Exam Questions PMI-RMP

PMI Risk Management Professional

NEW QUESTION 1

Ned is the project manager of the HNN project for your company. Ned has asked you to help him complete some probability distributions for his project. What portion of the project will you most likely use for probability distributions?

- A. Bias towards risk in new resources
- B. Risk probability and impact matrixes
- C. Risk identification
- D. Uncertainty in values such as duration of schedule activities

Answer: D

NEW QUESTION 2

You and your project team are identifying the risks that may exist within your project. Some of the risks are small risks that won't affect your project much if they happen. What should you do with these identified risk events?

- A. All risks must have a valid, documented risk response.
- B. These risks can be accepted.
- C. These risks can be added to a low priority risk watch list.
- D. These risks can be dismissed.

Answer: C

NEW QUESTION 3

Nancy is the project manager of a project with 78 stakeholders. This is a high-profile project and she needs to express to her project team and to the management the importance of communication in this project. She would like to show the number of stakeholder communication channels in the project. Based on this information how many communication channels exist within this project?

- A. 156
- B. 3,003
- C. 78
- D. 6,084

Answer: B

NEW QUESTION 4

Your organization has a project that is expected to last 20 months but the customer would really like the project completed in 18 months. You have worked on similar projects in the past and believe that you could fast track the project and reach the 18 month deadline. What increases when you fast track a project?

- A. Resources
- B. Costs
- C. Communication
- D. Risks

Answer: D

NEW QUESTION 5

Ben is the project manager of the YHT Project for his company. Alice, one of his team members, is confused about when project risks will happen in the project. Which one of the following statements is the most accurate about when project risk happens?

- A. Project risk can happen at any moment.
- B. Project risk happens throughout the project execution.
- C. Project risk is always in the future.
- D. Project risk is uncertain, so no one can predict when the event will happen.

Answer: C

NEW QUESTION 6

You are the project manager of the GHE Project. You have identified the following risks with the characteristics as shown in the following figure: How much capital should the project set aside for the risk contingency reserve?

- A. \$142,000
- B. \$41,750
- C. \$23,750
- D. \$232,000

Answer: C

NEW QUESTION 7

Courtney is the project manager for her organization. She is working with the project team to complete the qualitative risk analysis for her project. During the analysis Courtney encourages the project team to begin the grouping of identified risks by common causes. What is the primary advantage to group risks by common causes during qualitative risk analysis?

- A. It helps the project team realize the areas of the project most laden with risks.
- B. It saves time by collecting the related resources, such as project team members, to analyze the risk events.
- C. It can lead to developing effective risk responses.

D. It can lead to the creation of risk categories unique to each project.

Answer: C

NEW QUESTION 8

In what portion of a project are risk and opportunities greatest and require intense planning and anticipation of risk events?

- A. Closing
- B. Planning
- C. Initiating
- D. Executing

Answer: C

NEW QUESTION 9

You are the project manager of the BJA Project for your company. Management is worried about one of the identified risks in your project. The risk event has a probability of 90 percent and a cost impact of \$85,000. Management and you discuss possible solutions to address the risk. You share with them that for \$75,000 you can reduce the probability of the risk event to 15 percent and the impact to \$25,000. This solution will add three weeks to the project schedule. Management thinks this is a good idea and they would like you to add the time and cost additions to your project plan. What type of risk response is used?

- A. Avoidance
- B. Acceptance
- C. Exploit
- D. Mitigation

Answer: D

NEW QUESTION 10

You are the project manager for your organization and you are working with Thomas, a project team member. You and Thomas have been working on a specific risk response for a probable risk event in the project. Thomas is empowered with a risk response and will control all aspects of the identified risk response in which a particular risk event will happen within the project. What title, in regard to risk, is bestowed on Thomas?

- A. Risk expeditor
- B. Risk owner
- C. Risk team leader
- D. Risk coordinator

Answer: B

NEW QUESTION 10

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

Answer: A

NEW QUESTION 15

Harry works as a project manager for the NHQ Project. He is performing quantitative risk analysis for his project. One of the project risks has a 40 percent probability of happening, and it will cost the project \$65,000 if the risk happens. What is the expected monetary value of this risk event?

- A. Negative \$26,000
- B. Negative \$67,000
- C. Zero - the risk event has not yet occurred
- D. \$27,000

Answer: A

NEW QUESTION 20

You work as a project manager for BlueWell Inc. Your project is running late and you must respond to the risk. Which risk response can you choose that will also cause you to update the human resource management plan?

- A. Teaming agreements
- B. Transference
- C. Crashing the project
- D. Fast tracking the project

Answer: C

NEW QUESTION 23

You work as the project manager for Bluewell Inc. You are working on NGQQ Project you're your company. You have completed the risk analysis processes for the risk events. You and the project team have created risk responses for most of the identified project risks. Which of the following risk response planning techniques will you use to shift the impact of a threat to a third party, together with the responses?

- A. Risk acceptance
- B. Risk avoidance
- C. Risk transference
- D. Risk mitigation

Answer: C

NEW QUESTION 25

David is the project manager of the NKL Project for his organization. He has been asked to create a proposal for a construction project for a client. David realizes that there are several requirements within the SOW and RFP provided by the client that would eliminate his company from bidding on the construction project. David proposed to management that his organization create a partnership with a competitor so that together they could bid on the construction project and qualify for the customer's requirements. What risk response is David proposing to management?

- A. Exploiting
- B. Teaming agreement
- C. Transference
- D. Sharing

Answer: D

NEW QUESTION 27

You are the project manager for your organization. You are preparing for the quantitative risk analysis. Mark, a project team member, wants to know why you need to do quantitative risk analysis when you just completed qualitative risk analysis. Which one of the following statements best defines what quantitative risk analysis is?

- A. Quantitative risk analysis is the process of numerically analyzing the effect of identified risks on overall project objectives.
- B. Quantitative risk analysis is the planning and quantification of risk responses based on probability and impact of each risk event.
- C. Quantitative risk analysis is the review of the risk events with the high probability and the highest impact on the project objectives.
- D. Quantitative risk analysis is the process of prioritizing risks for further analysis or action by assessing and combining their probability of occurrence and impact.

Answer: A

NEW QUESTION 31

You are the project manager of the GHY Project for your company. You have completed the risk response planning with your project team. You now need to update the WBS. Why would the project manager need to update the WBS after the risk response planning process? Choose the best answer.

- A. Because of work that was omitted during the WBS creation
- B. Because of new work generated by the risk responses
- C. Because of risk responses that are now activities
- D. Because of risks associated with work packages

Answer: B

NEW QUESTION 34

You work as a project manager for BlueWell Inc. You are preparing to plan risk responses for your project with your team. How many risk response types are available for a negative risk event in the project?

- A. Four
- B. One
- C. Three
- D. Seven

Answer: A

NEW QUESTION 35

Melody is the project manager for her organization. She has created a risk response to conduct more tests on the software her project is creating. The identified risk that prompted this response was that the software is mission-critical and must be flawless before it can be put into product. What type of a risk response has Melody used in this scenario?

- A. Mitigation
- B. Enhance
- C. Transference
- D. Avoidance

Answer: A

NEW QUESTION 36

The Project Risk Management knowledge area focuses on which of the following processes? Each correct answer represents a complete solution. Choose all that apply.

- A. Quantitative Risk Analysis
- B. Risk Monitoring and Control
- C. Potential Risk Monitoring

D. Risk Management Planning

Answer: ABD

NEW QUESTION 38

Rex is the project manager of the BDF Project. This project will last for two years and has a budget of \$2,345,000. Management has instructed Rex that the project must not go over budget as funds are very tight in the organization. During the project planning Rex and the project team discover a positive risk event to save \$75,000. Rex wants to make certain that this risk event happens so which risk response method is most appropriate?

- A. Share
- B. Mitigation
- C. Exploit
- D. Enhance

Answer: C

NEW QUESTION 41

You and your project team have identified the project risks and now are analyzing the probability and impact of the risks. What type of analysis of the risks provides a quick and high-level review of each identified risk event?

- A. A risk probability-impact matrix
- B. Quantitative risk analysis
- C. Seven risk responses
- D. Qualitative risk analysis

Answer: D

NEW QUESTION 43

You are project manager for ABD project. You, with your team, are working on the following activities:

Probabilistic analysis of a project.

Probability of achieving cost and time objectives. Trends in Qualitative Risk Analysis results.

On which of the following processes are you working on?

- A. Plan Risk Management
- B. Perform Quantitative Risk Analysis
- C. Perform Qualitative Risk Analysis
- D. Identify Risks

Answer: B

NEW QUESTION 44

Rachel is the project manager of the KJH Project for her company. She needs a method to create a quick and simple approach to risk identification to communicate the project risk with the stakeholders. Which one of the following approaches to risk identification should Rachel choose to provide a quick and simple listing of the project risks?

- A. Delphi Technique
- B. Checklist analysis
- C. Assumptions analysis
- D. Brainstorming

Answer: B

NEW QUESTION 49

You are the project manager of the GGG project. You have completed the risk identification process for the initial phases of your project. As you begin to document the risk events in the risk register what additional information can you associate with the identified risk events?

- A. Risk potential responses
- B. Risk schedule
- C. Risk owner
- D. Risk cost

Answer: A

NEW QUESTION 53

Thomas is a key stakeholder in your project. Thomas has requested several changes to the project scope for the project you are managing. Upon review of the proposed changes, you have discovered that these new requirements are laden with risks and you recommend to the change control board that the changes be excluded from the project scope. The change control board agrees with you. What component of the change control system communicates the approval or denial of a proposed change request?

- A. Configuration management system
- B. Scope change control system
- C. Integrated change control
- D. Change log

Answer: C

NEW QUESTION 54

You work as a project manager for BlueWell Inc. You are preparing for the risk identification process. You will need to involve several of the project's key stakeholders to help you identify and communicate the identified risk events. You will also need several documents to help you and the stakeholders identify the risk events. Which one of the following is NOT a document that will help you identify and communicate risks within the project?

- A. Risk register
- B. Activity cost estimates
- C. Stakeholder register
- D. Activity duration estimates

Answer: A

NEW QUESTION 57

You work as a project manager for TechSoft Inc. You are preparing to plan risk responses for your project with your project team. How many risk responses are available for a positive risk event in the project?

- A. Three
- B. Four
- C. Seven
- D. One

Answer: B

NEW QUESTION 60

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Harry is correct, because the risk probability and impact considers all objectives of the project.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because organizations can create risk scores for each objective of the project.
- D. Sammy is correct, because she is the project manager.

Answer: C

NEW QUESTION 62

Harry is a project manager of a software development project. In the early stages of planning, he and the stakeholders operated with the belief that the software they were developing would work with their organization's current computer operating system. Now that the project team has started developing the software it has become apparent that the software will not work with nearly half of the organization's computer operating systems. The incorrect belief Harry had in the software compatibility is an example of what in project management?

- A. Issue
- B. Assumption
- C. Risk
- D. Constraint

Answer: B

NEW QUESTION 67

Harry is the project manager of the MMQ Construction Project. In this project, Harry has identified a supplier who can create stained glass windows for 1,000 window units in the construction project. The supplier is an artist who works by himself, but creates windows for several companies throughout the United States. Management reviews the proposal to use this supplier and while they agree that the supplier is talented, they do not think the artist can fulfill the 1,000 window units in time for the project's deadline. Management asked Harry to find a supplier who can fulfill the completion of the windows by the needed date in the schedule. What risk response has management asked Harry to implement?

- A. Mitigation
- B. Acceptance
- C. Avoidance
- D. Transference

Answer: A

NEW QUESTION 72

Which of the following risk responses delineates that the project plan will not be changed to deal with the risk?

- A. Exploitation
- B. Transference
- C. Acceptance
- D. Mitigation

Answer: C

NEW QUESTION 73

Shelly is the project manager of the BUF project for her company. In this project Shelly needs to establish some rules to reduce the influence of risk bias during the qualitative risk analysis process. What method can Shelly take to best reduce the influence of risk bias?

- A. Group stakeholders according to positive and negative stakeholders and then complete the risk analysis
- B. Determine the risk root cause rather than the person identifying the risk events
- C. Establish risk boundaries
- D. Establish definitions of the level of probability and impact of risk event

Answer: D

NEW QUESTION 78

Examine the figure given below.

What will be the expected monetary value of Risk C?

- A. -\$113,750
- B. \$175,000 if the risk event actually happens
- C. -\$175,000
- D. -\$27,000

Answer: D

NEW QUESTION 80

Your project spans the entire organization. You would like to assess the risk of the project but are worried that some of the managers involved in the project could affect the outcome of any risk identification meeting. Your worry is based on the fact that some employees would not want to publicly identify risk events that could make their supervisors look bad. You would like a method that would allow participants to anonymously identify risk events. What risk identification method could you use?

- A. Delphi technique
- B. Isolated pilot groups
- C. SWOT analysis
- D. Root cause analysis

Answer: A

NEW QUESTION 84

Which of the following techniques examines the degree to which organizational strengths offset threats and opportunities that may serve to overcome weaknesses?

- A. SWOT Analysis
- B. Expert Judgment
- C. Delphi
- D. Brainstorming

Answer: A

NEW QUESTION 87

You are the project manager of the HJU project for your company. This project will last for 18 months and has a project budget of \$567,000. Robert, one of your stakeholders, has introduced a scope change request that will likely have an impact on the project costs and schedule. Robert assures you that he will pay for the extra time and costs associated with the risk event. You tell Robert that the change request may affect more areas of the project than just time and cost and that you are worried about the additional risks the change request will bring. What project management component is responsible for evaluating a change request and its impact on all of the project management knowledge areas?

- A. Project change control system
- B. Integrated change control
- C. Risk analysis
- D. Configuration management

Answer: B

NEW QUESTION 89

Harry works as a project manager for BlueWell Inc. He is determining how to conduct the risk management activities for a project. According to the PMBOK, there are six inputs to the plan risk management process. Which one of the following is NOT an input to this process?

- A. Project scope statement
- B. Risk management plan
- C. Schedule management plan
- D. Cost management plan

Answer: B

NEW QUESTION 91

You and your project team are just starting the risk identification activities for a project that is scheduled to last for 18 months. Your project team has already identified a long list of risks that need to be analyzed. How often should you and the project team do risk identification?

- A. It depends on how many risks are initially identified.
- B. At least once per month
- C. Identify risks is an iterative process.
- D. Several times until the project moves into execution

Answer: C

NEW QUESTION 95

You are the project manager of the HJH project for your company. In your project, you have created the probability-impact risk matrix as shown in the following figure:

If Risk D happens in this project, how much will be left in the contingency reserve?

- A. \$440,000
- B. \$233,500
- C. \$258,500
- D. \$243,500

Answer: B

NEW QUESTION 100

Your project team has identified a project risk that must be responded to. The risk has been recorded in the risk register and the project team has been discussing potential risk responses for the risk event. The event is not likely to happen for several months but the probability of the event is high. Which one of the following is a valid response to the identified risk event?

- A. Corrective action
- B. Risk audit
- C. Technical performance measurement
- D. Earned value management

Answer: A

NEW QUESTION 101

Your project is an agricultural-based project that deals with plant irrigation systems. You have discovered a byproduct in your project that your organization could use to make a profit. If your organization seizes this opportunity it would be an example of what risk response?

- A. Enhancing
- B. Opportunistic
- C. Positive
- D. Exploiting

Answer: D

NEW QUESTION 102

You work as a project manager for BlueWell Inc. Your project is using a new material to construct a large warehouse in your city. This new material is cheaper than traditional building materials, but it takes some time to learn how to use the material properly. You have communicated to the project stakeholders that you will be able to save costs by using the new material, but you will need a few extra weeks to complete training to use the materials. This risk response of learning how to use the new materials can also be known as what term?

- A. Team development
- B. Benchmarking
- C. Cost of conformance to quality
- D. Cost-benefits analysis

Answer: C

NEW QUESTION 106

Ben works as a project manager for the MJH Project. In this project, Ben is preparing to identify stakeholders so he can communicate project requirements, status, and risks. Ben has elected to use a salience model as part of his stakeholder identification process. Which of the following activities best describes a salience model?

- A. Influence/impact grid, grouping the stakeholders based on their active involvement ("influence") in the project and their ability to affect changes to the project's planning or execution ("impact").
- B. Grouping the stakeholders based on their level of authority ("power") and their active involvement ("influence") in the project.
- C. Grouping the stakeholders based on their level of authority ("power") and their level or concern ("interest") regarding the project outcomes.
- D. Describing classes of stakeholders based on their power (ability to impose their will), urgency (need for immediate attention), and legitimacy (their involvement is appropriate).

Answer: D

NEW QUESTION 109

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

Answer: D

NEW QUESTION 110

You are the project manager of the NHH project for your company. You have completed the first round of risk management planning and have created four outputs of the risk response planning process. Which one of the following is NOT an output of the risk response planning?

- A. Risk register updates
- B. Organizational process assets updates
- C. Project document updates
- D. Risk-related contract decisions

Answer: B

NEW QUESTION 114

You are the project manager of the NNH project. In this project you have created a contingency response that the cost performance index should be less than 0.93. The NHH project has a budget at completion of \$945,000 and is 45 percent complete - though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's cost performance index?

- A. 1.06
- B. 0.92
- C. -\$30,647
- D. 0.93

Answer: D

NEW QUESTION 115

You are the project manager of the GGH Project in your company. Your company is structured as a functional organization and you report to the functional manager that you are ready to move onto the quantitative risk analysis process. What things will you need as inputs for the quantitative risk analysis of the project in this scenario?

- A. You will need the risk register, risk management plan, permission from the functional manager, and any relevant organizational process assets.
- B. You will need the risk register, risk management plan, cost management plan, schedule management plan, and any relevant organizational process assets.
- C. You will need the risk register, risk management plan, outputs of qualitative risk analysis, and any relevant organizational process assets.
- D. Quantitative risk analysis does not happen through the project manager in a functional structure.

Answer: B

NEW QUESTION 118

You are the project manager for the ABC organization. Your current project has 75 internal stakeholders and 245 external stakeholders. Many of the risks within your project will only affect the internal stakeholders, but several of the identified risk events will affect the external stakeholders. Management would like to know the total number of communication channels in the project. How many communication channels exist in this project?

- A. 245
- B. 51,040
- C. 102,080
- D. 320

Answer: B

NEW QUESTION 121

You work as the project manager for Bluewell Inc. Your project has several risks that will affect several stakeholder requirements. Which project management plan will define who will be available to share information on the project risks?

- A. Risk Management Plan
- B. Stakeholder management strategy
- C. Resource Management Plan
- D. Communications Management Plan

Answer: D

NEW QUESTION 123

You are the project manager of the NHQ Project for your company. You have completed qualitative and quantitative analysis of your identified project risks and you would now like to find an approach to increase project opportunities and to reduce threats within the project. What project management process would best help you?

- A. Monitor and control project risks
- B. Create a risk governance approach
- C. Create the project risk register
- D. Plan risk responses

Answer: D

NEW QUESTION 128

You are the project manager of the GYH project for your organization. Management has asked you to begin identifying risks and to use an information gathering technique. Which one of the following risk identification approaches is an information gathering technique?

- A. Root cause analysis
- B. Assumptions analysis
- C. SWOT analysis
- D. Documentation reviews

Answer: A

NEW QUESTION 133

Ted is the project manager of the HRR project for his company. Management has asked that Ted periodically reviews the contingency reserve as risk events happen, pass, or are still pending. What is the purpose of reviewing the contingency reserve?

- A. It helps to evaluate if the remaining reserve is adequate for the risk exposure.
- B. It helps to determine how much more funds will need to be invested in the project.
- C. It helps to evaluate secondary and residual risks related to the risk responses and their costs.
- D. It helps to determine the probability and impact of project risks.

Answer: A

NEW QUESTION 138

Mary is a project manager in her organization. On her current project she is working with her project team and other key stakeholders to identify the risks within the project. She is currently aiming to create a comprehensive list of project risks so she is using a facilitator to help generate ideas about project risks. What risk identification method is Mary likely using?

- A. Brainstorming
- B. Delphi Techniques
- C. Checklist analysis
- D. Expert judgment

Answer: A

NEW QUESTION 143

John is the project manager of the NHQ Project for his company. His project has 75 stakeholders, some of which are external to the organization. John needs to make certain that he communicates about risk in the most appropriate method for the external stakeholders. Which project management plan will be the best guide for John to communicate to the external stakeholders?

- A. Risk Response Plan
- B. Risk Management Plan
- C. Communications Management Plan
- D. Project Management Plan

Answer: C

NEW QUESTION 147

Gary is the project manager for his project. He and the project team have completed the qualitative risk analysis process and are about to enter the quantitative risk analysis process when Mary, the project sponsor, wants to know what quantitative risk analysis will review. Which of the following statements best defines what quantitative risk analysis will review?

- A. The quantitative risk analysis process will review risk events for their probability and impact on the project objectives.
- B. The quantitative risk analysis seeks to determine the true cost of each identified risk event and the probability of each risk event to determine the risk exposure.
- C. The quantitative risk analysis process will analyze the effect of risk events that may substantially impact the project's competing demands.
- D. The quantitative risk analysis reviews the results of risk identification and prepares the project for risk response management.

Answer: C

NEW QUESTION 149

Mark works as a project manager for TechSoft Inc. Mark, the project team, and the key project stakeholders have completed a round of qualitative risk analysis. He needs to update the risk register with his findings so that he can communicate the risk results to the project stakeholders – including management. Mark will need to update all of the following information except for which one?

- A. Prioritized list of quantified risks
- B. Watchlist of low-priority risks
- C. Trends in qualitative risk analysis
- D. Risks grouped by categories

Answer: A

NEW QUESTION 150

Marsha is the project manager of the NHQ Project. There's a risk that her project team has identified, which could cause the project to be late by more than a month. Marsha does not want this risk event to happen so she devises extra project activities to ensure that the risk event will not happen. The extra steps, however, will cost the project an additional \$10,000. What type of risk response is this approach?

- A. Enhancing
- B. Exploiting
- C. Mitigation
- D. Transference

Answer: C

NEW QUESTION 154

Tom works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the likely cost to complete the scheduled activities?

- A. Activity cost estimates
- B. Cost management plan

- C. Activity duration estimates
- D. Risk management plan

Answer: A

NEW QUESTION 155

Joan is the project manager of the KYU project for her company. She is working with management on defining a contingency reserve for her project. Currently the project is scheduled to last 18 months and it has a cost budget of \$2.5 million. What two areas of the project can the contingency reserve address in regard to risk management?

- A. Quality and costs
- B. Cost and resource management
- C. Risk and project planning
- D. Costs and schedule

Answer: D

NEW QUESTION 158

Frank is the project manager of the NHL Project for his company and he is starting the risk identification process for the project. Frank needs to ensure that the correct stakeholders are interviewed as part of risk identification. What document will help Frank to communicate and solicit inputs of the project stakeholders during risk identification?

- A. Project charter
- B. Risk register
- C. Requirements management plan
- D. Stakeholder register

Answer: D

NEW QUESTION 163

Fill in the blank with an appropriate phrase. The _____ is the risk or danger of an action or an event, a method or a (technical) process that still conceives these dangers even if all theoretically possible safety measures would be applied.

- A. residual risk

Answer: A

NEW QUESTION 166

You are the project manager for the NHQ Project. This project requires that you install 140 copies of design software onto your department's computers. The vendor offers you a twenty percent discount on the software if your company will purchase 150 or more copies of the software. You communicate this offer with other departments in your firm to see if anyone else would need 10 copies of the software to save your project a significant amount of funds. What is this risk response called?

- A. Exploiting
- B. Avoidance
- C. Sharing
- D. Transference

Answer: C

NEW QUESTION 170

Della works as a project manager for SoftTech Inc. She is working with the project stakeholders to begin the quantitative risk analysis process. Which of the following inputs will be needed for the quantitative risk analysis process in her project? Each correct answer represents a complete solution. Choose all that apply.

- A. Risk management plan
- B. Project scope statement
- C. Risk register
- D. Cost management plan

Answer: ACD

NEW QUESTION 175

Mark is the project manager of the BFL project for his organization. He and the project team are creating a probability and impact matrix using RAG rating. There is some confusion and disagreement among the project team as to how a certain risk is important and priority for attention should be managed. Where can Mark determine the priority of a risk given its probability and impact?

- A. Risk management plan
- B. Project sponsor
- C. Risk response plan
- D. Look-up table

Answer: D

NEW QUESTION 178

You are the project manager for BlueWell Inc. You are reviewing the risk register for your project. The risk register provides much information to you, the project

manager and to the project team during the risk response planning. All of the following are included in the risk register except for which item?

- A. Network diagram analysis of critical path activities
- B. Symptoms and warning signs of risks
- C. List of potential risk responses
- D. Trends in qualitative risk analysis results

Answer: A

NEW QUESTION 181
