expected to last six months. Within the KJH Project you have identified a risk event that has a probability of .70 and has a cost impact of \$350,000. When it comes to creating a risk response for this event what is the risk exposure of the event that must be considered for the cost of the risk response?

- A. The risk exposure of the event is \$245,000.
- B. The risk exposure of the event is \$500,000.
- C. The risk exposure of the event is \$350,000.
- D. The risk exposure of the event is \$850,000.

Answer: A

NEW QUESTION 147

Pete works as a project manager for BlueWell Inc. The Management has told him that he must implement an agreed-upon contingency response if the cost performance index in his project is less than 0.90. Consider that Pete's project has a budget at completion of \$275,000. His project is 65 percent complete and he has spent \$175,000 to date. However, Pete is scheduled to be 78 percent complete. What is the cost performance index for this project to determine if the contingency response should happen?

- A. 1.02
- B. 0.96
- C. 0.90
- D. 0.89

Answer: A

NEW QUESTION 150

Gary is the project manager for his project. He and the project team have completed the qualitative risk analysis process and are about to enter the quantitative risk analysis process when Mary, the project sponsor, wants to know what quantitative risk analysis will review. Which of the following statements best defines what quantitative risk analysis will review?

- A. The quantitative risk analysis process will review risk events for their probability and impact on the project objectives.
- B. The quantitative risk analysis seeks to determine the true cost of each identified risk event and the probability of each risk event to determine the risk exposure.
- C. The quantitative risk analysis process will analyze the effect of risk events that may substantially impact the project's competing demands.
- D. The quantitative risk analysis reviews the results of risk identification and prepares the project for risk response management.

Answer: C

NEW QUESTION 155

Mark works as a project manager for TechSoft Inc. Mark, the project team, and the key project stakeholders have completed a round of qualitative risk analysis. He needs to update the risk register with his findings so that he can communicate the risk results to the project stakeholders – including management. Mark will need to update all of the following information except for which one?

- A. Prioritized list of quantified risks
- B. Watchlist of low-priority risks
- C. Trends in qualitative risk analysis
- D. Risks grouped by categories

Answer: A

NEW QUESTION 160

Frank is a project team member in your project. Frank has been adding changes to the software interface for the software that your project is creating. Because Frank has been adding these features new risks have entered into the project. You elect that these additions should be removed from the project even if it takes extra time and money to remove the features. What are these riskladen features called?

- A. Gold plating
- B. Scope creep
- C. Negative risks
- D. Corrective actions

Answer: B

NEW QUESTION 164

You are the project manager for your organization. You are working with your key stakeholders in the qualitative risk analysis process. You understand that there is certain bias towards the risk events in the project that you need to address, manage, and ideally reduce. What solution does the PMBOK recommend to reduce the influence of bias during qualitative risk analysis?

- A. Establish the definitions of the levels of probability and impact
- B. Provide iterations of risk analysis for true reflection of a risk probability and impact
- C. Isolate the stakeholders by project phases to determine their risk bias
- D. Involve all stakeholders to vote on the probability and impact of the risk events

Answer: A

NEW QUESTION 168

Amy is the project manager for her company. In her current project the organization has a very low tolerance for risk events that will affect the project schedule. Management has asked Amy to consider the affect of all the risks on the project schedule. What approach can Amy take to create a bias against risks that will affect the schedule of the project?

- A. She can create an overall project rating scheme to reflect the bias towards risks that affect the project schedule.
- B. She can filter all risks based on their affect on schedule versus other project objectives.
- C. She can have the project team pad their time estimates to alleviate delays in the project schedule.
- D. She can shift risk-laden activities that affect the project schedule from the critical path as much as possible.

Answer: A

NEW QUESTION 172

You are the project manager of the NHJ project for your company. This project has a budget at completion of \$1,650,000 and you are 60 percent complete. According to the project plan, however, the project should be 65 percent complete. In this project you have spent \$995,000 to reach this point of completion. There is a risk that this project may be late so you have taken some measures to recover the project schedule. Management would like to know, based on current performance, what the estimate at completion for this project will be. What is the estimate at completion?

- A. \$1,650,000
- B. \$1,666,667
- C. \$663,333
- D. -\$8,333

Answer: B

NEW QUESTION 175

Mary is the project manager of PKT project. In Mary's project there are certain enterprise environmental factors that require Mary to use modeling and simulation techniques to predict the likelihood of achieving cost and schedule objectives in the project. Mary is using a technique for which the cost estimates are chosen at random for each iteration of the analysis, such as pessimistic, most likely, and worst-case scenarios. What type of analysis is Mary using in this project?

- A. Quantitative analysis
- B. Qualitative analysis
- C. Risk distribution
- D. Monte Carlo Analysis

Answer: D

NEW QUESTION 178

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

Answer: C

NEW QUESTION 180

Joan is the project manager of the KYU project for her company. She is working with management on defining a contingency reserve for her project. Currently the project is scheduled to last 18 months and it has a cost budget of \$2.5 million. What two areas of the project can the contingency reserve address in regard to risk management?

- A. Quality and costs
- B. Cost and resource management
- C. Risk and project planning
- D. Costs and schedule

Answer: D

NEW QUESTION 185

Adrian is a project manager for a new project using a technology that has recently been released and there's relatively little information about the technology. Initial testing of the technology makes the use of it look promising, but there's still uncertainty as to the longevity and reliability of the technology. Adrian wants to consider the technology factors a risk for her project. Where should she document the risks associated with this technology so she can track the risk status and responses?

- A. Risk register
- B. Risk low-level watch list
- C. Project scope statement
- D. Project charter

Answer: A

NEW QUESTION 189

You work as the project manager for Bluewell Inc. There has been a delay in your project work that is adversely affecting the project schedule. You decide, with your stakeholders' approval, to fast track the project work to get the project done faster. When you fast track the project, what is likely to increase?

- A. Risks
- B. Costs
- C. Quality control concerns
- D. Human resource needs

Answer: A

NEW QUESTION 194

Bill is the project manager of the JKH Project. He and the project team have identified a risk event in the project with a high probability of occurrence and the risk event has a high cost impact on the project. Bill discusses the risk event with Virginia, the primary project customer, and she decides that the requirements surrounding the risk event should be removed from the project. The removal of the requirements does affect the project scope, but it can release the project from the high risk exposure. What risk response has been enacted in this project?

- A. Mitigation
- B. Transference
- C. Acceptance
- D. Avoidance

Answer: D

NEW QUESTION 196

You work as a project manager for TechSoft Inc. You are working with the project stakeholders on the qualitative risk analysis process in your project. You have used all the tools to the qualitative risk analysis process in your project. Which of the following techniques is NOT used as a tool in qualitative risk analysis process?

- A. Risk Urgency Assessment
- B. Risk Categorization
- C. Risk Reassessment
- D. Risk Data Quality Assessment

Answer: C

NEW QUESTION 200

Beth is a project team member on the JHG Project. Beth has added extra features to the project and this has introduced new risks to the project work. The project manager of the JHG project elects to remove the features Beth has added. The process of removing the extra features to remove the risks is called what?

- A. Preventive action
- B. Corrective action
- C. Scope creep
- D. Defect repair

Answer: A

NEW QUESTION 202

Fill in the blank with an appropriate phrase. The _____ is the risk or danger of an action or an event, a method or a (technical) process that still conceives these dangers even if all theoretically possible safety measures would be applied.

- A. residual risk

Answer: A

NEW QUESTION 203

You are the project manager for the NHQ Project. This project requires that you install 140 copies of design software onto your department's computers. The vendor offers you a twenty percent discount on the software if your company will purchase 150 or more copies of the software. You communicate this offer with other departments in your firm to see if anyone else would need 10 copies of the software to save your project a significant amount of funds. What is this risk response called?

- A. Exploiting
- B. Avoidance
- C. Sharing
- D. Transference

Answer: C

NEW QUESTION 206

Della works as a project manager for SoftTech Inc. She is working with the project stakeholders to begin the quantitative risk analysis process. Which of the following inputs will be needed for the quantitative risk analysis process in her project? Each correct answer represents a complete solution. Choose all that apply.

- A. Risk management plan
- B. Project scope statement
- C. Risk register
- D. Cost management plan

Answer: ACD

NEW QUESTION 211

Fred is the project manager of the PKL project. He is working with his project team to complete the quantitative risk analysis process as a part of risk management planning. Fred understands that once the quantitative risk analysis process is complete, the process will need to be completed again in at least two other times in the project. When will the quantitative risk analysis process need to be repeated?

- A. Quantitative risk analysis process will be completed again after the cost management planning and as a part of monitoring and controlling.
- B. Quantitative risk analysis process will be completed again after new risks are identified and as part of monitoring and controlling.
- C. Quantitative risk analysis process will be completed again after the risk response planning and as a part of monitoring and controlling.
- D. Quantitative risk analysis process will be completed again after the plan risk response planning and as part of procurement.

Answer: C

NEW QUESTION 214

You are the project manager of the GHQ project for your company. You are working with your project team to prepare for the qualitative risk analysis process. Mary, a project team member, does not understand why you need to complete qualitative risks analysis. You explain to Mary that qualitative risks analysis helps you determine which risks needs additional analysis. There are also some other benefits that qualitative risks analysis can do for the project. Which one of the following is NOT an accomplishment of the qualitative risk analysis process?

- A. Corresponding impact on project objectives
- B. Time frame for a risk response
- C. Prioritization of identified risk events based on probability and impact
- D. Cost of the risk impact if the risk event occurs

Answer: D

NEW QUESTION 216

Jane is the project manager of the GBB project for her company. In the current project a vendor has offered the project a ten percent discount based if they will order 100 units for the project. It is possible that the GBB Project may need the 100 units, but the cost of the units is not a top priority for the project. Jane documents the offer and tells the vendor that they will keep the offer in mind and continue with the project as planned. What risk response has been given in this project?

- A. Acceptance
- B. Enhance
- C. Exploiting
- D. Sharing

Answer: A

NEW QUESTION 220

You are the project manager for a construction project. The project includes a work that involves very high financial risks. You decide to insure processes so that any ill happening can be compensated. Which type of strategies have you used to deal with the risks involved with that particular work?

- A. Mitigate
- B. Avoid
- C. Accept
- D. Transfer

Answer: D

NEW QUESTION 222

You are the project manager for BlueWell Inc. You are reviewing the risk register for your project. The risk register provides much information to you, the project manager and to the project team during the risk response planning. All of the following are included in the risk register except for which item?

- A. Network diagram analysis of critical path activities
- B. Symptoms and warning signs of risks
- C. List of potential risk responses
- D. Trends in qualitative risk analysis results

Answer: A

NEW QUESTION 226

You are the project manager of the NHH project for your company. You and the project team have completed the quantitative risk analysis for your project. During this process you create a contingency reserve based on the risk probability-impact matrix as seen in the figure below. Based on the information in the figure above, what amount would you need to include in your risk contingency fund?

- A. -\$465,000
- B. \$171,500

- C. -\$258,500
- D. \$258,500

Answer: D

NEW QUESTION 228

Which of the following is a risk response planning technique associated with threats that seeks to reduce the probability of occurrence or impact of a risk to below an acceptable threshold?

- A. Avoidance
- B. Exploit
- C. Transference
- D. Mitigation

Answer: D

NEW QUESTION 231

You are the project manager of the BlueStar project in your company. Your company is structured as a functional organization and you report to the functional manager that you are ready to move onto the qualitative risk analysis process. What will you need as inputs for the qualitative risk analysis of the project in this scenario?

- A. Qualitative risk analysis does not happen through the project manager in a functional structure.
- B. You will need the risk register, risk management plan, project scope statement, and any relevant organizational process assets.
- C. You will need the risk register, risk management plan, outputs of qualitative risk analysis, and any relevant organizational process assets.
- D. You will need the risk register, risk management plan, permission from the functional manager, and any relevant organizational process assets.

Answer: B

NEW QUESTION 234

Neil works as a project manager for SoftTech Inc. He is working with Tom, the COO of his company, on several risks within the project. Tom understands that through qualitative analysis Neil has identified many risks in the project. Tom's concern, however, is that the priority list of these risk events are sorted in "high-risk," "moderate-risk," and "low-risk" as conditions apply within the project. Tom wants to know that is there any other objective on which Neil can make the priority list for project risks. What will be Neil's reply to Tom?

- A. Risks may be listed by the additional analysis and response
- B. Risk may be listed by the responses in the near-term
- C. Risks may be listed by priority separately for schedule, cost, and performance
- D. Risks may be listed by categories

Answer: C

NEW QUESTION 239

You work as a project manager for BlueWell Inc. You are working on a project and the management wants a rapid and cost-effective means for establishing priorities for planning risk responses in your project. Which risk management process can satisfy management's objective for your project?

- A. Historical information
- B. Qualitative risk analysis
- C. Quantitative analysis
- D. Rolling wave planning

Answer: B

NEW QUESTION 243

Which risk response is acceptable for both positive and negative risk events?

- A. Transferring
- B. Acceptance
- C. Sharing
- D. Enhancing

Answer: B

NEW QUESTION 248

You are the project manager of the GGK project for your company. The GGK project has a budget of \$1,265,100 and is currently 40 percent complete. In this project, you elected to add labor to the project to increase the likelihood of completing the project early as the project was only scheduled to be 35 percent complete at this time. This positive risk response, while keeping the project ahead of schedule, has added significant costs to the project. You have already spent \$575,000 to reach this point in the project. Management would like to know what your cost performance index and the schedule performance index is for this project. What are these values?

- A. The CPI is -\$68,960 and the SPI is \$63,255.
- B. The CPI is .88 and the SPI is zero.
- C. The CPI is .88 and the SPI is 1.14.
- D. The CPI is 1.14 and the SPI is .88.

Answer: C

NEW QUESTION 253

You work as a project manager for BlueWell Inc. You are about to complete the quantitative risk analysis process for your project. You can use three available tools and techniques to complete this process. Which one of the following is NOT a tool or technique that is appropriate for the quantitative risk analysis process?

- A. Expert judgment
- B. Data gathering and representation techniques
- C. Organizational process assets
- D. Quantitative risk analysis and modeling techniques

Answer: C

NEW QUESTION 255

What approach can a project manager use to improve the project's performance during qualitative risk analysis?

- A. Focus on near-term risks first.
- B. Create a risk breakdown structure and delegate the risk analysis to the appropriate project team members.
- C. Focus on high-priority risks.
- D. Analyze as many risks as possible regardless of who initiated the risk event.

Answer: C
