

Exam Questions MS-100

Microsoft 365 Identity and Services

<https://www.2passeasy.com/dumps/MS-100/>

NEW QUESTION 1

- (Exam Topic 5)

You have the Microsoft Azure Active Directory (Azure AD) users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

Your company uses Microsoft Intune.

Several devices are enrolled in Intune as shown in the following table.

Name	Platform	BitLocker Drive Encryption	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group4

The device compliance policies in Intune are configured as shown in the following table.

Name	Require BitLocker	Assigned to
Policy1	Not configured	Group3
Policy2	Require	Group4

You create a conditional access policy that has the following settings:

- The Assignments settings are configured as follows:
 - Users and groups: Group1
 - Cloud apps: Exchange Online
 - Conditions: Include All device state, exclude Device marked as compliant

➤ Access controls is set to Block access.

For each of the following statements, select yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access Microsoft Exchange Online from Device1.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input type="radio"/>
User2 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:

Yes. User1 is in Group1. The Conditional Access Policy applies to Group1. The Conditional Access Policy blocks access unless the device is marked as compliant.

BitLocker is disabled for Device1. Device1 is in Group3 which is assigned device Policy1. The BitLocker policy in Policy1 is 'not configured' so BitLocker is not required.

Therefore, Device1 is compliant so User1 can access Exchange online from Device1. Box 2:

No. User1 is in Group1. The Conditional Access Policy applies to Group1. The Conditional Access Policy blocks access unless the device is marked as compliant. BitLocker is disabled for Device2. Device2 is in Group4 which is assigned device Policy2. The BitLocker policy in Policy2 is 'Required so BitLocker is required.

Therefore, Device2 is not compliant so User1 cannot access Exchange online from Device2. Box3:

Yes. User2 is in Group2. The Conditional Access Policy applies to Group1. The Conditional Access Policy does not apply to Group2. So even though Device2 is non-compliant, User2 can access Exchange Online using Device2 because there is no Conditional Access Policy preventing him/her from doing so.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions>

NEW QUESTION 2

- (Exam Topic 5)

You have a Microsoft Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Role
User1	Global administrator
User2	Billing administrator
User3	None

You enable self-service password reset for all users. You set Number of methods required to reset to 1, and you set Methods available to users to Security questions only.

What information must be configured for each user before the user can perform a self-service password reset? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1:	<input type="checkbox"/> Email address only <input type="checkbox"/> Phone number only <input type="checkbox"/> Security questions only <input type="checkbox"/> Phone number and email address
User2:	<input type="checkbox"/> Email address only <input type="checkbox"/> Phone number only <input type="checkbox"/> Security questions only <input type="checkbox"/> Phone number and email address
User3:	<input type="checkbox"/> Email address only <input type="checkbox"/> Phone number only <input type="checkbox"/> Security questions only <input type="checkbox"/> Phone number and email address

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Microsoft enforces a strong default two-gate password reset policy for any Azure administrator role. This policy may be different from the one you have defined for your users and cannot be changed. You should always test password reset functionality as a user without any Azure administrator roles assigned.

With a two-gate policy, administrators don't have the ability to use security questions.

The two-gate policy requires two pieces of authentication data, such as an email address, authenticator app, or a phone number.

User3 is not assigned to an Administrative role so the configured method of Security questions only applies to User3.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-policy#administrator-passw>

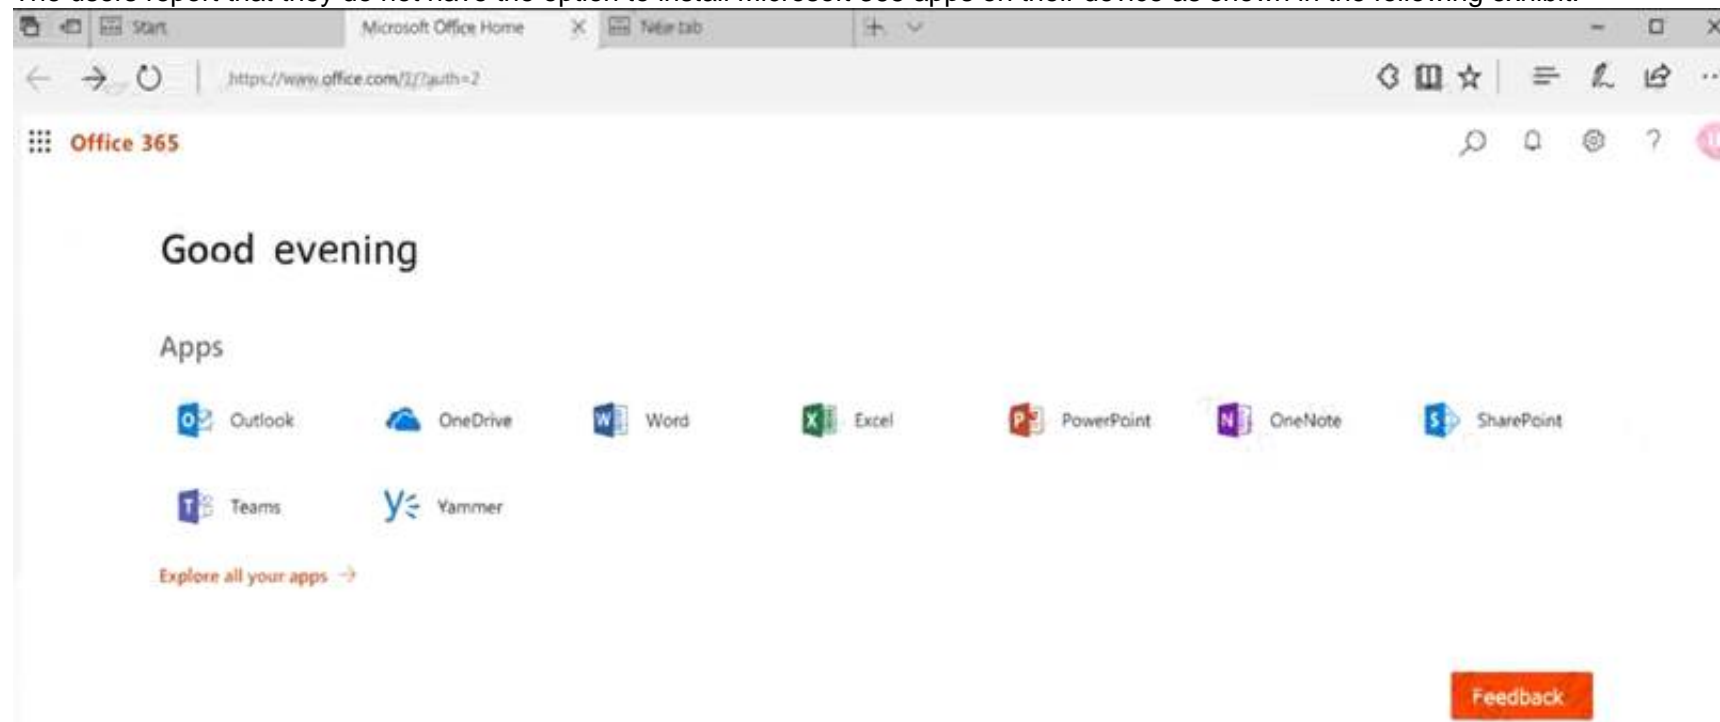

NEW QUESTION 3

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

All users are assigned a license to Microsoft 365 Apps for enterprise.

The users report that they do not have the option to install Microsoft 365 apps on their device as shown in the following exhibit.

You need to ensure that the users can install Microsoft 365 apps from the Office 365 portal.
 What should you do?

- A. From the Microsoft 365 admin center, modify the user license settings.
- B. From the Microsoft Endpoint Manager admin center, create a Microsoft 365 Apps app and assign the app to the devices.
- C. From the Microsoft Endpoint Manager admin center, create a Microsoft 365 Apps app and assign the app to the users.
- D. From the Microsoft 365 admin center, modify the Services & add-ins settings.

Answer: D

NEW QUESTION 4

- (Exam Topic 5)

You have a DNS zone named contoso.com that contains the following records.

```
@           IN      SOA      dns1.contoso.com. hostmaster.contoso.com. (
                                539          ; serial number
                                900          ; refresh
                                600          ; retry
                                86400        ; expire
                                3600         ) ; default TTL

@           NS       dns1.contoso.com.

@           MX       10      server1.contoso.com.
@           TXT       ( "v=spf1 a include:server1.contoso.com -all" )
Server1     A         193.77.10.15
```

You purchase a Microsoft 365 subscription.
You plan to migrate mailboxes to Microsoft Exchange Online.
You need to configure Sender Policy Framework (SPF) to support Exchange Online. What should you do?

- A. Add an additional TXT record.
- B. Modify the TXT record.
- C. Modify the expire interval of the SOA record.
- D. Modify the default TTL of the SOA record.

Answer: B

Explanation:

Reference:
https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/set-up-spf-in-office-365-to-help-pre

NEW QUESTION 5

- (Exam Topic 5)
You have a Microsoft 365 E5 subscription.
You have an Azure AD tenant named contoso.com that contains the following users:

- Admin 1
- Admin2
- User1

Contoso.com contains an administrative unit named AU1 that has no role assignments. User1 is a member of AU1.

Answer Area		
Statements	Yes	No
You can add Admin1 as a member of AU1.	<input type="radio"/>	<input type="radio"/>
You can add User1 as a member of AU2.	<input type="radio"/>	<input type="radio"/>
You can assign Admin2 the User administrator role for AU1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area		
Statements	Yes	No
You can add Admin1 as a member of AU1.	<input checked="" type="radio"/>	<input type="radio"/>
You can add User1 as a member of AU2.	<input checked="" type="radio"/>	<input type="radio"/>
You can assign Admin2 the User administrator role for AU1.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 6

- (Exam Topic 5)
You are confirming an enterprise application named Test App in Microsoft Azur as shown in the following exhibit.

Test Application
Click here to verify application configuration.

Basic Settings

Internal Uri ☒

External Uri

Pre Authentication

Connector Group

Additional Settings

Backend Application Timeout

Use HTTP-Only Cookie ☒ Yes ☐ No

Translate URLs In Headers ☒ Yes ☐ No

Application Body ☐ Yes ☒ No

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

To ensure that when users access TestApp, the proxy automatically scans for internal URLs published through the Application Proxy, set [answer choice]

To protect TestApp from Cross-Site Scripting (XSS), set [answer choice]

Use HTTP-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

Use HTTP-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

To ensure that when users access TestApp, the proxy automatically scans for internal URLs published through the Application Proxy, set [answer choice]

To protect TestApp from Cross-Site Scripting (XSS), set [answer choice]

Use HTTP-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

Use HTTP-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

NEW QUESTION 7

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: *yfLo7lr2&yIf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10811525

Your organization plans to open an office in New York, and then to add 100 users to the office. The city attribute for all new users will be New York.

You need to ensure that all the new users in the New York office are licensed for Microsoft Office 365 automatically.

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

You need create a dynamic group based on the city attribute. You then need to assign a license to the group. User accounts with the city attribute set to 'New York' will automatically be added to the group. Anyone who is added to the group will automatically be assigned the license that is assigned to the group.

- * 1. Go to the Azure Active Directory admin center.
- * 2. Select Azure Active Directory then select Groups.
- * 3. Click on the New Group link.
- * 4. Give the group a name such as New York Users.
- * 5. Select Users as the membership type.
- * 6. Select 'Add dynamic query'.
- * 7. Select 'City' in the Property drop-down box.
- * 8. Select 'Equals' in the Operator drop-down box.
- * 9. Enter 'New York' as the Value. You should see the following text in the Expression box: user.city -eq "New York"
- * 10. Click Save to create the group.
- * 11. In the Groups list, select the new group to open the properties page for the group.
- * 12. Select 'Licenses'.
- * 13. Select the '+ Assignments' link.
- * 14. Tick the box to select the license.
- * 15. Click the Save button to save the changes. References:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/groups-dynamic-membership> <https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign>

NEW QUESTION 8

- (Exam Topic 5)

Your company has a Microsoft 365 subscription and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

An external vendor has a Microsoft account that has a username of user1@outlook.com. You plan to provide user1@outlook.com with access to several resources in the subscription.

You need to add the external user account to contoso.onmicrosoft.com. The solution must ensure that the external vendor can authenticate by using user1@outlook.com.

What should you do?

- A. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify –UserPrincipalName user1@outlook.com.
- B. From the Microsoft 365 admin center, add a contact, and then specify user1@outlook.com as the email address.
- C. From the Azure portal, add a new guest user, and then specify user1@outlook.com as the email address.
- D. From the Azure portal, add a custom domain name, and then create a new Azure AD user and use user1@outlook.com as the username.

Answer: C

Explanation:

You can invite guest users to the directory, to a group, or to an application. After you invite a user through any of these methods, the invited user's account is added to Azure Active Directory (Azure AD), with a user type of Guest. The guest user must then redeem their invitation to access resources. An invitation of a user does not expire.

The invitation will include a link to create a Microsoft account. The user can then authenticate using their Microsoft account. In this question, the external vendor already has a Microsoft account (user1@outlook.com) so he can authenticate using that.

<https://docs.microsoft.com/en-us/azure/active-directory/b2b/add-users-administrator>

NEW QUESTION 9

- (Exam Topic 5)

You have a Microsoft 365 subscription you use Active Directory (Azure AD) tenant named contoso.com. The tenant contains the Windows 10 devices shown in the following table.

Name	Version	Language
Device1	x86	German
Device2	x64	English
Device3	x64	French

All the devices are managed by using Microsoft Endpoint Manager and are members of a group named Group1.

From the Microsoft Endpoint Manager admin center, you create an app suite named App1 for Microsoft Office 365 apps.

You configure the App1 settings as shown in the exhibit. (Click the Exhibit tab.)

App Suite Settings

X

These settings apply to all apps you have selected in the suite.
[Learn more](#)

Use shared computer activation

Yes

No

Languages

German, OS Languages

You assign App1 to Group1.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
Note: Each correct selection is worth one point.

Statements	Yes	No
On Device1, Office 365 ProPlus will be installed and the display language will be German.	<input type="radio"/>	<input type="radio"/>
On Device2, Office 365 ProPlus will be installed and both the German and English display languages will be installed.	<input type="radio"/>	<input type="radio"/>
On Device3, Office 365 ProPlus will be installed and both the German and French display languages will be installed.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: No
Device1 is x86 (32-bit) so Office 365 will not be installed. Box 2: Yes
Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (English) will be installed.
Box 3: Yes
Device2 is x64 (64-bit) so Office 365 will be installed. The German language pack will be installed and the OS language pack (French) will be installed.

Lab Instance: 10887751
Your organization has an office in Seattle.
You plan to create 100 users who will work in the Seattle office. The city attribute for all the users will be Seattle.
You need to create a group named Group1 that will automatically contain all the Seattle office users.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to create a Dynamic group. User accounts with the city attribute set to 'Seattle' will automatically be added to the group.

- * 1. Go to the Azure Active Directory admin center.
- * 2. Select Azure Active Directory then select Groups.
- * 3. Click on the New Group link.
- * 4. Give the group a name such as Seattle Users.
- * 5. Select Users as the membership type.
- * 6. Select 'Add dynamic query'.
- * 7. Select 'City' in the Property drop-down box.
- * 8. Select 'Equals' in the Operator drop-down box.
- * 9. Enter Seattle as the Value. You should see the following text in the Expression box: user.city -eq "Seattle"
- * 10. Click Save to create the group. References:

NEW QUESTION 10

- (Exam Topic 5)

You have a backend service that will access the Microsoft Graph API. The backend service is hosted on-premises. You need to configure the service to authenticate by using the most secure authentication method. What should you configure the service to use?

- A. a client secret
- B. a certificate
- C. a hash
- D. a shared key

Answer: B

NEW QUESTION 13

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. The domain contains 2,000 computers that run Windows 10.
You purchase a Microsoft 365 subscription.
You implement password hash synchronization and Azure Active Directory (Azure AD) Seamless Single Sign-On (Seamless SSO).
You need to ensure that users can use Seamless SSO from the Windows 10 computers. What should you do?

- A. Create a conditional access policy in Azure AD.
- B. Deploy an Azure AD Connect staging server.
- C. Join the computers to Azure AD.
- D. Modify the Intranet zone settings by using Group Policy

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sso-quick-start>

NEW QUESTION 17

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWYjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

You plan to create 1,000 users in your Microsoft 365 subscription.

You need to ensure that all the users can use the @contoso.com suffix in their username.

Another administrator will perform the required information to your DNS zone to complete the operation.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to add the contoso.com domain to Microsoft 365 then set the domain as the default.

- * 1. In the Admin Center, click Setup then click Domains.
- * 2. Click the 'Add Domain' button.
- * 3. Type in the domain name (contoso.com) and click the 'Use this domain' button.
- * 4. The question states that another administrator will perform the required information to your DNS zone. Therefore, you just need to click the 'Verify' button to verify domain ownership.
- * 5. Click Finish.
- * 6. In the domains list, select the contoso.com domain.
- * 7. Select 'Set as default'. References:
<https://docs.microsoft.com/en-us/office365/admin/setup/add-domain?view=o365-worldwide>

NEW QUESTION 18

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

Your organization plans to start a new collaborative project that will contain email and chat communications, as well as regular meetings.

You need to create a team in Microsoft Teams for the planned project. The team must have the following configurations:

- > Be named Project1.
- > Have an owner named Lee Gu.
- > Have a channel named Channel1.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to create a team. You can create a team in the Microsoft Teams Admin Center or in the Microsoft Teams app. However, to be able to specify the team

owner when creating the team, you need to use the Teams Admin Center.

- * 1. Go to the Microsoft Teams Admin Center.
- * 2. In the left navigation pane, expand the Teams section and select 'Manage Teams'.
- * 3. Click the '+ Add' link to add a new team.
- * 4. Give the team the name Project1.
- * 5. In the Team Owner field, remove your name which is there by default and add Lee Gu.
- * 6. Click the 'Create a team' button to create the team.
- * 7. In the teams list, select the Project1 team.
- * 8. Click on 'Channels'.
- * 9. Click the '+ Add' link to add a new channel.
- * 10. Give the channel the name Channel1.
- * 11. Click the Apply button to create the channel.

NEW QUESTION 20

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: *yfLo7lr2&y

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10811525

Your organization recently partnered with another organization named Fabrikam, Inc.

You plan to provide a Microsoft 365 license to an external user named user1@fabrikam.com, and then to share documents with the user.

You need to invite user1@fabrikam.com to access your organization.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to create a guest account for user1.

- * 1. Go to the Azure Active Directory admin center.
- * 2. Select Users.
- * 3. Click the 'New guest user' link.
- * 4. Select the 'Invite user' option.
- * 5. Give the account a name (User1) and enter user1@fabrikam.com in the email address field.
- * 6. Click the 'Invite' button. References:

<https://docs.microsoft.com/en-us/azure/active-directory/b2b/b2b-quickstart-add-guest-users-portal>

NEW QUESTION 23

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. The domain contains the users shown in the following table.

Name	Country	Organizational unit (OU)
User1	United States	OU1
User2	Canada	OU1
User3	United States	OU2

You have a Microsoft 365 subscription that is linked to an Azure Active Directory (Azure AD) tenant named contoso.com. You configure Azure AD Connect to sync the on-premises domain to contoso.com as shown in the following exhibit.

Answer Area

Statements	Yes	No
User1 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User3 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User3 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 25

- (Exam Topic 5)

Your company recently purchased a Microsoft 365 subscription.

You enable Microsoft Azure Multi-Factor Authentication (MFA) for all 500 users in the Azure Active Directory (Azure tenant).

You need to generate a report that lists all the users who Azure registration process.

What is the best approach to achieve the goal? More than one answer choice achieve the goal. Select the Best answer.

- A. From Azure Cloud Shell, run the Get-Msoluser cmdlet.
- B. From the Azure Active Directory admin center, use the Risky sign-ins blade.
- C. From the Azure Active Directory admin center, use the Multi-factor Authentication – Server Status blade.
- D. From Azure Cloud Shell, run the Get-AzureADUser cmdlet.

Answer: A

NEW QUESTION 29

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a hybrid deployment of Microsoft 365 that contains the objects shown in the following table.

Name	Type	Source
User1	User	Azure Active Directory (Azure AD)
User2	User	Windows Server Active Directory
Group1	Group	Cloud
Group2	Group	Windows Server Active Directory

Azure AD Connect has the following settings:

- > Password Hash Sync: Enabled
- > Password writeback: Enabled
- > Group writeback: Enabled

You need to add User2 to Group 2.

Solution: You use the Azure Active Directory admin center.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 33

- (Exam Topic 5)

Your network contains an Active Directory forest named local.

You have a Microsoft 365 subscription. You plan to implement a directory synchronization solution that will use password hash synchronization.

From the Microsoft 365 admin center, you verify the contoso.com domain name. You need to prepare the environment for the planned directory synchronization solution.

What should you do first?

- A. From the public DNS zone of contoso.com, add a new mail exchanger (MX) record.
- B. From Active Directory Domains and Trusts, add contoso.com as a UPN suffix
- C. From the Microsoft 365 admin center, verify the contoso.com domain name.
- D. From Active Directory Users and Computers, modify the UPN suffix for all users.

Answer: B

Explanation:

The on-premise Active Directory domain is named contoso.local. Therefore, all the domain users accounts will have a UPN suffix of contoso.local by default.

To enable directory synchronization that will use password hash synchronization, you need to configure the domain user accounts to have the same UPN suffix as

the verified domain (contoso.com in this case). Before you can change the UPN suffix of the domain user accounts to contoso.com, you need to add contoso.com as a UPN suffix in the domain.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-userprincipalname>

NEW QUESTION 38

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains a Microsoft Power Platform environment. You need to ensure that only specific users can create new environments. What should you do in the Power Platform admin center?

- A. From Data policies, create a new data policy.
- B. From Data integration, create a new connection set.
- C. From Power Platform settings, modify the Governance settings for the environment.
- D. From Environments, modify the behaviour settings for the default environment.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/control-environment-creation>

NEW QUESTION 43

- (Exam Topic 5)

You have a Microsoft Teams app that contains a conversational bot. The bot uses task modules to reply to users. When the bot receives a new message, the following code is executed before a response is sent back to the user to decide whether the bot should continue the conversation.

```

80 case "task/submit": {
81     if (invokeValue.data !== undefined) {
82         switch (invokeValue.data.taskResponse) {
83             case "message":
84                 session.send("task/submit results from the Adaptive card:" + JSON.stringify(invokeValue) + "");
85                 break;
86             case "continue":
87                 let fetchResponse = fetchTemplates.submitResponse;
88                 fetchResponse.task.value.card = renderACAttachment(cardTemplates.acSubmitResponse, { results: JSON.stringify(invokeValue.data) });
89                 cb(null, fetchResponse, 200);
90                 break;

```

Answer Area

If invokeValue.data.taskResponse equals "message", the user will [answer choice]

- stop interacting with the bot.
- continue interacting with the bot.
- receive a webpage pop-up window.
- receive a final message from the bot.

These are the selections for the statement If invokeValue.data.taskResponse equals "message", the user will [answer choice]

If invokeValue.data.taskResponse equals "final", the user will [answer choice]

- stop interacting with the bot.
- continue interacting with the bot.
- receive a webpage pop-up window.
- receive a final message from the bot.

These are the selections for the statement If invokeValue.data.taskResponse equals "final", the user will [answer choice]

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

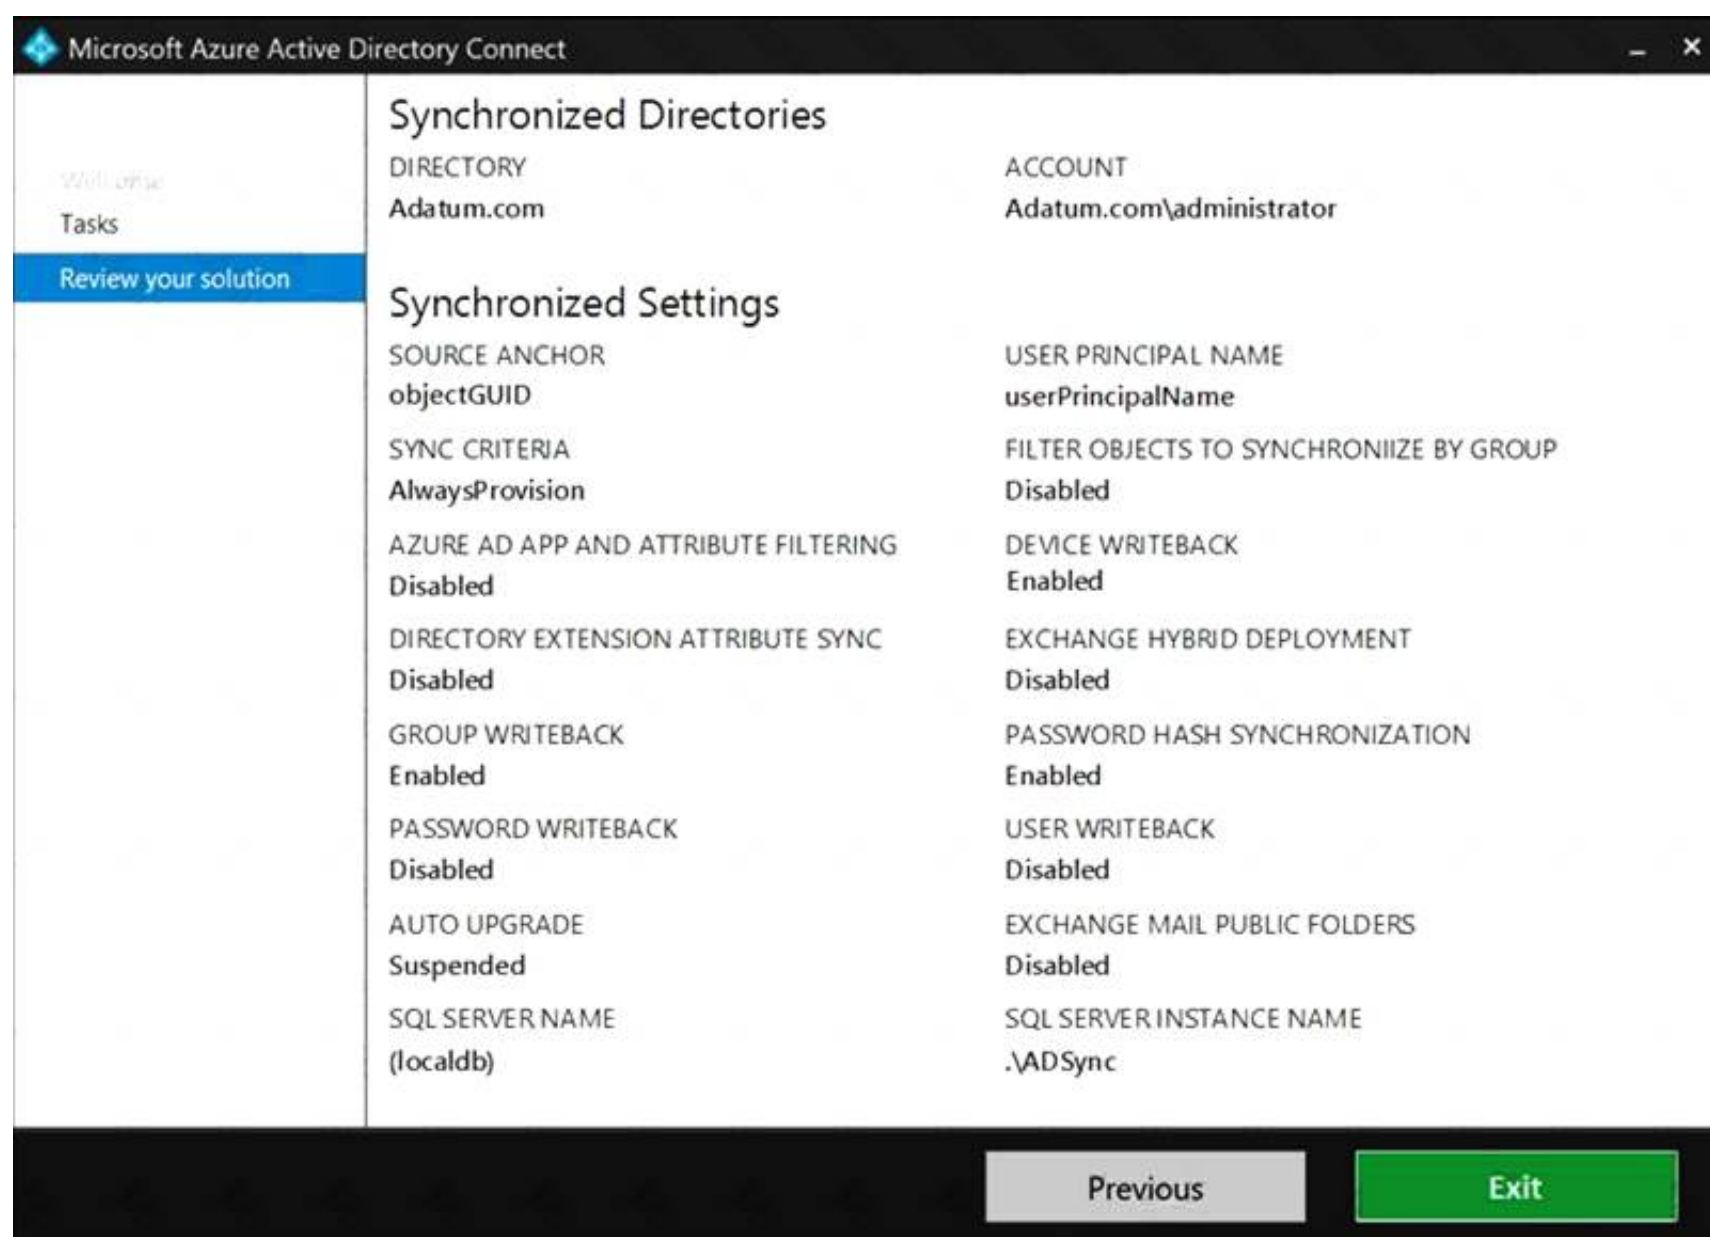

Reference:

<https://github.com/OfficeDev/microsoft-teams-sample-task-module-nodejs>

NEW QUESTION 45

- (Exam Topic 5)

You have an Active Directory domain named Adatum.com that is synchronized to Azure Active Directory as shown in the exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

If you create a security group in Azure AD, the group will [answer choice].

- not sync to adatum.com
- sync to adatum.com as a security group
- sync to adatum.com as a distribution group

If you join a computer to Azure AD, the object will [answer choice].

- not sync to adatum.com
- sync to the Computers container in adatum.com
- sync to the LostAndFound container in adatum.com
- sync to the RegisteredDevices container in adatum.com

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Group Writeback is enabled in the Azure AD Connect configuration so groups created in Azure Active Directory will be synchronized to the on-premise Active Directory. A security group created in Azure Active Directory will be synchronized to the on-premise Active Directory as a security group. Device Writeback is enabled in the Azure AD Connect configuration so computers joined to the Azure Active Directory will be synchronized to the on-premise Active Directory. They will sync to the RegisteredDevices container in the on-premise Active Directory.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-device-writeback>

NEW QUESTION 46

- (Exam Topic 5)

Your network contains an Active Directory domain named contoso.com. The domain contains five domain controllers.

You purchase Microsoft 365 and plan to implement several Microsoft 365 services.

You need to identify an authentication strategy for the planned Microsoft 365 deployment. The solution must meet the following requirements:

- > Ensure that users can access Microsoft 365 by using their on-premises credentials.
- > Use the existing server infrastructure only.
- > Store all user passwords on-premises only.
- > Be highly available.

Which authentication strategy should you identify?

- A. pass-through authentication and seamless SSO

- B. pass-through authentication and seamless SSO with password hash synchronization
- C. password hash synchronization and seamless SSO
- D. federation

Answer: A

Explanation:

Azure AD Pass-through Authentication. Provides a simple password validation for Azure AD authentication services by using a software agent that runs on one or more on-premises servers. The servers validate the users directly with your on-premises Active Directory, which ensures that the password validation doesn't happen in the cloud.

Reference:

<https://docs.microsoft.com/en-us/azure/security/fundamentals/choose-ad-authn>

NEW QUESTION 47

- (Exam Topic 5)

You are developing a single-page application (SPA) that authenticates users by using MSALjs. The SPA must meet the following requirements:

- Only allow access to the users in an organization named contoso.onmicrosoft.com.
- Support single sign-on (SSO) across tabs and user sessions.

How should you complete the code for the SPA? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

```
const config = {
  auth: {
    clientId: "c10639eb-16ca-452b-a94d-ad8c43682819",
    authority: "https://login.microsoftonline.com/consumers/",
    cacheLocation: "https://login.microsoftonline.com/organizations/",
  },
}

const myMSALObj = new UserAgentApplication(config);
```

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

```
const config = {
  auth: {
    clientId: "c10639eb-16ca-452b-a94d-ad8c43682819",
    authority: "https://login.microsoftonline.com/consumers/",
    cacheLocation: "https://login.microsoftonline.com/organizations/",
  },
}

const myMSALObj = new UserAgentApplication(config);
```

NEW QUESTION 48

- (Exam Topic 5)

Your company has a sales system that emails an alert to all the members of the sales department when a new sale is made.

You need to ensure that a notification is posted to a team channel when a new sale is made. The solution must minimize development effort.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Post XML to the webhook URL from the existing sales system.
- B. Set the configurationUrl property of a connector in the manifest
- C. Get an incoming webhook for the channel
- D. Post JSON to the webhook URL from the existing sales system.

Answer: AC

NEW QUESTION 53

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

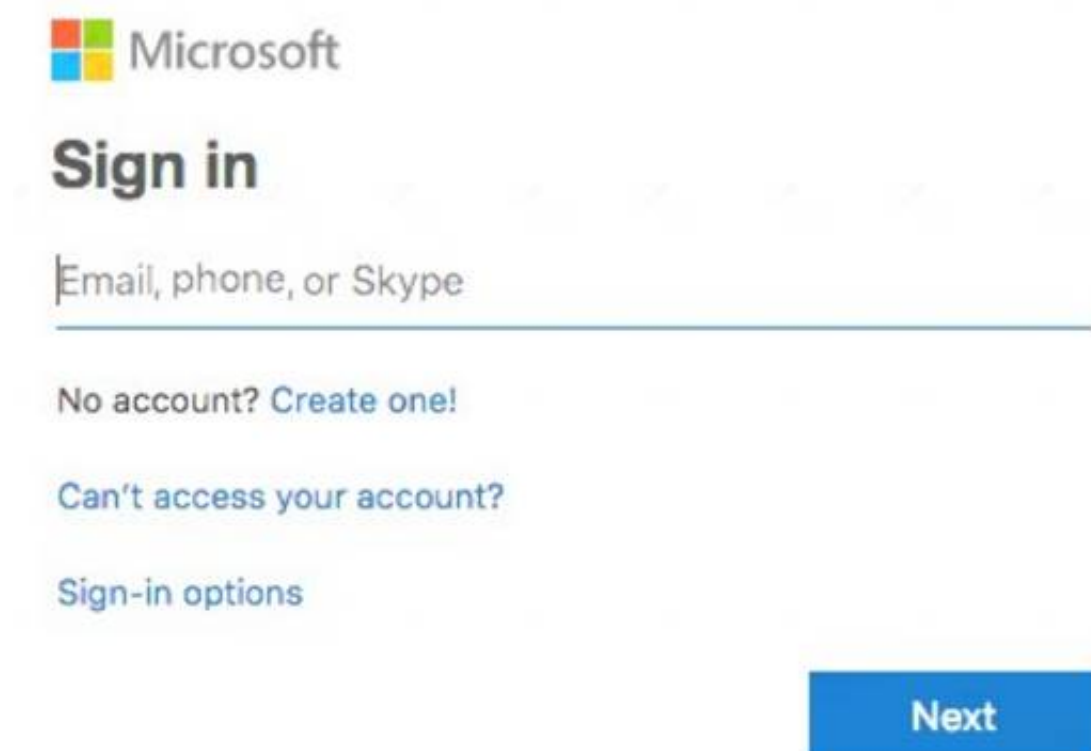

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to prevent all the users in your organization from sending an out of office reply to external users. To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to modify the default remote domain. When you add a remote domain, you specify the domain name and the settings apply to that domain. The default remote domain applies to all other domains. Therefore, we need to disable Out of Office replies for external users in the settings of the default remote domain.

- * 1. Go to the Exchange Admin Center.
- * 2. Click Mail Flow in the left navigation pane.
- * 3. Click on Remote Domains.
- * 4. Select the default remote domain and click the Edit icon (pencil icon).
- * 5. In the 'Out of Office automatic reply types' section, select 'None'.
- * 6. Click Save to save changes to the default remote domain.

NEW QUESTION 58

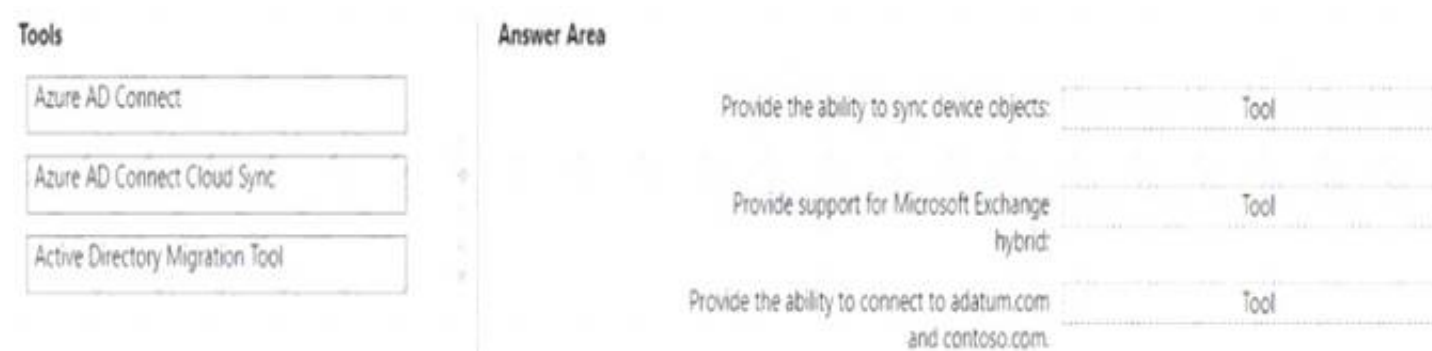

- (Exam Topic 5)

Your network contains two disconnected on-premises Active Directory forests named adatum.com and contoso.com.

You have an Azure AD tenant named nwtraders.com

You need to sync the on-premises forests to nwtraders.com. The solution must meet the following requirements:

- Provide the ability to connect to adatum.com and contoso.com.
- Provide support for Microsoft Exchange hybrid.
- Provide the ability to sync device objects.
- Minimize administrative effort.

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 61

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant. Solution: You review the Windows release health in the Microsoft 365 admin center. Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

Reference:

<https://techcommunity.microsoft.com/t5/windows-it-pro-blog/windows-release-health-now-available-in-the-admin-center/ba-p/1617444>

NEW QUESTION 64

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a hybrid deployment of Microsoft 365 that contains the objects shown in the following table.

Name	Type	Source
User1	User	Azure Active Directory (Azure AD)
User2	User	Windows Server Active Directory
Group1	Group	Cloud
Group2	Group	Windows Server Active Directory

Azure AD Connect has the following settings:

- > Password Hash Sync: Enabled
- > Password writeback: Enabled
- > Group writeback: Enabled

You need to add User2 to Group 2.

Solution: You use the Security & Compliance admin center. Does this meet the goal?

A. Yes

B. No

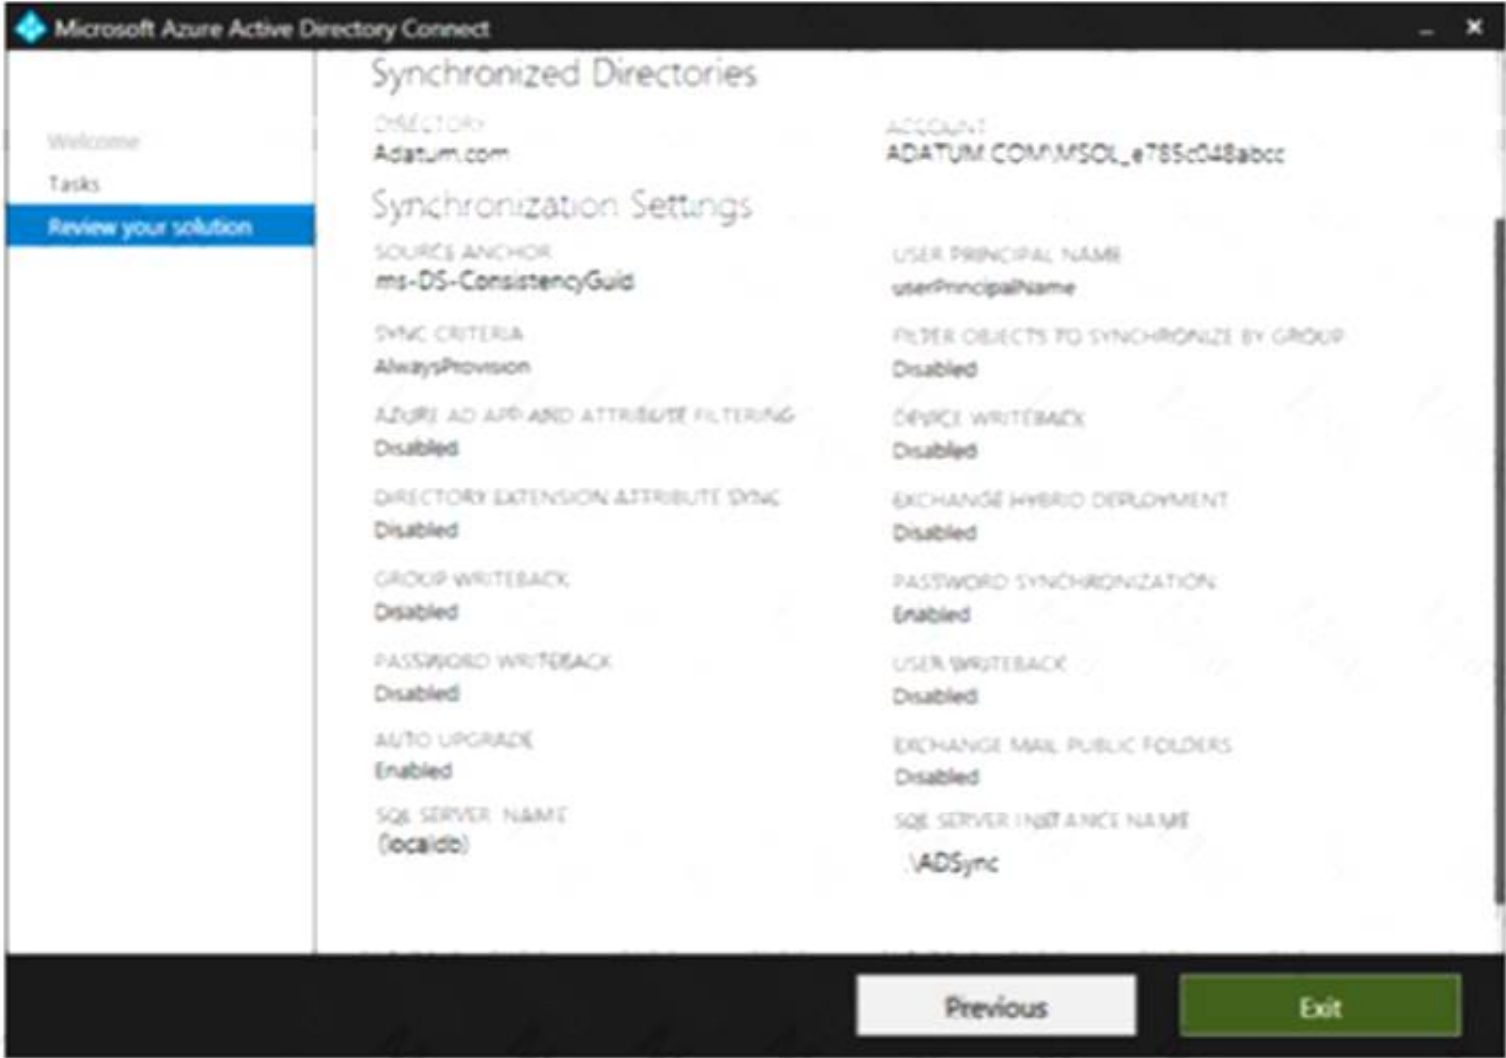

Answer: B

NEW QUESTION 66

- (Exam Topic 5)

Your company has a hybrid deployment of Microsoft 365.

An on-premises user named User1 is synced to Microsoft Azure Active Directory (Azure AD). Azure AD Connect is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

User1 [answer choice].

If the password for User1 is changed in Active Directory, [answer choice].

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 User1 cannot change her password from any Microsoft portals because Password Writeback is disabled in the Azure AD Connect configuration.
 If the password for User1 is changed in Active Directory, the password will be synchronized to Azure AD because Password Synchronization is enabled in the Azure AD Connect configuration.
 Reference:
<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom>

NEW QUESTION 67
 - (Exam Topic 5)

A user receives the following message when attempting to sign in to <https://myapps.microsoft.com>:
 "Your sign-in was blocked. We've detected something unusual about this sign-in. For example, you might be signing in from a new location, device, or app. Before you can continue, we need to verify your identity. Please contact your admin."
 Which configuration prevents the users from signing in?

- A. Security & Compliance supervision policies
- B. Security & Compliance data loss prevention (DLP) policies
- C. Microsoft Azure Active Directory (Azure AD) conditional access policies
- D. Microsoft Azure Active Directory (Azure AD) Identity Protection policies

Answer: C

Explanation:
 The user is being blocked due to a 'risky sign-in'. This can be caused by the user logging in from a device that hasn't been used to sign in before or from an unknown location.
 Integration with Azure AD Identity Protection allows Conditional Access policies to identify risky sign-in behavior. Policies can then force users to perform password changes or multi-factor authentication to reduce their risk level or be blocked from access until an administrator takes manual action.
 Reference:
<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview>

NEW QUESTION 68

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest. You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- Users passwords must be 10 characters or more.

Solution: Implement password hash synchronization and configure password protection in the Azure AD tenant.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-password-hash-synchronization>

NEW QUESTION 70

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to access service health alerts from a mobile phone. What should you use?

- A. the Microsoft Authenticator app
- B. the Intune app
- C. the Microsoft 365 Admin mobile app
- D. Intune Company Portal

Answer: A

NEW QUESTION 74

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

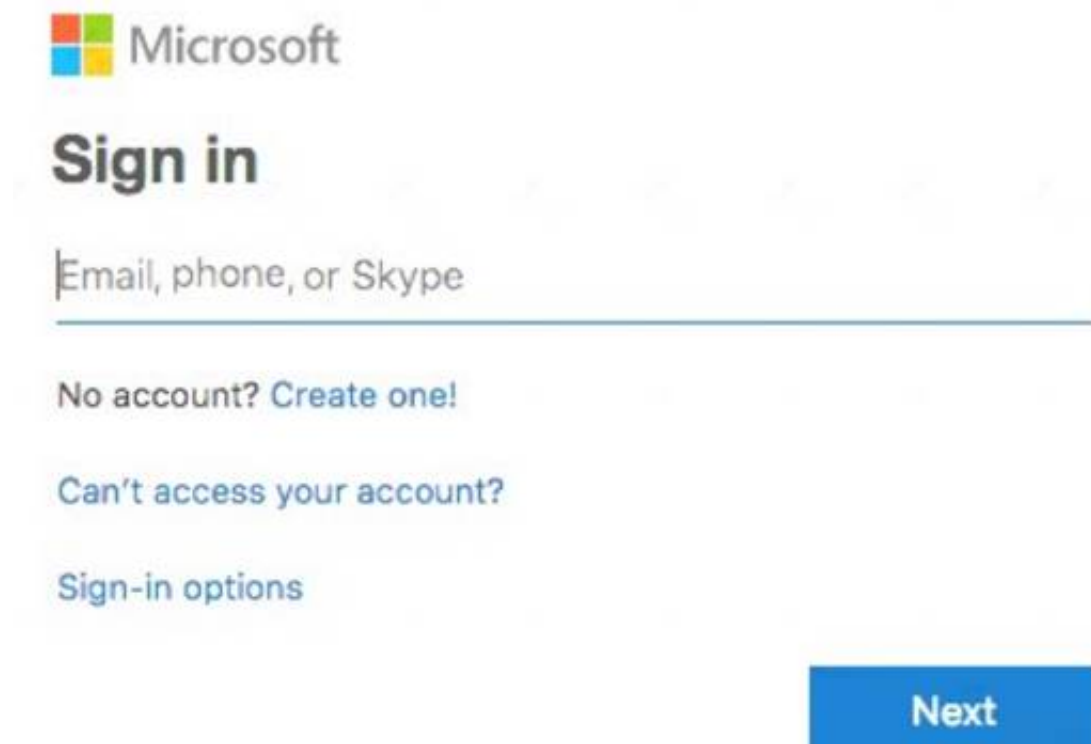

Microsoft 365 Username: admin@LODSe878763.onmicrosoft.com

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to create a policy that allows a user named Lee Gu to use Outlook Web App to review 50 percent of the outbound email messages sent by a user named Joni Sherman.

To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to configure a Supervision Policy.

- * 1. Go to <https://protection.office.com> or navigate to the Security & Compliance admin center.
- * 2. In the left navigation pane, select Supervision.
- * 3. Click the '+Create' button to create a new supervision policy.
- * 4. Give the policy a name such as 'Joni Sherman' and click Next.
- * 5. In the 'Supervised users' section, click '+Add users or groups'.
- * 6. Select Joni Sherman from the users list and click the Add button.
- * 7. Deselect the 'Teams chats' and 'Skype for Business Conversations' checkboxes leaving only the 'Exchange Email' checkbox ticked and click Next.
- * 8. Under 'Direction is', deselect Inbound leaving only Outbound selected and click Next.
- * 9. In the 'Percentage to review' section, enter 50 and click Next.
- * 10. In the 'Reviewers' section, start typing Lee Gu then select his account when it appears.
- * 11. Click Next.
- * 12. On the 'Review your settings' page, check the settings are correct the click the Finish button to create the policy.

NEW QUESTION 77

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You view the service advisories shown in the following exhibit.

The screenshot shows the 'Service health' page in the Microsoft 365 admin center. The breadcrumb is 'Home > Service health'. A message states 'Some services have posted advisories' with a timestamp of '2018-10-05 08:43(UTC)' and a 'View history' link. On the left, a sidebar has 'All services', 'Incidents', and 'Advisories' (which is selected). The main table lists services with their status:

Service	Status
Office 365 Portal	1 advisory
SharePoint Online	1 advisory
Office Subscription	Service is healthy
Microsoft Intune	Service is healthy
Microsoft StaffHub	Service is healthy
Microsoft Teams	Service is healthy
Mobile Device Management for Office 365	Service is healthy
Azure Information Protection	Service is healthy
Exchange Online	Service is healthy

You need to ensure that users who administer Microsoft SharePoint Online can view the advisories to investigate health issues.

Which role should you assign to the users?

- A. SharePoint administrator
- B. Message Center reader
- C. Reports reader
- D. Service administrator

Answer: D

Explanation:

People who are assigned the global admin or service administrator role can view service health. To allow Exchange, SharePoint, and Skype for Business admins to view service health, they must also be assigned the Service admin role. For more information about roles that can view service health.

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/view-service-health>

NEW QUESTION 81

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You need to implement Windows Defender Advanced Threat Protection (ATP) for all the supported devices enrolled devices enrolled on mobile device management (MDM).

What should you include in the device configuration profile? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Platform:

▼
Android
iOS
Windows 10 and later
Windows 8.1 and later

Settings:

▼
Offboard package
Onboard package
Windows Defender Applicaion Guard
Windows Defender Firewall

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

You can integrate Microsoft Defender Advanced Threat Protection (Microsoft Defender ATP) with Microsoft Intune as a Mobile Threat Defense solution. Integration can help you prevent security breaches and limit the impact of breaches within an organization. Microsoft Defender ATP works with devices that run Windows 10 or later.

When you establish a connection from Intune to Microsoft Defender ATP, Intune receives a Microsoft Defender ATP onboarding configuration package from Microsoft Defender ATP. This package is deployed to devices by using a device configuration profile.

Reference:

<https://docs.microsoft.com/en-us/intune/advanced-threat-protection>

NEW QUESTION 83

- (Exam Topic 5)

Your company has offices in several cities and 100.000 users. The network contains an Active Directory domain contoso.com.

You purchase Microsoft 365 and plan to deploy several Microsoft 365 services.

You are evaluating the implementation of pass-through authentication and seamless SSO. Azure AD Connect will NOT be in staging mode.

You need to identify the redundancy limits for the planned implementation.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Maximum number of servers on which you can run Azure AD Connect:	<table border="1"> <tr><td>▼</td></tr> <tr><td>1</td></tr> <tr><td>2</td></tr> <tr><td>4</td></tr> <tr><td>6</td></tr> <tr><td>11</td></tr> </table>	▼	1	2	4	6	11
▼							
1							
2							
4							
6							
11							
Maximum number of servers on which you can run standalone Authentication Agents:	<table border="1"> <tr><td>▼</td></tr> <tr><td>1</td></tr> <tr><td>2</td></tr> <tr><td>4</td></tr> <tr><td>6</td></tr> <tr><td>11</td></tr> </table>	▼	1	2	4	6	11
▼							
1							
2							
4							
6							
11							

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Azure AD Connect can be active on only one server. You can install Azure AD Connect on another server for redundancy but the additional installation would need to be in Staging mode. An Azure AD connect installation in Staging mode is configured and ready to go but it needs to be manually switched to Active to perform directory synchronization.

Azure authentication agents can be installed on as many servers as you like. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-pta-quick-start>

NEW QUESTION 87

- (Exam Topic 5)

Your company has a Microsoft 365 E3 subscription.

All devices run Windows 10 Pro and are joined to Microsoft Azure Active Directory (Azure AD).

You need to change the edition of Windows 10 to Enterprise the next time users sign in to their computer. The solution must minimize downtime for the users. What should you use?

- A. Subscription Activation
- B. Windows Update
- C. Windows Autopilot
- D. an in-place upgrade

Answer: C

Explanation:

When initially deploying new Windows devices, Windows Autopilot leverages the OEM-optimized version of Windows 10 that is preinstalled on the device, saving organizations the effort of having to maintain custom images and drivers for every model of device being used. Instead of re-imaging the device, your existing Windows 10 installation can be transformed into a “business-ready” state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 91

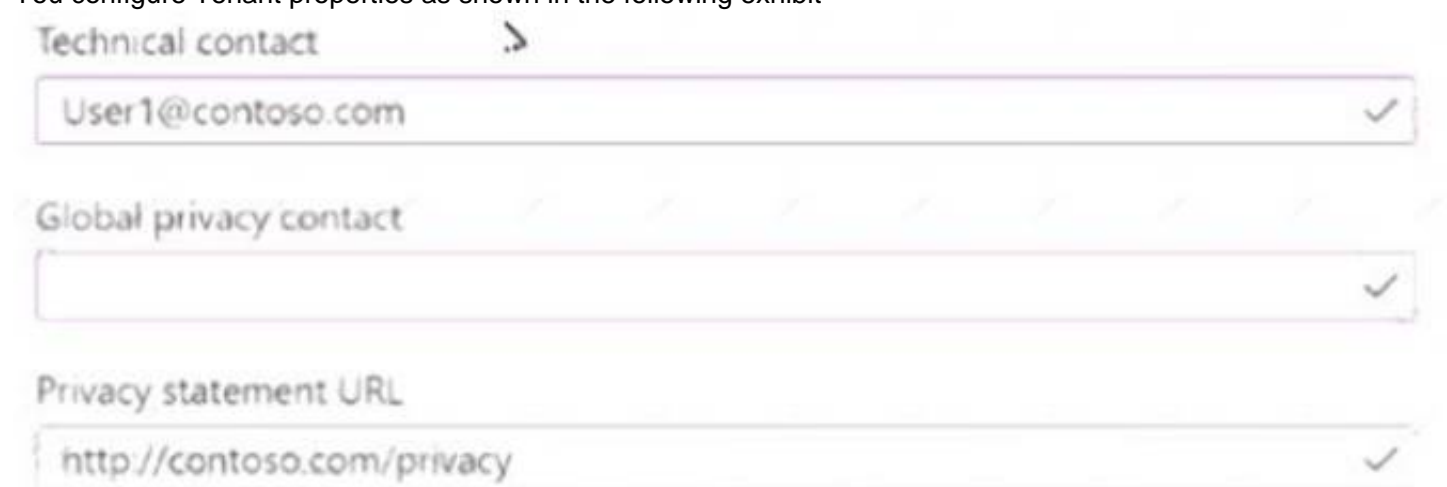

- (Exam Topic 5)

You have a Microsoft 365 subscription

You have an Azure AD tenant that contains the users shown in the following table.

Name	Role
User1	Security administrator
User2	Global administrator
User3	Service support administrator

You configure Tenant properties as shown in the following exhibit

Technical contact: User1@contoso.com ✓

Global privacy contact: ✓

Privacy statement URL: http://contoso.com/privacy ✓

Which users will be contacted by Microsoft if the tenant experiences a data breach?

- A. User1 only
- B. User2 only
- C. User3 only
- D. User1 and User2 only
- E. User2 and User3 only

Answer: A

NEW QUESTION 95

- (Exam Topic 5)

Your company has a Microsoft 365 tenant named litwareinc.com.

The Guest access settings in Microsoft Teams are configured as shown in the following exhibit.

Guest access

Guest access in Teams lets people outside your organization access teams and channels. When you turn on Guest Access, you can turn on or off features guest users can or can't use. Make sure to follow the steps in this [checklist](#) to set up the prerequisites and so Team owners can add guest users to their teams. [Learn more](#)

Allow guest access in Teams

The External access settings in Microsoft Teams are configured as shown in the following exhibit.

External access

External access lets your Teams and Skype for Business users communicate with other users that are outside of your organization. By default, your organization can communicate with all external domains. If you add blocked domains, all other domains will be allowed but if you add allowed domains, all other domains will be blocked. [Learn more](#)

The company has a third-party supplier named adventureworks.com. Users in litwareinc.com collaborate with the following users by using Microsoft Teams:

- > User1@contoso.com
- > User2@adventureworks.com

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User2@adventureworks.com can share files by using a Microsoft Teams channel of litwareinc.com.	<input type="radio"/>	<input type="radio"/>
User1@contoso.com can use Meet now in Microsoft Teams.	<input type="radio"/>	<input type="radio"/>
Litwareinc.com users can block user1@contoso.com in Microsoft Teams.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

The answer to this question depends on whether User1 and User2 have been added as guests. The question does not say that they are guests so we would have to assume they're not.

External Access is turned off. Even with the Contoso.com domain added as an allowed domain, the Off settings override this. If the external access settings were 'On', they would be on for only the Contoso.com domain.

Box 1: No

If External Access was On, the answer to this would still be No. If User2 was a guest, the answer to this would be Yes.

Box 2: No

If External Access was On, the answer to this would still be No. External Access does not enable Meet Now for the external user. If User1 was a guest, the answer to this would be Yes.

Box 3: No

If External Access was On, the answer to this would still be No. External Access does not allow blocking. If User1 was a guest, the answer to this would be Yes.

NEW QUESTION 97

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@M365x981607.onmicrosoft.com Microsoft 365 Password: *yfLo7lr2&yIf the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10811525

You need to prevent non-administrators in your organization from registering applications.

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

You need to configure the App Registrations setting in Azure Active Directory.

- * 1. Go to the Azure Active Directory admin center.
- * 2. Select Azure Active Directory.
- * 3. Select 'User settings'
- * 4. In the 'App registrations' section, toggle the 'Users can register applications' setting to No.
- * 5. Click Save to save the changes.

NEW QUESTION 98

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses an Azure AD tenant named contoso.com. The tenant contains the user's shown in the following table.

Name	Role
User1	Report reader
User2	User administrator
User3	Security administrator
User4	Global administrator

From the Sign-ins blade of the Azure Active Directory admin center, for which users can User1 and User2 view the sign-ins? To answer, select the appropriate options in the answer area.

Answer Area

User1 can view the sign-ins for the following users:

User2 can view the sign-ins for the following users:

User2 can view the sign-ins for the following users:

These are the selections for User2 can view the sign-ins for the following users:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

User1 can view the sign-ins for the following users:

User2 can view the sign-ins for the following users:

User2 can view the sign-ins for the following users:

These are the selections for User2 can view the sign-ins for the following users:

NEW QUESTION 101

- (Exam Topic 5)

You have a Microsoft 365 subscription and a DNS domain. The domain is hosted by a third-party DNS service.

You plan to add the domain to the subscription.

You need to use Microsoft Exchange Online to send and receive emails for the domain.

Which type of DNS record should you add to the DNS zone of the domain for each task? To answer, drag the appropriate records to the correct tasks. Each record may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer Area

Route email for the domain to Exchange Online

Enable Microsoft Outlook to auto discover the Exchange Online server for the domain.

Help prevent spam for the domain.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: MX

When you update your domain's MX record, all new email for anyone who uses your domain will now come to Microsoft 365.

Box 2: CNAME

Add CNAME records to connect other service. You can add CNAME records for each service that you want to connect.

Box 3: TXT

Add or edit an SPF TXT record to help prevent email spam Reference:

<https://docs.microsoft.com/en-us/microsoft-365/admin/get-help-with-domains/create-dns-records-at-any-dns-hos>

NEW QUESTION 103

- (Exam Topic 5)

This question requires that you evaluate the underlined text to determine if it is correct-In Microsoft Word on Windows, before you can sideload a Microsoft Office Add-in, you must first: upload the manifest to Microsoft OneDrive instructions: Review the underlined text. If it makes the statement correct select "No change is needed," If the statement is incorrect select the answer choice that makes the statement correct

- A. No change is needed.
- B. deploy the manifest to an Azure website
- C. publish the manifest to a trusted network location
- D. set Microsoft Edge to Developer Mode

Answer: C

NEW QUESTION 107

- (Exam Topic 5)

The following information is for technical support purposes only:

Lab Instance: 10811525

You plan to provide several users in your organization with the ability to join their Windows 10 device to Microsoft Azure Active Directory (Azure AD).

You need to ensure that all the users who join a device use multi-factor authentication.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to configure the device settings in Azure Active Directory.

- * 1. Go to the Azure Active Directory admin center.
- * 2. Select Azure Active Directory.
- * 3. Select Devices.
- * 4. Select Device Settings.
- * 5. Toggle the 'Require Multi-Factor Auth to join devices' setting to Yes.
- * 6. Click Save to save the changes. References:
<https://docs.microsoft.com/en-us/azure/active-directory/devices/device-management-azure-portal>

NEW QUESTION 111

- (Exam Topic 5)

You are developing a Microsoft Teams tab that will capture coordinates from mobile devices and send notifications to users.

The relevant portion of the app manifest is shown in the App Manifest exhibit (Click the App Manifest tab.) The relevant portion of the JavaScript code for the tab is shown in the JavaScript exhibit (Click the JavaScript tab)

While testing the tab, a user receives the message shown in the Message exhibit (Click the Message tab.) For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE; Each correct selection is worth one point.

Answer Area	
Statements	<div>YesNo</div>
If the user changes mobile devices after successfully using all the functionalities in the tab, the user will receive the message again.	<div><div></div><div></div></div>
If the user uses two different tenants on the same mobile device, the user will receive the message again.	<div><div></div><div></div></div>
If two users share the same mobile device, each user will receive the message when the user first uses the tab.	<div><div></div><div></div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Statements	Yes	No
	If the user changes mobile devices after successfully using all the functionalities in the tab, the user will receive the message again.	<input checked="" type="radio"/>	<input type="radio"/>
	If the user uses two different tenants on the same mobile device, the user will receive the message again.	<input type="radio"/>	<input checked="" type="radio"/>
	If two users share the same mobile device, each user will receive the message when the user first uses the tab.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 113

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Microsoft 365 Password: m3t^We\$Z7&xy

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 11440873

You need to add Adele Vance to a group named Managers. The solution must ensure that you can grant permissions to Managers. To answer, sign in to the Microsoft 365 portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to create a group named Managers and add Adele Vance to the group. To ensure that you can grant permissions to the Managers group, the group needs to be a Security Group.

- * 1. Sign in to the Microsoft 365 Admin Center.
- * 2. In the left navigation pane, expand the Groups section then select Groups.
- * 3. Click the 'Add a group' link.
- * 4. For the group type, select Security and click Next.
- * 5. Enter 'Managers' in the Name field and click Next.
- * 6. Click the 'Create Group' button to create the Managers group.
- * 7. In the list of groups, select the Managers group.
- * 8. Click the Members link.

- * 9. Click the 'View all and manage members link'.
- * 10. Click the 'Add Members' button.
- * 11. Select Adele Vance and click the Save button.
- * 12. Click the Close button to close the group page.

NEW QUESTION 118

- (Exam Topic 5)

Your network contains two on-premises Active Directory forests named contoso.com and fabrikam.com. Fabrikam.com contains one domain and five domain controllers. Contoso.com contains the domains shown in the following table.

Name	Number of domain controllers
Contoso.com	2
East.contoso.com	3
West.contoso.com	3

You need to sync all the users from both the forests to a single Azure Active Directory (Azure AD) tenant by using Azure AD Connect. What is the minimum number of Azure AD Connect sync servers required?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: A

Explanation:

You can have only one active Azure AD Connect server synchronizing accounts to a single Azure Active Directory (Azure AD) tenant. You can have 'backup' Azure AD Connect servers, but these must be running in 'staging' mode. Staging mode means the Azure AD Connect instance is not actively synchronizing users but is ready to be brought online if the active Azure AD Connect instance goes offline.

When you have multiple forests, all forests must be reachable by a single Azure AD Connect sync server. The server must be joined to a domain. If necessary, to reach all forests, you can place the server in a perimeter network (also known as DMZ, demilitarized zone, and screened subnet).

References:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/plan-connect-topologies#multiple-forests-single->

NEW QUESTION 123

- (Exam Topic 5)

Your organization has an on-premises Microsoft Exchange Server 2016 organization. The organization is in the company's main office in Melbourne. The main office has a low-bandwidth connection to the Internet.

The organization contains 250 mailboxes.

You purchase a Microsoft 365 subscription and plan to migrate to Exchange Online next month. In 12 months, you plan to increase the bandwidth available for the Internet connection.

You need to recommend the best migration strategy for the organization. The solution must minimize administrative effort.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. network upload
- B. cutover migration
- C. hybrid migration
- D. staged migration

Answer: C

Explanation:

With a hybrid migration, you can migrate the mailboxes in small batches over a period of time which will help to avoid saturating the bandwidth. With the migration wizard, you can configure a migration batch to start outside office hours which would minimize bandwidth usage during office hours.

With a hybrid migration, you do not need to reconfigure Outlook to connect to the migrated mailbox. Outlook will automatically detect the new mailbox location.

This reduces administrative effort.

Reference:

<https://docs.microsoft.com/en-us/exchange/mailbox-migration/mailbox-migration>

NEW QUESTION 127

- (Exam Topic 5)

You implement Microsoft Azure Advanced Threat Protection (Azure ATP). You have an Azure ATP sensor configured as shown in the following exhibit. Updates

Updates

Domain controller restart
during updates

NAME	TYPE	VERSION	AUTOM...	DELAYE...	STATUS
LON-DC1	Sensor	2.48.5521	 on	 on	Up to date

Save

How long after the Azure ATP cloud service is updated will the sensor update?

- A. 1 hour
- B. 7 days
- C. 48 hours
- D. 12 hours
- E. 72 hours

Answer: E

Explanation:

References:

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/atp-whats-new> The exhibit shows that the sensor is configure for Delayed update.

Given the rapid speed of ongoing Azure ATP development and release updates, you may decide to define a subset group of your sensors as a delayed update ring, allowing for a gradual sensor update process. Azure

ATP enables you to choose how your sensors are updated and set each sensor as a Delayed update candidate.

Sensors not selected for delayed update are updated automatically, each time the Azure ATP service is updated. Sensors set to Delayed update each service update.

Reference:

are updated on a delay of 72 hours, following the official release of

<https://docs.microsoft.com/en-us/azure-advanced-threat-protection/sensor-update>

NEW QUESTION 132

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) directory tenant named contoso.onmicrosoft.com.

All users have client computers that run Windows 10 Pro and are joined to Azure AD. The company purchases a Microsoft 365 E3 subscription.

You need to upgrade all the computers to Windows 10 Enterprise. The solution must minimize administrative effort.

You assign licenses from the Microsoft 365 admin center. What should you do next?

- A. Add a custom domain name to the subscription.
- B. Deploy Windows 10 Enterprise by using Windows Autopilot.
- C. Create provisioning package, and then deploy the package to all the computers.
- D. Instruct all the users to log off of their computer, and then to log in again.

Answer: B

Explanation:

With Windows Autopilot the user can set up pre-configure devices without the need consult their IT administrator.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios> <https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 137

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You plan to enable Microsoft Azure Information Protection.

You need to ensure that only the members of a group named PilotUsers can protect content. What should you do?

- A. Run the Add-AadrmRoleBaseAdministrator cmdlet.
- B. Create an Azure Information Protection policy.
- C. Configure the protection activation status for Azure Information Protection.
- D. Run the Set-AadrmOnboardingControlPolicy cmdlet.

Answer: D

Explanation:

If you don't want all users to be able to protect documents and emails immediately by using Azure Rights Management, you can configure user onboarding

controls by using the
Set-AadrmOnboardingControlPolicy References:
<https://docs.microsoft.com/en-us/azure/information-protection/activate-service>

NEW QUESTION 139

- (Exam Topic 5)

You have a Microsoft 365 subscription. You add a domain named contoso.com.

When you attempt to verify the domain, you are prompted to send a verification email to admin@contoso.com.

D18912E1457D5D1DDCBD40AB3BF70D5D

You need to change the email address used to verify the domain. What should you do?

- A. From the domain registrar, modify the contact information of the domain
- B. Add a TXT record to the DNS zone of the domain
- C. Modify the NS records for the domain
- D. From the Microsoft 365 admin center, change the global administrator of the Microsoft 365 subscription

Answer: A

Explanation:

The email address that is used to verify that you own the domain is the email address listed with the domain registrar for the registered contact for the domain.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/admin/setup/add-domain?view=o365-worldwide>

NEW QUESTION 141

- (Exam Topic 5)

Your company has a Microsoft 365 tenant.

You plan to allow users from the engineering department to enroll their mobile device in mobile device management (MDM).

The device type restrictions are configured as shown in the following table.

Priority	Name	Allowed platform	Assigned to
1	iOS	iOS	Marketing
2	Android	Android	Engineering
Default	All users	All platforms	All users

The device limit restrictions are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Engineering	15	Engineering
2	West Region	5	Engineering
Default	All users	10	All users

What is the effective configuration for the members of the Engineering group? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device limit:

5
10
15

Allowed platform:

Android only
iOS only
All platforms

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

When multiple policies are applied to groups that users are a member of, only the highest priority (lowest number) policy applies.

In this case, the Engineering users are assigned two device type policies (the default policy and the priority 2 policy). The priority 2 policy has a higher priority than the default policy so the Engineers' allowed platform is Android only.

The engineers have two device limit restrictions policies applied them. The priority1 policy is a higher priority than the priority2 policy so the priority1 policy device limit (15) applies.

Reference:

<https://docs.microsoft.com/en-us/intune/enrollment/enrollment-restrictions-set>

NEW QUESTION 146

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted

from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWyjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

The following information is for technical support purposes only:

Lab Instance: 10887751

You have a user named Grady Archie. The solution must meet the following requirements:

- Grady Archie must be able to add payment methods to your Microsoft Office 365 tenant.
- The solution must minimize the number of licenses assigned to users.
- The solution must use the principle of least privilege.

A. Mastered

B. Not Mastered

Answer: A

Explanation:

You need to assign the 'Billing Administrator' role to Grady Archie.

- * 1. Go to the Azure Active Directory admin center.
- * 2. Select Users.
- * 3. Select the Grady Archie account to open the account properties page.
- * 4. Select 'Assigned roles'.
- * 5. Click the 'Add Assignments' button.
- * 6. Select Billing Administrator then click the Add button. References:

<https://docs.microsoft.com/en-us/office365/admin/add-users/about-admin-roles?view=o365-worldwide>

NEW QUESTION 149

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes the users shown in the following table.

Name	Usage location	Membership
User1	United States	Group1, Group2
User2	<i>Not applicable</i>	Group2
User3	<i>Not applicable</i>	Group1
User4	Canada	Group1

Group2 is a member of Group1.

You assign a Microsoft Office 365 Enterprise E3 license to Group1. You need to identify how many Office 365 E3 licenses are assigned. What should you identify?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: C

Explanation:

Group-based licensing currently does not support groups that contain other groups (nested groups). If you apply a license to a nested group, only the immediate first-level user members of the group have the licenses applied. Therefore, User2 will not be assigned a license.

When Azure AD assigns group licenses, any users without a specified usage location inherit the location of the directory. Therefore, User3 will be assigned a license and his usage location will be set to the location of the directory.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-groups-assign> <https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-group-advanced>

NEW QUESTION 152

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain. The domain contains a server named Server1. Server1 has a share named Share1 that contains the files shown in the following table.

Name	Created	Modified	Permission
File1.txt	12/15/2018	03/15/2019	Domain Users: Allow Read
File2.txt	01/15/2019	03/15/2019	User1: Allow Read
File3.txt	03/05/2019	03/15/2019	Domain Users: Allow Read User1: Deny Read

You have a hybrid deployment of Microsoft 365.

You create a Microsoft SharePoint site collection named Col lection1. You plan to migrate Share1 to a document library in Collection1
You configure the SharePoint Migration Tool as shown in the exhibit. (Click the Exhibit tab.) For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

All migration settings

Only perform scanning ⓘ

Answer Area

Statements	Yes	No
File1.txt will be migrated to SharePoint.	<input type="radio"/>	<input type="radio"/>
File2.txt will be migrated to SharePoint.	<input type="radio"/>	<input type="radio"/>
User1 will be denied access to read File3.txt in SharePoint when the migration is complete.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
File1.txt will not be migrated as it was created before Jan 1 2019
Box 2: Yes
File2.txt will be migrated as it was created after Jan 1 2019 and was modified after Mar 1 2019.
Box 3: Yes
File permissions will be maintained after the migration. References:
https://docs.microsoft.com/en-us/sharepointmigration/spmt-settings

NEW QUESTION 154

- (Exam Topic 5)
You have a Microsoft 365 Enterprise subscription.
You create a password policy as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

If users are locked out of their account, they have [answer choice].

five sign-in attempts each subsequent minute

one sign-in attempt each subsequent minute

five sign-in attempts every five minutes

one sign-in attempt every five minutes

Users can create a password of [answer choice].

Password11

Conto\$01Pa\$\$word

AzureAD!!111

pa\$\$w0rd

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

By default, smart lockout locks the account from sign-in attempts for one minute after 10 failed attempts. In this question, the lockout threshold if 5 failed attempts. The account locks again after each subsequent failed sign-in attempt, for one minute at first and longer in subsequent attempts. Password evaluation goes through several steps including normalization and Substring matching which is used on the normalized password to check for the user's first and last name as well as the tenant name.

The next step is to identify all instances of banned passwords in the user's normalized new password. Then: ➤ Each banned password that is found in a user's password is given one point.

➤ Each remaining unique character is given one point.

➤ A password must be at least five (5) points for it to be accepted.

Conto\$01Pa\$\$word contains two banned passwords and no remaining unique characters so is given a score of 2 points. This is less than the required 5 points so will be rejected.

Pa\$\$w0rd contains a banned password and no remaining unique characters so is given a score of 1 point. This is less than the required 5 points so will be rejected.

AzureAD!!111 contains a banned password (AzureAD!!) and has three remaining characters. However, the remaining characters are all the same (they're all 1s) so that is only one unique character. So that password will be given a score of 2. One for the banned password and 1 for the unique character. This is less than the required 5 points so will be rejected.

Password11 does not contain a banned password. Password11 contains 10 characters. However, there are two 's' and two '1' so there are 8 unique characters. Therefore, the password will be given a score of 8 points. This is more than the required 5 points so the password will be accepted.

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad> <https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-smart-lockout>

NEW QUESTION 157

- (Exam Topic 5)

You are developing a Microsoft Teams app that will use an Azure function to send scheduled messages from a bot to users. What is required for the Teams app to send a proactive message to the users?

- A. The users must send at least one message to the bot.
- B. The bot must be approved in Azure Active Directory (Azure AD).

- C. The bot must be granted admin access to the users.
D. The Teams app must be added for each user.

Answer: A

NEW QUESTION 160

- (Exam Topic 5)

You are developing a Microsoft Teams tab.

You need to create a modal dialog to collect input from a user.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Create the dialog as:

A bot
A .json manifest file
A webpage
An .xml file

Invoke the dialog from the Teams tab by using a JavaScript code of:

```
microsoftTeams.appInitialization.notifySuccess();
microsoftTeams.tasks.startTask(taskModuleInfo);
microsoftTeams.tasks.submitTask();
window.open("/dialog.html", "_blank");
```

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Create the dialog as:

A bot
A .json manifest file
A webpage
An .xml file

Invoke the dialog from the Teams tab by using a JavaScript code of:

```
microsoftTeams.appInitialization.notifySuccess();
microsoftTeams.tasks.startTask(taskModuleInfo);
microsoftTeams.tasks.submitTask();
window.open("/dialog.html", "_blank");
```

NEW QUESTION 165

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains a Microsoft Azure Directory (Azure AD) tenant Contoso.com. The tenant includes a user named user1.

You enable Azure AD Identity protection.

You need to ensure that User1 can review the list in Azure AD identity protection of users flagged for risk. The solution must use the principle of least privilege.

To which role should you add User1?

- A. Security administrator
B. Report
C. Global reader
D. Owner

Answer: A

NEW QUESTION 168

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You sign up for Microsoft Store for Business.

The tenant contains the users shown in the following table.

Name	Microsoft Store for Business role	Azure AD role
User1	Purchaser	None
User2	Basic Purchaser	None
User3	None	Application administrator
User4	None	Cloud application administrator
User5	None	None

Microsoft Store for Business has the following Shopping behavior settings:

- Allow users to shop is set to On.
- Make everyone a Basic Purchaser is set to Off.

You need to identify which users can install apps from the Microsoft for Business private store. Which users should you identify?

- A. user1, User2, User3, User4, and User5
- B. User1 only
- C. User1 and User2 only
- D. User3 and User4 only
- E. User1, User2, User3, and User4 only

Answer: C

Explanation:

Allow users to shop controls the shopping experience in Microsoft Store for Education. When this setting is on, Purchasers and Basic Purchasers can purchase products and services from Microsoft Store for Education.

References:

https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business

NEW QUESTION 173

- (Exam Topic 5)

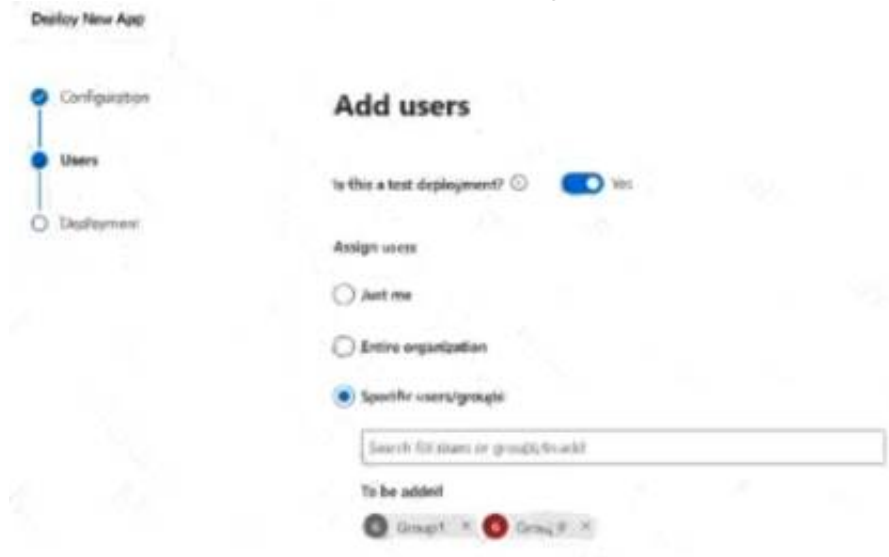

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Helpdesk admin
User2	Global Administrator
User3	None
User4	None
User5	None

The subscription contains the groups shown in the following table.

Name	Type	Members
Group1	Microsoft 365	User2, User3
Group2	Mail-enabled security	User1, Group3
Group3	Distribution list	User4, User5

You deploy an app as shown in the following exhibit

For each of the following statements, select Yes if the statement is true. Otherwise select No.

Statements	Yes	No
User1 can modify the app deployment.	<input type="radio"/>	<input type="radio"/>
User2 will receive the app.	<input type="radio"/>	<input type="radio"/>
User4 will receive the app.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1 can modify the app deployment.	<input type="radio"/>	<input checked="" type="radio"/>
User2 will receive the app.	<input checked="" type="radio"/>	<input type="radio"/>
User4 will receive the app.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 178

- (Exam Topic 5)

Your network contains an Active Directory domain named contoso.com. You have a Microsoft 365 subscription.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You implement directory synchronization.

The developers at your company plan to build an app named App1. App1 will connect to the Microsoft Graph API to provide access to several Microsoft Office 365 services.

You need to provide the URI for the authorization endpoint that App1 must use. What should you provide?

- A. <https://login.microsoftonline.com/>
- B. <https://contoso.com/contoso.onmicrosoft.com/app1>
- C. <https://login.microsoftonline.com/contoso.onmicrosoft.com/>
- D. <https://myapps.microsoft.com>

Answer: C

Explanation:

In a single tenant application, sign-in requests are sent to the tenant's sign-in endpoint. For example, for contoso.onmicrosoft.com the endpoint would be:

<https://login.microsoftonline.com/contoso.onmicrosoft.com>. Requests sent to a tenant's endpoint can sign in users (or guests) in that tenant to applications in that tenant.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/develop/howto-convert-app-to-be-multi-tenant>

NEW QUESTION 181

- (Exam Topic 5)

You are developing a mobile application that will display the current signed-in user's display name and the application settings. The application settings are stored as a Microsoft Graph extension of the user profile.

Users of the application have intermittent network connectivity

You need to retrieve the least amount of data by using a single REST request. The solution must minimize network traffic.

Which URI should you use to retrieve the data?

- A. [https://graph.microsoft.com/v1.0/me?Select=displayName,ids\\$expand=extensions](https://graph.microsoft.com/v1.0/me?Select=displayName,ids$expand=extensions)
- B. <https://graph.microsoft.com/v1.0/me>
- C. [https://graph.microsoft.com/v1.0/me?select=displayName,userType\\$expand=extensions](https://graph.microsoft.com/v1.0/me?select=displayName,userType$expand=extensions)
- D. <https://graph.microsoft.com/v1.0/me?Expand=extensions>

Answer: B

NEW QUESTION 185

- (Exam Topic 5)

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains 10,000 users.

The company has a Microsoft 365 subscription.

You enable Azure Multi-Factor Authentication (MFA) for all the users in contoso.com. You run the following query.

search "SignInLogs" | where ResultDescription == "User did not pass the MFA challenge."

The query returns blank results.

You need to ensure that the query returns the expected results. What should you do?

- A. From the Azure Active Directory admin center, configure the diagnostics settings to archive logs to an Azure Storage account.
- B. From the Security & Compliance admin center, turn on auditing.
- C. From the Security & Compliance admin center, enable Office 365 Analytics.
- D. From the Azure Active Directory admin center, configure the diagnostics settings to send logs to an Azure Log Analytics workplace.

Answer: D

Explanation:

You can now send audit logs to Azure Log Analytics. This gives you much easier reporting on audit events and the ability to perform queries such as the one in this question.

References:

<https://docs.microsoft.com/en-us/azure/active-directory/reports-monitoring/howto-integrate-activity-logs-with-lo>

NEW QUESTION 189

- (Exam Topic 5)

You have a Microsoft 365 Enterprise E5 subscription.

You add a cloud-based app named App1 to the Microsoft Azure Active Directory (Azure AD) enterprise applications list.

You need to ensure that two-step verification is enforced for all user accounts the next time they connect to App1.

Which three settings should you configure from the policy? To answer, select the appropriate settings in the answer area.

Home > Enterprise applications > Conditional access > Policies > New > Users and groups

New

Info

*Name

App1 policy

Assignments

Users and groups

Include Exclude

☐ None
☒ All users
☐ Select users and groups

☐ All guest users
☐ Directory roles
☐ Users and groups

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

In the Cloud Apps section, you need to select the name of the app (App1) that the policy will apply to.

In the Grant section under Access Controls, there is a checkbox named "Require Multi-factor Authentication". That checkbox needs to be ticked.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/best-practices> <https://techcommunity.microsoft.com/t5/Enterprise-Mobility-Security/Conditional-Access-now-in-the-new-Azu>

NEW QUESTION 190

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

You have users in contoso.com as shown in the following table.

Name	Source
User1	Azure Active Directory
User2	Azure Active Directory
User3	Windows Active Directory

The users have the passwords shown in the following table.

Name	Password
User1	Contoso123
User2	N3w3rT0Gue33
User3	ComplexPassword33

You implement password protection as shown in the following exhibit.

Save

X Discard

Custom smart logout

Lockout threshold ⓘ

3

Lockout duration in seconds ⓘ

120

Custom banned passwords

Enforce custom list ⓘ

YesNo

Custom banned password list ⓘ

Contoso

Password protection for Windows Server Active Directory

Enable password protection on Windows Server Active Directory ⓘ

YesNo

Mode ⓘ

EnforcedAudit

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 must change his password at the next sign in.	<input type="radio"/>	<input type="radio"/>
User2 can change his password to C0nt0s0_C0mplex123.	<input type="radio"/>	<input type="radio"/>
User3 can change his password to MyPasswordContoso123.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: No
User1's password contains the banned password 'Contoso'. However, User1 will not be required to change his password at next sign in. When the password expires or when User1 (or an administrator) changes the password, the password will be evaluated and will have to meet the password requirements.

Box 2: Yes
Password evaluation goes through several steps including normalization and Substring matching which is used on the normalized password to check for the user's first and last name as well as the tenant name. Normalization is the process of converting common letter substitutes into letters. For example, 0 converts to o. \$ converts to s. etc.

The next step is to identify all instances of banned passwords in the user's normalized new password. Then: ➤ Each banned password that is found in a user's password is given one point.

➤ Each remaining unique character is given one point.

➤ A password must be at least five (5) points for it to be accepted.

'C0nt0s0' becomes 'contoso' after normalization. Therefore, C0nt0s0_C0mplex123 contains one instance of the banned password (contoso) so that equals 1 point. After 'contoso', there are 11 unique characters. Therefore, the score for 'C0nt0s0_C0mplex123' is 12. This is more than the required 5 points so the password is acceptable. Box 3:

The 'Password protection for Windows Server Active Directory' is in 'Audit' mode. This means that the password protection rules are not applied. Audit mode is for logging policy violations before putting the password protection 'live' by changing the mode to 'enforced'.

Reference:
<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-password-ban-bad>

NEW QUESTION 191

- (Exam Topic 5)
You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. A user named User1 has files on a Windows 10 device as shown in the following table.

Name	Text in file
File1.docx	Importing and exporting is easy. For import, you need a source, and for export, you need a destination
File2.docx	You must declare what you want to import. Dangerous items cannot be imported. If you want to import valuables, you must pay customs.
File3.docx	IM are initials for instant messaging. You can use Microsoft Skype for IM, but there are also other IM programs.

In Azure Information Protection, you create a label named Label1 that is configured to apply automatically. Label1 is configured as shown in the following exhibit.

Condition: Condition1

Default Directory - Azure Information Protection

Save Discard Delete

Choose the type of condition

Information Types

Custom

* Name

Condition1

* Match exact phrase or pattern

im

Match as a regular expression

Off

On

Match with case sensitivity

Off

On

* Maximum number of occurrences

2

Count occurrences with unique value only

Off

On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Label1 applies to File1.docx.	<input type="radio"/>	<input type="radio"/>
Label1 applies to File2.docx.	<input type="radio"/>	<input type="radio"/>
Label1 applies to File3.docx.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The phrase to match is "im" and it is case sensitive. The phrase must also appear at least twice. Box 1: No
 File1.docx contain the word "import" once only Box 2: Yes

File2.docx contains two occurrences of the word "import" as well as the word "imported" Box 3: No

File3.docx contains "IM" but his is not the correct letter case.

<https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-classification>

NEW QUESTION 192

- (Exam Topic 5)

You have an on-premises Microsoft Exchange Server organization that contains 500 mailboxes and a third-party email archive solution.

You have a Microsoft 365 tenant that contains a user named User1.

You plan to use the User1 account to perform a PST import of the archive mailboxes to the tenant. Which two roles does User1 require to perform the import? The solution must use the principle of least privilege. Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Mail Recipients
- B. Exchange admin
- C. Records Management
- D. Mailbox Import Export
- E. eDiscovery Manager

Answer: AD

Explanation:

Reference:

https://docs.microsoft.com/en-us/microsoft-365/compliance/importing-pst-files-to-office-365?view=o365-world

NEW QUESTION 197

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You build a Microsoft Teams app named App1. You need to publish App1 to the app catalog.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create an app package.

Publish the app by using the Microsoft Teams admin center.

Upload the app package by using the Teams App Submission API.

Enable custom app uploading for Microsoft SharePoint Online.

Sideload the app to Microsoft Teams.

Upload the app package to Microsoft AppSource.

NEW QUESTION 199

- (Exam Topic 5)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab. Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username: admin@LODSe426243.onmicrosoft.com Microsoft 365 Password: 3&YWyjse-6-d
 If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
 The following information is for technical support purposes only:
 Lab Instance: 10887751
 You hire a new global administrator named Irvin Sayers to manage your Microsoft 365 tenant.
 You need to modify Irvin Sayers to meet the following requirements:

- Uses at least two methods of user authentication
- Has the highest Microsoft Office 365 administrative privileges

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

You need to assign the Global Admin role to Irvin Sayers. You then need to configure the account to require Multi-Factor Authentication (MFA).

- * 1. In the Microsoft 365 admin center, select Users then select Active Users.
- * 2. Select the Irvin Sayers account to open the account properties blade.
- * 3. In the Roles section, click on the 'Manage roles' link.
- * 4. Select the 'Admin center access' option.
- * 5. Select Global Administrator then click the 'Save changes' button.

The next step is to enable the account for Multi-Factor Authentication (MFA).

- * 1. If the Irvin Sayers account is selected in the user accounts list, deselect it (click on the tick icon next to the account name). Selecting a user account changes the menu options at the top of the page; deselecting the accounts changes the menu options back.
- * 2. Click on the 'Multi-factor authentication' link at the top of the page.
- * 3. In the 'Multi-factor authentication' page, select the Irvin Sayers account.
- * 4. Click the 'Enable' link on the right side of the page.
- * 5. In the pop-up window, click the 'enable multi-factor auth' button.

NEW QUESTION 200

- (Exam Topic 5)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com that contains the users shown in the following table.

Name	Role
User1	Password administrator
User2	Security administrator
User3	User administrator
User4	None

You need to identify which users can perform the following administrative tasks:

- Reset the password of User4.
- Modify the value for the manager attribute of User4.

Which users should you identify for each task? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Reset the password of User4:

▼

User1 only

User2 only

User1 and User2 only

User1 and User3 only

User1, User2, and User3

Modify the value for the manager attribute of User4:

▼

User1 only

User2 only

User3 only

User1 and User3 only

User1, User2, and User3

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1:

A Password Administrator or a User Administrator can reset the password non-administrative users.

Box 2: A User Administrator can configure other attributes such as the Manager attribute of non-administrative users.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles>

NEW QUESTION 204

- (Exam Topic 5)

Your company has 3.000 users all the assigned Microsoft 365 E3 licenses.

Some users are assigned for all Microsoft365 services, Other users are assigned licensees for only certain Microsoft 365 services.

You need to determine whether a user named User1 is licensed for Exchange Online only. Solution: You launch the Microsoft 365 admin center, and then review the Active users blade. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 209

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	Fabrikam.com

The domain syncs to an Azure Active Directory (Azure AD) tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

PROVISION FROM ACTIVE DIRECTORY

Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Enabled

USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com. You need to ensure that User2 can access the resources in Azure AD.

Solution: From the Azure Active Directory admin center, you assign User2 the Security reader role. You instruct User2 to sign in as user2@contoso.com. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

This is not a permissions issue so you do not need to assign the Security Reader role.

The on-premises Active Directory domain is named contoso.com. User2 could sign on as user2@contoso.com but you would first need to change the UPN of User2 to user2@contoso.com.

NEW QUESTION 210

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD) as shown in the following two exhibits.

Microsoft Azure Active Directory Connect

Tasks

Connect to Azure AD

Sync

Connect Directories

Domain/OU Filtering

Optional Features

Azure AD Apps

Azure AD Attributes

Directory Extensions

Configure

Azure AD attributes

These attributes will be exported to Azure AD based on the previously selected application. Remove an individual attribute only if required to meet string organizational security policy.

EXPORTED ATTRIBUTES

- ☒ domainNetBios
- ☒ employeeID
- ☒ extensionAttribute1
- ☐ extensionAttribute10
- ☐ extensionAttribute11
- ☒ extensionAttribute12
- ☒ extensionAttribute13
- ☒ extensionAttribute14
- ☒ extensionAttribute15
- ☒ extensionAttribute2
- ☒ extensionAttribute3
- ☒ extensionAttribute4

☒ I want to further limit the attributes exported to Azure AD. ?

☐ View the list of attribute as comma-separated values

Previous Next

Selected Attributes

- extensionAttribute10 (user) [String]
- extensionAttribute12 (user) [String]

Previous Next

You create a user named User1 in Active Directory as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements

The value of extensionAttribute1 is synchronized to Azure AD.

Yes

☐

No

☐

The value of extensionAttribute10 is synchronized to Azure AD.

☐
☐

The value of extensionAttribute11 is synchronized to Azure AD.

☐
☐

The value of extensionAttribute12 is synchronized to Azure AD.

☐
☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The Azure AD Attributes page shows which attributes will be synchronized based on the Office 365 services you are using (Exchange, SharePoint etc). We can see that ExtensionAttribute10 and ExtensionAttribute11 have been deselected.

The Directory Extensions page shows which additional attributes will be synchronized (additional to the list in the Azure AD Attributes page).

ExtensionAttribute1:

Will be synchronized because it is ticked in the Azure AD Attributes page. ExtensionAttribute10.

Will be synchronized because although it is unticked in the Azure AD Attributes page, it is added again in the Directory Extensions page.

ExtensionAttribute11.

Will not be synchronized because it is unticked in the Azure AD Attributes page and it is not added again in the Directory Extensions page.

ExtensionAttribute12:

Will be synchronized because it is ticked in the Azure AD Attributes page. It is also added again in the Directory Extensions page but this will have no effect as it is already ticked in the Azure AD Attributes page.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-feature-directory-extension> <https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom>

NEW QUESTION 212

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that is linked to an Azure Active Directory (Azure AD) tenant named contoso.com.

You purchase a DNS domain named fabnkam.com.

You need to ensure that Microsoft Exchange Online users can receive emails sent to the fabrikam.com domain.

What should you use?

- A. the Microsoft 365 admin center

- B. the Microsoft Endpoint Manager admin center
- C. the Microsoft 365 compliance center
- D. the Exchange admin center

Answer: A

NEW QUESTION 217

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named adatum.com that syncs to Azure Active Directory (Azure AD) by using the Azure AD Connect Express Settings. Password writeback is disabled.

You create a user named User1 and enter Pass in the Password field as shown in the following exhibit.

New Object - User

Create in: Adatum.com/

Password:

Confirm password:

< Back

Next >

Cancel

The Azure AD password policy is configured as shown in the following exhibit.

Statements	Yes	No
User1 can sign in to Azure AD.	<input type="radio"/>	<input type="radio"/>
User1 can change the password immediately by using the My Apps portal.	<input type="radio"/>	<input type="radio"/>
From Azure AD, User1 must change the password every 90 days.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

The question states that User1 is synced to Azure AD. This tells us that the short password (Pass) meets the on-premise Active Directory password policy and you were able to create the on-premise account for User1. The on-premise Active Directory password policy applies over the Azure AD password policy for synced user accounts.

Box 2: No

Self-Service Password Reset would need to be configured. Box 3: Yes

The password for the Azure AD User1 account will expire after 90 days according to the Azure AD password policy. If the on-premise password policy has a shorter password expiration period, User1 would have the change his/her on-premise AD password. The new password would then sync to Azure AD.

NEW QUESTION 218

- (Exam Topic 5)

Your company has a Microsoft Office 365 subscription that contains the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User3

You have the licenses shown in the following table.

License	Included service	Assigned to
Microsoft 365	Microsoft Exchange Online	Group1
Microsoft 365	Microsoft SharePoint Online	User1, User2, User3

Another administrator removes User1 from Group1 and adds Group2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 is licensed for SharePoint Online.	<input type="radio"/>	<input type="radio"/>
User2 is licensed for SharePoint Online.	<input type="radio"/>	<input type="radio"/>
User3 is licensed for SharePoint Online.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

User1, User2 and User3 have each been assigned a SharePoint license directly. Therefore, they are all licensed for SharePoint Online.

Changing the group memberships will only affect whether or not they are licensed for Exchange Online because the Exchange Online licenses are assigned to Group1.

<https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/active-directory-licensing-what-is-azure-po>

NEW QUESTION 221

- (Exam Topic 5)

Your company uses email, calendar, contact, and task services in Microsoft Outlook.com.

You purchase a Microsoft 365 subscription and plan to migrate all users from Outlook.com to Microsoft 365. You need to identify which user data can be migrated to Microsoft 365.

Which type of data should you identify?

- A. task
- B. email
- C. calendar
- D. contacts

Answer: B

Explanation:

You can use the Internet Message Access Protocol (IMAP) to migrate user email from Gmail, Exchange, Outlook.com, and other email systems that support IMAP migration. When you migrate the user's email by

using IMAP migration, only the items in the users' inbox or other mail folders are migrated. Contacts, calendar items, and tasks can't be migrated with IMAP, but they can be by a user.

Reference:

<https://docs.microsoft.com/en-us/exchange/mailbox-migration/mailbox-migration#migrate-email-from-anotheri>

NEW QUESTION 224

- (Exam Topic 4)

You need to recommend the development environment and tools for the development of SalesApp. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Development model:

IDE:

Front-end framework:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Office Add-ins

Scenario: SalesApp must be integrated with Microsoft Word and must combine images and text from multiple sources to create a quotation as a DOCX file.

You can use the Office Add-ins platform to build solutions that extend Office applications and interact with content in Office documents.

Box 2: Microsoft Visual Studio

Visual Studio can be used to create Office Add-ins for Excel, Outlook, Word, and PowerPoint. An Office Add-in project gets created as part of a Visual Studio solution and uses HTML, CSS, and JavaScript.

Box 3: Fluent UI

Fluent UI is the upcoming and continually evolving design system for Microsoft 365. Currently, there is an ongoing merge in the process to have one consistent UI Framework across the Microsoft ecosystem.

<https://docs.microsoft.com/en-us/office/dev/add-ins/overview/office-add-ins>

<https://n8d.at/5-reasons-or-thoughts-on-fluent-ui-web>

NEW QUESTION 227

- (Exam Topic 3)

You need to configure Azure AD Connect to support the planned changes for the Montreal Users and Seattle Use's OUs. What should you do?

- A. From PowerShell, run The Add-ADSyncConnectorAttributeInclusion cmdlet.
- B. From the Microsoft Azure Active Directory Connect wizard, select Customize synchronization options.
- C. From PowerShell, run the start-ADSyncSyncCycle cmdlet.
- D. From the Microsoft Azure Active Directory Connect wizard, select Manage federation.

Answer: D

NEW QUESTION 228

- (Exam Topic 3)

You need to configure just in time access to meet the technical requirements. What should you use?

- A. access reviews
- B. entitlement management
- C. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- D. Azure Active Directory (Azure AD) Identity Protection

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure> joergsi 5 months, 1 week ago

Privileged access management

The effectiveness of an information protection strategy depends on how secure the administrative accounts used to manage that strategy are. If accounts that can be used to configure and manage an information protection strategy are not properly secured, then the information protection strategy itself can be easily compromised.

Privileged access management enables you to configure policies that apply

=> just-in-time administrative principles to sensitive administrative roles.

For example, if someone needs temporary access to configure an information protection policy, that person would need to go through an approval process to obtain the necessary set of rights instead of having an Azure Active Directory (Azure AD) account with those rights permanently assigned.

NEW QUESTION 231

- (Exam Topic 3)

You need to ensure that Admin4 can use SSPR.

Which tool should you use, and which action should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Action:

▼

Enable app registrations.

Enable password writeback.

able password hash synchronization

Disable password hash synchronization

Tool:

▼

Azure AD Connect

Synchronization Rules Editor

Azure Active Directory admin center

- A. Mastered
 B. Not Mastered

Answer: A

NEW QUESTION 232

- (Exam Topic 3)

You are evaluating the use of multi-factor authentication (MFA).

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Users will have 14 days to register for MFA after they sign in for the first time.	<input type="radio"/>	<input type="radio"/>
Users must use the Microsoft Authenticator app to complete MFA.	<input type="radio"/>	<input type="radio"/>
After registering, users must use MFA for every sign-in.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

Reference:

NEW QUESTION 237

- (Exam Topic 2)

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest. You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

* Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.

* User passwords must be 10 characters or more.

Solution: Implement pass-through authentication and modify the password settings from the Default Domain Policy in Active Directory.

Does this meet the goal?

- A. Yes
 B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-password-hash-synchronization>

NEW QUESTION 242

- (Exam Topic 2)

Which migration solution should you recommend for Project1?

- A. From the Microsoft 365 admin center, start a data migration and click Exchange as the data service.
- B. From the Exchange admin center, start a migration and select Cutover migration.
- C. From the Exchange admin center, start a migration and select Staged migration.
- D. From the Microsoft 365 admin center, start a data migration and click Upload PST as the data service.

Answer: A

Explanation:

Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365. Fabrikam does NOT plan to implement identity federation.

All users must be able to exchange email messages successfully during Project1 by using their current email address.

During Project1, some users will have mailboxes in Microsoft 365 and some users will have mailboxes in Exchange on-premises. To enable users to be able to exchange email messages successfully during Project1 by using their current email address, we'll need to configure hybrid Exchange.

A new way to migrate mailboxes in a hybrid Exchange configuration is to use the Microsoft 365 data migration service. The data migration service can migrate Exchange, SharePoint and OneDrive. Therefore, we need to start a data migration and click Exchange as the service to be migrated.

Reference:

<https://docs.microsoft.com/en-us/fasttrack/O365-data-migration> <https://docs.microsoft.com/en-us/exchange/hybrid-deployment/move-mailboxes>

NEW QUESTION 246

- (Exam Topic 2)

You need to meet the application requirement for App1.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From the Azure Active Directory admin center, configure the application URL settings.
- B. From the Azure Active Directory admin center, add an enterprise application.
- C. On an on-premises server, download and install the Microsoft AAD Application Proxy connector.
- D. On an on-premises server, install the Hybrid Configuration wizard.
- E. From the Microsoft 365 admin center, configure the Software download settings.

Answer: ABC

Explanation:

➤ An on-premises web application named App1 must allow users to complete their expense reports online. Application Proxy is a feature of Azure AD that enables users to access on-premises web applications from a remote client. Application Proxy includes both the Application Proxy service which runs in the cloud, and the Application Proxy connector which runs on an on-premises server. Azure AD, the Application Proxy service, and the Application Proxy connector work together to securely pass the user sign-on token from Azure AD to the web application.

In this question, we need to add an enterprise application in Azure and configure a Microsoft AAD Application Proxy connector to connect to the on-premises web application (App1).

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy#how-application-proxy>

NEW QUESTION 249

- (Exam Topic 2)

You need to ensure that all the sales department users can authenticate successfully during Project1 and Project2.

Which authentication strategy should you implement for the pilot projects?

- A. password hash synchronization and seamless SSO
- B. pass-through authentication
- C. password hash synchronization
- D. pass-through authentication and seamless SSO

Answer: A

Explanation:

➤ Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.

➤ Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.

➤ After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.

➤ Fabrikam does NOT plan to implement identity federation.

➤ After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.

You need to enable password hash synchronization to enable the users to continue to authenticate to their mailbox and to SharePoint sites by using their UPN.

You need to enable SSO to enable all users to be signed in to on-premises and cloud-based applications automatically.
